After H.M. Government's plan of June 3 of 1947, storm clouds were gathering over the Princes' Chamber. The schism between the two schools of thought among the Princes widened as to their place in the future political set-up of India. The crisis was precipitated by the resignation of the Nawab of Bhopal of the Chancellorship of the Chamber. The first impact of the plan found the Chamber of Princes disintegrating. The Standing Committee of the Princes, under the Chairmanship of the Maharaja of Patiala (who, as pro-Chancellor, was acting as Chancellor) passed a resolution recommending to the Crown representative to wind up the Chamber of Princes.

The reaction of the Standing Committee of the All-India States' People's Conference to H.M. Government's statement was contained in a resolution declaring that "on the lapse of Paramountcy sovereignty resided in the peoples of the States and the Princes could only be constitutional rulers embodying the people's sovereignty... any ruler declaring his State independent will thereby express his hostility not only to the Indian Union but to his own people. Such an act will have to be resisted." Later a directive to the people of the States to be vigilant and be prepared for contingencies as certain States were increasing their forces was contained in a resolution adopted by the Standing Committee.

INSTRUMENT OF ACCESSION

According to the Draft Instrument of Accession circulated among the rulers at the end of July, the States which would be acceding to the Indian Dominion would not be committing themselves in any way to acceptance of any future constitution of India or fettering their discretion to enter into agreement with the Government of India under any such future constitution. Further, the terms of the Instrument of Accession should not be varied by an amendment of the Indian Independence Act of 1947 unless such amendment was accepted by the ruler concerned by a supplementary Instrument of Accession.

The schedule attached to the Instrument of Accession covered matters with respect to which the Dominion Legislature might make laws in the acceding States. They included defence, foreign affairs and communications as main subjects and other ancillary subjects.

This was soon followed by a Princes' Conference with the Viceroy at which the latter strongly advised the Indian States to join one or the other Dominion by August 15.

STATEMENT SHOWING AREA AND POPULATION OF STATES THAT HAVE MERGED WITH PROVINCES OF INDIA

| Date of merger | Names of States | No. of States | Province with which merged | Area in sq. miles | Population in lakhs | Revenue in lakhs |

* The original Rajasthan State was formed on April 18, 1948; Jodhpur, Jaipur, Bikaner and Jaisalmer joined it, on April 7, 1949; the Matsya States of Alwar, Bharatpur, Dholpur and Karauli were integrated with it on May 15, 1949.

THE UNITED STATE OF MADHYA BHARAT

THE constitution of the United State of Gwalior, Indore & Malwa (Madhya Bharat) after the attainment of freedom by India was one of the notable events in the integration of Indian States into the body politic of India. Till the formation of Greater Rajasthan, Madhya Bharat was the biggest of the Unions of Indian States. Madhya Bharat is also notable in that for the first time two viable units (Gwalior and Indore) merged their identity along with 23 other States.

The following are the 20 States that signed the Covenant which created United State of Madhya Bharat:—Alirajpur, Barwan, Dewas (Senior), Dewas (Junior), Dhar, Gwalior, Indore, Jaora, Jabua, Khilchipur, Narsingarh, Rajgarh, Ratlam, Sullana, Sitamau, Jobat, Kathiwara, Kurwal, Mathura and Piploha. Besides these States the Rulers of Mohammadgarh and Pathari as also the Bhumats of Jannia, Nimkheda and Rajgarh agreed to merge their territories in Madhya Bharat.

The Hon'ble Pandit Jawaharlal Nehru, the Prime Minister of India, formally inaugurated the new Union at Gwalior on May 28, 1949. On June 16, the administrations of Gwalior and Indore, and on June 29 and 30 the administrations of the remaining States were taken over by the Raj Pramukh. Jaora came in after the dispute to its Gaddi was settled by the States Ministry in August 1948. On July 17, 1948 the Raj Pramukh executed the revised Instrument of Accession.

The Covenant and the revised Instrument of Accession authorise the Dominion Legislature to legislate for Madhya Bharat in respect of subjects in Lists I and III of the 7th Schedule to the Government of India Act, 1935, but not so as to impose any tax or duty or to prohibit the imposition of any duty or tax in Madhya Bharat.

The area of Madhya Bharat is about 47,000 sq. miles and its population according to the 1941 census is about 7.2 million. The density of population per square mile is 154. By way of comparison the density in Matsya Union is about 244 and in Patiala and East Punjab States Union 338. Hindus constitute 82.21 per cent of the population, Muslims 5.05 per cent, aboriginals 10.65 per cent and others 1.19 per cent.

The capital of Madhya Bharat is Gwalior for seven months, and Indore for the five summer months.

NATURAL REGIONS

The Union is situated between 20°-20' and 28°-50' latitude & 74°-10' and 78°-40' longitude. The Chambal river in the north and north-east separates it from Rajasthan and Matsya Unions, and the Agra and Etawah districts of the United Provinces. To the east are Jhansi and Jalaun Districts of the U.P., and the Saugar District of the Central Provinces. To the south are the Bhopal State, the Nimar District of the C.P. and East Khandesh. To the west are the Panchmahal District and other portions of Gujarat.

Aravali, Vindhyaachal and Satpura, mainly the last two are the chief mountain ranges in Madhya Bharat. Vindhyaachal range lies to the north and the Satpura range lies to the south of the Narmada river. The Vindhyaachal range passes through Bhilsa, Chanderi, Shivpuri, Gwalior, Kolaras, Guna, Sardarpur, Neemuch, Agar and Shajapur. Among the more important rivers in the Union are the Narmada, Kshipra, Chambal, Betwa and Kalisindh.

There is a varying amount of rainfall in different regions of the Union, ranging from 15 to 50 inches. In the southern region of Madhya Bharat, known as Malwa, rainfall ranges from 30 to 50 inches; in the northern region it is

higher. Malwa has black cotton soil and owing to enough rainfall, wheat and cotton are produced in abundance in this region.

From the climatic point of view, there is a great difference between the northern and southern regions. In the southern region, that is, Malwa the climate is temperate while most of Nimad which lies in the extreme south is hot in the summer but comparatively mild in the winter. The northern region has an extreme climate. Indore and Gwalior are 1,738 and 697 ft. respectively above sea-level, and their maximum temperature during the summer rises to 112° F. and 118° F.

AGRICULTURE

The mainstay of the people is agriculture in which 75 per cent of the population is engaged. Wheat, cotton, jowar, gram, bajra, rice, oil-seeds, ground-nut, sugarcane, pulses and opium are amongst the important products of the land.

The acreage under wheat, gram, jowar, bajra, maize and rice in the year 1948 was 6,707,523 and under oil-seeds 500,000 acres. Mangoes, guavas, melons and lemons are amongst the important fruits of this region. The total land area is divided as under:—

| | Acre. |
|--|-----------|
| 1. Cultivated land | 8,783,510 |
| 2. Fallow land lying uncultivated at present | 4,068,510 |
| 3. Uncultivable land | 628,450 |
| 4. Unproductive Bangar land | 5,044,100 |
| 5. Pasture land | 1,126,910 |

Note:—The above figures are of Gwalior, Indore and other 13 States. The figures from other 7 States are not available.

Heavy tractors supplied by the Government of India are being used for eradication of the weed kans and reclamation of land. The Government of India have suggested that out of 6.2 million acres of waste and old fallow land which they propose to bring under cultivation in the next five to seven years, Madhya Bharat alone would contribute nearly one-fourth. Plans in this behalf are being worked out.

LAND TENURE AND ADMINISTRATION

The land tenure in Madhya Bharat is partly ryotwari and partly jagirdari. For ryotwari areas of different integrating States a uniform revenue law is being enforced shortly. The police powers and the powers of civil, criminal, and judicial courts exercised by the jagirdars have been taken away.

A committee of officials and non-officials has been appointed to submit proposals regarding the abolition of the jagirdari system so that Government should take over direct administration of the jagir areas and give compensation to the jagirdars.

The sixteen districts of Madhya Bharat have been grouped into three Commissioner's divisions and at the head of the revenue organisation of Government is a Board of Revenue consisting of a Senior Member who is in charge of administrative work and two other members who sit as a Bench constituting the highest court of revenue appeal. The sixteen districts are divided into 80 tahsils and 25 taluqs. Taluqs are independent sub-divisions of Tahsils.

FORESTS

The total forest area is 12,000 sq. miles forming about 25 per cent of the total area of the Union. The annual revenue from forests is about Rs. 42,08,473. The forest area is divided into two main regions, northern and southern. In the northern region, there are 7 Divisions and 19 Ranges while in the southern region there are 5 Divisions and 19 Ranges. The forests of the northern portion are not very valuable whereas in the southern portions, forests of the Vindhyaachal and Satpura ranges are comparatively dense and productive.

Recently, when the neighbouring provinces were threatened with fodder famine, 30 million pounds of fodder were exported to Saurashtra, Baroda, Cutch and Ajmer-Merwara from the Madhya Bharat forests.

Working plans for forests existed in Gwalior and Indore and to some extent in Dhar. For the rest of Madhya Bharat plans are now being prepared.

A scheme has been sanctioned to replace all untrained staff by trained personnel in three years and the first batch of trainees has been sent to the forest colleges conducted by the Central Government.

MINERAL RESOURCES

Marble, sandstone, china clay, clay for making tiles and bricks, limestone, etc., are found in Madhya Bharat. From the geology of the region it is expected that manganese, asbestos, valuable stones, copper, lead, iron, gold, mercury, etc., occur in this region and a mineral survey is being undertaken shortly.

Government's industrial policy is to encourage private enterprise to the utmost so that the country's production might be stepped up. Facilities are provided for making available raw material with as little expense as possible and liberal concessions are allowed in matters of import and export tariffs and in other essential respects—at least in the initial stages of a new industry. With regard to nationalization, the policy declared by the Central Government is generally being followed.

COMMERCE AND MANUFACTURES

Textile, oil, sugar, metal and engineering works are among the more important industries of this region. There are in all about 1,800 industries including both large and small out of which 750 are in Gwalior, 650 in Indore and 400 in other States. Of the important factories, 17 are textile mills, 7 sugar mills, 55 oil mills, 1 woollen mill, 2 cement factories, 2 glass factories, 43 general engineering works, 23 chemical works, besides tobacco, starch, match, paints and varnishes, spinning and pressing factories, plastics, paper, carpets, tent factories, etc. The Engineering Works, Potteries and the Leather Works are State-owned and are located at Gwalior. It is intended to open a watch-making centre in Madhya Bharat. Proposals to establish an industry for manufacturing power alcohol from molasses and mahua and for starting forest industries are under the consideration of the Government.

Cotton is grown on nearly eleven lakh acres of land and nearly two and a quarter lakh bales of cotton are produced annually. About 50,000 labourers are employed in the cotton mills of Madhya Bharat, and 250 million yards of cloth are manufactured annually, a figure which works out at 7 per cent of the all-India production of cloth.

Chanderi and Maheshwar are famous for the fine texture of their handloom cloth. Chanderi saris interwoven with golden threads particularly are famous throughout India for their beauty and style. The Maheshwar handloom industry was established and promoted during the reign of the famous Devi Ahilyabai Holkar who had a Government shop established to import silk from China directly and sell it at cost to weavers. There are also two blanket-producing factories at Manasa and Indore.

The number of Sugar Mills situated in Madhya Bharat is the largest among the Unions of Indian States with a crushing capacity of 3,400 tons of sugarcane daily.

Oil-seeds are grown on 525,300 acres of land and the annual produce is 3,150,000 mds. There are in all 55 oil mills at present. One vegetable ghee factory is under construction at Indore.

LABOUR

Standardisation of wages in certain occupations and increase in basic wages in the textile industry have been effected. Similar steps are contemplated for medium-scale industries. To achieve uniformity with the rest of India in respect of labour standards, all progressive labour laws are being adopted. Two Labour Housing Schemes are being put into operation at Indore. An Industrial Court of Arbitration has been set up and provisional appointment of two Judges has been made. Government have issued a statement of labour policy concerning the welfare of all grades of labourers as well as steps to increase production. The participation in the Central Government's scheme of social Insurance is being actively considered.

COMMUNICATIONS AND TRANSPORT

In Madhya Bharat, there are 3,700 miles of roads out of which 2,384 miles are in the former Gwalior territory, 800 miles in the former Indore territory and the remaining in the other integrating States.

The motor services run by the Gwalior and Central India Transport Company at present traverse a large portion of Madhya Bharat. This is a nationalised service, owned and controlled by Government.

There are 1,100 miles of railway lines in the Union, 800 miles in Gwalior, 131 miles in Indore and 160 miles in the other States. Out of these 42% miles are of broad gauge, 212 miles of metre gauge and 294 miles of narrow gauge.

There are three railway systems which cover the Union: (1) the B.B. & C.I., (2) the G.I.P. and (3) the Scindia State Railway—a narrow gauge line of about 294 miles in length. There is at present one mile of Railway line to every 50 sq. miles.

A scheme for constructing a straight railway line between Gwalior and Indore and another line between Indore and Dohad is under the consideration of the Government.

An Air Service connecting Bombay, Indore, Gwalior and Delhi has been operating since 26 July, 1948 on alternate days. Gwalior, Indore, Neemuch and Mhow have modern aerodromes.

Rivers such as the Narmada, Chambal, Parvati, Kshipra, Betwa and Kalisindh provide a convenient means of transport in Madhya Bharat. By the Narmada, for instance, fine quality timber is transported to distant places.

BUDGET

The estimated revenue of Madhya Bharat for the year 1949-50 is 9-80 crores, excluding two new sources of revenue viz., excise duty on cotton cloth and income-tax. In respect of income-tax, a bill has been presented to the Legislature. Income-tax is expected to yield about 30 lakhs in the first year, and a crore of rupees or so after sometime. Excise duty on cotton cloth is expected to yield annually Rs. 34 lakhs. Though faced with a deficit budget Government have forged ahead with new expenditure to the tune of Rs. 82,96,400 in order that administrative efficiency and nation building activities may not suffer. It is hoped that in future years the deficit will be wiped out. Capital expenditure to the extent of Rs. 2,73,79,000 is also expected to be incurred during the year 1949-50. While it is true that Madhya Bharat does not contribute to the Central Exchequer by way of income-tax and certain other minor sources available to the Centre from the Provinces, Madhya Bharat is loaded with certain responsibilities which the Provinces do not have to bear. Expenditure of this nature amounts of about 1-1 crore of rupees per year spent on defence and about 75 lakhs likely to be spent on Privy Purse and on political pensions some of which have been sanctioned and others are likely to be sanctioned. As a corollary to integration moreover, the Government have sacrificed a substantial customs revenue by abolishing the internal customs outposts between the boundaries of

integrating States. Government have also introduced prohibition in one district in the first instance thereby sundering a further reduction in their revenues. Madhya Bharat was the only Union of States which has had to shoulder the task of framing a budget and presenting it to the Legislature within six months of its birth. This has been successfully accomplished though the difficulties in integrating the budgets of twenty-five different States, with their differing systems and in some no system at all, was a stupendous task.

DEVELOPMENT PROJECTS

As regards development projects and nation-building activities of the Madhya Bharat Government, the Chambal Hydro-Electric Scheme estimated to cost about Rs. 9-75 crores has pride of place. It is proposed to dam the Chambal river at a distance of about two hundred and fifteen miles from its place of origin in the Vindhyaas for the generation of 72,000 k.W.s of electric. The dam when complete would be 160 ft. high, hold about 3,02,000 m.cu.ft. of water and submerge 1,63,200 acres of land in 93 villages. Transmission lines carrying electricity to Indore in the south and Gwalior in the north are proposed to be laid, covering a distance of 570 miles. The dam would be the fourth biggest, and for its storage capacity relatively the cheapest in the world. Electricity is expected to be produced at less than 6 pies per unit.

The capital expenditure proposed in 1949-50 also includes Rs. 8,86,000 on the Scindia State Railways, Rs. 7,90,000 on construction of irrigation and connected works, Rs. 9,50,000 on public health engineering schemes, Rs. 30,00,000 on construction of new roads, Rs. 68,80,300 on the Chambal Hydro-Electric Scheme (already mentioned above) and about Rs. 50,00,000 on thermal electricity Schemes. In the budget of expenditure incurred from ordinary revenues the estimates under irrigation works are Rs. 20-8 lakhs, under education 121-8 lakhs, under medical and public health 94-6 lakhs, under agriculture, rural development, veterinary and co-operation Rs. 58-8 lakhs and under civil works Rs. 72 lakhs. Provision of Rs. 5 lakhs has also been made for opening a broadcasting station in Madhya Bharat. Efforts are being made, however, to persuade the Government of India to finance the Scheme. The budget for refugee relief and rehabilitation is Rs. 22,44,000 besides provision of Rs. 24 lakhs as loans and advances for relief and rehabilitation work. Here again it is hoped that the Government of India will come to the aid of Madhya Bharat.

RELIEF AND REHABILITATION

It is estimated that nearly 60,000 refugees have arrived in Madhya Bharat so far and 1,40,000 more are still to come. Provision has been made in the budget for loans, educational scholarships, camps, industrial houses, erection of small shops, etc. for refugees. Loans upto Rs. 3,000 for small industries or trades have been sanctioned by the Government.

Refugees who take to farming are given *Taccari* loans for purchasing seed, bullocks and implements and are provided for by the Government until the first harvest.

Deserving refugee students of 9th and 10th classes in Government Schools have been exempted from paying fee and, if needed, a sum upto Rs. 7-5 is given to each of them for purchasing books, etc.

Industrial Homes are also being opened by the Government for giving employment to refugees.

P. W. D. AND IRRIGATION

This department is in charge of a Chief Engineer with two Superintending Engineers for Northern and Southern Divisions under him for roads and buildings, and one Superintending Engineer for irrigation for the whole of Madhya Bharat.

EDUCATION

Most of the expenditure incurred on education in Madhya Bharat is on Government account. There are at present in Madhya Bharat 5 degree Colleges (one exclusively for girls), 2 Sanskrit Colleges, 1 Music College, 7 Intermediate Colleges, 30 High Schools, 178 middle schools, about 2,700 primary schools, besides 6 girls' High Schools, 35 girls' middle schools and about 250 girls' primary schools.

About 200,000 students, out of which 30,000 are girls, receive their education in various educational institutions in Madhya Bharat.

Among the schools for special education are the Scindia Public School—Gwalior, Dady College—Indore, Agricultural School—Gwalior, Institute of Plant Industry—Indore, Forest School—Shivpuri, Ayurvedic College—Jashkar, Gajra Raja Medical College—Gwalior, Mahatma Gandhi Memorial Medical College—Indore, Technical School—Gwalior, School of Art and Teachers' Training School—Indore and Gwalior, and Music College—Gwalior as well as Music Schools at other places.

Sixty schools are being specially run by the Government for the education of the children of scheduled castes and aboriginals. Government have exempted Harijans and adivasis from tuition fees for a period of five years.

The National Cadet Corps Scheme, introduced by the Government of India, is being adopted in Madhya Bharat also.

An enabling Bill for compulsory primary education in Madhya Bharat is being introduced in the Legislature.

MEDICAL AND PUBLIC HEALTH

The Department is in charge of a Director of Health Services. There are 416 hospitals and dispensaries in Madhya Bharat. Some of these hospitals have clinics (3 big and 4 small) attached to them. There are 26 Maternity Homes and 108 Ayurvedic and Unani dispensaries. A T.B. Sanatorium is located at Rau near Indore. There are two Mental Hospitals and one Leprosy Asylum in the Union. Five Travelling Dispensaries provide medical facilities to villages away from the road.

A new hospital for women and children known as the Kamla Raja Hospital with 250 beds is under construction at Gwalior. Government have also sanctioned a scheme of mass survey for detecting and combating tuberculosis while this dreaded disease is in its early stages. There are two Lymph Centres, one at Shivpuri and the other at Manpur.

The Government propose to establish Ayurvedic or Allopathic Dispensaries also, so that every place may have a dispensary within a distance of 10 miles from it.

A Public Health Laboratory situated at Gwalior examines foodstuffs and water specimens.

VETERINARY DEPARTMENT

The total cattle population of Madhya Bharat according to the 1940 cattle census is about 70 lakhs. At present, there are 13 A class, 38 B class and 56 C class hospitals and dispensaries in the various covenanting States of the Union. The Veterinary Department has been integrated and has prepared a plan for creating one dispensary for every twenty-five thousand of the cattle population in accordance with the recommendations of the Royal Commission. 20 new dispensaries will be started every year so that in about 10 years' time the Union will have the requisite number of dispensaries. A programme for training of Veterinary Assistants to be posted at the dispensaries has also been formulated. The Vaccine Institute of the Union will be extended so as to produce goat-tissue vaccine, anti-rabies vaccine and Ranikhet vaccines to meet all local requirements.

An Animal Husbandry section has also been created as part of the Veterinary Department. There are, at present, 2 bull-breeding farms

for Malvi and Nimadi cattle. A Live-stock Development Officer and Gausghala Development Officer have also been appointed. During next year, a scheme for the setting up of 'Go-Sadan' or concentration camps for un-economic cattle will be put into operation. A mobile unit has been organised for prevention of epidemics amongst the cattle.

POLITICAL SET-UP

The Raj Prammukh is the constitutional head of the United State and a popular ministry responsible to an interim Legislature is in charge of the administration. The Madhya Bharat Government has secured the services of senior and experienced officers from outside as Chief Secretary, Finance Secretary, Auditor-General and Inspector-General of Police. The first task before the United State was to establish an integrated administration in respect of each Department throughout Madhya Bharat abolishing the independent administrations of 25 States. This task is well on the way to completion.

The Secretariat has been reorganised and is functioning on the provincial model, a Madhya Bharat Administrative Service has been constituted, the Indian system of audit and accounts has been introduced, the budget for 1949-50 with all its details has been presented for discussion to the Legislature and a Public Service Commission with a Chairman borrowed from the Federal Public Service Commission has been appointed. Like the Madhya Bharat Administrative Service there will be other parallel services, namely, the Madhya Bharat Police Service and the Judicial Service. On the Report of the Mohan Rao Committee, Government have passed orders regarding uniform pay scales for the Union but employers can opt for the old pay scales as on April 15, 1948. Surplus personnel are being discharged and in pursuance of the guarantee given by the Covenant, Government have framed rules for payment of pension, gratuity and equitable compensation to them. Rules determining relative seniority as between officers of different States have also been framed. A High Court with two Benches at Gwalior and Indore was established immediately after the formation of the United State with a retired High Court Judge from Lahore as the Chief Justice. The Judiciary has been separated from the executive, a reform long-advocated by progressive opinion in India. It is only in matters pertaining to the maintenance of law and order, or more precisely, for the purposes of Chapters VIII, IX and XI of the Criminal Procedure Code that the Subas (corresponding to Collectors in Provinces) are directed to exercise the powers of District Magistrates. Uniform laws for the whole of Madhya Bharat are under preparation and a good deal of legislative work has already been pushed through.

The new State has been divided into 16 Districts breaking down old boundaries in several cases though this involved the difficult task of overhauling old attachments and localities. Here is a list of the 16 districts: Bhopal; Bilaspur; Morena; Shivpuri; Guna; Bilhisa; Rajgarh; Shajapur; Dewas; Indore; Mandla; Ratlam; Ujjain; Dhar; Nimar; Jabua.

At the head of the District is the Suba, a member of the Madhya Bharat Administrative Service, who is not only the head of the district for revenue matters but also for general administration including the maintenance of law and order. There are 5 sub-divisions in charge of Naib-Subas. In addition to this every Suba will be assisted by a Naib-Suba in his district. The Naib-Subas are also members of the Madhya Bharat Administrative Service. The Administrative Services are controlled by the Chief Secretary in the General Administration Department.

LOCAL SELF-GOVERNMENT

As for local self-government in rural areas there are in all 125 municipalities in Madhya Bharat.

The Development Department has accepted the principle that all development activities in

the villages will be carried out through the co-operation and organization of village panchayats. Every village of the Union will have a village panchayat of its own if it is big enough, or will be a member of a group of village panchayats as sometimes a village may be too small an economic unit for carrying out development activities. The Development Department has under consideration a programme for the creation of "Kendra" panchayats for a group of 20-25 villages, the panchayats being given wide powers and responsibilities as units of local self-government. The elected representatives of these panchayats will form a Mandal Panchayat which will perform the functions analogous to those of a District Board. The executive functions of the panchayats will be discharged by paid executives.

POLICE

The police forces of the different covenanting States have been integrated into one police force for the whole Union working under the control of an Inspector-General of Police. Three Ranges have been created with Deputy Inspectors-General at their head and Superintendents, Deputy Superintendents and subordinate officers in the districts under them. There is an independent Intelligence Branch under a D.I.G.

The Jagir Police has been incorporated into state police.

With a view to allowing due scope to the citizens to acquire physical fitness and render voluntary service in the field of Civil Defence and maintenance of law and order, Government have approved a scheme for setting up an organisation to be called Griha Rakshak Dal. The training will be free and trainees will receive free uniforms. The details of the scheme are being worked out.

Government are anxious to purify public life and weed out corruption. A non-official Anti-Corruption Committee has been constituted and an Anti-Corruption Department is being organised to launch a vigorous drive against corruption.

DEFENCE

Under the Covenant Defence is a subject vested in H.H. the Rajprammukh who deals with it in consultation with the Government of India.

The total strength of the Madhya Bharat armed forces is 60,255. The headquarters of the Madhya Bharat forces are located at Gwalior with sub-stations at Rajgarh, Khilchipur and Kurwal under the direct control of headquarters. There is a sub-area command located at Indore for the supervision and control of the military forces at Indore, Dewas, Dhar, Ratlam and Sullana.

After the formation of the Union the 3rd Gwalior Infantry, the Gwalior Mountain Battery, Scindia's Field Battery, the 1st Indore Infantry, Troops Pack of the Gwalior Transport Corps, the 4th Gwalior Infantry and the 1st Gwalior Lancers were all sent out to serve with the Indian Army Units.

ADMINISTRATIVE PERSONNEL

Rajprammukh, Lt.-Gen. H. H. the Maharaja Sir Jiwaji Rao Scindia, Alilaj Bahadur, G.C.I.F., G.C.S.I., Maharaja of Gwalior.

Senior Up-Rajprammukh, Maj.-Gen. H. H. the Maharaja Sir Yeshwant Rao Holkar, G.C.I.F., Lt.-Col., Maharaja of Indore.

Junior Up-Rajprammukhs, Lt.-Col. H. H. Maharaja Anand Rao Puar Bahadur of Dhar; H. H. Raja Rao Bahadur Yeshodhar Singh of Khilchipur.

CABINET

Premier (General Administration, Political, Press, Information and Broadcasting), The Hon'ble Pt. Liladhar Joshi.

Deputy Premier (Police, Census and Refugees Relief and Rehabilitation), vacant.

Minister for Revenue and Food, The Hon'ble Shri Radhesh Vyas.

Minister for Law, The Hon'ble Shri Jagmohaul Shrivastava.

Minister for P.W.D., Irrigation, Customs and Excise, The Hon'ble Shri Yashwantsingh Kushwah.

Minister for Medical, Public Health, Jails and Municipalities, The Hon'ble Syed Hamid Ali.

Minister for Industries, Commerce and Civil Supplies, The Hon'ble Shri Mishrilal Gangwal.

Minister for Finance, The Hon'ble Shri Ramkrishna Dixit.

Minister for Development and Labour, The Hon'ble Shri D. M. Parulekar.

Minister for Education and Communications, The Hon'ble Shri Kalaram Virulkar.

Deputy Development Minister, The Hon'ble Shri Sunmhal.

Advisor to H.H. the Rajprammukh (Defence), Col. Brijar Naram.

Advisor to H.H. the Senior Up-Rajprammukh, Capt. H. C. Dhandra.

Secretary to the Rajprammukh, Col. Eknath Rao Patil.

Military Secretary to the Rajprammukh, Col. S. K. Surve.

Controller of Household, Major S. V. Indulkar.

SECRETARIAT

Chief Secretary, V. Viswanathan, I.C.S.

General Secretary, Major S. N. Bamru.

Finance Secretary, S. D. Bajpai.

Revenue Secretary, J. N. Garga.

Law Secretary, M. L. Mital.

Commerce Secretary, V. Bhargava.

Health Secretary, S. P. Mehda.

Customs Secretary, K. K. Kalewar.

Communications and Education Secretary, K. B. Wagle.

Food and Civil Supplies Secretary, G. Cornelius.

HEADS OF DEPARTMENTS

General Officer Commanding, Major-General K. R. Rane.

Auditor-General, P. Mohan Rao.

Economic Advisor, Dr. L. C. Jain.

Inspector-General of Police, V. S. Rana, I.P.

Chief Engineer, P. W. D., Major N. K. Bhonsale.

Chief Conservator of Forests, A. R. Advani.

Commissioners, Jails, Prisons and Court of Wards, S. S. Gaur.

Commissioner for Customs and Excise, Masood Quli Khan.

Census Commissioner, Ranglal.

Development Commissioner, S. N. Dubey.

Transport Commissioner, C. L. Gupta.

Labour Commissioner, A. S. Banwalkar.

Accountant-General, V. N. Singh.

Postmaster-General, Bapat.

Director of Public Health and Medical Services and Inspector-General of Prisons, Col. Shankarlal Garzwa.

Director of Agriculture, Rai Bahadur K. I. Thudani.

Director of Education, B. N. Jha.

Director of Industries, N. Swami.

Director of Land Records, K. M. Phalke.

Director of Food, Kaul.

Director of Relief and Rehabilitation, G. R. Sohni.

Director of Civil Veterinary, Dr. H. K. Mehra.

Director of Information (Offg.), Lt. P. C. Gupta.

Director of Civil Supplies and Textile Commissioner (Offg.), J. M. Kochar.

HIGH COURT

Chief Justice, G. K. Shinde (Offg.).

Judges, Abdul Hakim; P. V. Dixit; M. B. Beg; V. N. Mehta; Hazari Lal Sauchi; B. K. Chaturvedi; A. N. Sehgal (Offg.).

PUBLIC SERVICE COMMISSION

Chairman, Dr. I. D. Joshi.

Members, S. V. Kanungo; C. W. Pandit.

MEMBERS OF THE MADHYA BHARAT LEGISLATURE

(Gwalior)

Lalchand Sethi; Durga Prasad Mandella; Anandbehari Mishra; Bankebehari Lal Pandey; Jagmohanlal Shrivastava; Shrinati Sundarabai Pagnis; Brijdawan Prasad Tiwari; Hamid Ali Shah; Harishankar Dwivedi; Vinayakrao Vaidhya; Soharan Singh; Major Sardar A. B. Phalke; Major Raja Panchan Singh; Masood Ahmed; Dhaniram Sagar; Govindrao Patankar; Vaidohi Charan Parashar; Vishwanath Ayachit; Harikewak Mishra; Muti Ahmed; Ram Sahai; Radhe Charan

Sharma; Shyam Lal Pandviya; Gautam Sharma; Bhagwatsingh; Gaurishankar Shrivastava; Laxminarain Porwar; Laxmichand Valsiya; Saubhagyamal Jain; Ramkrishna Dixit; Sannulal; Shiydayal Shrivastav; Dattatraya Rao Datar; Ramcharan Mishra; Vijaya Singh; Yeshwantsingh Kushwah; Liladhar Joshi; Gopkrishna Vijayvargiya; Radhelal Vyas; Takhtamal Jain.

(Indore)

Jadhavchand Jain; N. G. Kothari; Hakim Haidulla; N. H. Dravid; D. L. Parulkar; Sajjansingh Vishnar; V. V. Sarvate; V. S. Khode; Rameshwardayal Totla; Nandlal

Joshi; V. V. Dravid; Mishrilal Gangwal; Lt.-Col. Raoraja Hirralal; R. C. Jal; Mashir-ud-Daula; Rao Bahadur Sardar M. V. Kibe.

(Other Covenanted C.I. States)

Kashinath Trivedi; Kaluram Virulkar; Kanhaiyalal Jain; A. S. Patwardhan; Dr. Devi Singh; Dr. Prem Singh; Kusumkant Jain; Raghunandan Sharan Sharma; Syed Hamid Ali; Nandlal Dalal; Samiramal Dapharia; Radhavallabh Vijayvargiya; Banwarilal Azad; Kundanlal Pathak; Th. Amar-singh; Kailash Narain; Mulchand Vani; Mangilal Vyas; Hemraj; Brijkishore.

THE PATIALA AND EAST PUNJAB STATES UNION

THE Patiala and East Punjab States Union comprising Patiala, Kapurthala, Nabha, Jind, Faridkot, Mukerkotia, Nalgargh and Kalsla states lies within the boundaries of East Punjab Province. It was inaugurated at Patiala by India's Deputy Prime Minister, Sardar Vallabhbhai Patel on 15th July, 1948.

Three of these seven, Patiala, Nabha and Jind make up the Phulkian group, the rulers of which trace their descent from the same progenitor from whom the name Phulkian is derived. The Raja of Faridkot who is descended from an ancestor of Chaudhri Phul also belongs to the same family group, as do the Houses of Nalgargh and Kalsla. Mukerkotia is a Muslim State. But the fact that it survived the tumultuous period of the eighteenth century is enough testimony to the friendship which the neighbouring Phulkian States bear to it. Thus the Rulers and the States are bound together by blood relation ties of friendship and by historical antecedents.

The Union covers an area of 10,120 square miles, three-fifths of which form Patiala territory. The Union has a population of about 35 lakhs according to the 1941 census of which Patiala State alone accounts for about 20 lakhs. The population of the Union is homogenous. All the people speak the same language, namely Punjabi, and have the same kind of customs, etc., factors which make for political unity and solidarity. The Jats who form a major part of the population are among the finest peasantry in India. They are not only good cultivators but are also first class soldiers. The average annual revenue of the State is about Rs. 5 crores.

AGRICULTURE

The Patiala and East Punjab States Union like the rest of the country is essentially an agricultural area. The former Patiala State had a separate Agriculture Department for the purpose of educating the farmers in the art of modern cultivation and the use of improved varieties of seeds and modern implements. There was also a central farm about six miles from the capital. Similar farms exist at Nabha, Faridkot and Kapurthala.

The main crops of the Union are wheat, gram, sugar-cane and cotton in the plains and potatoes in the hills. In addition barley, oats, bajra, maize and other minor crops are also grown.

Out of a total area of about 900,000 acres of culturable waste a little over 200,000 acres can be easily brought under cultivation. Reclamation work will in fact start shortly by means of heavy crawler tractors. It is estimated that reclaimed land will yield an additional 70,000 tons of foodgrains and would enable the Union to resettle 21,000 families.

The Agriculture Department has a separate marketing section which looks to the proper marketing of agricultural produce and the introduction of standard weights and measures in the mandies. Grading stations for wheat, atta and eggs were established in the Patiala area and there is a glue grading laboratory at Narnaul with an output of about 10,000 maunds of glue

per annum. The following acts are in force in the Union:—1. The Agricultural Produce Markets Act; 2. Standards of Weights Act; and 3. The Agricultural Produce (Grading and Marketing) Act.

Veterinary hospitals exist practically in all important centres in the Union. The Patiala and East Punjab States Union has been an important centre for the famous breed of Hariana cattle and Murrah buffaloes and the services of the Veterinary Department have been in great demand. It is, therefore, proposed to open twenty-five more hospitals at the headquarters of each Tehsil and Sub-Tehsil and important towns, and to start bull breeding farms for improving the indigenous breed of cattle and buffaloes.

Regular cattle fairs are held in important rural centres to encourage cattle breeding and facilitate the sale and purchase of cattle. The Agriculture Department provides various facilities to visitors to these cattle fairs. Special shows are sometimes arranged for their entertainment.

The cattle Development Scheme jointly financed by the Indian Council of Agricultural Research and the Union Government for the purpose of improving the milk supply and encourage the cultivators to start mixed farming has recently begun functioning.

There are great potentialities for the development of agriculture in the Union. The schemes for land reclamation, opening of demonstration centres, seed multiplication farms, well boring operations, starting of veterinary hospitals, mechanised farming, i.e., tractor cultivation, etc., have been submitted to the Government of India for sanction.

HORTICULTURE

There is an up-to-date Horticulture Department whose experiments conducted in the hill territory over a decade will be of great help in fruit culture in India. There are three separate zones according to elevation:—1. Pinjore—Representing about 2,000 ft., conducts experiments on mangoes, litchies, spotles, papayas and pine-apples; 2. Kandiana—Representing elevation ranging between 4,000 to 5,000 ft. above sea-level, conducts experiments on peaches, apricots, plums, grapes, brambles and persimmons; and 3. Shillon—Ranging in elevation between 5,000 and 9,000 ft. is for apples, pears, cherries and chestnuts.

INDUSTRIES

Although agriculture is the main occupation of the people in the Union, the development of industries has not been lost sight of.

Two large-scale cement factories are functioning in the Union, one at Surajpur near Kalka and the other at Dadri. The former has a capacity of six hundred tons of cement per day.

An up-to-date Biscuit factory, one of the biggest of its kind in India is functioning at Rajpura where there are also factories for the manufacture of starch, and chemicals.

A large sugar factory exists at Phagwara and another at Hamira. A distillery for the distillation of fine quality liquor is also functioning at Hamira.

A number of big and small iron and steel works, with foundries are situated at Kapurthala and Patiala and at other important towns of the Union. There are also two big roller flour mills at Patiala and Bhathinda.

Cotton ginning and pressing factories and oil mills are other industries found at a number of places.

EDUCATION

There are in all 10 colleges, one upto M.A. and the other upto the degree and intermediate classes, and 51 High Schools in the Union. Besides, there are 73 middle schools, 77 lower-middle schools and 642 primary schools. There are in all 853 educational institutions in the Union. The Union has no university of its own, all its schools and colleges are affiliated to the East Punjab University. The percentage of literacy varies from 5.14 in Nalgargh to 12.7 in Patiala.

In addition to a Girls' College co-education facilities have been provided at the primary and university stages.

To encourage primary and women's education in the Union primary education for boys upto 4th class and for girls upto the 10th class is made free in all schools in Patiala. Harijans and members of other backward classes are also given a free education upto the matriculation standard.

The Education department has an ambitious plan for re-organising and re-orientating the whole education system in the Union. The budget of the department which was about 40 lakhs in 1948-49 has been raised to 65 lakhs.

PUBLIC HEALTH

An up-to-date and independent medical department exists in the Union with its Headquarters at Patiala and all the different medical and health departments have been integrated into one and placed under the Director of Health & Medical Services. At present the Union Government maintains 30 Hospitals (17 for men and 13 for women) and 89 dispensaries with a total of 973 beds.

For purposes of administration two districts have been combined to form a civil surgeoncy making four civil surgeons in all. Similarly there are four District Health Officers. The present staff comprises 200 doctors (13 Specialists, 53 Assistant Surgeons, 23 Lady Sub-Assistant Surgeons, 4 Dental Surgeons, 8 Lady Sub-Surgeons). All the hospitals are located in the urban areas, while the dispensaries serve the small towns and rural population.

The Raiindra and Lady Dufferin Hospitals are the main Hospitals of the Union which are managed by highly qualified doctors and Specialists. Eight doctors hold foreign post-

graduate qualifications and 15 have Indian post-graduate qualifications. At present 11 doctors are receiving post-graduate training overseas in the U.K. and the U.S.A.

There are two health centres one at Patiala and the other at Kapurthala. The Union has maternity wards attached to Lady Dufferin Hospital, Patiala, Civil Hospital, Nabha and R.F. Hospital, Kapurthala.

In the former Patiala State there were three touring dispensaries which covered the entire rural area and brought medical aid to the very doors of the villagers. Ex-Ray and Laboratory facilities are available at Patiala, Nabha, Sangrur, Faridkot, Kapurthala and Dharampore. Arrangements for segregation of infectious disease cases exist in the hospitals at the District Headquarters.

There is a T. B. Hospital at Dharampore and a T. B. Clinic at Patiala.

The Public Health Department has further comprehensive schemes to improve the health of the people. There are two programmes before the department, one short-term and the other long-term. Under the short-term programme it is proposed to raise the present number of beds from 1,000 to 2,500 in ten years. It is also intended to supplement the existing hospitals and dispensaries and raise some of the latter to the standard of hospitals in the next two or three years.

According to the long-term programme which extends over a period of 25 years, the hospital accommodation which at present stands at 24 beds per 1,000 will rise to 5.67 beds per 1,000, and the different areas of the Union will be more fully covered with hospitals and dispensaries. The total number of patients both indoor and outdoor treated in all the hospitals and dispensaries of the Union was 28,04,925 in 1947-48. The Union budget for Public Health & Medical Services at present stands at Rs. 22 lakhs.

LOCAL SELF-GOVERNMENT

Each of the covenanting States has its own form of Local Self-Government, hence there is no homogeneity. The whole system of Local Self-Government is now being reorganized with a view to achieving uniformity throughout the Union, and the Local Self Government Laws are also being unified. A number of steps have already been taken in this direction and it is expected that the work would be completed within a short period.

IRRIGATION AND PUBLIC WORKS

The greater part of the Union situated between the Jamna and the Beas has alluvial soil. Canal irrigation is resorted to in the southern part of the plains where rainfall is scarce. The major part of the Union is fed by water from the Sirhind canal with its arterial branches.

The Government of the former Patiala State had undertaken the construction of a Hydro-Electric dam in its hill territory at a cost of Rs. 5 crores at the time when the Union was formed. This scheme is now under consideration of the Union Government and if given effect to would generate enough electric energy to provide all the nascent industry of the Union and also the agriculturists. The Dochi Dam Project, as it is called, is situated in a picturesque valley about 10 miles from Chail, the summer headquarters of the Rajpramukh near Simla.

The construction of new arterial roads connecting the rural area with important nodules and business centres has already been taken in hand. The credit for the construction of the 19 miles long metalled road connecting Rajpura with Kalka in the record time of three months goes to the Union P.W.D. This road besides shortening the way between Kalka and Ludhiana by about 16 miles also obviates the necessity of crossing the River Ghaggar which is impassable when it is in flood, an event which is not uncommon during the rainy season. The Union P.W.D. is also working hard to improve communications in Patiala town which is the capital of the Union. A sum of Rs. 50 lakhs has been provided this year for the construction of new roads and repairing of existing ones.

BUDGET FOR 1949-50

The Patiala & East Punjab States Union Government started the financial year 1949-50 with an opening balance of Rs. 6,55,84,019. The estimates for the year 1949-50 reveal a deficit of Rs. 84,46,389. The total revenue for the year 1949-50 is estimated at Rs. 5,00,49,988 and the expenditure at Rs. 5,84,97,377. The deficit of Rs. 84,46,389 is accounted for mainly by the arrears of pay and dearness allowance, which have been recently increased for all the employees of the Union.

POLITICAL SET-UP

Prior to the inauguration of the Union the individual States had their own separate administration. The ruler was the source of all power and had absolute jurisdiction over his territory.

After the formation of the Union strong efforts were made both by His Highness the Rajpramukh and Sardar Vallabhbhai Patel to bring the three political parties of the States Union namely the Union Congress, the Shiromani Riyasti Akali Dal and the Lok Sewak Sabha together but the efforts failed. Sardar Patel in his inaugural address declared that no popular interim Government could be formed as the parties had failed to agree. On the day on which His Highness the Rajpramukh was to take charge of the covenanting States—August 20, 1948—the States Ministry constituted a Caretaker Government comprising S. Gian Singh Rarewala as Prime Minister, Sir Jai Lal as Adviser, S. Inderjit Singh as Finance Secretary and Shri R. R. Patel as Chief Secretary. This was only a temporary arrangement; the Government was to keep the administration going till an interim popular ministry was formed. It took about five months before an interim popular ministry could be formed. This Ministry which took office on January 13, 1949 comprised four Congressmen, two Lok Sabha and one Independent with S. Gian Singh Rarewala as Premier. It is now busy preparing the electoral rolls for the elections to the Constituent Assembly. The integration of the different administrations is already accomplished.

ADMINISTRATION

Rajpramukh, His Highness the Maharajadhiraj of Patiala.
Secretary to His Highness the Rajpramukh, Sodhi Jaidev Singh.
Prime Minister and Minister for Finance, The Hon'ble S. Gian Singh Rarewala.
Home Minister, The Hon'ble Col. S. Ragbhir Singh.
Revenue Minister, The Hon'ble Gian Zail Singh.
Education Minister, The Hon'ble Chaudhuri Nihal Singh Takshak.
Law & Labour Minister, The Hon'ble Shri Lachhman Das.
Minister for Works, Mines and Power, The Hon'ble S. Ajit Singh.
Minister for Rehabilitation, The Hon'ble S. Harcharan Singh.
Minister for Civil Supplies, The Hon'ble Seth Ram Nath.
Chief Secretary, Shri B. R. Patel, I.C.S.
Finance Secretary, S. Inderjit Singh.
Revenue Secretary, S. Dhanna Singh.
Development Secretary, S. Puran Singh.

THE UNION OF RAJASTHAN

THE Union of Rajasthan is comprised of the following States: Banswara, Bundi, Dungarpur, Jhalawar, Kishengarh, Kotah, Parganah, Shahpura, Tonk, Udaipur, Bikaner, Jaipur, Jodhpur, Jaisalmer, Alwar, Karauli, Dholpur and Bhairatpur. It is the biggest of the States Union with an area of about 140,000 sq. miles, a population of about 15 millions and a revenue of about 16 crores.

When it was first formed on April 18, 1948 it comprised only Banswara, Bundi, Dungarpur, Jhalawar, Kishengarh, Kotah, Parganah, Shahpura, Tonk and Udaipur. On March 30, 1949 four other States Bikaner, Jaipur, Jodhpur and Jaisalmer joined it. It acquired its present size and composition when the four States of the Matsya Union Alwar, Karauli, Dholpur and Bhairatpur were merged into it on May 15, 1949.

The provisional capital of the Union is Jaipur. The principal language is Rajasthani. Among other common languages are Western Hindi and Urdu. Among castes and tribes the most numerous are the Brahmins, Jats, Mahajans, Chamaras, Rajputs, Minas, Gujars, Bhis, Malis and Dalais.

The Union lies roughly between North Latitude 23° 3' and 26° 12' and East Longitude 69° 30' and 78° 17'. It is bounded on the north by Delhi, East Punjab, the Patana and East Punjab States Union and the West Punjab Province of Pakistan; on the east by the U.P. and Madhya Bharat; on the south by Madhya Bharat and Bombay Province; and on the west by the Pakistan Provinces of Sind and West Punjab. Enclosed in the Rajasthan Union is the Chief Commissioner's Province of Ajmer-Merwara.

NATURAL REGIONS

It may be useful to give a rough idea of the geographical position of the several states which merged to form the Union. Jaisalmer, Jodhpur and Bikaner form a homogeneous group in the north and west, while a part of Jaipur and the whole of Alwar lie in the north-east. Jaipur, Bhairatpur, Dholpur, Karauli, Bundi, Kotah and Jhalawar may be grouped together as the eastern and south-eastern States. Those in the south are Parganah, Banswara, Dungarpur and Udaipur with Sirohi in the south-west. In the centre lie Kishengarh State and parts of Tonk.

The Aravalli mountains intersect the country from end to end by a line running north-east and south-west. The heights of Mount Abu are close to the south-western extremity of the range, while its northern end may be said to terminate near Khetri almost on the borders of Delhi.

There are two main regions, one to the north-west of the hills and the other to the south-east. On the whole the north-west region is sandy, ill-watered and unproductive; it improves gradually as we move from west to east. In the extreme west it is more desert, while towards the east it is comparatively fertile and habitable. The only river of any consequence here is the Luni. The great desert forming the whole of the frontier between Rajasthan and Sind is covered by sand-hills on which grows a kind of coarse grass in the dry season and in the rains slightly richer vegetation. The cultivation is everywhere poor and precarious. Along the base of the Aravalli range the land is well cultivated.

The region south-west of the Aravallis is higher, more fertile, and very diversified in character. It contains extensive hill ranges, long stretches of rocky wold and woodland. The region is traversed by considerable rivers and in many parts there are wide valleys, fertile table-lands and great breadths of excellent soil. The chief rivers are Banas and Chambal.

There are no natural fresh-water lakes in Rajasthan, the only considerable basin being the well-known salt lake at Sambhar. There are, however, numerous artificial sheets of water in the eastern half of the Province. The oldest and the most famous are in Mewar, the Dhebar Lake, the Raj Samand and the Pichola Lake at Udaipur city.

AGRICULTURE

The most prominent constituent of the vegetation of Rajasthan is the scrub jungle; trees form quite a secondary feature. Among fruit trees are figs, mulberry, tamarind, mango, pomegranate, peach, custard apple and guava.

Rainfall is very unequally distributed throughout Rajasthan. The summers are very hot; hot winds and dust storms are common. The winters are very cold. The change of temperature between day and night is sudden, excessive and very trying.

The principal crops are bajra and jawar. Bajra is the chief crop in the western and northern parts, while jawar is commoner in Bundi, Jhalawar, Kotah, Tonk and parts of Parganah and Udaipur. Other kharif crops are maize, mott, mung, cotton and a coarse kind of rice. The principal rabi crops are wheat, barley, gram, sugar-cane, poppy, tobacco, saffron and indigo. Oilseeds consists of til, mustard, rape, linseed and castor. Among cultivated fruit are apricot, custard apple, guava, mango, mulberry, orange, peach, plantain, plum, pomegranate, pummelo, tamarind, lime, melon and several varieties of fig. Many kinds of vegetables are grown such as beet, cabbage, carrot, cauliflower, egg-plant, onion, parsnip, potato, radish, spinach, tomato, turnip, yam and several of the gourd and cucumber family.

The main wealth of the desert lands of the west and north consist in the vast herds of camels, horned cattle, and sheep. The horses of Marwar are renowned for their hardness and ease of pace.

There are no large timber forests in Rajasthan but the woodlands are quite extensive upon the south-western Aravallis. Mount Abu possesses several valuable kinds of timber. The southernmost parts comprising the former States of Banswara, Dungarpur and Parganah are in proportion to their size the best wooded of any in Rajasthan. Here teak and other valuable timber trees can thrive well. Small bamboos are very common. Minor forest produce consists of grass, fire-wood, bamboos, fruit, honey, lac and gum.

MINERALS, MANUFACTURES

The most important mineral is coal, but it is of inferior quality. It is generally mixed with the Benasi variety before use. Other ores are copper, iron, cobalt but all are present in small quantity. The rocks of Rajasthan are rich in building material. Limestone is abundant. One variety is a fine-grained crystalline marble; another variety, the Jaisalmer marble as it is sometimes called is well adapted for fine carving. Sandstone is plentiful almost everywhere, varying greatly in texture and colour. Fuller's earth occurs in parts of Bikaner and gypsum in Jodhpur. Rajasthan has vast salt resources.

In manufacture Rajasthan has no speciality. The more important industries are the weaving of muslin, dyeing and stamping of cotton cloths, manufacture of carpets, rugs and other woollen fabrics, enamelling, pottery, and work in ivory, lac, brass, steel stone, etc. Jaipur is pre-eminent for enamelling on gold. The best pottery is also produced in Jaipur. Brass and copper utensils of daily use are manufactured everywhere. Sword blades, daggers, knives are manufactured in Jhalawar.

Among the chief exports are salt, wool, woollen fabrics, raw cotton, oilseeds, opium, ghee, marble and sandstone, hides, printed cloths, camels, cattle, sheep and goats. The main imports include food grains, cotton goods, sugar, tobacco, metals, timber and kerosene oil. The principal trade centres are the capitals of the former States.

RECONSTRUCTION

The original Rajasthan Union had gone far towards integration of the various States. The following items may be mentioned in this connection: integration of the administrative Departments of the covenanted States; reorganization and reconstitution of the Departments

on modern lines; absorption of the staff of the covenanted States into new administrative machinery; the establishment of a single High Court and Revenue Board for the whole Union.

It had also an impressive record of reconstruction work. In this connection the following particulars may be mentioned: separation of executive from judiciary; abolition of judicial and administrative powers of jagirdars; the opening of several nation-building departments; the starting of new schools; granting of scholarships; construction of several new roads costing Rs. 50 lakhs; starting of work on new railway lines; starting of work on the Chambal-Hydro-Electric project; opening of department for the uplift of backward classes; passing of labour welfare laws; abolition of *Lacats* or cesses on agriculturists; passing of tenant protection law; amending of forest rules to help the cultivator; revision of pay scales of Government servants; the passing of a new Panchayat Act; launching of a social education movement; and so on.

The Union Government is very active in refugee relief and resettlement work. Free ration is being issued to refugees numbering 3,677; the ration is higher than that of the Central Govt. Arrangements are in progress for the distribution of pure milk. Blankets and beds are also being distributed. Accommodation is being found in Pratapgarh, Kotah, Bhilwada and Kishengarh. Regarding resettlement and employment, special officers are appointed, and ways and means loans are being secured from the Central Govt. Co-operative societies are also being formed. Education centre for women have been opened and freeships, scholarships in addition to grants to private institutions are given. Kerosene oil facilities have been available to refugees for long.

ADMINISTRATION

At the time of writing the new enlarged Union has just come into being, and so plans for administration are yet to be finalized. It is likely however that the Union will be divided into five administrative Divisions: Jodhpur and Jaisalmer; Kotah and adjacent States; Udaipur, Bikaner, and Jaipur with the Matsya Union States distributed. There will be a commissioner for each Division.

A striking point in the covenant is that it gives the Government of India controlling and directing power in the administration of the Union. The Government of India appoints advisers who have the right to be consulted on issues pertaining to finance, law and order, revenue and immigration. In case of difference of opinion the matter would be settled by the States Ministry. The Government of India may also set up an agency to help and guide the Rajpranukh. This agency will represent the centre in its dealings with the Union. Important posts in the Union will be named by officers loaned by the Government of India.

Paucity of trained staff is one of the biggest problems which the State has to face.

ADMINISTRATIVE PERSONNEL

Maharajpranukh, The Maharaja of Udaipur.
Rajpranukh, The Maharaja of Jaipur.
Prime Minister in charge of General Administration, Integration, Finance and Revenue, Hiralal Shastri.
Minister for Home, Premnaran Matur.
Minister for Industries, Commerce, Siddharaj Dandia.
Minister for Transport, Communications, Public Works, Rural Development, Co-operation, Municipal Affairs,
Minister for Food, Agriculture, Forest, Law, Justice, Rasbhudhralal Goyal.
Minister for Local Self-Government, Phoolchand Bapna.
Minister for Education, Vedpal Tyagi.
Minister for Medical and Health, Rao Raja Hanut Singh.
Minister for Labour, Refugee and Rehabilitation, Narsinh Kachawa.
Chief Justice, Kamalant Verma.
Regional Commissioner-in-Adviser, C. S. Venkatachari.
Chief Secretary to Government, D. R. Pradhan.

THE UNION OF SAURASHTRA

THE scheme for the formation of the United State of Saurashtra was finalised in the last week of January 1948. A Covenant for the formation of the United State of Saurashtra was signed by the Rulers of the Covenanting States on 23rd January 1948, and the new State came into existence on 15th February 1948. The inauguration ceremony was performed by the Hon'ble Sardar Vallabhbhai Patel, the Deputy Prime Minister of India. The total number of States comprising the United State of Saurashtra is 221. This includes the following 30 Jurisdictional States: Nawanganar, Bhavnagar, Porbandar, Dhrangadhra, Morvi, Gondal, Jafabad, Wankaner, Palitana, Dhol, Limdi, Rajkot, Wadhwan, Lakhnar, Sayla, Chudra, Vala, Jaslan, Amarnagar (Dhama-Devil), Vadla, Lathi, Muli, Bajana, Virpur, Maliya, Kotda-Sangani, Jetpur, Bilkhia, Patdi, Kharasa.

Before the formation of the United State of Saurashtra Kathiawar was the area was formerly called was divided into about 800 different administrative units. With the merging of the former Junagadh State into the United State of Saurashtra, by a supplementary Covenant, the State becomes a well-knit unit extending to the whole of Kathiawar.

The United State of Saurashtra lies on the west coast of India between 20° 40' and 23° 25' North Latitude and 69° 5' and 70° 20' East longitude. The Province is bounded on the south and south-west by the Arabian Sea, on the north-west by the Gulf of Cutch and on the east by the Gulf of Cambay and the mainland of India. Further north is the little Rann of Cutch.

PHYSICAL FEATURES

Standing boldly out into the Arabian Sea between Cutch and the Gujarat coast, Saurashtra's physical features suggest that it may once have been an island or a group of islands of volcanic origin. The surface of Saurashtra is for the most part undulating with low ranges of hills running in very irregular directions. With the exception of the Tianga and Mandav hills, in the west of Jhalawar, and some unimportant hills in Halar the northern portion of the country is flat. But in the south from the neighbourhood of Gogha, the Gir range runs nearly parallel with the coast and at a distance of about 20 miles from it, along the north of Babariwad and Sorath to the neighbourhood of Girnar. The principal river is the Bhadar which rises in the Mandav hills and, flowing south-west, falls into the sea at Navibandar after a course of about 110 miles, everywhere marked by highly cultivated lands bordering its course. Other rivers in the Union are Manj, Machhu, Ozat and Shetrunji, the last remarkable for wild and romantic scenery. There are a number of salt-water creeks. The Union has a 600-mile coast line and a number of ports: Bedi Bunder, Navakhali, Bhavnagar, Porbandar and Sien. Of these the first and chief port in the matter of import traffic from Europe is Navakhali.

The United State of Saurashtra has an area of about 21,318 sq. miles and a population of 35.85 lakhs. It has a revenue of about Rs. 8 crores per year.

AGRICULTURE, INDUSTRY

Saurashtra is essentially an agricultural Province. The main source of income of the State is land revenue. Agricultural produce of the State is made up of wheat, bajri, jawar, ground-nuts, cotton, and mace.

Industrial development is making rapid progress under the new regime. Saurashtra has at present nine textile mills and 10 weaving factories producing in all about 5,000 bales of cloth and 15,000 bales of yarn per annum. Textiles is the most important industry of the State. Next in importance are the 13 salt works dotted all over the coast line including

the salt works at Kuda situated inland. There are 14 state-owned and 44 private-owned spinning and pressing factories, 6 pottery works, 1 glass works, 9 match factories, 2 bone mills, 2 cement works (one of which is in territory belonging to the former Baroda State), 10 silicate factories, 2 chemical works manufacturing soda ash, 74 oil mills, 3 vegetable oil factories, 1 sugar mill, 1 magnesia works at Dhrangadhra. Over and above this, there are a good number of small scale factories.

With a view to helping the industries financially, an Industrial Finance Corporation is to be constituted with an authorised capital of Rs. 2 crores. The issued capital will be of Rs. 1 crore and the Saurashtra Government have decided to contribute 51% of the capital to the Corporation. The Corporation will give financial assistance to industries on certain prescribed terms. A plan for the advancement of small scale cottage industries has also been undertaken. Fisheries and marine produce in general are also engaging the attention of the Government. The main items in the export trade are cotton, ground-nuts, ground-nut oil, -all, soda ash, potteries, ghee, and wool.

Saurashtra is served by a net-work of railway lines with a total length of over 2,000 miles. In regard to road development Government are putting through a scheme for linking the capital of Saurashtra with important divisional towns and with Ahmedabad. The existing roads are not good enough. Reconstruction work was undertaken soon after the formation of the State.

POLITICAL SET-UP

An important change in the composition of the Union since its formation on 15th February 1948, was the merger of Junagadh into the State. The elected members from Junagadh in the Constituent Assembly unanimously decided to join the United State of Saurashtra and Junagadh became a part of the Union on 20th January 1949.

Immediately after the formation of the United State of Saurashtra preparations for the election of a Constituent Assembly for the State were set on foot and nine months later in November elections were held. The first meeting of the Constituent Assembly took place at Rajkot on 24th January 1949. The inauguration ceremony was performed by the Hon'ble Sardar Vallabhbhai Patel, the Deputy Prime Minister of India.

ADMINISTRATION

Raj Prammukh, His Highness Lieut.-General Maharaja Shri Sir Digvijaysinhji, G.C.S.I., G.C.I.E., A.D.C., Maharaja Jam Sahab of Nawanganar.

Upraj Prammukh, His Highness Yuvrajshree Mayurdhvasinhji, Maharaja of Dhrangadhra. **Members of the Presidium**, H. H. The Jam Sahab of Nawanganar (President); H. H. The Maharaja of Dhrangadhra (Vice-President); H. H. The Maharaja of Bhavnagar; H. H. The Maharaja of Palitana; H. H. The Maharaja of Kotda-Sangani.

MINISTRY

The first Ministry of the United State of Saurashtra was sworn in on 15th February 1948 and two more members were added to it when Junagadh became a part of the United State of Saurashtra. At present the total strength of the Ministry is 8. The following is a list of the Ministers and the portfolios held by them:—

Chief Minister (Services, Political, Assembly & Constitutional Reforms), Uchharanagar N. Dholkar.

Minister for Education, Medical, Public Health, Nannabhai Bhatt.

Minister for Railway, Ports, Road Transport, Posts, Telegraphs & Telephone, Air Lines, Sea Customs, Internal Customs, Local Self-Government, Archaeology, Balwantray G. Mehta.

Minister for Revenue, Refugee, Registration & Stamps, Provincial Exercise, Integration of States, Security, Information, Samaldas Gandhi.

Minister for Finance, Law, Jagdishlal Parikh.

Minister for Home, Press, Public Works, Rasikbhai U. Parikh.

Minister for Food, Cloth & Kerosene, Agriculture, Veterinary, Girharbhai Kotak.

Minister for Industries, Commerce, Electricity, Card Supplies, Other than Food & Cloth & Kerosene, Labour, Backward Class, Manubhai Shah.

JUDICIARY

Chief Justice, Sir H. P. Divetia.

Justice Judges, H. M. Shukla; M. M. Zala.

PUBLIC SERVICES COMMISSION

Chairman, Sir Jamnadhani Madan.

Members, R. M. Buch (Advocate); S. C. Mody.

IMPORTANT OFFICIALS

Chief Secretary, V. Ishwaran, I.C.S.

Revenue Secretary, K. S. Baneshubji.

Secretary, Education Department, D. M. Buch.

Secretary, Law Dept. & Legal Remembrancer, M. S. Dave.

Secretary, P.W.D. & Chief Engineer, Upendra Bhatt.

Secretary, Food & Agriculture, Dept., R. K. Trivedi.

Additional Secretary, Home & Services Dept., J. L. Hatthi.

Joint Secretary, Finance Department, G. T. Mehta.

Joint Secretary, Communications Department, Bhogilal Trivedi.

Deputy Secretary, Commerce Department, Janmadas G. Shah.

Deputy Secretary, Industries Department, G. F. Mankodi.

Deputy Secretary, Labour & Backward Class Dept., D. K. Badheka.

Director of Health Services, Col. K. Rai.

Director of Agriculture, Sursinhji.

Ag. Director of Information, R. B. Shukla.

Collectors, I. D. Dave (Gohilwad Division); R. S. Mane Patil (Zulawad Division); J. L. Johnpotta (Madhya Saurashtra); M. S. Jaykar (Halar Division).

Accountant-General, Adavi.

Inspector-General of Police, D. Shirole.

Registrar of High Court, S. J. Chhatpar.

Executive Engineers, C. J. Parekh (Gohilwad Division); D. V. Pancholi (Zulawad Division); V. M. Davishi (Madhya Saurashtra); M. D. Joshi (Halar Division); A. P. Mehta (Project Division).

SAURASHTRA CONSTITUENT ASSEMBLY

President, Deyashanker Dave.

(A) GOHILWAD DIVISION—(10)

Jaggiwan Shivlal Parekh (Bhavnagar City); Vrajlal Gokaldas Vora (Daseori-Sihor); Chhaganbhai Lalji Gopani (Sonoli Vala-Litha Lathi); Balwantray Gopalji Mehta (Bodad-Gadhra); Laxmidas Valabhabas Desai (Jadhvi); Keshavji Modi (Mahuva Taluka-Chok-Jathal); Premchand M. Masani (Shah); Mochji Ramji Kanbi (Kandla Region); Vajubhai Manilal Shah (Jorabadi); H. H. The Maharaja Sahab Bahadursinhji Mansinhji Gohel (Palitana).

(B)—ZALAWAD DIVISION—(6)

Harshadral Vithalraibhai (*Dhanganadhra*); Manharlal Mansukhlal (*Wadhvan*); Rasiklal Umdechand (*Limbi*); Darbarshee Chandrasinhji Kalubha Bhadiwa Talukdar (*Sayla*); Ghanshyamlal Chhotalal (*Lakhtar-Patdi*).

(C)—MADHYA SAURASHTRA DIVISION (12)

Jethalal Harikrishna Joshi (*Rajkot No. 1*); Balkrishna Dinmanishanker Shukla (*Rajkot No. 11*); Akbarali Amiji Jasdaniwalla, Virchand Panachand (*Jasdan-Atkot*); Namdar Yuvraj Shree Vikramsinhji Bhujraji (*Gondal*); Bhlumji Ruda Patel, Jayantilal Mohanlal

(*Dhoraji-Mandorna*); Gajanan Bhawanishanker Joshi, Markandral Kanalyal Desai (*Jetpur-Kunkavav*); Maharaj Kumar Shri Prasad Sinhi (*Amarsinhji (Wankaner)*); Jayantilal Narbheram (*Morri No. 1*); Amritlal Jadavji Mehta (*Morri No. 11*).

(D)—HALAR DIVISION—(8)

Uchharangrai Navalsanker Dhebar (*Jamnagar City*); Girdharlal Bhavanibhai Kotak (*Panchkoshi-Jadiya*); Maganlal Bhagwanji (*Khambhata-Kalyanpur*); Keshavji Arjan (*Bhanvad-Jam-Jodhpur-Dhrava*); Jadvaji Nathlal (*Kalavad-Latpur-Jala*); Mathuradas Gordhandas (*Porbandhar No. 1*); Malde Rana (*Porbandhar No. 11*); Chandra Sinhi Dip

Sinhji (H.H. The Thakor Sahab of Dholi) (*Dholi*).

(E)—ADMINISTERED AREAS (3)

Jaya Vajubhai Shah (*Mangrol*); Suragbhai Kalubhai (*Bubariawad*); Kantilal Lalshanker Hathli (*Manavadar-Sardargadh-Bantwa*).

(F)—JUNAGADH—(7)

Samaldas Gandhi (*Junagadh*); Ratilal A. Dani (*Vanthali-Kutiya*); Nambha Amersinh Rajguda (*Keshod-Shil*); Narayan Damji (*Veraval-Maliya*); Hamir Sharmar Patel (*Patan-Talala*); Pushaben Mehta (*Una*); Daya-shanker Dave (*Vishavadar-Bheshan*).

THE UNION OF TRAVANCORE AND COCHIN

THE Union of Travancore & Cochin was inaugurated on July 1, 1949: the Maharaja of Travancore is to act as the Rajpramukh of the new Union.

The total area of the Union is 9141.57 sq. miles; total population 7,492,893 and the total annual revenue nearly Rs. 135 lakhs.

The climate of the whole region is generally temperate and the rainfall heavy. The staple food of the people is rice, fish and tapioca. Agriculture forms the main occupation of the people. Among the important agricultural products grown in the Union are rice, tapioca, yams, beans, gram, pepper, rubber, ginger, turmeric, tea and cardamom. There are also to be found in the Union dense coconut plantations, together with fruit trees, such as areca, jack, tamarind, cashew and mango. The forests are well-wooded with teak, ebony, black-wood, rose-wood, jack and anjili. The fauna consists of the elephant, leopard, bison, bear, the sambar and a variety of small game.

Industrially the Union is comparatively well-advanced. There are many big and small industries to be found throughout the Union. The former Government of Travancore played a big part in the industrial life of the State and owned a ceramic factory for the manufacture of porcelain ware, electric goods, crockery, fancy articles and sanitary equipment like drainage pipes; sugar and chemicals for the manufacture of sugar and 260 varieties of pharmaceutical products; a rubber factory; an aluminium smelting factory; a glass factory and a plywood factory. All these factories were and are driven by cheap power obtained from the Pullivasal Hydro-electric Works. The State also produced refined salt on a commercial scale, and was able to export salt after meeting its own requirements at home. The area covered by the former State of Cochin is also well-advanced industrially; there are about 110 different kinds of factories to be found there. Besides, Cochin has a magnificent harbour which is expected to develop into one of the major ports of India.

Similarly the means of communication and transport are also highly developed throughout the Union.

The Union occupies a front rank among Indian States and Provinces in the matter of education. The literacy figures of this region are the highest in India, both among males as well as females. There are 4,219 educational institutions throughout the Union, imparting education to more than 9,30,000 students, of whom girls form more than 40 per cent.

THE COVENANT

The covenant signed by the Maharaja of Travancore and the Maharaja of Cochin slightly differs from the covenants signed by the rulers of other Indian States. In this Covenant provision is made for the Rajpramukh of the United State of Travancore and Cochin to take over the administration in the event of a breakdown. This provision is similar to Section 93 of the Government of India Act.

Another provision in the covenant relates to the administration of Devaswom (Maintenance of Temples). It will be an obligation on the part of the covenanting State of Travancore to contribute annually from its general revenue a sum of Rs. 60 lakhs towards the Devaswom Fund. Out of this fund Rs. 5 lakhs are to be contributed towards the expenditure of Sree Padmanabhaswami Temple at Trivandrum (the deity of the ruling dynasty in Travancore). The administration of the Devaswom will be in the hands of a specially constituted board of Trustees, consisting of one Brahmin, one non-Brahmin and one Harijan member of the Legislature. But the administration of the Padmanabha temple will remain in the hands of the Maharaja of Travancore.

Similarly, the Cochin Dewaswom Board (also provided for in the covenant) will administer the Devaswom and the Devaswom estates and property in Cochin.

The oath of allegiance to be taken by the Maharaja of Travancore presented a problem.

In conformity with the hereditary laws the Maharaja can take his oath only to God Padmanabha. Eventually a satisfactory solution was found. It is now decided that he will swear allegiance both to India's constitution and to that of the Travancore-Cochin Union and declare that he would work for both to the best of his faith and knowledge.

The members of the representative body of Travancore and the Legislative Assembly of Cochin will form the Legislative Assembly of the Union, and any vacancy will be filled as if no covenant had been entered into. The Legislature will have full powers to make laws for the United State, within the framework of the Covenant and the constitution of India. The Rajpramukh will have the power to promulgate ordinances for the maintenance of peace and order in the Union. He and the Council of Ministers will in the exercise of these functions, comply with the directions that may be given from time to time by the Government of India.

The continuance in service of the permanent members of the public services in both the States are guaranteed on conditions that are not less advantageous to them. Similarly pensions, etc. sanctioned by competent authorities are also guaranteed by the Covenant.

Unless sanction to that effect is previously obtained from the Rajpramukh, no proceedings, civil or criminal, can be instituted against any servant of the State in respect of any act done in the execution of his duty.

The Rulers of the two States will retain the power of suspension, remission of commutation of death sentences in respect of any person.

Trivandrum will be the capital of the Union and the Maharaja of Travancore as mentioned before will be Rajpramukh for life.

It was provisionally agreed that the following would constitute the Council of Ministers: T. K. Narayana Pillai, Miss Anne Mascarene, A. J. John, John Philipose, P. Govinda Menon, Ayyappan, Ikkanda Warriar, Kunjuranam, T. Abdullin and T. E. K. Madhavan.

THE UNITED STATE OF VINDHYA PRADESH

THE United State of Vindhya Pradesh lies between 22° 30' and 26° 10' N. latitude and 78° 10' and 83° 5' E. longitude and includes 35 Baghelkhand and Bundelkhand States of which Rewa is the biggest. The States are besides Rewa: Ajalgarh, Bhooni, Baraundha, Bijawar, Chhatarpur, Charkhari, Datia, Malhar, Nagod, Orchha, Panna and Samthar (Salute States) and Alhaura, Banka Bahari, Beri, Bhaisunda, Bhat, Bijna, Daurwal, Garrauli, Gaurihar, Jaso, Jigul, Kamta Rajaula, Khanaluhana, Kothi, Lugasi, Naigawan, Relai, Pabra, Paldeo, Sarila, Sohawal, Taraon and Tori Fatehpur (Non-salute States).

Vindhya Pradesh lies between the United Provinces in the north and the Central Provinces in the south. Beri, Datia, Jigul, Samthar and Sarila form islands in the U.P.

The formation of the United State of Vindhya Pradesh was decided on at a meeting of the Rulers of the individual States held at Nowgong on 13th March, 1948 when the Maharaja of Rewa and all the other 34 Rulers signed the covenant. The United State was inaugurated by Mr. N. V. Gadgil, Minister of Works, Mines and Power on the 4th April, 1948.

The population of the Union is about 36 lakhs, and the area 24,137 square miles. Hindus form an overwhelming majority of the population. The prevailing languages are Hindi and dialects called Baghelkhandi and Bundelkhandi. The main occupation of the people is agriculture. The capital of the State is Rewa.

There are 8 districts sub-divided into 31 Tehsils. Rewa, Satna, Shahdol and Sidhi districts form Baghelkhand division, while Bundelkhand division comprises the Districts of Datia, Tikamgarh, Chhatarpur and Panna, each division being under a Commissioner.

The soil is fertile and bears excellent crops. Wheat, Gram, Barley, Linseed, etc., are grown in the spring and rice, maize, Saman, Kodon, Cotton, Jajra, etc., in the autumn. Irrigation is mainly by Bandhs and wells.

MINERALS

Vindhya Pradesh has large mineral resources. The State is richly endowed with coal and building stone, especially limestone. Large deposits of corundum noted for their fine quality are found in Sidhi district. The diamonds of Panna are well known. Other minerals and rocks of economic importance, so far known to exist in this area, are iron ore, copper ore, lead ore, yellow ochre, felspar, fireclay, Sillimanite and bauxite.

Geologists believe that fresh minerals may be found in the Union as many minerals not yet found here are known to occur in other parts of India in similar formation. There are good prospects for the manufacture of cement, glass, paper, aluminium, heavy chemicals and synthetic petrol.

FORESTS

There are extensive forests which produce excellent timber. Enough bamboos and bagal

grass are also available for making paper pulp. There is a shellac factory at Umaria to convert lac found in the southern area into shellac.

The Rewa jungles are famous for their big game. Tigers are met with in considerable numbers, as also bears, panthers and wild buffaloes while Sambhar, Chikara and Roj abound.

COMMUNICATIONS

The Union is not well served by railways and communication is mostly by road. Satna (32 miles) is the railway station for Rewa, the capital of the Union, and is situated on the Great Indian Peninsula Railway which runs between Jukehi and Dabhaura. Another section of the G.I.P. connects some places in the Bundelkhand division with one another. The Katni-Bilaspur section of the Bengal-Nagpur Railway passes through the southern District of the Union for a distance of 138 miles including C.I.C. Railway from Anuppur.

There are not many metalled roads, and parts in the interior are sometimes cut off from one another during the monsoon. All the district towns are connected by road.

ARCHAEOLOGY

There are a number of places of archaeological interest in the Union, chief among them being Khajuraho and Orchha temples, Bandhogarh Fort, Chandrehe and Mandla. There are numerous waterfalls the most picturesque among them being the Chachal and Keotli.

EDUCATION

The percentage of literates to the total population is about 4. Literacy in urban areas ranges from 14 to 25. The number of educational institutions is increasing every year. A feature of the education of Vindhya Pradesh is that not only primary education, but education upto and including the high school sections is free throughout.

There are two Degree Colleges, two Intermediate Colleges, 18 High Schools, 26 A.V. Middle Schools, 136 Hindi Middle Schools and about 1,600 Primary Schools.

BUDGET

The estimated income for the current year is about 290 lakhs, the main heads of income being land revenue, forests and customs. The main heads of expenditure are Education, Police and P.W.D. The budget shows a deficit of about Rs. 10 lakhs.

POLITICAL SET-UP

To start with there were two Ministries, one for Rewa and the other for the remaining 34 States with headquarters at Nowgong. In May 1948 the States Ministry decided to have a common Ministry for the whole of Vindhya Pradesh. Capt. Avadhesh Pratap Singh formed a Ministry which continued to function till 15th April 1949 when the administration was taken

over by the Indian Government owing to mal-administration. Mr. N. B. Bonarji, I.C.S., who was the Regional Commissioner, was appointed as the Chief Minister.

Rewa is the Capital.

On July 20, 1948 the Raj Pramukh signed a revised Instrument of Accession on behalf of all the Rulers signatory to the covenant of June 1948, whereby the United States of V.P. acceded to the Dominion of India for purposes of all matters mentioned in List I and List III of the seventh schedule to the Government of India Act, 1935, except matters relating to taxation. This Instrument of Accession was accepted by the Governor-General of India on 13th September 1949.

ADMINISTRATIVE PERSONNEL

Raj Pramukh, His Highness Maharaja Adhina Bahadurvesh Martand Singh Ju Deo, Maharaja of Rewa.

Upraj Pramukh, Maharaja of Panna.

Military Secretary to Raj Pramukh, Lt.-Col. Ramyal Singh.

Private Secretary to Raj Pramukh, T. R. Babu.

Chief Minister, Hon'ble Shri S. N. Mehta, I.C.S.

Additional Minister and Chief Secretary, Rai Bahadur Pandit Brijendra Nath Chaturvedi.

Chief Justice, Rai Bahadur Phul Chand Mogha.

Inspector-General of Police, Shanker Dayal Shukla, I.P.

Secretary to Government, Revenue Department, Rai Bahadur Seth Badri Prasad.

Secretary to Government, Finance Department, Rai Bahadur Motan Behari Lal.

Secretary to Government, Industries Department, A. K. Watal.

Secretary to Government, Judicial Department, Pandit Vishveshwar Prasad Dubey.

Secretary to Government, Education Department, Pandit A. K. Tankha.

Cabinet Secretary, Ganvya Prasad Jain.

Commissioner, Baghelkhand Division, Kaulhaiya Lal Partholey.

Commissioner, Bundelkhand Division, B. S. Grewal, I.C.S.

Commissioner, Customs & Excise, Pandit Nand Kishore Dubey.

Chief Medical Officer, Lt.-Col. L. Oswald.

Chief Engineer, T. C. Guj.

Mining Adviser, J. C. Gupta.

Conservator of Forests, M. N. Bahuguna.

Director of Education, Dr. Hari Ram Misra.

Principal, Darbar College, Dr. A. P. Mathur.

THE JAMMU AND KASHMIR STATE

THE Jammu and Kashmir State constituting the extreme western section of the Himalayas, lies between 32° 17' and 36° 58' north latitude, and 73° 26' and 80° 30' east longitude. The total area of the State is 48,471 sq. miles—1,773 sq. miles more than the area of Hyderabad, and the population 4,021,616, with an average density of 84 per sq. mile. For administrative purposes, the State is divided into three provinces—Kashmir, Jammu and the Frontier.

Non-Muslims form about 23 per cent of the total population—a percentage slightly higher than the one which Muslims formed in India before the partition. Culturally both Muslims and Hindus belong to the same group. Consequently, they speak the same language and have common customs and conventions.

About 10.3 per cent of the total population is urban. There are 2 cities, 37 towns and 5,740 villages in the whole State.

From the point of history, much progress was made during the war years. The latest figures on the subject are not available. According to the 1911 census, there were 2,078 educational institutions in the State. About 228,000 persons were literate in 1911, out of whom 25,000 were females. This year the State has established a University of its own at Srinagar.

The State occupies an important position in the political geography of India as it has common frontiers with China, the U.S.S.R., Pakistan and Afghanistan.

EARLY HISTORY

About the beginning of the 14th century Rentschen Shah, a Buddhist fugitive from Tibet happened to capture power and occupy the throne of Kashmir. He then wanted to change his religion and adopt Hinduism. The Brahmins of the State refused to accede to his request. He therefore embraced Islam, and started a regular campaign to kill the Brahmins.

After Rentschen Shah came a long succession of sultans who, for more than two centuries, ruled Kashmir with an iron hand. They were followed by the Moghals. Then the Afghans captured power in 1750. In 1819 the Afghans were ousted by the Sikhs.

Gulab Singh, the great grand father of the present ruler, Hari Singh, ascended the throne in 1816. Gulab Singh was one of the most important generals in Maharaja Ranjit Singh's army, and after Ranjit Singh's death, became the Prime Minister of the Sikh dominion. At the time he had absolute control over Jammu, Ladakh and other adjoining territories and had spread his conquests to Kashmir to the extent that by 1846 he was the virtual ruler of that land. That year, in return for his neutrality during the Sikh wars and also for the payment of a small sum of Rs. 7,500,000, the British signed a treaty with him whereby they recognized his sovereignty over Kashmir. This treaty is called the Treaty of Amritsar.

AGRICULTURE

Kashmir Province has a delightful climate, though winter months are very cold. The maximum recorded temperature of the Kashmir

Valley is 99.3 degrees and the minimum 11.5°, or sometimes even higher, but comes down to 30° and even to 20 during winter. The average rainfall for the whole of the State is 28.45".

Forests hold an important place in the economy of the State. They yield fine wood of many varieties, medicinal herbs and also provide game and fodder for the cattle. The forest operations do not extend to the Frontier Province which forms three-fourths of the total area of the State. In the two remaining provinces, 10,865 sq. miles or about 50 per cent of their total areas constitute forest land.

Agriculture is the main occupation of the people. But the soil is not very fertile. Only 5.6 per cent of the total area is cultivable, and the remaining portion is full of mountains and deserts. The total amount of land actually under cultivation in the State is about 23,000,000 acres. The main crops grown are rice and maize, and in Jammu wheat and maize. The State on the whole is deficit with regard to food supply to the extent of about 31,000 tons annually.

INDUSTRY, MINERALS

Woollen textile manufacturing is the second biggest industry in the State. It gives employment to about 200,000 people, including both part-time and whole-time workers. Kashmir shawls, such as shawls, carpets, namdas and gabbas have a world-wide popularity. During the 18th and 19th centuries especially Kashmir shawls had a wide demand in England, and, as it was expressed at the time, 'adorned the proudest beauties in Europe and the rest of the world.'

Next in importance comes the silk industry. Kashmir silkworms are the largest in the world for a single unit of production, and produce one of the finest quality silks.

Papier-mache, silver-ware, and wood-carving are among the other minor industries of the State.

Woollen manufactures, silks, forest products such as timber, herbs, some chemicals, furs and skins, and fruit and vegetables are the main items of export, whereas food-stuffs, textiles, sugar and tea, spices and hardware form the main imports into the State.

The following is a list of the minerals found in the State: Coal, Lignite (possibilities of petroleum), Bauxite, Iron ore, Copper ore, Lead, Zinc, Nickel ore, Manganese, Gold, Arsenic, Chromite, Cobalt, Gypsum, Graphite, Kaoline, Bentonite, Fuller's earth, Marble, Slate, Scapolite, Serpentine, Barites, Corundum (Sapphire and Ruby), Beryl and Aquamarine and Tourmaline. There are other minerals too, suitable for glass manufacture. But it is not known, whether the exploitation of all these minerals is an economic proposition. Coal, Lignite and Iron ore and some other minerals are supposed to be in existence in fairly large quantities, and their exploitation has already been taken in hand.

Tourist traffic is one of the main sources of income both to the State and the people. It is estimated that before the trouble started in

Kashmir, about 40,000 people used to visit that place annually, spending about Rs. 1,50,00,000 during their stay of a few months in the Valley. Great efforts are now being made by the State to develop this traffic to the maximum possible extent.

TRANSPORT

The total mileage of roads maintained by the P.W.D. is about 2,651, out of which 562 miles are metalled, 620 unmetalled and the remaining mileage bridle paths. Jammu is connected with Srinagar by a fine motorable road of 203 miles. The State has only 16 miles of railway line that connects Jammu with Sialkot and is out of use at present. Being navigable, the rivers in Kashmir valley play a great part as means of transport.

The Pathankot Jammu road, 65 miles long, built in three months at a cost of about Rs. 3,00,00,000, was opened for traffic by the Prime Minister of India, on July 7, 1948. Considering the sort of country in which it was built, the road is regarded as a very remarkable feat of engineering. Three important bridges on the road, 2,500 ft., 2,000 ft., and 1,000 ft. long were also declared open on July 7, 1948.

The pre-war state budget used to vary generally between 2 crores and 3 crores. During the war the budget touched the peak of Rs. 7 crores. The average over the whole period however, comes to about Rs. 5 crores.

The main sources of income are customs, land revenue, forests, profits of silk reeling (which is a State monopoly), courts, etc., and the main items of expenditure are military, privy purse, salaries, public utility works, education, sanitation, etc.

ADMINISTRATION

Kashmir acceded to India on October 26, 1947. Simultaneously, to fulfil one of the conditions of the acceptance of accession by the Government of India, the Maharaja invited Sheikh Mohammad Abdullah, president of the All Jammu and Kashmir National Conference, to form an interim Government, and to carry on the administration of the State. The interim Government later changed into a full-fledged Cabinet, with Sheikh Abdullah as the first popular Prime Minister.

The Maharaja has temporarily withdrawn from the State and has handed over power to his 20 year old son who is to act during his absence as a constitutional ruler. The latter, Yuvraj Karan Singh, formally took over from his father on June 20, 1949.

COUNCIL OF MINISTERS

Prime Minister, Sheikh Mohammad Abdullah; *Deputy Prime Minister*, Ghulam Mohammad Bakshi; *Revenue Minister*, Mirza Mohammad Atzal Bex; *Development Minister*, Ghulam Mohammad Sadiq; *Health & Rehabilitation Minister*, Sardar Budh Singh; *Civil Supplies, Food and Local Self Government*, Pandu Shamal Sarat; *Finance Minister*, Girdhari Lal Dogra, *Education Minister*, Col. Peer Mohammad Khan.

THE HYDERABAD STATE

The Hyderabad State, also known as the Nizam's Dominions, forms the eastern portion of the Deccan. If Berar, for which the Nizam receives annual rental of Rs. 25 lakhs, is excluded, the State lies between 15° 10' and 20° 40' N. and 74° 35' and 81° 35' E, covering an area of 82,698 square miles. The population according to the 1941 census is 16,338,534. The languages spoken are Marathi, Telugu, Kanarese and Urdu.

The State may be divided into two fairly definite regions, the western, generally called Marathwada and the eastern called Telangana, although the State contains some Kanarese-speaking population as well. If a line were drawn from the confluence of the Tungabhadra and the Krishna in the south to the confluence of the Manjira and the Godavari in the north, and extended right up to the Hyderabad-Berar boundary, this would serve as a good demarcation of the two tracts. These regions differ not only linguistically but also in their physical formation; for the Marathwada is covered by trappean rock, while the Telangana has granitic and calcareous formation. The western trap or black cotton soil region (which is continued northward in Berar) is the land of wheat and cotton, while the granitic Telangana is the land of rice and jowar. Moreover, the former is covered with luxuriant vegetation, cliffs, crags and undulating hills, while in the granite and limestone region the hills are bare of vegetation and the land is covered with huge fantastic tors and boulders. Also in the east as the soil is sandy, the rivers dry up in hot weather, necessitating the storage of water in tanks and artificial lakes for purposes of irrigation.

COMMUNICATIONS AND TRANSPORT

The City of Hyderabad is the railway communications centre. From here lines radiate east, south, west and north. The line which goes east passes through Warangal and joins the Madras-Calcutta line at Bezawada. The line which goes south connects with the Madras-Bombay line at Guntakal. The western line links up with the Madras-Bombay line at Wadi. The northern line goes north-west rather than north and joins the main Bombay-Bhusaval line at Mammad.

The Nizam's State Railway operates a Road Transport Service which covers 4,597 miles. This includes suburban and district services. A large fleet of buses is maintained for this purpose. The State has 6,191 miles of road of which 4,560 miles are metalled.

There is also air service provided by a Company named the Deccan Airways Limited with an air mileage of 1,858. Hyderabad City is connected by air with Bombay, Nagpur, Madras and Bangalore. There are 9 aerodromes in the State, the chief of which are the Begumpet and Hakimpet aerodromes.

MINERAL RESOURCES

The mineral wealth of the State is its greatest asset, and the Hyderabad State has long been noted for its coal, gold, diamonds, iron and copper. Coal is now being mined at Singareni, Tandur, Yellandu, Sasti and Kothagudem, and there are good prospects of further discoveries of coal measures in the south Godavari valley. Modern gold mining operations were initiated in 1891 and continued until 1920, when they were stopped. They have now been revived. During the period when the mines were in operation those at Wandall, Huttu and Topoloddi, in the Raichur District, produced 225,222 ounces of fine gold. The question of restarting gold mining was first taken up ten years ago, but the requisite plant has only just arrived. The prospects are said to be excellent.

FOREST

The State possesses 9,466 square miles of forest. The forests in the east are extensive, while in the west they are as good as non-existent.

The principal forests are situated in the Districts of Asifabad, Warangal, Karimnagar and the Amarabad taluqa of the Mahbubnagar District. Forests capable of producing fine timber are confined to the eastern parts of Asifabad, Karimnagar and Warangal districts along the river Godavari. The State has 7,100 acres under afforestation and 1,000 families are engaged in afforesting the waste belts of the Marathwada Districts.

AGRICULTURE

Agricultural conditions differ considerably in the three main regions of the State. In the Telangana tract, which is generally full of hills and valleys, wet cultivation is carried on on a large scale, the water being supplied by tanks and irrigation reservoirs. The number of major tanks is 8,000 and of minor 25,000. Conditions in the Marathwada country are quite different as the rainfall is less and the soil so rich that the ryots are never anxious to grow wet crops. In some places advantage has been taken of the water obtainable from rivers and wells, and garden crops which are more profitable than dry crops, are extensively grown. Conditions in the Karnatake tract are much the same as in the Marathwada, and the ryots are not anxious to grow rice. This is the reason why the Telangana people generally use rice and the Marathwada and Karnatake people use wheat or jowar for their food.

There are usually four crops in the year in the Telangana, namely, *khajri*, *rahi*, *ab* and *talu*, but in the Marathwada, where irrigation sources are very limited, only two crops are raised, namely, *khajri* and *rahi*. These are known as 'dry crops' because they are cultivated without the help of artificial irrigation and depend on the monsoon rains. The principal *khajri* crops are yellow jowar, bajra, makai, cotton, guar, lachua, sawa, kodru, til, and pulses, such as moong, urad and kulthi. The principal *rahi* crops are cotton, white jowar, chenna (Bengal gram) jow or barley, kharad, als or linseed, tobacco, lak and peas. According to the latest statistics available, a total of 25,032,000 acres are under cultivation in the State, of which 1,419,000 acres are under paddy, 485,000 acres under wheat, 7,555,000 acres under jowar, 2,936,000 acres under groundnut and 2,156,000 acres under cotton. Land under irrigation in the whole State is in the neighbourhood of 1,794,000 acres.

INDUSTRIES AND TRADE

There are within the State 639 large-scale industrial organisations employing nearly 75,165 persons. The State has 6 cotton mills producing annually 108 lakhs pounds of cotton and 21,371,336 lbs. of yarn. The State Collieries produce 10,95,831 tons of coal annually. The sugar factory at Bodhan in the Nizamsagar area produces annually 16,372 tons of sugar and the Sirpur Paper Mills produce 4,218 tons of paper. The production of cement amounts to 150,070 tons; of power alcohol 3,22,060 gallons; of glass 14,221 tons; and of cigarettes 3,417,251,000. The mica mines in the State produce 0.3 cewts. of finished mica per year and the graphite mines produce 25 tons of crude graphite annually. Electric power produced in the State amounts to 59,927,161 units. Ten cities and towns are supplied with electric power and the number of consumers of power and lighting is 17,298. There are 209 registered joint-stock companies with a total authorised capital of O.S. Rs. 106 million, issued capital of O.S. Rs. 197 million and paid up capital of O.S. Rs. 104 million.

Small-scale and cottage industries consist of yarn spinning, cloth weaving, Patthan industry of gold embroidery, Aurangabad *Henna*, Mashru and Kanikhab; blanket making, cloth dyeing and printing, silk weaving, wool carpet and durry making, Ridiware, silver filigree work, Mirnat toy works, hand-made paper, metal industry, tanning, button industry, soap manufacture, cane work, brush work, mat making,

tusser work, clay work, brass industry, brick and tile making, carpentry, smithy, rattan work, biscuit making, fruit and vegetable processing, bangle manufacture, pottery and hosiery.

Hand-loom weaving is the most important cottage industry in the State. Next in importance and usefulness only to agriculture as a national occupation, this industry which is pursued by 3 per cent of the total population consumes imported yarn of the approximate value of Rs. 61,00,000 annually and clothes nearly half the population of the State.

The principal imports are piece-goods, yarn, salt, sugar and jaggery, fruits and vegetables, gold, silver, livestock, betelnut, silk, timber, copper, brass sheets and utensils, cinema films, mineral oils, motor cars and other vehicles. The principal exports are cotton, groundnuts, foodgrains, castor seed, linseed, sesamum, livestock, leather, oils and oil-cakes, coal and building material.

RECENT DEVELOPMENTS

When Indian troops entered Secunderabad on the evening of September 18, 1948, they found a people stricken by fear, a State empty of all beneficent activity. The administration was at a standstill; in the districts especially, utter chaos prevailed.

Today conditions have improved. The Military Government has disposed of the Razakars menace, and the people are returning to their homes.

Local officials also who left their stations during the police action are back at their posts. Following the pacification operations everywhere, except in the Nalgonda district and in parts of the Warangal district (where also, Communist activity is now on the wave) there is peace.

Among Razakars only the ringleaders are under arrest—those against whom no definite charges could be brought have already been released.

While the Indian Army is maintaining law and order another equally important limb of the Military Government, the Civil Secretariat, is being "spring-cleaned" with a view to toning up its general working and to bringing it into line with the Secretariat organizations in the provinces of the Indian Union. Secretariat reforms visualize the cutting of red tape, the speeding-up of work and improvement of efficiency, the elimination of superfluous expenditure, and the creation generally of a friendly and healthy atmosphere in Government offices.

The budget is undergoing a thorough overhaul at the hands of the Civil Administration. All items of extravagant expenditure are either to be deleted or to be drastically cut down.

To look after the interests of the working classes, a new Labour Department has been created. This Department has already drafted legislation on the lines of the Industrial Relations Act of Bombay, under which strikes would be virtually eliminated.

One of the immediate problems facing the Military Government is the rehabilitation of the thousands of evacuees who left Hyderabad during the crisis. The Government is helping to rebuild the houses of those whose homes have been damaged or destroyed, while those in need of cattle, agricultural implements and seed will be enabled to secure them. For this purpose provision has been made for loans amounting to Rs. 40,00,000. In addition a discretionary grant of Rs. 10,000 for each of the 16 districts has also been placed with the Civil Administrators.

Side by side with the administrative effort, steps are being taken to set up, as quickly as possible, democratic and popular institutions. Arrangements are in hand for the preparation

of electoral rolls so that a Constituent Assembly based on adult franchise may be elected as early as possible.

There is complete communal harmony evidenced by the fact that during the last two months several Hindu and Muslim festivals have been celebrated peacefully. Pujaris, mullahs, bishops and other religious dignitaries are performing their functions unhampered. The subventions granted to mosques, churches and other places of worship also continue.

HYDERABAD CABINET

Military Governor, Major-General J. N. Chaudhuri, O.B.E.

Chief Civil Administrator, D. S. Bakhle, I.C.S.

THE MYSORE STATE

MYSORE STATE is surrounded on all sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. The capital of the State is Mysore, which is also the residence of the Maharaja, and the headquarters of the Mysore University. The administrative headquarters are to Bangalore.

The area of the State is 29,474.82 square miles, the population 73,29,140 and annual revenue Rs. 10,75,82,000. For administrative purposes the State is divided into nine Districts.

Mysore has acceded to the Dominion of India under certain specified subjects and has sent its own representatives to the Indian Constituent Assembly.

The chief agricultural products are rice, ragi, sugar-cane, coffee, cocoanut, areca, cotton and mulberry.

Industries manufacturing iron and steel, cement, paper, sugar, cotton, and silk, soaps, chemicals and fertilisers, sandalwood oil, etc., thrive in the State. The only aircraft factory

in India is situated in Bangalore. Mysore is the principal gold producing centre in India.

Communications by road as well as by railway are well maintained throughout the State. There are 6,273 miles of road of which 5,051 miles are metalled. The State railway comprises 609 miles of metre gauge line and 102 miles narrow gauge line. There is also a tram line running for 36 miles. Mysore is also rapidly developing into an important air port.

The State is devoting special attention to post-war planning for which many schemes have been formulated. So far Government have sanctioned 80 schemes relating to agriculture, veterinary and animal husbandry, electrical, railways and medical and public health. Government have also ordered working out of details for the establishment of a rayon factory in the State.

ADMINISTRATION

The State has a Representative Assembly consisting of 310 members and a Legislative Council of 60 members.

The ultimate authority is the Maharaja who is assisted in the administration by an executive council consisting of the Dewan, a Chief Minister and eight other Ministers. The Ministers function as a cabinet with the Dewan and act on the basis of joint responsibility on all matters. The Ministry has initiated the setting up of a constituent assembly composed of 76 elected members of whom 5 are Muslims and 9 depressed classes, to frame the new constitution.

COUNCIL OF MINISTERS.—*Dewan*: DIWAN BAHADUR SIR A. RAMASWAMI MUDALIAR, K.C.S.I.; *Chief Minister*: K. CHENGALARA RAY REDDY, B.A., B.L.; *Minister, Finance and Industries*: H. C. DASAPPA, B.A., I.L.B.; *Law and Labour*: K. T. BHASHYAM IYENGAR, B.A., B.L.; *Public Works and Agriculture*: H. SIDDIAH, B.A., I.L.B.; *Home*: T. MARIAPP, B.A., I.L.B.; *Local Self-Government*: R. CHENNIGARAMIAH; *Public Health and Excise*: MAHMOOD SHERRIFF, B.A., I.L.B.; *Education*: D. H. CHANDRASEKHARAIYA, B.A., I.L.B.; *City Municipalities and Muzrai*: RAJA-SIVASAKTA P. SUBBARAMA SETTY.

INDIAN REPRESENTATIVES ABROAD

Ambassador in China, His Excellency Sardar K. M. Panikkar.

Ambassador in U.S.S.R., Moscow, Sir S. Radhakrishnan.

Ambassador in Iran, Tehran, His Excellency Mr. Ali Zahoer, Bar-at-Law.

Ambassador in Nepal, Kathmandu, Chandreshwari Prasad Narain Singh.

Ambassador in Burma, Rangoon, His Excellency Dr. M. A. Rau, Bar-at-Law.

Ambassador in Afghanistan, Kabul, His Excellency Wing Commander Rup Chand.

Ambassador in Turkey, Ankara, His Excellency Diwan Chaman Lal.

Ambassador in the United States of America, Washington, D.C., Her Excellency Shriemati Vijayalakshmi.

Ambassador in France, Paris, His Excellency Sardar H. S. Malik, C.I.E., I.C.S.

Charge d' Affaires in Belgium, Brussels, B. F. H. B. Tyabji, I.C.S.

Envoy Extraordinary and Minister Plenipotentiary in Siam, Bangkok, Bhagwat Dayal.

Envoy Extraordinary and Minister Plenipotentiary, Berne (Switzerland), D. B. Desai.

Charge d' Affaires, in Brazil, Rio de Janeiro, Atiab Rai.

Consul-General in Indonesia, Batavia, Dr. S. C. Alagappan.

Consul-General in Shanghai, vacant.

Consul-General in the French Establishments in India, Pondicherry, Mirza Rashid Ali Bang.

Consul in Indo-China, Saigon, vacant.

Ambassador in Holland, His Excellency Mohan Sibus Mehta.

Ambassador in Czechoslovakia, Prague, His Excellency N. Raghavan, Bar-at-Law.

Ambassador in Italy, Rome, His Excellency Diwan Ram Lal.

Consul-General in the Portuguese Possessions in India, Nova Goa, Major Ashoka N. Mehta.

Ambassador to Egypt, Cairo, His Excellency A. A. A. Fyzee.

Envoy Extraordinary & Minister Plenipotentiary in Sweden, Stockholm, R. K. Nohra, I.C.S.

Ambassador to Argentina, Buenos Aires, His Excellency Jamshed S. Vesugat.

Head of the Indian Liaison Mission, Tokyo, Dr. P. P. Pillai.

Head of the Indian Military Mission, Berlin, Maj. Gen. Khan Chand, I.C.S.

Consul-General, Kashmir, Capt. R. D. Sathe.

Political Officer, Sikkim, H. Dayal, I.C.S.

Consul-General in New York, R. R. Sakseena.

Permanent Representative of the Government of India with the United Nations, Indian Delegation's Office, New York, Sir B. Nursing Ram.

High Commissioner in Canada, Ottawa, Prince K. S. Dubeek Singhji.

High Commissioner in Ceylon, Colombo, V. V. Siri, Bar-at-Law.

Agent to the Government of India in Ceylon, Kandy, I. P. M. Menon.

High Commissioner in the United Kingdom, London, V. K. Krishna Menon.

High Commissioner in Pakistan, Karachi, Dr. Sita Ram.

Deputy High Commissioner in Pakistan, Lahore, Y. K. Puri, I.C.S.

Deputy High Commissioner for India in Pakistan, Dacca, S. K. Basu.

High Commissioner in Australia, Canberra, M. C. Col. Dayasingh Boli.

Secretary, High Commissioner's Office, Cape Town, R. T. Chari, I.C.S.

Representative of the Government of India in Malaya, Singapore, J. A. Thivy, Bar-at-Law.

Agent of the Government of India in Malaya, Kuala Lumpur, T. G. Nataraja Pillai.

Commissioner for the Govt. of India in East Africa, Appa B. Pant, Bar-at-Law.

Consul-General of India, San Francisco, S. K. Kirpalani, I.C.S.

Consul of India in Saudi Arabia, Jeddah, Prof. Abdul Majid Khan.

Consul of India in Soubgalla, South Siang, S. R. Aiyer.

Vice-Consul of India, Medan, Gopal Das Sethi.

Vice-Consul of India, Zahidan, A. T. G. Wilson.

Commissioner for the Govt. of India in British West Indies, Port of Spain (Trinidad), Prof. Satya Charan Shastri.

Commissioner for the Govt. of India Mauritius, Port Louis, Dharam Vash Dev.

Commissioner for the Govt. of India in Fiji, Suva, S. A. Watt.

Consul-General at Kashgar, Sinkiang China, R. D. Sathe.

Indian Minister to the Holy See, Philadelph Desai.

Envoy Extraordinary to London, P. A. Menon.

Ambassador in Holland, His Excellency Mohan Sibus Mehta.

Indian Embassy in Pakistan

After the division of the sub-continent and the establishment of Pakistan, the Government of India nominated on August 11 Mr. Sri Prakasa, a well known Congress leader from the United Provinces, as their High Commissioner in the new Dominion. Soon afterwards, Sardar Sampuran Singh was appointed as Deputy High Commissioner at Lahore. Mr. V. Viswanathan, I.C.S., one of Indian civilians with a long diplomatic experience was sent to the Pakistan capital as the Deputy High Commissioner to organise the Indian High Commissioner's office. At about the same time, Mr. K. L. Punjabi, I.C.S., was named as the Deputy High Commissioner at Peshawar but subsequently, he was transferred to Lahore his place being taken by Major B. K. Kapur as Liaison Officer at Peshawar.

The offices at Lahore and Peshawar were mainly engaged in tackling problems arising out of the mass exchange of population between East and West Punjab and N.-W. Frontier Province. The actual work of evacuation was carried out in that region by the Military Evacuation Organisation. These two offices were also concerned with the difficult problem of settling claims of evacuees' abandoned property in the two Dominions. Even after evacuation of Government personnel and refugees, the problem of abducted women remained to be solved and both India and Pakistan have shown exemplary co-operation in handling this

and other allied inter-Dominion problems. In the Frontier Province, there are still some small Hindu pockets which are being cleared.

IN KARACHI

The High Commissioner's office in Karachi is intended to be India's Embassy in Pakistan and from the very beginning concerned itself with work of a purely diplomatic nature. Owing to acute housing scarcity in the Pakistan capital, both the High Commissioner and his deputy were forced to carry on their work in their rooms in a private hotel, but subsequently, they moved to Damodar Mahal, a palatial building, situated in the new Bander Road extension of Karachi.

The first problem that this office had to tackle was the evacuation of 15,000 Central Government personnel scattered in Sind, Baluchistan, North-West Frontier and Bahawalpur. A transfer bureau was set up and evacuation of all personnel was completed on November 1, 1947. Although there was no rioting on the Punjab scale in these areas there were widespread outbreaks of violence in Quetta, Bahawalpur and Hyderabad (Sind) which led to a large exodus of Hindus and Sikhs from Sind beginning with August 15, 1947. The migration slackened about the beginning of December, but unfortunately, the disorders at Hyderabad (Sind) on December 17 and much more widespread disturbances in the Pakistan capital itself on January 6, 1948, led to a second wave of migration. With no military organisation to assist them, the energies of the officers of the Indian Embassy were taxed to the full as a lakh of Hindus and Sikhs had to be moved from Sind to India every month by train and sea and even by air. This large-scale evacuation raised questions relating to evacuees' property and allied problems. No custodian of evacuee property was appointed in Sind, but economic rehabilitation officers in Sind and Baluchistan carried out the functions of custodians of evacuee property. Although no accurate estimate of non-Muslim evacuee property in Western Pakistan could be had at present, it must be remembered that as the entire trade and commerce were in their hands in this part of the sub-continent, the evacuees' economic stake must be very considerable.

One of the redeeming features of the Indo-Pakistan relations since partition is the way both Governments had co-operated in solving their mutual difficulties in regard to food. India's Food Controller, Major-General A. C. Arnold who was mainly responsible for this, had vacated his office of Regional Food Controller in Karachi in March 1947.

The following are among the more important members of the Indian High Commissioner's staff in Pakistan:

IN KARACHI

Deputy High Commissioner: M. K. Kirpalani.

Food Controller: Vacant.

Secretary to the High Commissioner: B. K. Massand.

IN LAHORE

TRADE COMMISSIONER SERVICE

UNITED KINGDOM

THE United Kingdom Trade Commissioners are the representatives in India of the Board of Trade. The department of the Board which is mainly concerned with external economic relations is the Commercial Relations and Exports Department which is responsible for general external commercial policy and for the promotion of export trade.

In foreign countries the counterpart of the work performed by Trade Commissioners is undertaken by Foreign Service Officers in Commercial Diplomatic and Consular posts. The Board of Trade is associated with the Foreign Office in the staffing of commercial posts in foreign countries. But the trade policy of the United Kingdom is a matter for the President of the Board of Trade acting, as do all other Ministers, in consultation and agreement with those of his colleagues whose interests are also concerned.

Function of United Kingdom Trade Commissioners. The primary duty of the United Kingdom Trade Commissioners consists in the giving of assistance to governments, organisations, firms and individuals who wish to establish contact with sources of supply in the United Kingdom. The Trade Commissioner, in addition, himself collects information in regard to trade opportunities which may arise within his territory. He reports to the Board of Trade on all matters affecting the trade, industry and commerce of the area entrusted to him. He is responsible for maintaining close personal relations with ministers and officials of governments in his area, with chambers of commerce, trade associations and the principal importers and manufacturers. He aims at visiting the principal commercial centres, reporting upon foreign competition, on financial and trade conditions, and new legislation affecting trade. He is also expected to maintain a regular flow of commercial information of all kinds to the Board of Trade, to maintain active correspondence with firms in the United Kingdom who wish to extend their trade, and to give all possible assistance to representatives of United Kingdom firms who may visit this territory. The senior U.K. Trade Commissioner in India acts in addition as Economic Adviser to the U.K. High Commissioner.

The United Kingdom Trade Commissioners in India endeavour to maintain contact with United Kingdom representatives and agents in India. The offices are equipped with a wide range of directories and reference books of all kinds, including libraries of catalogues of the leading United Kingdom manufacturers. Firms desiring information with regard to specific manufacturers are invited either to call personally or to communicate their requirements in writing. It is hoped that local importers and buyers will not hesitate to make more extensive use of the information available in these offices, and to bring to the attention of the United Kingdom Trade Commissioners any cases where difficulties may have arisen over the harmonious development of trade between the United Kingdom and India.

Staff:

Delhi—Bowland Owen, United Kingdom Senior Trade Commissioner in India.

L. Harrison, Principal United Kingdom Trade Commissioner at Delhi.

E. A. Midgeley, M.B.E., United Kingdom Trade Commissioner.

J. N. McKelvie, United Kingdom Trade Commissioner.

Telephone No. 23005.

Telegrams: TRADCOM.

Madras:—D. A. Bryan, O.B.E., United Kingdom Trade Commissioner for S. India.

Address: Rutland Gate, Madras.

Telephone No. 84448.

Telegrams: TRADCOM.

AUSTRALIA

Australian Government Trade Commissioners are stationed at Bombay and Calcutta, and an appointment will soon be made to Karachi.

The territory covered by the Australian Trade Commissioner Service in India and Pakistan includes the Dominions of India and Pakistan, Burma, Nepal, the Persian Gulf area and Aden.

The Trade Commissioners deal with enquiries from all the above mentioned areas, their main function being concerned with putting Australian exporters and manufacturers in touch with organizations and merchants interested in importing Australian merchandise.

They maintain a flow of trade information to the Department of Commerce, Australia, for dissemination to Australian exporters and information on specific openings for trade, including Government contracts and tenders for which Australian products might be suitable. They watch the demand for specific goods and give information concerning competition to be met in their supply. An important function is to provide details of credit conditions and terms of payment. Market surveys on specific commodities are prepared and sent for the information of trade interests in Australia.

Information and literature is available on all aspects of trade with Australia.

The following is a list of Australian Trade Commissioner offices operating in the Indian Ocean Zone:—

Australian Government Trade Commissioner, Bombay: 8, D. Shubart. **Address:** Menkwa Building, Outram Road, Bombay, P.O. Box 217.

Australian Government Trade Commissioner, Calcutta: A. G. Hard. **Address:** 2 Fairlie Place, Calcutta, P.O. Box 303.

Assistant Trade Commissioner: A. R. Taysom.

CANADA

The Canadian Department of Trade and Commerce comprises, as one of its principal divisions, the Foreign Trade Service, formerly described as the Commercial Intelligence Service. This service had its beginnings prior to the establishment of the Department in 1892 and has undergone considerable expansion. Before the war it included a headquarters staff in Ottawa and thirty-four Trade Commissioner offices abroad, seventeen of these being in British and an equal number in foreign countries. Several of these were closed during the war

years but are being progressively reopened and at the beginning of 1949 the service comprised offices in the United Kingdom, the Dominions, Newfoundland, Elre, the West Indian Colonies, the United States, Cuba, Egypt, the principal countries of Central and South America, the Netherlands, Norway, Sweden, Portugal, France, Belgium, Italy, Turkey, Greece, India, China and other centres of the East. The service still continues to expand both in respect to offices and trained personnel in order to assist in the transition of Canada's extensive wartime trade to a normal commercial basis.

In those countries where Canada has established diplomatic representation the Trade Commissioner's office has been incorporated into the Canadian embassy or legation.

The office of the Canadian Trade Commissioner for India, Burma and Ceylon was established in Calcutta in 1922 and was transferred to Bombay on April 1st, 1940. In the summer of 1947, the office of the High Commissioner for Canada was established at New Delhi where a Commercial Section is also located. Since September 1947, a Trade Commissioner office has been established in Karachi to look after the requirements of the new Dominion of Pakistan. The services of Canadian Trade Commissioner offices are at the disposal of Canadian firms interested in the export of their goods to the Indian, Pakistan, Burma and Ceylon markets and to Canadian manufacturers and others who may be interested in the purchase of local products. These offices are also in regular touch with import houses in these countries and are prepared to co-operate as well with exporters interested in the Canadian market.

Canadian Trade Commissioner: R. K. Thompson.

4, Aurangzeb Road, New Delhi.

Commercial Secretary: Richard Grew, P. O. Box 11, Cable Address: "CANADIAN", New Delhi. **Gresham Assurance House, Mint Road, Bombay, P. O. Box 886.** Cable Address: "CANADIAN", Bombay.

SWITZERLAND

Trade Commissioner: E. W. Duttcher. **Address:** Gresham Assurance House, Sir P. Mehta Road, Fort, Bombay.

THE PRESS

BEFORE 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and stipulated a few other minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the 1857 upheaval, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 133A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which it was explained was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than one consultation with Local Governments, a Committee was appointed in February 1921 after a debate in the then Central Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report (for details see 1948 Year Book).

In general the laws which affect the Press in India today are Press and Registration of Books Act, 1867; the Indian States (Protection against Disaffection) Act, 1922; the Indian Official Secrets Act No. XIX of 1923; the Indian Press (Emergency Powers) Act No. XXIII of 1931; the Foreign Relations Act No. XII of 1932; the Indian States Protection Act No. XI of 1934; Sections 124-A, 153-A, and 505 of the Indian Penal Code; Sections 69A-69G of the Criminal Procedure Code; Sections 19 and 181A of the Sea Customs Act No. VIII of 1878; Sections 26, 27A-27D in the Indian Post Office Act No. VI of 1898; Section 5 of the Indian Telegraph Act; Provisions in Provincial Public Safety or Maintenance of Public Order Acts dealing with censorship, control of publications and import, possession and conveyance of documents.

HISTORY

The newspaper Press in the sub-continent is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. More than a century and a half has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much

behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much later than was the case in Calcutta. In Calcutta the English were on sufferance before Plassey, but in Bombay they were absolute masters after 1685, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

FIRST NEWSPAPER

The first newspaper was called *The Bengal Gazette* which, better known from the name of its founder as *Hicky's Gazette or Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy his bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Bazar*, which came into existence only a little later. No fewer than five papers followed in the many years, the *Bengal Gazette* and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the West Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stockholder in 1836.

From its commencement the press was jealously watched by the authorities who put serious restraints upon its independence and pursued a policy of discouragement and rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules being immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Sir Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days, availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press

in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to *The Times of India*.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of press in Indian-owned English and language papers. The first newspaper in any Indian language was the *Samachar Darban* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengal. It received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely Gujarati paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Indian language Press which at the present day is by far the largest part of the press in India, numbering nearly 800 papers.

From 1835 to the upheaval of 1857 the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During the 1857 upheaval its freedom had to be temporarily controlled by the Gagging Act which Ganning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more comparatively free.

Macaulay made sedition a penal offence when he drafted the Penal Code, and journalism became a hazardous undertaking particularly with the growth of the freedom movement in the country. Subsequent history may be summarized in one sentence. Every time a campaign was launched against the Government some kind of public safety measure or emergency ordinance was at once put through; when pauses in the campaign occurred the laws were relaxed or abrogated.

I. AND E. NEWSPAPER SOCIETY

An important development in connection with newspapers in the sub-continent took place in 1939, when the Indian and Eastern Newspaper Society was formed. The Society's principal objects are as follows:—(a) To act as a central organisation of the Press of India, Burma and Ceylon; (b) To promote and safeguard the business interests of members as affected by the action of Legislatures, Governments, the Law Courts, municipal and local bodies and associations or organisations commercial or formed for any other purpose; (c) To collect information upon all topics having a practical interest for members and to communicate the same to them; (d) To promote co-operation in all matters affecting the common interests of members; (e) To hold periodical conferences of its members to discuss and determine action on matters of common interest; (f) To make rules to govern the conduct of its members in specified matters, to provide penalties for the infringement thereof, and to provide means of determining whether there has been such infringement; (g) To maintain a permanent secretariat in India which should watch over the interests of members and should permit of a constant interchange of information and views; (h) To do all such other things as may be conducive or incidental to the attainment of the aforesaid objects.

EDITORS' CONFERENCE

During 1940 a Conference of Editors was called by Mr. K. Srinivasan of *The Hindu* to consider the Government of India's restrictions on the Press under the Defence of India Act in

connection with the Congress satyagraha movement. The Conference was held at Delhi and formed itself into a body representing the Editors of Indian newspapers.

At a subsequent meeting the All-India Newspaper Editors' Conference adopted a constitution with the following aims and objects:—(a) To preserve the high traditions and standards of journalism. (b) To serve and safeguard the interests of the Press in regard to the publication of news and fair comment. (c) To secure all facilities and privileges to the Press for the due discharge of its responsibilities. (d) To represent the Press in India in its relations with the public and public institutions and particularly in its relations to Government to set up Committees who would act as liaison between the Government and the Press as a whole. (e) To establish and develop contacts with Associations with similar objects in other countries.

The Standing Committee of the Editors' Conference which is representative of the editors of English and Indian language newspapers and news-agencies keeps itself in touch with the Government of India and its meetings are generally attended by a spokesman of Government.

The general outlines of the code to be observed by the editors are laid down by this Committee for the whole Dominion.

Provincial Press Advisory Committees function in most of the provinces and a senior official if not the Minister in charge, of the Home Department keeps himself in close touch with the proceedings of the Committee. From time to time procedure is laid down by these Committees regarding restraints to be observed in publication or dissemination of matters affecting peace and security.

PRESS LAWS COMMITTEE

At the end of the war there was a general demand that Press laws should be brought in line with those prevailing in progressive countries and the Government of India appointed a committee of officials and non-officials on March 15, 1947 to review Press laws and suggest reforms. The Committee consisted of the following: Rai Bahadur Ganga Nath (*Chairman*), Nawabzada Khurshid Ali Khan, Rai Bahadur Sri Narain Mohdun, Sri Prakash, Dywan Channulal, Siddique Ali Khan, K. Srinivasan, S. A. Brelvi, Tushar Kanti Ghosh, G. V. Bedekar (*Secretary*). Evidence was submitted by Governments, press organizations and individual journalists. While the Provincial Governments were in favour of retention of the laws and even tightening some of them journalistic opinion on the whole seemed unfavourable. Thus the U.P. Hindi Journalists' Conference asked for the repeal of all laws relating to sedition. The Cawnpore Hindi Journalists' Association took up much the same attitude. The Frontier (N.W.F.P.) Journalists' Association demanded that laws which curtail freedom of the Press should be abolished. The Vice-President of the Delhi Muslim Journalists' Association stated that while the Press Act of 1931 and the Provincial Public Safety Acts could remain the Princes Protection Act should be abolished. The A-I. N. E. C. the most authoritative of all the bodies made a series of recommendations which could be summarized as follows:—The Post Office Act, the Criminal Procedure Code provisions and the so-called Censorship Act could be left alone. Section 5 of the Telegraph Act should be amended so as to free messages intended for publications in newspapers. In respect of sec. 124-A, I.P.C. the trial of sedition cases must be by jury. Trial of cases under Section 153-A may be made summary and in camera to avoid the evil effects of additional publicity. Sec. 144 of the Cr. P. C. should not be used to order editors not to publish news. The laws of contempt should be so amended as to permit bona fide reporting of judicial proceedings. Parliamentary reports should be made statutorily privileged. The conference gave it as its opinion that there was no justification for the humiliating restrictions imposed upon the Press by the

various Provincial Public Safety Acts and said that there was need for guarantee against the powers under the Acts being abused. The operations of the Official Secrets Act, 1923 should be restricted to cases giving information to enemy in times of war and publication of confidential Government information likely to imperil public safety. The memorandum finally asked for outright repeal of the Indian States Act, 1922, Princes Protection Act, 1934, and Foreign Relations Act, 1932, and demanded constitutional guarantees for the freedom of the Press with a clause in the fundamental rights section that as in America the legislature here may pass no laws to restrict the freedom of the Press. Where there is no incitement to violence communication of news and expression of opinion should be free.

THE REPORT

The Committee which published its report on August 19, 1948 commended the repeal of the Indian Press (Emergency Powers) Act, 1931 but some of the provisions of the Act were to be incorporated into the ordinary law of the country.

Other recommendations of the Committee are the exemption of the Press from Section 144 of the Criminal Procedure Code and the provision of a separate law, if necessary, for dealing with the Press in urgent cases of apprehended danger and the amendment of Section 124-A, Indian Penal Code, so that only incitement to violence against Government established by law would be treated as sedition.

The report includes an exhaustive historical review of the press laws of India, a chapter on laws governing the Press in the principal countries of the world and a comparison of those with the Indian Press Laws and also an examination of the Press Laws of India with reference to the fundamental rights formulated by the Constituent Assembly of India and a chapter on the rights and responsibilities of the Press.

The Committee have also recommended that an explanation should be added to Section 153-A of the Indian Penal Code (promoting enmity between classes) to the effect that it does not amount to an offence under that section to advocate a change in the social or economic order provided such advocacy does not involve violence.

Another recommendation of the Committee is that the provisions of the Indian Telegraph Act and the Indian Post Office Act which relate to interception should be amended to provide that actions and orders of subordinate officers are reported to and reviewed by responsible Ministers of Government.

Repeal of the Indian States Protection against Disaffection Act, 1922 and the Indian States (Protection) Act, 1934, has also been recommended.

The Committee are of the view that while the Foreign Relations Act, 1932, should be repealed, more comprehensive legislation should be undertaken to make provision on a reciprocal basis for protection of heads of foreign States, foreign Governments and the diplomatic representatives in India from defamatory attacks.

Lastly, the Committee have recommended that before taking action against the Press under emergency legislation, Provincial Governments should invariably consult the Press Advisory Committee or similar body.

The report is signed by all members, subject to certain dissenting views expressed by Mr. Brelvi and Mr. Srinivasan. There are separate notes by Diwan Chaman Lal, the Hon. Mr. Mohanlal Saksena and Mr. Tushar Kanti Ghosh.

In his note, Diwan Chaman Lal expresses the view that Government should take serious notice of the tendency towards the formation of monopolies in connection with newspaper production and news agencies and advocates the setting up of a National News Agency controlled by an independent public authority.

In regard to monopolies and cartels in the production of newspapers, Diwan Chaman Lal is of the view that steps should be taken to prevent concentration in the hands of "big business" of a series of newspapers. He also expresses the opinion that the law of defamation and libel is entirely inadequate and needs to be strengthened and that the penalties should be more severe.

In the second note, Mr. Tushar Kanti Ghosh expresses the view that the name of the editor should, as now, continue to be published in papers and that the editor alone should be held fully responsible in respect of matter appearing in his paper. Mr. Ghosh is of the view that proceedings against a newspaper under Section 124-A, I.P.C. (Sedition) should be tried with the help of a jury and that no prosecution should be encouraged in respect of any printed matter unless it amounts to clear incitement to violence. He also expresses his opposition on principle to any proceedings in a court of law being conducted in camera except in grave emergencies.

Mr. Mohanlal Saksena in his note expresses the view that the Official Secrets Act should be confined only to matters which must remain secret in the interest of the safety of the State. He thinks that the Act should be amended accordingly and specific provision should also be made that powers under the Act shall not be put into operation without the consent of the Minister concerned.

RECENT DEVELOPMENTS

The year witnessed the death of Syed Abdullah Brelvi on January 9. Mr. Brelvi was editor of *The Bombay Chronicle* for twenty-five years and was an influential figure in the press world. There were a number of strikes in newspaper offices, the most interesting being the one at Surat where press owners combined to bring out three Gujarati newspapers composed and printed by themselves. Trouble in newspaper offices in general led to the appointment of committees in two provinces C.P. and Berar and the United Provinces to investigate conditions in newspaper offices. Two other developments which ought to be mentioned as they have some importance for the future are the establishment by the United Press of a full teleprinter service on June 1, 1948, and the laying of the foundation stone of a factory, the first of its kind in India to manufacture newsprint. This factory is owned by a company called the National Newsprint and Paper Mills Ltd. and will be located at Chandi in the C.P. The factory will start working before the end of 1949 and in the initial stages will produce 100 tons of newsprint a day.

There was some trouble between newspapers and provincial authorities which resulted in the authorities taking action against a number of papers under the various public safety measures. Action generally took the form of restraining offenders from publishing news or comment relating to specific questions such as investigation into crime, civil disturbance, communal situation, relations between India and Pakistan or between India and an Indian State. Action also took the more drastic form of ban on newspapers. For instance, the Government of East Bengal banned the *Patrika* (April 1, 1948), the Government of Bombay banned the *Jung* of Karachi (April 8, 1948), a whole bunch of Karachi newspapers (May 14, 1948), and the *Civil and Military Gazette* of Lahore (Oct. 7, 1948). The Government of Pakistan confiscated copies of the *Frontier Leader*, the official organ of the Defence services of India (June 30, 1948) and the Government of India put a ban on the *Dawn* of Karachi (Sept. 3, 1948). The Government of Bombay also carried out a raid on the New Age printing press where the *People's Age*, the organ of the communist Party of India is printed (April 26, 1948).

INTER-DOMINION AGREEMENT

There was a general feeling, on the whole, that newspapers could play a part in promoting good will and understanding between India and

Pakistan, and attempts were made to draw up a code with this end in view, a code which newspapers in both the Dominions were to strictly observe. Thus a group of journalists from East and West Punjab met in Simla on April 29, 1948, in the course of a good will tour and decided to appoint a joint committee to ensure that the code which the meeting had drawn up was observed by newspapers in East and West Punjab. An event of much greater significance was the conclusion of an agreement between the Governments of India and Pakistan covering the whole sub-continent. At the conference at Calcutta held early during the year the two Governments agreed that in order to create a better atmosphere they would take steps in co-operation with the representatives of the Press to ensure that (1) the press of one Dominion did not indulge in propaganda against the other Dominion, (2) did not publish exaggerated versions of the news of a character likely to inflame or cause fear or alarm to the population or a section of the population in either Dominion, and lastly (3) did not publish material likely to be construed as advocating a declaration of war by one Dominion against the other Dominion or suggesting the inevitability of war between the two Dominions. It is hoped that if the press in the two Dominions carried out its obligations in the spirit of the agreement arrived at between the two Governments the relations between them would vastly improve.

P.T.I.-REUTER

One of the most important developments of the year in so far as it relates to the press is the partnership agreement concluded between Reuters Limited and the newly established Press Trust of India Limited. The Agreement became effective on February 1, 1949.

The Associated Press of India Limited, a Reuter subsidiary Company which for almost 50 years has collected and distributed the internal news in India, is transferred to the Press Trust of India Limited.

The Press Trust of India Limited becomes a partner with the newspapers of the United Kingdom, Australia and New Zealand in the ownership of Reuters. It is represented in Reuters by a trustee and a director and it becomes a party to the Reuter Trust.

The agreement is governed by a preamble as follows:—

"Both parties declare that they are news agencies serving no other purpose than the dissemination of truthful unbiased news, that they are free from any Government or tendentious control and that the news which they supply to each other shall be compiled and selected solely for its objective news value. They have entered into this agreement in full accord and understanding as to the basic principles of integrity of news.

"They have decided that it is right that the internal news agency of India, hitherto owned and managed by Reuters, be transferred to the ownership and control of the newspapers of India acting together through the Press Trust of India.

"Moreover, they have agreed that it is in the best interest of the press of India, the United Kingdom, Australia and New Zealand that the Press Trust of India should share in the ownership of Reuters and take an active part in organising the collection and distribution of world news in the international field."

By this agreement Reuters Limited are handing over as a running concern to the Press Trust of India, which is owned by Indian newspapers, the whole Associated Press internal news service organisation in the country, while at the same time the Press Trust of India is entering into a partnership with Reuters as part and parcel of that organisation, holding—as does Australia for the Far East and the Antipodes—primary responsibility for the organisation of foreign news services for a large area of which

this country will be the centre. Apart entirely from the great national advantage this offers in according India participation in a worldwide news organisation which would take many years and a prohibitive outlay to build up independently, this friendly business arrangement on a no profit basis throws on the Indian Press a valuable and constructive responsibility for the assurance and defence of a full supply, in and out, of objective factual news.

Central Press Advisory Committee: J. N. Sahani, J. K. Cowley, P. D. Sharma, Deshbandhu Gupta, B. Shiva Rao, H. A. Zubeiri, Ram Gopal.

The Indian Languages Newspapers Association (138, Meadows Street, Fort, Bombay).

Marathi Journalists Conference (Poona): Chairman: M. V. Sane (Kesari, Poona); Treasurer: R. V. Patankar (Lokasakti, Poona); J. Secy.: N. M. Shidhaye (Prabhat, Poona); M. Sahasrabudhe (Prabhat, Bombay).

THE INDIAN NATIONAL CONGRESS

THE Indian National Congress had a membership of 10,500,000 in 1947-48 which is a 100 per cent increase over the 1946-47 figure of 5,500,000. The U.P. tops the list with a membership of 2,500,000. Andhra and Bihar are second and third with 2,082,429 and 2,050,271 respectively.

The Congress has a President elected for a year, two General Secretaries, a Working Committee all nominated by the President of the year, an elected All India Congress Committee (A.I.C.C.) and Provincial and local Committees. The country is divided for this purpose into twenty-three Congress Provinces: Ajmer (Ajmer), Assam (Gauhati), Andhra (Bezawada), Bengal (Calcutta), Bihar (Patna), Bombay (Bombay), Delhi (Delhi), Punjab (Jullandhar), Gujarat (Ahmedabad), Himachal Pradesh (Simla), Karnatak (Hubli), Kerala (Calicut), Madhya Bharat (Indore), Mahakoshal (Jubbulpore), Maharashtra (Poona), Nagpur (Nagpur), Patiala and East Punjab States (Patiala), Rajputana (Jaipur), U.P. (Lucknow), Tamilnad (Madras), Vidharba (Akola), Vindhya Pradesh (Rewa), Utkal (Cuttack). There is a Parliamentary Sub-Committee to select candidates, co-ordinate legislation and generally give advice and a secretariat consisting of seven departments located in New Delhi.

OFFICE-BEARERS

President of the Indian National Congress, Dr. B. Pattabhi Sitaramaya.

General Secretaries, Shanker Rao Deo; Kala Venkata Rao.

Treasurer, Sardar Vallabhbhai Patel.

Members of the Working Committee, Pandit Jawaharlal Nehru, Maulana Abul Kalam Azad, Rafi Ahmed Kidwai, Jagjivan Itani, Pandit Govind Ballabh Pant, Sardar Pratap Singh Kairon, Dr. Rajendra Prasad, Dr. Prafulla Chandra Ghosh, Sucheta Kriplani, S. K. Patil, N. G. Ranga, Kamaraja Nadar, Deveswara Sharma, Nijalingappa, Gokul Bhai Bhatt, Ram Sahay Sarde.

Parliamentary Board, Dr. Pattabhi Sitaramaya, Sardar Patel, Dr. Rajendra Prasad, Maulana Abul Kalam Azad, Kala Venkata Rao, Nijalingappa.

Presidents of Provincial Congress Committees

AJMER—Mukut Behari Lal Bhargava

ANDHRA—N. G. Ranga.

ASSAM—Deveswara Sharma

BENGAL—Dr. Suresh Chandra Banerji

BIHAR—Pandit Prajapati Mishra

BOMBAY—S. K. Patil

DELHI—Radha Raman

GUJARAT—Kanaylal Nanabhai Desai

KARNATAK—S. Nijalingappa

KERALA—K. Kelappan

MAHAKOSHAL—Seth Govind Das

MAHARASHTRA—B. B. Htre

NAGPUR—M. S. Kannanwar

EAST PUNJAB—Giani Gurnukh Singh Musafar

TAMILNAD—K. Kamaraj

UTKAL—Biswanath Das

UNITED PROVINCES—Purushottam Das Tandon

HIMACHAL PRADESH—Yashwant Singh Parmar

MADHYA BHARAT—Gopikrishna Vijaya Bargarja

RAJPUTANA—Gokul Bhai Bhat

VIDARBHA—Gopalrao Khadkar

VINDHYA PRADESH—Banashpati Singh

CONGRESS LEGISLATURE PARTY

Leader, Pandit Jawaharlal Nehru

Deputy Leader, Sardar Vallabhai Patel

Chief Whip, Satyanarayan Sinha

Secretaries, Ananthasayanam Ayyangar; Prof. N. G. Ranga.

Whips, Gokul Bhai Bhatt, A.C. Guha, U. Srinivasa Malysa.

Treasurer, Seth Govinddas.

Executive Committee, Jagjivan Ram, Maulana Abul Kalam Azad, G. Durgabhai, Rafi Ahmed Kidwai, B. V. Keskar, R. K. Chowdhry, K. Hanumanthayya, Kenuka Ray, Mahabir Tyagi, Pandit Thakurdas Bhargava, K. Santhanam, L. K. Maitra, Mohanlal Saxena, R. N. Goenka.

CONGRESS CONSTITUTION

This is a summary of the main Articles of the Constitution of the Congress.

OBJECT

ARTICLE I

The object of the Indian National Congress is the well-being and advancement of the people of India and the establishment in India by peaceful and legitimate means of a Co-operative Commonwealth based on equality of opportunity and of political, economic and social rights and aiming at world peace and fellowship.

CONSTITUENTS

ARTICLE II

The Indian National Congress will comprise: (a) Primary members under Article IV. (b) Primary Congress Panchayats in a village, in a group of villages, in a ward of a town and in a part of a town. (c) District Congress Committees and such intermediate Committees as the P.C.C. may decide. (d) Provincial Congress Committees. (e) All India Congress Committee. (f) Working Committee.

JURISDICTION

ARTICLE III

The following shall be the provinces with the headquarters mentioned against them:

1. Ajmer-Merwara, Ajmer; 2. Andhra, Bezawada; 3. Assam, Gauhati; 4. Bihar, Patna; 5. West Bengal, Calcutta; 6. Bombay (City), Bombay; 7. Delhi, Delhi; 8. Gujarat, Ahmedabad; 9. Karnatak, Hubli; 10. Kerala, Calicut; 11. Mahakoshal, Jubbulpore; 12. Maharashtra, Poona; 13. Nagpur, Nagpur; 14. East Punjab; 15. Tamilnad, Madras; 16. United Provinces, Lucknow; 17. Utkal, Cuttack; 18. Vidharbha (Bihar), Akola; and the five new P.C.C.'s set up in states, Rajputana, Madhya Bharat, Vindhya Pradesh, Himachal Pradesh, Patiala and East Punjab States.

MEMBERSHIP

ARTICLE IV

Any person of the age of 21 years and over who believes in Article I, shall, on making a written declaration to that effect on Form 'A', be deemed to be a Primary Member of the Congress.

A primary member shall be deemed to be a qualified member eligible for election to a Primary Congress Panchayat if he fulfils the following conditions:

"He shall be a habitual wearer of certified Khadi (certified through the agencies approved by the W.C.) made from handspun yarn and a teetotaler. He does not observe or recognise untouchability in any shape or form. He must be a believer in inter-communal unity and have respect for the faiths of other people.

He must also believe in equality of opportunity and status for all irrespective of race, creed or sex."

Provided that he is not a member of any political party, communal or other, which has a separate membership, constitution and programme.

A qualified member shall be deemed to be an effective member provided he devotes regularly a part of his time to some form of national or constructive activity as laid down from time to time by the Congress.

TERM OF CONGRESS COMMITTEE

ARTICLE V

The term of every Primary Congress Panchayat and Congress Committee shall ordinarily be three years.

QUALIFICATIONS FOR VOTERS AND CANDIDATES

ARTICLE VII—A. VOTERS:

Every Primary member of the Congress shall be entitled to vote at the election of the Primary Congress Panchayat of his constituency.

All members of the Panchayats and effective members shall be entitled to vote at the elections of delegates and, to all other Congress Committees subordinate to P.C.C.'s.

B. CANDIDATES:

A qualified member shall be eligible for election to a Primary Congress Panchayat.

An effective member shall be eligible for election to any Congress Committee.

PRIMARY CONGRESS PANCHAYAT

ARTICLE VIII

A Primary Congress Panchayat shall consist of qualified members elected by the primary members.

The jurisdiction of any Primary Congress Panchayat shall not ordinarily extend beyond an area comprising a population of 2,500 adult voters on the list of Government Electoral Rolls.

No Primary Congress Panchayat shall consist of less than three or more than ten members, provided that there is not more than one member for every 250 adults.

No Primary Congress Panchayat shall be formed in an area unless 8 per cent. of the adult voters on the Government Electoral Rolls have enrolled themselves as primary members.

ELECTION OF DELEGATES

ARTICLE IX

Every province shall be entitled to return delegates to the Congress in the proportion of one for every lakh of population provided that there are not less than five panchayats in the constituency.

The members of the A.I.C.C. co-opted from affiliated Associations and the ex-Presidents of each P.C.C. resident in the province, who have served one full term, shall be declared to be delegates provided they are otherwise qualified under the constitution.

A. I. C. C. ELECTIONS

ARTICLE X

The delegates in every province shall elect from among themselves one-eighth of their number, as representatives of the province on the A.I.C.C. provided that no province shall have less than 5 representatives on the A.I.C.C.

The election shall be by proportional representation by single transferable vote.

PROVINCIAL CONGRESS COMMITTEE

ARTICLE XI

The Provincial Congress Committee in each Province shall consist of the delegates from the Province and those mentioned in clause (b) of this Article, provided they pay Rs. 5 annually to the respective P.C.C.'s.

The Presidents and ex-Presidents of the Congress, the ex-Presidents of the P.C.C. as referred to Article IX clause (f) and any other person or persons within the jurisdiction of the P.C.C. who have been co-opted by the A.I.C.C. for any reason shall also be members of the P.C.C. and delegates to the Congress provided that they are duly qualified under Article IV.

Every Provincial Congress Committee shall

- (i) ordinarily function through District and Taluka or Tehsil Congress Committees formed in respective administrative divisions of the area provided that such Committees shall include, as ex-officio members, those who have been elected to the P.C.C. from that area;
- (ii) subject to the general supervision and control of the A.I.C.C., be in charge of the affairs of the Congress Committee within its own province and to that end frame its provincial constitution not inconsistent with this Constitution, which shall come into operation only with the previous sanction of the Working Committee;
- (iii) On failure of any Provincial Congress Committee to function in terms of the Constitution, the Working Committee may suspend the existing P.C.C. and form an *ad hoc* committee to carry on Congress work in the province.

ALL INDIA CONGRESS COMMITTEE

ARTICLE XII

The President of the Congress Session, members of the A.I.C.C. elected under Article X, the ex-Presidents of the Congress, provided they are qualified under Article IV, the treasurer of the Congress and representatives of affiliated Associations, if any, shall constitute the All India Congress Committee, provided that such representatives shall not exceed one-tenth of the elected number of members.

The A.I.C.C. shall have power to frame rules, not inconsistent with this Constitution, for regulating all matters connected with the Congress which shall be binding on all subordinate Congress Committees.

The President of the Congress session or President elected under Article XVI (h) shall be chairman of All India Congress Committee.

The A.I.C.C. shall meet as often as required by the Working Committee, or on joint requisition addressed to the Working Committee by not less than 40 members. Such requisition shall specify the purpose for which the requisitionists desire a meeting of the A.I.C.C.

Sixty or one-fifth of the total number of members, whichever is less, shall form the quorum for a meeting of the A.I.C.C.

The A.I.C.C. shall continue to function till the meeting of the newly elected A.I.C.C.

SUBJECTS COMMITTEE

ARTICLE XIII

The A.I.C.C. shall meet as the Subjects Committee, under the chairmanship of the President at least two days before the Congress Session. The outgoing Working Committee shall submit to it the draft programme of work for the Congress Session including resolutions recommended by the Provincial Congress Committees, provided that whenever a new President is elected he shall preside.

The Subjects Committee shall proceed to discuss the programme and shall frame resolutions for being moved in the open session. At least one day shall be allotted by the Subjects Committee for the consideration of propositions of which due notice has been given by the Provincial Congress Committees or members of the A.I.C.C.

CONGRESS SESSION

ARTICLE XIV

The Session of the Congress shall be ordinarily held annually at the time and place decided upon by the A.-I. Congress.

The Congress Session shall consist of: (i) The President of the Congress. (ii) The ex-Presidents of the Congress, provided they are duly qualified under Article IV. (iii) The delegates elected under Article IX and the representatives under clause (h), Article XII.

The Congress Session shall consider resolutions recommended for adoption by the Subjects Committee in the first instance.

Thereafter the Session shall take up any substantive motion not included in (i) but which 40 delegates have, before the commencement of the day's sitting, requested the President in writing to allow them to place before the Congress, provided however that no such motion shall be allowed unless it has been previously discussed at a meeting of the Subjects Committee and has received the support of at least a third of the members then present in the Subjects Committee.

The Provincial Congress Committee, in whose jurisdiction the Congress Session is held, shall form a Reception Committee.

ELECTION OF PRESIDENT

ARTICLE XVI

Any ten delegates may jointly send the name of any delegate or ex-President of the Congress duly qualified under Article XI whom they proposed to be elected as President of the next Congress Session.

The General Secretary shall publish the names of all persons so proposed, and it shall be open to any person whose name has been so proposed to withdraw his candidature within ten days of the publication of the proposed name.

After eliminating the names of those who have withdrawn, the General Secretary shall immediately publish the names of the remaining candidates and circulate them to the Provincial Congress Committees.

On a date fixed by the Working Committee, which shall not ordinarily be less than seven days after the final publication of the names of contesting candidates, each delegate shall be entitled to record, for the selection of a president, his vote.

As soon as may be after the receipt of reports the General Secretary shall, by the process of eliminating those candidates who secure the smallest number of votes announce as President-elect the name of candidate who has secured more than 50 per cent of the votes polled.

In case there are only two candidates, the General Secretaries shall announce as President-elect the name of the candidate obtaining the majority of votes.

In the event of any emergency arising by reason of any cause such as death or resignation of the President elected as above, the General Secretary shall forthwith fix a date for a fresh election by the delegates as prescribed above. In case such procedure is not found possible, the A.I.C.C. shall elect the President.

WORKING COMMITTEE

ARTICLE XVII

The Working Committee shall consist of the President of the Congress Session, a Treasurer and eighteen members including one or more secretaries. All the members of the Working

Committee shall be appointed by the President ordinarily from amongst the members of the A.I.C.C. provided, however, that a delegate so appointed shall cease to be a member of the Working Committee if he is not elected as a member of the A.I.C.C. within the next 6 months. The proportion of members on the Working Committee holding ministerial office shall not exceed one-third of the total membership of the Committee.

The Working Committee shall be the highest executive authority of the Congress and such shall have the power to carry into effect the policy and programme laid down by the Congress and by the A.I.C.C. and shall be responsible to the A.I.C.C.

The Working Committee shall have the power

- (i) to frame rules which will be placed before the next meeting of the A.I.C.C. for its final approval and to issue instructions as may be necessary not inconsistent with the constitution and the rules for the proper working of the constitution and in all matters not otherwise provided for;
- (ii) to superintend, direct and control all Congress Committees except the A.I.C.C.;
- (iii) to take such disciplinary action as it may deem fit against a Committee or individual for misconduct, wilful neglect or default in the discharge of duty.

The Working Committee shall make arrangements to have the annual audit of the accounts of the A.I.C.C. by an auditor appointed by the A.I.C.C. every year.

GENERAL SECRETARIES

ARTICLE XIX

The General Secretaries shall be in charge of the office of the A.I.C.C.

The General Secretaries shall be responsible for the preparation of the report of the proceedings of the Congress session along with the audited accounts of the session.

CREDENTIALS COMMITTEE

ARTICLE XX

The first general meeting of the P.C.C. shall, by a majority of at least three-fourths of its members present and voting, appoint a Credentials Committee of not less than three and of not more than five members who shall not be candidates for any of the Congress elections during the term of their membership of this Committee.

Each D.C.C. shall elect a panel of three members in its general meeting, by a majority of at least three-fourths of the members present and voting, and submit the same to the Provincial Credentials Committee which shall appoint a District Credentials Committee of not more than three for each District. No member of the District Credentials Committee shall be a candidate for election to any Committee during the term of his membership of the Credentials Committee.

The Provincial and District Credentials Committees may examine applications for effective and qualified membership of the Congress respectively, hear objections if any and decide them.

TRIBUNALS

ARTICLE XXI

The P.C.C. in its first general meeting shall, by a majority of at least three-fourths of its members present and voting, appoint an Election Tribunal, of not less than three and not more than five, no member of which shall stand as a candidate for any Congress election during the term of his office. Each D.C.C. shall elect a panel of three members in its general meeting by a majority of at least three-fourths of the members present and voting and submit the same to the Provincial Election Tribunal which shall appoint a District Election Tribunal for each

district of one or more members out of the panel submitted by the respective D.C.C.'s, to receive and decide disputes relating to the election of office-bearers and members of elective committees, provided that no person so appointed shall stand as a candidate for any Congress election during his term of office.

PARLIAMENTARY BOARD

ARTICLE XXVII

(a) The Working Committee shall set up a Parliamentary Board consisting of the President and five other members with the Congress President as its Chairman for the purpose of regulating and co-ordinating parliamentary activities of the Congress Legislative Parties and shall frame rules in that behalf.

(b) A Central Election Committee shall be set up consisting of members of the Parliamentary Board and five other members elected by the A.I.C.C. for the purpose of (1) conducting election campaigns and (2) making final selection of candidates for the Provincial and Central Legislatures.

(c) Provincial Election Committees shall be elected by the general meeting of the respective P.C.C.'s. They shall recommend candidates for Central and Provincial Legislatures. The final selection, after hearing objections and appeals, shall be made by the Central Election Committee.

CHANGE IN THE CONSTITUTION

ARTICLE XXVIII

The foregoing constitution can be amended, altered, or added to only by the Congress except when the A.I.C.C. has been authorised to do so. In case such authority has been given by the Congress then the constitution can be amended, only by a majority of two-thirds of members present and voting at a meeting of the A.I.C.C. provided notice of such proposed changes has been given to each member at least one month before the date of the meeting.

EFFECTIVE MEMBERS' PLEDGE

Effective members of the Congress, that is to say, those who are entitled to hold elective posts in the Congress organization have to give the following pledge:

"I accept the following objective of the Congress: 'The object of the Indian National Congress is the well-being and advancement of the people of India and the establishment in India by peaceful and legitimate means of a co-operative commonwealth, based on equality of opportunity and of political, economic and social rights and aiming at world peace and fellowship.'

"I am a habitual wearer of *Khadi* made from hand-spun yarn and a teetotaler. I do not observe or recognise untouchability in any shape or form. I am a believer in inter-communal unity and have respect for the faiths of other people. I also believe in equality of opportunity and status for all irrespective of race, creed or sex.

"I devote regularly a part of my time to activity or activities indicated in the following list by my initials: (1) communal unity, (2) removal of untouchability, (3) prohibition, (4) *Khadi*, (5) other village industries, (6) village sanitation, (7) new or basic education, (8) adult education, (9) education in health and hygiene, (10) uplift of women, (11) propaganda for 'Rashtra Bhasha' and provincial languages, (12) working for economic equality, (13) organisation of 'Ishans', (14) organisation of labour, (15) organisation of students, (16) service of 'adivasis', (17) relief work, (18) parliamentary work, (19) Congress organisation or any other activity recommended by the Working Committee of the A.-I.C.C.

"I am not a member of any other political party, communal or other which has a separate membership, constitution and programme."

PARLIAMENTARY BOARD

The primary function of the Board is to select candidates for election to the various legislatures. A list of nominees is sent by the P.C.C.'s along with the full report of the nominees' qualifications sometime before nomination is due. Out of that list the Board makes its final selection. With the formation of Congress Ministries in all the Provinces however the Board tended to assume a second function, that of advising Provincial leaders on the composition of ministries and on the content of Provincial bills of an all-India importance. Thus the Zamindari Abolition Bills in Bihar and Madras were referred to the Board for suggestion and approval. If necessary joint consultation takes place between the Board, the ministries and the parties whose interests are involved. Of late this work has been carried a step further in an attempt to bring uniformity into the laws passed by the Provincial Legislatures on questions of common interest to all Provinces. This work is now carried on through the A.-I.C.C. Secretariat in New Delhi under the direct control of one of the General Secretaries Mr. Kala Venkat Rao. All Congress Parliamentary work both at the Centre and in the Provinces is being pooled and coordinated. The main provisions of all important bills are summarized and sent round to all Provinces so that every Province may profit by the experience of every other Province. Part of the object of all this activity is to give the country a comprehensive idea of Congress achievement when the next general elections come round.

REVIEW OF THE YEAR

Among the more important questions that affected the Congress as a political organization during the year were, (1) relations between the party and the public, (2) relations between Congress organizations and the Ministries, (3) standards of public conduct of individual Congressmen, (4) Congress organization in the States, (5) economic policy, (6) relations with Labour and Socialists, (7) formation of linguistic provinces. These seven items are not of course arranged in the order of their importance. We shall now proceed to deal with each of them at some length.

CONGRESS ORGANIZATION

With the formation of Congress Governments in the Provinces a certain looseness entered into the Congress Organization. The leaders most of whom accepted administrative responsibility had little time to attend to the day-to-day work of Congress or help in the shaping of its policy. To revitalize the Congress circulars were sent round emphasizing the new tasks that lay before the Congress. Social revolution it was pointed out was the new objective and the means of attaining it were those outlined by Mahatma Gandhi. The Provincial organizations were asked to seek the help of all constructive organizations like All-India Spinners' Association, All-India Gram Udyog Sangh, Harijan Sevak Sangh, and Talimi Sangh. The need for a strong well disciplined broad-based volunteer corps was stressed. The circulars also declared that there was no doubt that the Congress as an organization had to continue in the best interests of the country. This point was especially argued with great force in a note entitled 'Role of the Congress' prepared by Mr. Shanker Rao Deo, one of the General Secretaries. The note expressed the view that the Congress Organization must continue to work for the reunification of India the division of which was regarded as temporary. The continuance of the Congress was also essential for establishing a democratic social order based on justice and equity. The Country was facing a critical time and it required a party which would ensure both a stable government and orderly progress. There was no other organization in the country which was better fitted to play that part and none which commanded so much loyalty and allegiance. To accomplish the new task, Mr. Deo concluded, the Congress should cease

to be the platform of group conflicts and rival ideologies and become a well-knit party working for the achievement of specific aims and objects.

RELATIONS WITH MINISTRY

This is really an old question. As early as 1939 the A.-I.C.C. at a meeting in June that year had laid down on the recommendation of the Working Committee that in matters of day-to-day administration the P.C.C. was not to interfere. What it could do was to ask the executive to place specific grievances when they arise before the Provincial Ministry. If there was difference of opinion between the Provincial Congress executive and the Ministry the matter was to be referred to the Parliamentary Sub-Committee. However important the question all discussion on it was to be conducted in private; public wrangles were to be avoided at all cost. The self-same question arose in a much more serious form after August 1947 for the reason that this time absolute power had passed into the hands of the Congress; neither in the legislatures nor in the country at large was then any organized opposition which could make a protest in case lapses occurred. At present the position is that Provincial Ministries work under the guidance of the Central Parliamentary Board and are in no way subordinate to the Provincial organizations. Relations between the Ministries and the Congress organizations were not, generally speaking, very happy. There were complaints on both sides. On behalf of the Congress organizations it was represented that the Ministers went about their work as if they had no obligation to Congress Committees; advice and suggestion coming from Congress Committees were studiously ignored or contemptuously rejected. On the other hand the Ministers complained that there was unauthorized interference on the part of individual Congressmen in the day-to-day administration of the Province. This interference has reached such enormous proportions that it was threatening to bring the whole administrative machinery into contempt. The Congress President as well as the Working Committee had to take notice for undoubtedly irregularities were occurring. Two Ministers particularly spoke up on this question—Pandit Dwarika Prasad Misra, Minister for Social Education in the C.P. and Mr. B. G. Kher, the Prime Minister of Bombay. In an outspoken speech to a group of local officials Mr. Kher asked all officials to carry on their tasks without bothering about local politics; if they did the right thing Government would stand by them regardless of party considerations. Dr. Rajendra Prasad, who was then Congress President lent his powerful support to Provincial Governments in their struggle to maintain administrative efficiency. He sent round a directive instructing Congressmen not to interfere in the day-to-day work of the Government or try to dictate to officials or cause any kind of inconvenience to the administration. If there were any constructive suggestions to make they were to be made to the A.I.C.C. which in its turn would place them before the appropriate authority. Dr. Rajendra Prasad then went on to propose that some kind of liaison might be set up between Governments and P.C.C.'s to remove legitimate grievances both in the provincial and local spheres. An individual Congressman was to bring the grievance concerned to the notice of the head of his own organization. And it was up to the latter to place it before the District or provincial authority for appropriate action. On the whole Congressmen everywhere acquiesced in the President's direction at any rate in principle though a lone protest came from some Ahmedabad leaders who continued to insist on their right to contact officials to represent public or private grievances. A meeting of Congress Workers of Maharashtra drew attention to yet another question to which no answer has so far been found, the proper relation between Congress Committees and Congress members of the legislature. At present individual and public grievances are generally taken direct to M.L.A.'s. It was argued on behalf of Congress

Committees that this practice might result in the strengthening of individual as against group prestige. The suggestion was then put forward that M.L.A.'s ought to make it a point to receive public complaints at the office of the local committee at a fixed time instead of receiving them on their own. All in all no method has so far been worked out which would put inter-relationships among the different elements of the Congress organization on a satisfactory basis.

A point which may be mentioned in this connection pertains to relations between Congress Government and the party in the Legislature. On certain occasions during the budget session of the Central Assembly it seemed as though there was some disposition among Congress Legislators to get out of control, so to speak. Criticism was uttered and language was used which appeared to transgress the bounds of party discipline. This led to a general desire to put relations between the Government and party members on a basis acceptable to both sides. Ultimately an arrangement was made by which Congress Members had to refer their individual criticism to the Standing Committees attached to the Ministries. If there was no response the members were next to refer to the executive of the Congress Parliamentary Party when the attention of the Minister concerned would be drawn to the question.

All this was really part of a much bigger question. For discipline has two aspects. There is party discipline pure and simple which is already mentioned. Next there is the question of public honesty of individual Congressmen. Congressmen have always set themselves a high standard of public morality. But just at the moment when the very highest standards were demanded corruption appeared to set in. Jobbery, black-marketing and self-seeking in general assumed serious proportions so much so indeed that there arose a wide-spread demand that something should be done to cleanse the public life of the country once and for all, such as a new directive from the highest authority in the Congress. The Congress President Dr. Pattabhi Sitaramayya sent round a circular on January 17 forbidding Congressmen specially those holding elected position in the organization to recommend candidates for offices, apply for import and export permits, obtain licence to open ration shops, approach authorities about civil or criminal matters which have come up for decision. Whenever interference does occur, the letter stated, the Minister or the Secretary should at once notify the P.C.C. The Congress President further asked in the same letter that group politics should cease and unity should be restored in the larger interests of the country. It is worthwhile noting that the Tamilnad Congress Committee acting on its own made a declaration prohibiting Congress lawyers from defending persons charged with offences under the Prohibition Act or under rules governing the issue of permits and licences.

ACHARYA KRIPALANI'S ATTACK

The bitterest attack on certain aspects of Congress politics made during the year came from an ex-President, Acharya Kripalani in two speeches delivered at Bangalore on July 9 and July 13 roundly declared that Congress administration is not run in the best interests of the country. The Congress has forgotten the task of preventing moral deterioration and has concerned itself with politics such as ministry and President-making, and Congressmen are engaged in a struggle for power instead of effort to raise the moral tone of society. Corruption and black-marketeering are rampant. A spirit of communalism and parochialism are spreading in the country while the administration itself has fallen a prey to red tape and the old bureaucratic machine. Indian Governors are following the same procedure as the old British Governors. The staffs and establishments are as heavy and undisciplined as ever while all the old traditions flourish in full force. The duty of every Congressman is to help in the reconstruction of society and the eradication of

communalism. Why are ministries formed on communal lines, the ex-President asked in conclusion. Every man in India should be taught to feel himself an Indian.

ORGANIZATION IN STATES

The months between April and October were mostly taken up with questions affecting the States. The States which were hitherto outside the Congress jurisdiction now became an integral part of Congress activity. The lines on which Congress organization was to function in States was clearly laid down by the Working Committee and the A.I.C.C., the latter in fact prepared a comprehensive note on the subject in a resolution passed at its Delhi meeting on July 1 and 2. The Working Committee also passed a resolution (July 1 and 2) whereby it was decided that in States which had acceded to the Indian Union and in which Congress Committees were functioning they would be subject to the same control as in Indian Union Provinces. The Working Committee also decided that for the purpose of Congress Organization the Praja Mandals be reorganized as Congress Committees and the Regional Councils as Provincial Congress Committees. The A.I.C.C. at its Bombay session adopted a resolution authorizing the Working Committee to take steps towards the inclusion of not more than 30 members in the A.I.C.C. from the States. A Sub-Committee of the Working Committee which was appointed to settle details decided that five new P.C.C.'s should be constituted to include Unions and States as component parts viz. Rajputana, Madhya Bharat, Vidhya Pradesh, Himachal Pradesh, and Patiala and East Punjab States Union and that some of the existing P.C.C.'s should extend their jurisdiction in the following manner: Utkal over Mayurbhanj, Maharashtra over Kolhapur, Gujarat over Saurashtra, Cutch and Baroda, United Provinces over Tehri-Gharwal, Rampur Benares and West Bengal over Cochin-Bihar, with respect of the States which merged with the adjoining provinces such as Chhatisgarh States in C.P., Eastern States in Orissa, Kathiawar States in Gujarat, Decran States in Bombay these should be brought under the jurisdiction of the P.C.C.'s in the respective areas of those Provinces. By a separate resolution the Working Committee extended the jurisdiction of the Assam P.C.C. over Tripura, Manipur and Lushai Hills and directed that they should be free to conduct their parliamentary activities subject to the control of the Parliamentary Board and also that they should be free to transact their affairs in their own languages.

ECONOMIC POLICY

The A.I.C.C. which met in November 1947 at Delhi passed an important resolution concerning the social and economic objectives of the Congress. The resolution declared that democracy was a social and economic concept as much as political. Democracy also implied decentralization of political and economic power.

"The smallest territorial unit should be able to exercise effective control over its corporate life by means of a popularly elected panchayat. In so far as it is possible, national and regional economic self-sufficiency in the essentials of life should be aimed at. Large scale industries should belong to the community and they should be so organised that workers became not only co-sharers in the profits but were also increasingly associated with the management and administration of the industry. Land and all other means of production, distribution and exchange must belong to and be regulated by the community in its own interest." With a view to drawing up an economic programme for the Congress in accordance with these principles the A.I.C.C. appointed a committee consisting of Pandit Jawaharlal Nehru, Maulana Abul Kalam Azad, Shri Jai Prakash Narain, Prof. N. G. Rangnekar, Shri Gulzarilal Nanda, Shri J. C. Kumarappa, Shri Achyut Patwardhan, Shri Shankarrao Deo, with powers to co-opt.

This Committee produced a report which was placed before the A.I.C.C. at its meeting in February 1948. The report was approved by the A.I.C.C. The Working Committee at its meeting at New Delhi on April 21 and 22 also discussed the report and gave its specific approval to the aims and object as laid down in the report but in regard to more detailed suggestions made on the report it appointed a standing Committee 'to consider the implementation of the general programme, more especially in regard to priorities and make recommendations from time to time to the Working Committee'. The Standing Committee had the following members on it: Pandit Jawaharlal Nehru (Chairman), Shri Bhai Ramji Karkar, Shri Shankarrao Deo, Prof. N. G. Rangnekar, Dr. Pattabhi Sitaramayya, Shri Jagjivan Ram, Shri Gulzarilal Nanda, Shri J. C. Kumarappa, Shri Annada Prasad Choudhary.

SOCIALISTS, LABOUR

It was argued, at a conference of Presidents and Secretaries of P.C.C.'s held at Allahabad on February 22, 23 and 24, 1947, that one of the causes of weakness and confusion in the Congress was the existence of conflict between rival ideologies and groups particularly conflict between Socialists and so-called Orthodox Congressmen. The general opinion of the conference was that while the existence of different ideologies was not unhealthy the existence of organized parties with different policies, funds and registered membership issuing definite mandates was destructive of all discipline and a source of confusion in the mind of the people. The conference therefore authorized the Working Committee to take measures to stop the continuance of such parties or party groups within the Congress.

A Socialist group had in fact been functioning within the Congress for over a decade. Its object was as Socialists explained, to give a radical reorientation to Congress outlook and policy. This inevitably led to conflict not only at the higher level of policy-making but in the day to day work in the Districts where one set of Congressmen calling themselves Socialists opposed another set of Congressmen who for purposes of distinction came to be called Orthodox Congressmen. This state of affairs could not continue for long without producing an open break some time, and the principal spokesman for the Socialist point of view Mr. Jai Prakash Narain fully realized that Congressmen professing the Socialist creed could no longer remain in the Congress without giving rise to a certain feeling of incongruity. At last in March 1948 Socialists finally decided to leave the Congress to function as an independent political party. A mandate was issued to all Congress Socialists to resign from Congress organizations and Provincial legislatures and seek re-election on Independent Socialist tickets. A number of resignations followed though it must be pointed out that from a numerical point of view the secession did not materially weaken the Congress. In the trial of strength subsequently took place it was looked on as a kind of task of public feeling the Socialists scored a few victories in the election to the Bombay Corporation but were heavily defeated in the election to the local boards and the Provincial legislature in the United Provinces. Later the Congress was to face yet another revolt in Maharashtra when an influential group broke away, to form what was called the 'Peasants' and Workers' Party. This secession will be dealt with at greater length elsewhere in this section.

A note on Congress relations with Labour will be relevant here. At a meeting of the Working Committee held in Delhi in September-October 1947 the members gave particular attention to questions concerned with Labour. Congress work in the field of labour came up for review and after some deliberation the Working Committee decided to ask Congress-controlled labour organizations to join the Indian National Trade Union Congress which had been formed independent of the Congress earlier in May. The I.N.T.U.C. has no official relations with the

Congress though it has strong ideological affiliations with that body. The Congress took yet another step which brought it squarely into Trade Union politics when the Working Committee at a meeting on April 21 and 22, 1948 considered a note on labour submitted by Mr. Gulzarilal Nanda. The Working Committee decided to open a whole-time Department of labour in the A.I.C.C. secretariat and appointed a committee consisting of Dr. Rajendra Prasad, Mr. Shankarrao Deo, Mr. Gulzarilal Nanda, Prof. N. G. Ranga and Mr. Sampurnanand to direct and coordinate a whole range of Congress activity in the sphere of labour. The Department of labour in the A.I.C.C. started functioning in August 1948. Its work was to consist mainly of study of labour problems, redress of working class grievances, help and support to the I.N.T.U.C. work to bring about unity and solidarity in labour ranks, attempt to spread and popularize Congress ideology among workers, and bring uniformity in labour legislation in States and Provinces.

SARWA SEVA SANGH

A note on the Sarvodaya Samaj will be in order in any survey of Congress politics. At a meeting of Constructive Workers on March 13 at Wardha it was decided to amalgamate all the different bodies which were formerly devoted to constructive work under the inspiration of Mahatma Gandhi into one consolidated body called Sarwa Seva Sangh or Sarvodaya Samaj. Eleven organizations were affected by this decision. They are All India Village Industries Association, The Charka Sangh, Hindustani Talimi Sangh, Hindustani Prachar Sabha, Go-Seva Sangh, Harijan Sevak Sangh, Adivasi Seva Sangh, Nature Cure Trust, Navjivan Trust, Kasturba Trust and the Hindustani Mazdoor Sangh. Mr. J. C. Kumarappa was authorized to take the necessary steps towards unification which, it is expected, will be completed about the end of July.

The objects of the Sarvodaya Samaj are the evolution of society based on truth and non-violence; it will be careless and while there will be no room for exploitation, there will be full opportunity for individual and collective progress in all directions. A brotherhood of all those who believe in the Gandhian ideology is sought to be established. These objects are to be achieved by working on lines which are classified under 22 heads including communal unity, khadi and village industries, prohibition, village sanitation, equality of rights for both sexes, development of the country's languages, eradication of narrow provincialism, organization of labour, service of the aboriginals, cow protection and relief of the distressed.

Anyone endeavouring to work on these lines has only to notify the Secretary to become a "sewak" and can participate in the annual gathering of the Samaj on January 13 every year at different places which will be an occasion for the workers to contact one another. A committee which will assume a purely advisory role is to be set up to guide the Samaj.

REVOLT IN MAHARASHTRA

The secession of Socialists as already mentioned did not weaken the Congress organization to any perceptible degree. But a second secession by a group of Congressmen in Maharashtra appeared to be a more serious threat to Congress influence particularly in certain Districts in Maharashtra. It was indeed becoming necessary to take active measures to counteract the propaganda of the secessionists. This new party is called Peasants' and Workers' Party and is led by Mr. K. M. Jedhe and Mr. S. S. More who had previously held positions of influence in the Congress Party. The group broke away from the parent organization in April 1948. The reasons for the revolt are not very clear; the aims and objects of the new party are also somewhat obscure. That communal and territorial considerations played a part in the secession, there seems to be little doubt. But it is possible the party has some sort of economic

faith: in official Congress circles, for instance, the new party is described 'as the legal wing of the Communist Party.' What is certain is that the new party is making head-way in some Districts notably Ahmednagar where the party is preparing to fight the Congress in District Board elections and whatever by-elections may take place to the Bombay Legislative Assembly. A recent conference of Congress Workers held at Malabeshwar decided that it was time something was done to counteract the effects of propaganda carried on by the new party in the rural areas against the Congress. One point of difference between the new party and the Congress concerns the need for the early formation of linguistic provinces and the status of Bombay City, a question on which the public opinion of Maharashtra is greatly agitated.

LINGUISTIC PROVINCES

One of the earliest demands of the Congress has been for the redrawing of provincial boundaries according to languages, particularly in South India. The Congress organization itself is based on such a distinction as the names of Provincial Congress Committees show—Maharashtra, Karnatak, Gujarat, Kerala and so on. Consequently there was a great deal of disappointment when just at the moment when the Congress had the power to give effect to one of its basic beliefs the Constituent Assembly decided to postpone the whole question in accordance with the recommendations of the Dhar Committee. The Dhar Committee Report produced such an outcry in Congress ranks—no one was more outspoken in this criticism than Dr. Pattabhi Sitaramayya—that the Jaipur Congress set up a three-men committee to make a review of the whole position and report to the Working Committee. This Committee consisted of Pandit Jawaharlal Nehru, Sardar Vallabhbhai Patel and the Congress President, Dr. Pattabhi Sitaramayya. The report of the Linguistic Provinces Committee was made public on April 5 and accepted by the Working Committee. The Linguistic Provinces Committee while accepting the principle of linguistic redistribution suggested postponement 'so that we might concentrate on other matters of vital importance and not allow ourselves to be directed by this question.' The Committee however went on to add that if public sentiment was insistent and overwhelming, we, as democrats have to submit to it but subject to certain limitations in regard to the goal India as a whole. Incidentally, the Committee recommended that the question of the Andhra Province, should be taken up first before considering the position of any other Province but the City of Madras should remain with Tamilnad. And no case of rectification of provincial boundaries in North India should be raised at the present moment whatever might be the merits of such a proposal. When a division of any existing province does take place it must be on the basis, that the new province has well-defined areas based on mutual agreement and not involving any conflict or serious dislocation vis-a-vis another Province or State. Applying this principle to Maharashtra, for instance, well-defined and accepted areas of Maharashtra can, if they so choose, form themselves into a separate province. Whether Vidarbha (Berar) and Nagpur will join or not should depend on the choice of Vidarbha and Nagpur. Further the formation of Maharashtra is contingent on the negotiation of an arrangement for the separate portion of Karnatak. Referring to Bombay City, the most contested single area, the Committee say that Bombay City is essentially a cosmopolitan and multi-lingual city and can not belong to any linguistic group. The population is mixed and the Marathas are in a minority. The Committee mentions the fact that under the Congress constitution Bombay is a separate province. The Committee cautions that there will always be trouble about border areas where people and languages are mixed and it would be difficult to decide where such middle areas were to go, not to mention the position of States like Hyderabad and Mysore which is yet undefined. The

resultant controversies will seriously divert attention and energy from more urgent and pressing problems affecting the very life and existence of the community.

In regard to Kerala and Karnatak the new Provinces can only be formed in conjunction with certain States. This can come about not by a merger of State with Province but of Province with State, an operation that would result in the disappearance of the State. Further, in the event of such mergers, linguistically disputed areas will have to be left out. That is to say, people forming a new linguistic province have to proceed on the basis that only such areas are accepted as are clearly in favour of that particular linguistic province.

In conclusion, the Committee declares, the present is not an opportune moment for the formation of new Provinces. The primary need is to consolidate the gains, political and otherwise, already achieved. Even as it is, the administrative structure is dangerously depleted in strength and personnel.

The report of the three-man Committee makes an advance on the Dhar Committee report in the sense that it concedes the principle of linguistic redistribution and recommends postponement on general grounds. While the report has, on the whole been well-received in Andhra, in Maharashtra and Karnatak it has caused disappointment and even bitterness. There is a belief that the Workers' and Peasants' Party will profit from the resulting discontent and that one of the main tasks of the Congress propaganda is to make the idea of postponement acceptable to public opinion.

JAIPUR CONGRESS

Dr. Pattabhi Sitaramayya was elected President of the Congress for the year on October 24 by 1199 votes as against 1085 votes secured by the rival candidate Shri Purushottam Das Tandon. Originally six names had been proposed for the Presidentship. Dr. Rajendra Prasad, Dr. Pattabhi Sitaramayya, Acharya Kripalani, Dr. Premlal Chandra Ghosh, Mr. Purushottam Das Tandon and Mr. Shankar Rao Deo. Four of the candidates later withdrew leaving the field open to a straight contest between Dr. Pattabhi Sitaramayya and Mr. Purushottam Das Tandon.

The 55th session of the Indian National Congress was held at Jaipur (This is the first time a session has been held in territory which was formerly part of a 'Native State'), on December 18, 1948. It is estimated that about 200,000 people attended the session. Dr. Pattabhi Sitaramayya took 80 minutes to deliver his speech first in Hindi, then in English.

In the course of his speech he made the following points: (1) India would be a sovereign republic with reciprocal relations with members of the Commonwealth which do not limit freedom of action of members in regard to any domestic or international question, (2) the question of linguistic redistribution is a major question, the solution of which cannot be put off for long, (3) India must force a new economic order in which there is no exploitation, (4) after ten years there would be nationalization of land and of select industries and plenty of food, clothing and houses for all and also universal education and medical facilities. This is the only way in which the promise of 'Ram Raj' can be redeemed. Dr. Pattabhi Sitaramayya then went on to refer to the difficult task confronting all the Governments and paid a tribute to the strength and skill displayed by the States Minister in accelerating the integration and democratization of the states.

The following is a summary of the minutes of the open session:—

Pandit Jawaharlal Nehru moved the Resolution on "The Message". It was seconded by Maulana Abul Kalam Azad. The Resolution which was passed unanimously said *inter alia*:

"Political freedom having been attained through non-violent action under the leadership

of Gandhiji, the National Congress has now to labour for the attainment of social and economic freedom so that progress and equal opportunity may come to all the people of India without any distinction of race or religion. This task requires a new and positive approach and a dedication to the service of the Motherland in a constructive spirit.

"The people of India have achieved independence; but to enjoy its fruits, they must discharge their responsibilities and obligations. Congressmen must remember that it has been and should continue to be their highest privilege to serve the people and to shoulder these responsibilities and obligations, and those who hanker after office or power, forgetting their obligations, do an ill-service to the country."

FOREIGN POLICY

Pandit Govind Ballabh Pant then moved the following Resolution on "Foreign Policy". It was seconded by Shri Bhadrakrishna Mohib. The resolution which was passed unanimously said *inter alia* :

"The National Congress has, even while it was struggling for the freedom of India, associated itself with progressive movements and struggles for freedom in other countries. India's liberation was viewed as a part of the larger freedom of all the countries and peoples of the world. In particular, the Congress has stood in the past for the ending of all imperialist domination and colonial exploitation of any country or people, and has opposed Fascism and all other tendencies which suppress human spirit.

"The foreign policy of India must necessarily be based on the principles that have guided the Congress in past years. These principles are the promotion of world peace, the freedom of all nations, racial equality, and the ending of Imperialism and Colonialism. In particular, the Congress is interested in the freedom of the nations and peoples of Asia and Africa who have suffered under various forms of colonialism for many generations.

"With a view to advance the cause of world peace and co-operation, India associated herself with the United Nations. This Congress declares its full adherence to the principles underlying the Charter of the United Nations.

"It should be the constant aim of the foreign policy of India to maintain friendly and co-operative relations with all nations and to avoid entanglement in military or political alliances which tend to divide up the world in rival groups and thus endanger world peace.

"In view of the attainment of complete independence and the establishment of the Republic of India, which will symbolise that independence and give to India the status among the nations of the world that is her rightful due, her present association with the United Kingdom and the Commonwealth of Nations will necessarily have to change. India, however, desires to maintain all such links with other countries as do not come in the way of her freedom of action and independence, and the Congress would welcome her free association with the independent nations of the Commonwealth for their commonwealth and the promotion of world peace.

"India is especially concerned with her neighbour countries of Asia and the Congress trusts that closer bonds of fellowship and co-operative effort for the maintenance of the freedom of Asian nations and their progress will be developed."

FOREIGN POSSESSIONS IN INDIA

Mr. S. K. Patil moved the following Resolution on "Foreign Possessions in India". It was seconded by Shri R. K. Sidha. The resolution which was passed unanimously said *inter alia* :

"With the establishment of independence in India the continued existence of any foreign possession in India becomes anomalous and

opposed to the conception of India's unity and freedom. Therefore it has become necessary for these possessions to be politically incorporated in India and no other solution can be stable or lasting or in conformity with the will of the people. The Congress trusts that this change will be brought about soon by peaceful methods and the friendly cooperation of the Governments concerned. The Congress realises that during this long period administrative, cultural, educational and judicial systems have grown up in these foreign possessions, which are different from those prevailing in the rest of India. Any change-over therefore must take these factors into consideration and allow for a gradual adjustment which will not interfere with the life of the people of the areas concerned. The Congress would welcome the present cultural heritage of these possessions to be continued, in so far as the people of those possessions desire and for a measure of autonomy to be granted, wherever possible, so as to enable the people of those possessions to maintain their culture and institutions within the larger framework of free India."

INDIANS IN SOUTH AFRICA

Seth Govind has moved the following resolution on Indians in South Africa which was seconded by Shri Rajji Bhai Patel. Shri Mata Prasad also addressed the Session. The resolution which was passed unanimously said *inter alia* :

"This Congress has noted with deep regret that the Government of the Union of South Africa continues to treat its Indian citizens in disregard of acknowledged human rights and of the principles laid down in the Charter of the United Nations. That Government has ignored the wishes of the General Assembly of the United Nations and even challenged the fundamental principles on which the United Nations Organisation is founded. This repudiation of a vital principle, if persisted in, can only lead to bitter and far-reaching racial conflicts and may even result in the break-up of the United Nations Organisation."

INDONESIA

Acharya Jugal Kishore then moved the resolution on Indonesia which was seconded by Shri Deshpande. The resolution which was passed unanimously said *inter alia* :

"The Congress sends its greetings to the leaders and people of the Indonesian Republic, who have struggled for their freedom against difficulties during the past three years. It assures them of its complete sympathy for their cause. The people of Indonesia have been culturally associated with the people of India for ages past and it is a matter of the utmost concern to India that Indonesia should attain her full freedom and take her rightful part in Asian and international affairs."

STATES

Mr. Balwantrai Mohita moved the following resolution on "States". It was seconded by Shri Shanti Saran (Rampur State). Among others who spoke on the resolution were: Shri Harbans Lal (East Punjab States), Shri Dulla Chand Trivedi (Rajasthan Union), Shri Kulwantrai (Patiala and East Punjab States), Shri Y. S. Parmar, Shri Gian Chand (Patiala and East Punjab States), Shri Guwanand Sharma (Telari State), Shri Satya Dev Rushari (Himachal) and Shri Sitaram Dwivedi (Benares State). Sardar Vallabhbhai Patel also addressed the Session. The Resolution which was passed unanimously said *inter alia* :

"The Congress welcomes the developments that have taken place in regard to the States in India, resulting in the ending of the Indian States system which the British Government had built up early in the 19th century. While welcoming this process of integration, merger and union, so as to make the States approximate to the Provinces, the Congress trusts that all feudal relics and impediments to the free development of the people will be removed."

COMMUNALISM

Shri Govind Ballabh Pant then moved the following resolution on "Communalism" which was seconded by Shri Purshottam Das Tandon. Among others who spoke on the resolution were Shri Anantashyam Ayyangar, Sardar Zail Singh, Shri Harinar Lal Bhargava, Sardar Mohan Singh Sahney and Shri Anwar Harwal. The resolution which was passed unanimously said among other things:

"Ever since its inception, the National Congress has conceived and striven for a nation where the people of all religions and races should have equal rights and opportunities and should function together as citizens of India. It has opposed communalism and separatism which weaken the nation and come in the way of all progress and co-operative effort. Keeping this ideal in view, it has nevertheless, by stress of circumstances, and by the pressure of the dominating power at the time, accepted certain compromises, which introduced an element of communalism in the public life of the country. In spite of the efforts of the Congress, communal forces, exploiting the name of religion grew in strength and resulted not only in the partition of the country, but also in the foul assassination of Mahatma Gandhi.

"The long past of India is evidence of the spirit of tolerance which was the basis of life and culture in this country. India has been and is a land of many religions and many races and must remain so. The freedom of India can only be based on a recognition of an over-riding unity binding together the richly varied cultural life of the country, which should have full play. The aim of the Congress has therefore been to develop this great country as a democratic secular State which neither favours nor discriminates against any particular religion.

"This Congress reiterates this objective and declares its firm resolve not to permit communalism or the misuse of religion as a political weapon for anti-national and socially reactionary purposes. The Congress calls upon the country to make a supreme effort to restore goodwill, peace and harmony among the various communities that form the nation."

LABOUR

Mr. Jagjivan Ram, then, moved the following resolution on "Labour". It was seconded by Shri Shankarrao Deo. Other speakers on the resolution were General Awar, Shri Alghur Shastri, Shri Satyanarayana Raju, Smt. Ram Dulari Sinha, and Shri M. C. Taple (Vidarbha). The resolution which was passed unanimously said *inter alia* :

"The National Congress has always stood for the rights of the working class and for ending exploitation in every shape or form. Even while engaged in a life and death struggle to achieve the freedom of the country, it never lost sight of its essential duty of protecting and advancing the vital interests of the worker, whether in the field or in the factory. The growth and development of Trade Unionism in this country owe much to the active sympathy, support and guidance of leading Congressmen and the Congress organisation.

"With the achievement of independence the task of more direct and active participation in the programme of ameliorating the condition of the working class develops more squarely on this great national organisation. The Congress calls upon its members and its constituent bodies to take more active interest in the labour field, to strengthen their links with the workers in fields and factories and to promote just relations between labour and management.

"The Congress is aware of and fully sympathises with the difficulties and hardships of the workers due to various causes and yet appeals to them to take a realistic and responsible view of the critical situation through which the country is passing and not to be swayed by destructive ideologies leading to greater strife, chaos and discord. The Congress further warns the workers against the organised attempts

to exploit the working classes for narrow political ends in the utter disregard of the vital needs and basic interests of the country.

"While appreciating the timely move of the Central Government to establish Industrial Truce, this Congress asks both capital and labour to work whole-heartedly on the maintenance of peace and good relations in industry. This Congress is of the opinion that uninterrupted and expanding production is a vital and indispensable pre-condition for relieving the present hardship of the people and for raising the standard of living of the workers. Any slowing down or suspension of work for even a short period in industry or transport anywhere in the country would greatly hamper recovery, add to the already heavy burden of miseries of the people and prove exceedingly detrimental to the interests of the workers themselves.

"The Congress fully admits that adequate incentives must be offered to the workers so that they can fully co-operate with the nation's drive for increased production. In this connection this Congress approves of the recommendations of the Economic Programme Committee of the A.I.C.C. on fixation of fair wages and fair profits and the scheme of profit-sharing for labour in industry and calls upon the Central and Provincial Governments to take effective and early steps to implement these recommendations."

ECONOMIC PROGRAMME

Prof. N. G. Ranca moved the resolution on "Economic Programme", which was seconded by Dr. P. C. Ghosh. The resolution which was passed unanimously said *inter alia* :

"The nation must undergo a period of austerity and must avoid all wasteful expenditure. Conscious and concerted effort must be made on a national scale to meet this crisis in production and price inflation. All the nation's resources, human and material, should be utilised to increase production. While the people must produce more, they must consume less and invest their savings in Government Securities and undertakings. There must be economy all round. Government must ruthlessly cut down their expenditure consistently with the efficiency of administration and the safety of the State.

"While it is essential to press forward large scale projects in order to increase the food supply and the power resources of the nation so that the nation may be self-sufficient in regard to food and other essential commodities, small scale projects should be particularly undertaken as they yield quicker results. This must be done in a planned manner. Attention must be specially directed to the rapid development of cottage and small scale industries, preferably on a co-operative basis, which will provide employment to many and will immediately produce more consumers' goods. This plan of decentralised production should form part of the permanent economy of the country.

"To assure the urban population, specially industrial workers a regular supply of food grains at the controlled rate during this period of shortage, food grains should be procured from the cultivator at a price remunerative to the cultivator and fair to the consumer after leaving enough for the peasant and his family. Peasants should co-operate with the Governments in making the procurements of food grains a success. This Congress endorses the textile policy of the Government of India and calls upon the Provincial Governments to see that a fair quota of mill-cloth and other essential goods necessary for a minimum standard of living be made available at controlled rates, preferably through co-operatives, to the villagers. The services of the A.I.S.A. and A.I.V.I.A. should be enlisted to organise an intensive campaign throughout the country for production of Khadi and other commodities.

"The Congress congratulates the Central Government on its efforts in the interest of industrial truce and social insurance and recommends early establishment in all the Provinces, States and Unions on a uniform basis, of statutory machinery for the resolution of industrial disputes in a just and peaceful manner, and also the establishment of machinery, Central, regional and functional, for the study and determination of fair wages and conditions of labour and fair remuneration of capital, and methods for the association of labour in all matters concerning industrial production such as formation of Central, regional and unit production committees.

"The Government of India have announced their Industrial Policy favouring a mixed Economy and leaving a very large sector for development and expansion by private enterprise. The industrialists in this hour of crisis must do their duty by the nation. While it is the policy of the Congress to see that the industries are operated in the interest of the nation and the key industries are progressively brought under State control and ownership, it is not its intention to injure the legitimate interests of the industrialists.

"The Central, Provincial, States and Union Governments are further requested to take steps to have adequate housing facilities provided for industrial labour. Locally available materials should be used to the largest possible extent in order to lessen cost and expedite construction.

"The Congress is fully aware of the hardships due to the rising cost of living and defective system of settlement of disputes and is anxious to find effective remedies for both. At the same time the Congress would like to place the working class on its guard against disruptive forces which want to exploit the working class for the fulfilment of their political aims. There is no better and greater duty today for all those engaged in industry in whatever capacity than to keep the wheels of production constantly going."

STANDARDS OF PUBLIC CONDUCT

Mr. Shankarra Doo then moved the following resolution on "Standards of Public Conduct". It was seconded by Shri Jagat Narain Lal. Shri Rajendra Dube also spoke on the resolution. The resolution which was passed unanimously said *inter alia* :

"The Congress, under Gandhiji's leadership, became not only a powerful instrument for gaining India's freedom, but also an organisation in intimate contact with the masses and attracting their goodwill and loyalty and exercising a moral authority over them. Congressmen came to be judged not by their wealth or status in society but by their public service and sacrifice and their individual conduct. Thus the Congress attained a supreme position in the life of the country and public standards rose to a high level.

"Unfortunately, contact with power has affected many Congressmen and there is a tendency to use this power and position for self-interest. The spirit of disinterested service and of constructive work for the public cause gradually ceases to be the motive power which moves large numbers of people. It is essential, from the point of view of the individual as well as of the nation, that this tendency should be arrested and every Congressman and Congresswoman has a duty and obligation to work to this end.

"Gandhiji combined political work with constructive and productive activity and placed a varied programme of constructive work before the country in which every Congressman, and indeed every Indian, was expected to take part. It was by this service that the Congress organisation grew in influence and the nation became strong. Political activity must necessarily be confined to a few, but national activity and service must be the privilege and obligation of every individual.

"In order to renew and revitalise itself, the Congress must devote itself to renewing this service in some form of the constructive programme. Unity among the various communities in the country is the first essential, and the removal of all forms of untouchability and the like is equally important. Other important activities are, social education of the masses in towns and villages, and a countrywide campaign for increasing production in every way and, more especially, through the agency of co-operatives and village industries, including Khadi. Association with the "Grow More Food" campaign, and organisation and service of workers in field and factory. It should be the special privilege of young men and young women to undertake these various activities in the service of the country.

"The success of the Central and Provincial Governments, controlled by the Congress, depends to a large extent on full co-operation between the Governments and the Congress organisation. This co-operation should be evolved in each Province, subject to broad principles being laid down in regard to it by the Working Committee of the Congress or the Central Parliamentary Board. It is not possible or desirable for individual Congressmen to interfere in Government's activities. Complaints of Governmental activity or abuse of authority should be dealt with by the Provincial Congress Committee alone who should approach Government for redress. In particular Congressmen must always beware of getting any special facilities, financial or other, for themselves or for their friends and relatives.

"All Congressmen must set an example in all such matters and maintain a high standard of conduct."

LINGUISTIC PROVINCES

The following resolutions on "Linguistic Provinces" and on "Congress Constitution" were moved from the Chair and passed unanimously. The resolution said *inter alia* :

"The question of the formation of new provinces on a unilingual basis and the redistribution of the existing provinces for this purpose, wherever necessary, has engaged public attention for a considerable period. The Congress is aware of the strong desire for the formation of separate provinces on a linguistic basis and it has accepted the principle. In view, however, of the report of the Linguistic Provinces Commission appointed by the President of the Constituent Assembly and the new problems that have arisen out of the achievement of independence, this Congress appoints a committee of the following three members, namely: Dr. Pattabhi Sitaramayya, Pandit Jawaharlal Nehru and Sardar Vallabhbhai Patel to review the position and to examine the question in the light of the decisions taken by the Congress in the past and the requirements of the existing situation. The Committee will submit its report to the Working Committee within three months."

One critic summed up his impressions of the whole session in this way. First, nothing new had emerged or been said save for purposes of the Party's record. Second, there had been a great deal of self-congratulation, which was justified considering the difficult circumstances. Third, while there had been a certain measure of self-criticism this was more or less qualified on the ground that the difficulties were immense, and so undiluted declaration of confidence in all placed in authority were a primary responsibility not only to the leaders but also to the Nation. In their turn the leaders left no doubt that they would not hesitate to give up their position if the organization as a whole showed signs of losing confidence in them. This is the real meaning of Pandit Nehru's insistence that the standards of Public Confidence resolution should be so amended as to delete any specific reference to Cabinet Ministers.

A.I.C.C. SESSION

The A.I.C.C. held an important session at Dehra Dun on May 21 and 22 at which it ratified the London decision by which India was to stay within the Commonwealth. The Committee also went into secret session when it discussed the record of the Congress Ministries and the whole question of relations between the Congress Governments and the Congress organisation.

The Committee met in the Convocation Hall of the Forest Research Institute. Out of 398 members about 233 were present. Most of the 12 speakers who opposed the resolution on the Commonwealth were young people or they belonged to the leftist groups. Some of the arguments they put forward related to colour bar or 'the evils of British Imperialism'. Some spokesmen of the refugees also appeared to be against the resolution. There were 29 amendments most of which were ruled out of order on technical grounds, and even out of the four or five actually moved two were later withdrawn. The resolution was passed with only six voting against it.

Pandit Nehru replying to criticism said that the London decision did not imply that India had accepted all policies pursued by individual countries in the Commonwealth. He maintained that India's prestige had been enhanced by the London decision and the cause of world peace made more secure. He wanted India to be really independent and not merely superficially so. The Prime Minister finally repudiated the suggestion that he was reluctant to develop cordial relations with Russia and would be glad to go to Russia if invited to do so.

Dr. Pattabhi Sitaramayya who started the proceedings with a speech made a rapid survey of developments in the country touching upon questions like Kashmir, Hyderabad, refugee relief, Indians overseas and the working of Provincial and State Governments.

At the end of the session a group of young men initiated a move to revitalize the Congress by forming a bloc within the larger organization.

Here are the details:

In his opening address, the President, Dr. Pattabhi Sitaramayya, welcomed the Commonwealth decision, dwelt on the situation in Hyderabad and Kashmir and discussed organisational problems before the Congress.

Referring to the Commonwealth agreement, the President said: "The Western countries and ourselves are now bound together by ties of friendliness which in fullness of time let us hope, may ripen into friendship. Let us not rake up past quarrels."

About foreign possessions in India, the President said: "I am sure that if there is a proportionate awakening in these possessions, ere long they will also be able to obtain freedom."

On Hyderabad, Dr. Pattabhi said, the problem was two-fold. How to deal with anti-social elements which had long terrorised certain border districts, and, secondly, how to change over the present provisional administration to a democratic form of Governments and liquidate the reactionary forces.

The Congress President expressed the hope that peace and order would soon be restored in Hyderabad through the firm rule of the States Ministry and its representative in that State.

On Kashmir, Dr. Pattabhi said: "Pakistan has been condemned on its own admissions. Even so, the Government of India seeks peace subject to the basic principle that peace cannot come if it is based on untruth, immorality or acceptance of brutal aggression. We must discharge our duty in defending Kashmir from aggression, and allowing the will of the people to prevail. Kashmir's future lies with India."

"There have been rumours of a division of Kashmir. Let it be clearly understood that we do not approve of any such division or of any appeasement of the aggressors."

MINORITIES

Dr. Pattabhi welcomed the recommendations of the Advisory Committee of the Constituent Assembly abolishing reservation for minorities except for Harijans, and paid a tribute to Nationalist Muslims and Sikhs.

About refugees Dr. Pattabhi said: "It behoves every one of us to ask ourselves, every day 'what have I done to ameliorate their lot?' the cumulative effort of millions may well achieve what even organised labours of Government may not."

The President, called upon everyone to follow Mahatma Gandhi's constructive programme and ended his speech saying: "Today India's prestige and reputation are high in the world. Nations of the world look for inspiration to our Prime Minister for the establishment of a world State based on truth and non-violence."

The House stood in silence for two minutes as a mark of respect to the memory of Mrs. Sarojini Naidu. This followed a moving reference made by Dr. Pattabhi to her death.

Before Dr. Rajendra Prasad moved the main resolution on the Commonwealth, Dr. Pattabhi said he would accept amendments from members, and would give them half an hour to do so. He pointed out that for the first time in the last seven years a whole day had been allotted for non-official resolutions, and it was up to them to utilise the opportunity.

COMMONWEALTH RESOLUTION

The resolution on the Commonwealth declaration, was moved by Dr. Rajendra Prasad and seconded by Pandit Govind Ballabh Pant.

"The All-India Congress Committee, having considered the declarations agreed to by the Prime Minister of India on the membership of India in the Commonwealth of Nations, as set out in the official statement issued at the conclusion of the conference of Commonwealth Prime Ministers in London on April 27, 1949, records its approval of the action taken on behalf of India."

"The Committee is of the opinion that this action is in accordance with the directive given in the foreign policy resolution of the Jaipur Congress, and it maintains the full sovereign independence of the Indian Republic, while at the same time keeping the free association of India with other Commonwealth countries in a new conception of the Commonwealth which in no way interferes with the sovereignty and freedom of action of each member country."

Moving the resolution, Dr. Rajendra Prasad said that it did not restrict India's independence either in the external or in the internal sphere.

Replying to criticisms, Dr. Prasad said that the doubts arose out of weakness, and were not warranted by the agreement. He would advise them to take the Prime Minister at his word when he said that there were no secret commitments involved. Any suspicion or doubt was an injustice to the Prime Minister and to the nation.

Dr. Rajendra Prasad said that, unlike other agreements this particular agreement on Commonwealth had no strings whatsoever attached to it. If at any time India felt she wanted to get out of the Commonwealth she was free to do so. There was nothing in the agreement to compel India to stay even one minute longer in the Commonwealth than she wanted to.

The London agreement marked yet another departure in the Commonwealth concept. Under this agreement a country which was not prepared to owe even nominal allegiance to the King was welcomed as a full member of the Commonwealth.

Dr. Rajendra Prasad expressed his conviction that the London agreement was fully in accord with past Congress pledges, India's policy of non-alignment with any bloc, Gandhi's message of friendship between nations and finally that the agreement would contribute to world peace.

Seconding the resolution, Pandit Govind Ballabh Pant said that the concept of the Commonwealth had been entirely revolutionized by the London declaration.

By the London declaration Britain had acknowledged the supreme necessity of having independent India as co-partner. Geographical and economic considerations led to the present agreement.

TWENTY AMENDMENTS

The President announced that about 20 amendments to the resolution had been received, but when he analysed them he found that several of them used ironical terms in expressing opposition to the resolution. This was not in conformity with the dignity of the House.

The President ruled out all amendments excepting three. Among those ruled out was one of Prof. Shibbanlal Saksena who sought postponement of consideration of the issue until a new consideration of the issue until a new A.I.C.C. and a new Parliament was elected.

Mr. Vishwanath Das moved an amendment seeking deletion of the reference in the resolution to the new conception of the Commonwealth.

Mr. Jagat Narain Lal (Bihar) moved an amendment stating that the declaration maintained "in spirit" the sovereign independence of the Indian Republic. His amendment substituted the words "in spirit" for the word "full" (sovereign independence) in the resolution.

Mr. Joharilal Jhanjheria (Ajmer) moved for the deletion of the word "full" before the words "sovereign independence of the Indian Republic." He said that the word was redundant.

Mr. Dasu Sinha (Bihar), opposing the resolution, said that if India was, in fact, an independent nation there was no reason why it should remain in the Commonwealth, in which a member nation like South Africa treated Indians as aliens.

Mr. Govind Das, C.P., supporting the resolution said it was not political sagacity to condemn the agreement without a constructive alternative.

Babu Puroshotamdas Tandon, U.P., supporting the resolution, said: "There are no special reasons which warrant us to sever our relations with it."

Maulana Hifzur Rahman (United Provinces), supporting the resolution, said it was Pandit Nehru's statesmanship and devotion to Congress ideology that made the London agreement possible.

Dr. Chhotram Gidwani said that the agreement should have been placed before the A.I.C.C. first and then before the Constituent Assembly. If India was equal member in the Commonwealth then the President of India should have been the head of the Commonwealth and not the King of England.

Mr. Ansar Harwani (United Provinces) said that Asia was looking to Pandit Nehru for leadership. Instead of remaining in the British Commonwealth Pandit Nehru should have taken initiative in forming an Asian Commonwealth.

Mr. Govind Sahay, Parliamentary Secretary to the U. P. Premier, opposing the resolution, said that the London agreement would weaken the forces of peace in the world. The expectation that India would give a lead to other nations had been belied by the agreement. He was afraid that India might be dragged into war as a result of this policy.

Prof. Shibbanlal Saksena, who was given one minute to speak, said, "Whatever Pandit Nehru may say I hold that this agreement will drag us into a third world war on the Anglo-American side."

PREMIER'S DEFENCE

The London decision might be "bitter" for others but not for the Congress or for India, said Pandit Nehru, replying to criticisms. It would help consolidate India's freedom and strengthen the forces of peace in the world.

The next four or five years, he added, were vital for world peace. "If we are not economically strong we will not be able to influence world politics. The London decision gives us an opportunity to advance economically. That economic advancement will be achieved in this agreement, not at the cost of national self-respect."

Pandit Nehru reiterated that the London agreement was in accordance with past pledges.

He agreed with the suggestion made by some members that the agreement should have been first discussed by the A.I.C.C. and afterwards by the Constituent Assembly. But the A.I.C.C. could not be called at too short notice while the Constituent Assembly met soon after the London declaration and it was only proper that such a momentous issue should have been referred to it immediately.

The decision, Pandit Nehru added, was "a friendly pact." The King had been recognised as a symbol of free association but India's Republican constitution would remain unaffected.

He appealed to the House not to bring in the question of racial discrimination while discussing the merits of the resolution. Membership of the Commonwealth did not prevent India from fighting South Africa's policy. India had also conflict with Pakistan on Kashmir and certain other issues. Even under the present set-up, these issues had to be taken up bilaterally just as between any two independent nations. The Commonwealth did not come into the picture. India did not want to refer such disputes to the Commonwealth because it would mean conferring the status of a super state on the Commonwealth.

The London decision did not imply that India had accepted all policies pursued by individual countries in the Commonwealth. India might have pacts and treaties with Russia and U.S.A. also for mutual benefit but that would not mean that India subscribed to Russian and American policies.

Referring to the hanging of Ganapathy in Malaya, he said, India Government tried to get the sentence commuted but failed. Government were now making efforts on behalf of Sambasivan. He would, however, point out that the Malayan Government had certain laws equally applicable to Malays, Chinese and Indians and the Government of India could not tell the Malayan Government that if Indians were arrested under the same regulations they should not be punished. But the Government of India could certainly plead for commutation or reduction of sentences issued on them taking into account the special circumstances.

Pandit Nehru said that India could not demand any rights of Indians in South Africa or elsewhere which would prejudice the rights of indigenous population. One of the members had alleged that he (Nehru) had agreed to visit U.S.A. but declined a similar invitation from the Soviet Union. Such statements, he said, were utterly baseless. He would certainly visit Soviet Union if he got the opportunity to do so. He was visiting U.S.A. because of a long-standing invitation.

SECRET SESSION

The secret session lasted about five hours and was devoted to a discussion of the working of popular ministries and Congress policy and ideals in general.

The main theme of discussion was how to check the "declining prestige" of the Congress and how to maintain the significance of ideals of truth, honesty and social equality, around which traditions of the Congress had been built.

Dr. Rajendra Prasad exhorted Congressmen to devote their time and energies to carry out the constructive programme of the Congress. He is further reported to have added that both the Congress Committees and Congress Ministries failed in their duties. In some cases, the Ministers had not carried out their duties in the way in which the people wanted them to do; and in other cases, the average Congressman failed to make the proper approach.

Dr. Rajendra Prasad is reported to have asked both sections to develop better co-operation between them henceforth. He is stated to have expressed the opinion that if the average Congressmen carried on constructive work, the failings of the Ministries could be supplemented and most of dissatisfaction would be wiped out. The Congressmen had been complaining that the Ministries were not taking effective steps to stop black marketing and hoarding. But in his opinion, average Congressmen did not make the proper approach in a spirit of co-operation.

Replying to criticism from some members of the A.I.C.C. as to why this novel method of a secret session had been devised this time and why non-official resolutions were not being taken up, Dr. Pattabhi Sitaramayya, Congress President, is understood to have told the delegates that since the Congress has taken up power in 1937, this is the first time that they were discussing the conduct of the Ministries and affairs of Governments. This is a new procedure no doubt, but they should rather welcome, instead of resenting it.

PANDIT NEHRU

Addressing the delegates for over half an hour, Pandit Nehru advised them to strengthen the Congress and devote themselves to constructive work. He is understood to have admitted that there was corruption in the country, but he said this was nothing new; it was one of the effects of the war. There was no country in the world which was not affected by it. Great Britain, perhaps, was the only country, he added, which fought corruption. In India, it was not of such magnitude that they should shout about it.

Referring to criticism that the Government had failed to nationalise industries, Pandit Nehru said that in principle it was a good policy but it was beyond the country's means. They thought that it was better to extend industries than to spend money in acquiring them.

Making a reference to the Communists, Pandit Nehru is reported to have said that he was not opposed to the ideal of Communism, but the Communist Party in India was anti-national. It wanted to create confusion by sabotage and armed insurrection. Therefore the country should beware of them.

The Socialists, Pandit Nehru is understood to have said, were patriots, but they were confusing the ends and the means. If the Government accepted that idea they would only weaken the country.

Criticising the administration, Acharya J. B. Kripalani is reported to have said that the task of the Congressmen was the task of a reformer. Reformers, however, could only create an atmosphere, and that advantage of the atmosphere was taken by the legislature and the administration. Therefore, to lay blame on Congressmen was "absurd" he is reported to have further said. It was the duty of the administration to wipe out corruption in administration. Acharya Kripalani is understood to have stated, had failed to do so.

After the British Government left, Acharya Kripalani is reported to have said, the Government had two courses before them—those between western socialism and Gandhism ideology. The administration, according to him failed to make a choice.

MODERATE TONE

The speeches of the A.I.C.C. members discussing the conduct of Congress Ministries and their relationship with the organisation at today's secret session "exceeded all expectation regarding moderation, sobriety, sense of seriousness and responsibility which characterised them" said Mr. Kala Venkat Rao, General Secretary of the Congress, who gave a resume of the proceedings to the press at the end of the session.

He said that the meeting had been arranged without much premeditation or a study of the 54 non-official resolutions which were circulated in the order of the ballot. It appeared to the

Working Committee that instead of taking these resolutions piecemeal, it would be advantageous to study the root cause of many of the complaints, and devote a day to some "introspection".

To ensure free and frank discussion it was considered desirable to exclude the press and visitors. Members, except one or two, readily took to the idea, and appreciated the opportunity given for the first time since popular Ministries came into being 13 years ago.

Almost everyone, Mr. Kala Venkat Rao said, made constructive suggestions for the working of the Congress organisation as well as the maintenance of cordial relations between the Congress organisation and the Government of the country.

Mr. Venkat Rao said that there was a suggestion for the appointment of a committee of three at a high level to clear misunderstandings, settle disputes and promote goodwill. Some emphasised the constructive programme and others frank and free exchanges of ideas. Two or three members dwelt upon the administration of controls, while several emphasised the service ideals as against power seeking. Periodical conferences between the Congress heads and the Ministries were recommended and the need for a close scrutiny of the working of the Ministries to detect cases of nepotism and even corruption was emphasised.

The slow progress of prohibition was deplored as also the halting progress in respect of nation-building activities. The conflict between the need for nation-building activity and the abolition of zamindari and anti-inflation measures was referred to. One member deprecated the leaders of the Congress speaking of corruption in the Congress. Another spoke of the financial difficulties of the Congress Committees under the new constitution.

OTHER ISSUES

A great number of resolutions had been sent up for discussion. It was this fact that led to the secret session, arrangement and the general discussion of the whole Congress position. Here are some of the resolutions so sent up and later amalgamated.

A resolution tabled by Mr. K. Subbaraja (Andhra) said "Several Congress members elected to the municipalities and other local bodies are getting handicapped in the discharge of their duties owing to local politics, and personal factions. This reflects on the Congress committees, and brings a bad name to the Congress organisation itself."

Mr. Dasu Sinha (Patna), wanted "drastic action" to be taken against Government officials indulging in "undesirable activities".

Mr. Jazat Narain's resolution, recommended the appointment of a commission to examine the working of the Congress Ministries in the provinces and the States, and to make recommendations "for ensuring efficiency as well as integrity of both the administration and Government of these areas."

A resolution tabled by Mr. Abdul Ghanil, demanded the end of the military regime in Hyderabad and the establishment of a "responsible rule."

Mr. Nandikishore Narain (Bihar) in his resolution asked for the setting up of a board to arbitrate in any dispute between Congressmen and Congress leaders and to take necessary action subject to the approval of the Congress Working Committee. His resolution also suggested that "no-confidence" motions should not be allowed to be moved against Congress leaders in the Congress organisation or Government, as such moves "encourage the reactionaries to discredit the entire Congress organisation."

The same resolution also suggested that no complaint of such a nature against anybody of the Congress organisation or Government should be entertained by the Working Committee or the Parliamentary Board, unless the same was recommended by the Arbitration Board, by a majority.

The setting up of a fitting memorial to martyrs, a joint annual meeting of P.C.C.'s and the Assembly Party, recognition of "Bande Mataram" as the national anthem, approval of the three-member committee's report on linguistic provinces, immediate election of the Central and Provincial Assemblies on adult franchise, starting of an official Congress organ in different provincial languages in order to counteract communal and reactionary forces that are at work to stifle popular voice and sentiments, incorporation of progressive elements in the Congress, protection of linguistic minorities in the areas of Bihar and Orissa in view of the fact that the formation of provinces on language basis had been postponed were also some of the other demands made in the non-official resolutions.

Resolutions had also been given notice of suggesting that there should be no partition of Kashmir, opposing "the imposition of a reactionary" Ministry in Patna and the East Punjab States Union and condemning repression there, demanding removal of grievances of the Manbhumi satyagrahis, asking the Government of India to make efforts to secure some land areas from Pakistan with a view to properly accommodating the East Bengal refugees.

Yet another resolution asked the Congress President to appoint Inspector to supervise and control the working of P.C.C.'s and other subordinate Congress committees.

There were about 50 other non-official resolutions on various subjects, including a demand for decontrol of commodities, the imposition of a ban on the Communist Party, the transfer of the Biria House to the nation, and provision of more accommodation for indoor patients in hospitals.

NEW BLOC

A move to organise a new bloc of "young Congressmen" within the Congress in order to revitalize the Congress organisation was initiated during the session of the All-India Congress Committee.

A conference to consider the ways and means of organising such a bloc and chalk out a programme for it was to be held in Delhi in July 1949.

The initiators were a group of 25 members of the A.I.C.C. who issued a joint statement emphasising the need for such a bloc within the Congress "to save the Congress from plunging into chaos and anarchy".

The signatories included Mr. Mahesh Dutt, Mr. Anwar Farwani, Mr. Abdul Gani, Mr. Mohan Singh Sahawany, Mr. Govind Prasad Srivastava, Mr. Pariparamund Saxena, Mr. Fakir Chaud Roy and Mr. B. P. Maity. Twenty-five more members were expected to sign the same statement.

HISTORY 1885-1947

FOR a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the *Indian Year Book*.

The Congress was founded in 1885 by Mr. Allan Octavian Hume, retired member of the Indian Civil Service, and it held its first session in Bombay during Christmas of that year.

In 1927 the Congress adopted independence as the goal of India. In the following two years the Congress made what the extremists left described as a climb-down. At its 1928 session the Congress, while adhering to independence, agreed to accept Dominion Status, if granted, before the end of 1929.

Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England, British India and the Indian States.

In fulfilment of the "ultimatum" issued at its previous session, the Congress, at its 1929 session, declared itself for complete independence or "Purna Swaraj." Throughout the year 1930 the Congress was engaged in a campaign of civil disobedience:

Early next year the Congress suspended civil disobedience by virtue of an agreement arrived at with the Government.

As a result of this Mahatma Gandhi, on behalf of the Congress, went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its normal activities and succeeded fully in its object. All forms of Congress work throughout the country were successfully prevented.

In the middle of 1934 the civil disobedience movement was withdrawn. In the autumn of that year Mahatma Gandhi retired from the Congress, although he remained in practice the virtual dictator of the organisation. During the next four or five years, the Congress functioned as a constitutional organisation. It was actually in charge of His Majesty's Government for more than two years in eight provinces under the 1935 constitution.

(See past issues of the *Indian Year Book* for a history of the non-co-operation and the civil disobedience movements, and for the parliamentary activities of the Congress.)

This parliamentary phase proved to be short-lived. Soon after the declaration of the Second World War the Congress withdrew its Ministers in the provinces as a protest against the fact that India was made a belligerent without consulting the people, and two, that India cannot assist the war effort unless one of the aims of the war was the grant of freedom to India. The Congress gave supreme command of the organisation and its members to Mahatma Gandhi who launched another campaign of civil disobedience—this time on the issue that Congressmen should have the right non-violently to preach against India's war effort.

Thousands of Congressmen answered the Mahatma's call, uttered anti-war slogans and courted jail. This civil disobedience campaign was not of the mass type, but restricted to individuals carefully chosen by Mahatma Gandhi himself. Even so, close upon 25,000 representative Congress leaders took part in the campaign.

Ramgarh. The first great event in the history of the Congress after the war started was the annual session at Ramgarh in April 1940. Maulana Abul Kalam Azad presided. Only one resolution was adopted by the Ramgarh session. It stated *inter alia*:

"The Congress hereby declares again that nothing short of complete independence can be accepted by the people of India . . .

"The Congress is further of opinion that, while it will always be ready, as it ever has been, to make every effort to secure communal harmony, no permanent solution is possible, except through a Constituent Assembly, where the rights of all recognised minorities will be fully protected by agreement, as far as possible, between the elected representatives of various majority and minority groups, or by arbitration if agreement is not reached on any point. Any alternative will lack finality . . ."

(For full text of the resolution see past issues of *The Indian Year Book*.)

The weeks that followed the Ramgarh session of the Congress were occupied by intensive preparation for a direct action movement under the guidance of Mahatma Gandhi, side by side with expressions of hope by the Mahatma and other Congress leaders that such a struggle might be avoided. Mahatma Gandhi's notion of

"preparation" was as usual on the constructive plane, that is, hand-spinning, removal of untouchability and promotion of Hindu-Muslim unity.

As for communal unity, Mahatma Gandhi stoutly resisted the Muslim League demand for Pakistan but declared that, although, as a man of non-violence, he could not resist the proposed partition with force, he could never be a willing party to the proposed vivisection of the country.

POONA OFFER

A few weeks later the war took a sudden turn for the worse. The invasion of the Low Countries, the capitulation of Belgium and the collapse of France produced in India a new feeling in favour of Britain. There was clear evidence of a desire on the part of many Congress leaders actively to help in the war in spite of Mahatma Gandhi's known convictions on the subject.

By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation caused a revolution in the minds of most Congressmen who did not adhere steadfastly to the Mahatma and his non-violence in any eventuality. The Congress Working Committee virtually abandoned him and offered to co-operate in the war effort provided a fully representative National Government was formed at the centre. Apart from the ideological separation from the Mahatma, this offer constituted a big change for the Congress—from non-participation in any war to active help in the prosecution of this war.

The resolution said, among other things:—

"The Working Committee are more than ever convinced that the acknowledgement by Great Britain of the complete independence of India is the only solution of the problems facing both India and Britain and are, therefore, of opinion that such an unequivocal declaration should be immediately made and that, as an immediate step in giving effect to it, a provisional National Government should be constituted at the Centre, which, though formed as a transitory measure, should be such as to command the confidence of all the elected elements in the Central Legislature, and secure the closest co-operation of the responsible Governments in the provinces.

" . . . The Working Committee declare that if these measures are adopted, it will enable the Congress to throw in its full weight in the efforts for the effective organisation of the defence of the country."

Government Response.—Then came the famous statement by the Viceroy, known as the British Government's August offer. (For full text see past issues of *The Indian Year Book*.) It said *inter alia*:

"Last October His Majesty's Government again made it clear that Dominion Status was their objective for India. They added that they were ready to authorise the expansion of the Governor-General's Council to include a certain number of representatives of political parties, and they proposed the establishment of a Consultative Committee . . ."

"They (His Majesty's Government) have authorised me accordingly to invite a certain number of representative Indians to join my Executive Council.

"They have authorised me further to establish a War Advisory Council, which would meet at regular intervals and which would contain representatives of the Indian States and of other interests in the national life of India as a whole . . .

"With regard to the machinery for building, within the British Commonwealth of Nations, a new constitutional scheme . . .

"His Majesty's Government authorise me to declare that they will most readily assent to the setting up, after the conclusion of the war, with

the least possible delay, of a body representative of the principal elements in India's national life in order to devise the framework of the new Constitution."

The Congress, however, rejected the Viceroy's offer as being wholly opposed not only to the principle of democracy, acclaimed by the British Government in their war aims, but also to the best interests of India.

In order to meet the League objections to the Congress idea of a National Government Mr. C. Rajagopalachariar made what has come to be known as a "sporting offer". He said: "In answer to Mr. Amery's difficulty as to the minorities, I may make a sporting offer that if His Majesty's Government agree to a Provisional National Government being formed at once, I will undertake to persuade my colleagues in the Congress to agree to the Muslim League being invited to nominate the Prime Minister and to let him form a National Government as he would consider best." Nothing, however, came out of this "sporting offer."

CIVIL DISOBEDIENCE

When this "last gesture" was ignored, the Congress returned to Mahatma Gandhi and his programme. This was the outcome of the deliberations of the All-India Congress Committee held in Bombay in the middle of September 1940. The A.I.C.C. passed a resolution confirming the August resolution of the Working Committee rejecting the Viceroy's offer and requesting the Mahatma to take over the leadership of the Congress.

About a fortnight after this, Mahatma Gandhi unfolded his plan of individual civil disobedience restricted to a limited number of satyagrahis.

He chose as his first satyagrahi Mr. Vinoba Bhave who had been doing village uplift work. Accordingly Mr. Vinoba Bhave set out on a marching tour from village to village preaching non-participation in war on grounds of non-violence. He enjoyed freedom for a couple of days but was arrested on the third day and sentenced to imprisonment for doing an act prejudicial under the Defence of India Ordinance.

Then followed a series of arrests of persons chosen by the Mahatma. They included most of the members of the Congress Working Committee, most of the Premiers and Ministers of the former Congress Governments and a large number of members of the Central Legislature and other prominent Congressmen all over the country.

The general feeling of political inaction engendered by the satyagraha movement, the restlessness of the public at the absence of any gesture from the Government, the conviction that the country's war effort was being adversely affected, ever so slightly, by the continuance of leaders in prison, and the insistent demands of non-Congress leaders led the Government to release the prisoners towards the end of 1941. The Government of India announced that "confident in the determination of all responsible opinion in India to support the war effort until victory is secured, have reached the conclusion that those civil disobedience prisoners whose offences have been formal or symbolic in character can be set free." Accordingly the bulk of satyagrahi prisoners were released.

Co-operation Offered.—From the statements issued by the Congress President, Pandit Nehru and others soon after their release it became apparent that once again they favoured active participation in the armed defence of India and the prosecution of the war to victory if Indians were given complete control of affairs and if steps were taken to lay the foundations of Indian freedom.

The Congress Working Committee met at Bardoli and made an important change in Congress policy. Civil disobedience was suspended and the door was left open for negotiations with the British Government for a political settlement.

A resolution was passed reiterating their attitude towards the war as set forth in their statement issued on September 14, 1939, wherein they condemned the Nazi and Fascist aggression and expressed their willingness to help the cause of freedom and democracy, provided the objectives of the war were clearly stated and acted upon insofar as was possible at present.

Another resolution relieved Mahatma Gandhi of the responsibility laid upon him by the A.I.C.C. in September 1940, while reiterating that the policy of non-violence adopted under his guidance for the attainment of 'swaraj,' and which had proved so successful in leading to mass awakening and otherwise would be adhered to by the Congress. (For details see past issues of the *Indian Year Book*.)

Japan's entry into the war and her early gains in Malaya, the Netherlands, East Indies and Burma impelled the British authorities to consider whether the time had not arrived for settling the political problems in India if only to promote unity of purpose and co-ordinated endeavour in this country in order effectively to meet Japanese invasion of India. It is also widely believed that Russia, China and the United States of America brought their influence to bear upon the British authorities in this behalf.

CRIPPS' OFFER

Shortly thereafter the Prime Minister made a statement in Parliament announcing that Sir Stafford Cripps, the Socialist leader who had recently returned to England from his diplomatic successes at Moscow and had been made the Lord Privy Seal in a reconstituted War Cabinet, would go to India immediately on a special mission.

Sir Stafford Cripps flew to India in a few days and held consultations with representatives of the Congress, the Muslim League, the Hindu Mahasabha, the 'Princes' Chamber, and a number of other political and sectional organisations. Here is the text of the offer which he brought to India in the name of the British Cabinet:

"His Majesty's Government, having considered the anxieties expressed in this country and in India as to the fulfilment of promises made in regard to the future of India, have decided to lay down in precise and clear terms the steps which they propose shall be taken for the earliest possible realisation of self-government in India. The object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by a common allegiance to the Crown but equal to them in every respect, in no way subordinate in any aspect of its domestic or external affairs."

"His Majesty's Government, therefore, make the following Declaration:—

"(a) Immediately upon cessation of hostilities steps shall be taken to set up in India in manner described hereafter an elected body charged with the task of framing a new Constitution for India."

"(b) Provision shall be made, as set out below, for participation of Indian States in the Constitution-making body."

"(c) His Majesty's Government undertake to accept and implement forthwith the Constitution so framed subject only to:—

"(i) The right of any Province of British India that is not prepared to accept the new Constitution to retain its present constitutional position, provision being made for its subsequent accession if it so decides."

"With such non-acceding Provinces, should they so desire, His Majesty's Government will be prepared to agree upon a new Constitution giving them the same full status as the Indian Union and arrived at by a procedure analogous to that here laid down."

"(ii) The signing of a Treaty which shall be negotiated between His Majesty's Government and the Constitution-making body. This

Treaty will cover all necessary matters arising out of the complete transfer of responsibility from British to Indian hands; it will make provision, in accordance with undertakings given by His Majesty's Government, for the protection of racial and religious minorities; but will not impose any restriction on the power of the Indian Union to decide in future its relationship to other Member States of the British Commonwealth."

"Whether or not an Indian State elects to adhere to the Constitution it will be necessary to negotiate a revision of its Treaty arrangements so far as this may be required in the new situation."

Responsible Government.—" (d) The Constitution-making body shall be composed as follows unless the leaders of Indian opinion in the principal communities agree upon some other form before the end of hostilities:—

"Immediately upon the result being known of Provincial Elections which will be necessary at the end of hostilities, the entire membership of the Lower Houses of Provincial Legislatures shall as a single electoral college proceed to the election of the Constitution-making body by the system of proportional representation. This new body shall be in number about 1/10th of the number of the electoral college."

"Indian States shall be invited to appoint representatives in the same proportion to their total population as in the case of representatives of British India as a whole and with the same powers as British Indian members."

"(e) During the critical period which now faces India and until the new Constitution can be framed His Majesty's Government must inevitably bear the responsibility for, and retain the control and direction of, the defence of India as part of their world war effort, but the task of organising to the full the military moral and material resources of India must be the responsibility of the Government of India with the co-operation of the peoples of India. His Majesty's Government desire and invite the immediate and effective participation of the leaders of the principal sections of the Indian people in the counsels of their country, of the Commonwealth and of the United Nations. Thus they will be enabled to give their active and constructive help in the discharge of a task which is vital and essential for the future freedom of India."

After protracted negotiations, in which representatives of the principal Indian organisations met, in addition to Sir Stafford, the Commander-in-Chief and Col. Louis Johnson, the personal representative in India of President Roosevelt, the Congress rejected the scheme. The Hindu Mahasabha had already rejected it (see chapter on Hindu Mahasabha) and the Muslim League followed suit (see chapter on Muslim League), while other organisations expressed disapproval in more or less strong language (see chapter on the Indian National Liberal Federation).

CONGRESS OBJECTIONS

The Congress Working Committee, which held what was perhaps the longest session in its history, passed a resolution of which the following is a summary:—

"The Committee, while recognising that self-determination for the people of India is accepted in principle in that uncertain future, regret that this is fettered and circumscribed. . . . Even the constitution-making body is so constituted that the people's right to self-determination is vitiated by the introduction of non-representative elements. . . .

"The complete ignoring of the ninety millions of the people of the Indian States and their treatment as commodities at the disposal of their rulers is a negation of both democracy and self-determination. . . .

"The acceptance beforehand of the novel principle of non-accession for a province is also a severe blow to the conception of Indian unity and an apple of discord likely to generate growing trouble in the provinces. . . .

"Nevertheless the Committee cannot think in terms of compelling the people in any territorial unit to remain in an Indian Union against their declared and established will. . . . Each territorial unit should have the fullest possible autonomy within the Union, consistently with a strong national state.

Freedom Now.—"Any proposal concerning the future of India must demand attention and scrutiny, but in today's grave crisis, it is the present that counts, and even proposals for the future are important in so far as they affect the present. . . . For this present the British War Cabinet's proposals are vague and altogether incomplete, and it would appear that no vital changes in the present structure are contemplated.

"It has been made clear that the defence of India will in any event remain under British control. . . . The Committee would repeat that an essential and fundamental prerequisite for the assumption of responsibility by the Indian people in the present is their realisation as a fact that they are free and are in charge of maintaining and defending their freedom. . . . It is manifest that the present Government of India, as well as its provincial agencies are lacking in competence, and are incapable of shouldering the burden of India's defence.

"The Committee, therefore, is unable to accept the proposals put forward on behalf of the British War Cabinet."

Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India, "though not quite perhaps to that position."

Rajagopalachari Resigns.—In spite of the failure of the effort of Sir Stafford Cripps and the bitter tone of the final remarks in the controversy, responsible Indian leaders reiterated their determination to defend the country against aggression.

Just at this time, on the eve of the meeting of the All-India Congress Committee, called at Allahabad at the end of April 1942, the Madras Congress Legislature Party, under the guidance of Mr. Rajagopalachari, passed a resolution recommending to the A.-I.C.C. to "acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India" and to "invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency."

The meeting also passed a resolution voicing "the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its utmost to secure the requisite conditions for the people to play their part. The party is of the opinion further that to facilitate united and effective action in this regard by such a popular Government, the Muslim League should be invited to participate in it."

These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles.

The Madras resolution acknowledging the Muslim League's claim to separation came up for consideration before a meeting of the A.-I.C.C. at Allahabad in April 1942, but was defeated by 120 votes against 15, while a counter-resolution, moved by Pandit Jagat Narain, opposing any proposal to disintegrate India, was carried by 92 votes to 17.

When the bold line suggested by him proved unacceptable to the bulk of Congressmen Mr. Rajagopalachari had to resign his membership of the Congress Working Committee and his leadership of the Madras Legislature Congress party.

"QUIT INDIA"

The weeks that followed the Allahabad meeting of the All-India Congress Committee witnessed Mahatma Gandhi's advocating in his weekly organ, *Harijan*, policies outlined in the resolutions adopted at Allahabad and resisting Mr. Rajagopalachari's proposal to settle with the Muslim League on the basis of dividing India. The South Indian leader, for his part, carried on a raging and tearing campaign in favour of making peace with Qaid-e-Azam Jinnah and thereby facilitating the establishment of a National Government, which, he affirmed, was essential not only for the well-being of India but also for the object of effectively defending the country against Japanese aggression.

It became apparent from Mahatma Gandhi's writings and utterances that he was growing more and more restless and bitter towards Britain for the latter's refusal to concede the Congress demand. Towards the end of April the Mahatma conceived an idea which later crystallised into what has come to be known as the "Quit India" demand. He urged the withdrawal of the British from India not only in India's interest but also for the sake of Britain. He wrote in *Harijan*: "Hitherto the rulers have said, 'we would gladly retire if we know to whom we should hand over the reins'. My answer now is, 'leave India to God; if that is too much, then leave her to anarchy'."

As time rolled on Mahatma Gandhi appeared to abandon the policy of non-embarrassment to Britain's war effort in India. He also hinted that his views on the moral basis of Britain's war had undergone a change. In an interview to the press in Bombay in the middle of May he stated: "I used to say that my moral support was entirely with Great Britain. I am very sorry to have to confess today that my mind refuses to give that moral support." He added, "This ordered, disciplined anarchy of British rule should go, and if there is complete lawlessness in India as a result, I would risk it, for I believe that 22 years of continuous effort at educating India along the lines of non-violence will not have gone in vain and people will evolve real popular order out of chaos."

Not Pro-Japanese.—The Mahatma took care to avoid giving the impression that his demand for the withdrawal of Britain was the outcome of pro-Japanese sentiment. He wrote: "Of course, the people must not, on any account lean on the Japanese to get rid of the British power. That were a remedy worse than the disease. But in this struggle every risk has to be run in order to cure ourselves of the biggest disease, a disease which has sapped our manhood and almost made us feel as if we must for ever be slaves. . . ."

"Assuming that the national Government is formed and it answers my expectations, its first act would be to enter into a treaty with the United Nations for defensive operations against aggressive powers, it being common cause that India will have nothing to do with any of the Fascist powers and India would be morally bound to help the United Nations. . . ."

"It should be understood that the Indian army has been disbanded with the withdrawal of British power. Again if I have any say in the councils of the National Government, all its power, prestige and resources would be used towards bringing about world peace."

Answering the criticism that the withdrawal of Britain might lead to Japanese occupation of India, Mahatma Gandhi wrote, "Abrupt withdrawal of the Allied troops might result in Japan's occupation of India and China's sure fall. I had not the remotest idea of any such catastrophe resulting from my action. Therefore I feel that if in spite of the acceptance of my proposal, it is deemed necessary by the Allies to remain in India to prevent Japanese occupation, they should do so, subject to such conditions as may be prescribed by the National Government that may be set up after the British withdrawal.

DEMAND FOR WITHDRAWAL

With the country thus prepared, the Working Committee of the Congress met at Wardha in the middle of July and passed a lengthy resolution embodying the Mahatma's ideas. The resolution ran:—

"Events happening from day to day, and the experience that the people of India are passing through, confirm the opinion of Congressmen that British rule in India must end immediately, not merely because foreign domination, even at its best, is an evil in itself and a continuing injury to the subject people, but because India in bondage can play no effective part in defending herself and in affecting the fortunes of the war that is desolating humanity. . . ."

"Ever since the outbreak of the world war, the Congress has studiously pursued a policy of non-embarrassment. Even at the risk of making its *satyagraha* ineffective, it deliberately gave it a symbolic character, in the hope that this policy of non-embarrassment, carried to its logical extreme, would be duly appreciated and that real power would be transferred to popular representatives, so as to enable the nation to make its fullest contribution towards the realisation of human freedom throughout the world, which is in danger of being crushed. . . ."

"These hopes, have, however, been dashed to pieces. The abortive Cripps proposals showed in the clearest possible manner that there was no change in the British Government's attitude towards India. . . ."

"The Congress representatives have tried their utmost to bring about a solution of the communal tangle. But this has been made impossible by the presence of the Foreign Power whose long record has been the pursue relentlessly the policy of divide and rule. . . ."

"In making the proposal for the withdrawal of British Rule from India, the Congress has no desire whatsoever to embarrass Great Britain or the Allied Powers in their prosecution of the war. . . . The Congress is, therefore, agreeable to the stationing of the armed forces of the Allies in India, should they so desire, in order to ward off and resist Japanese or other aggression, and to protect and help China. . . ."

"Should, however, this appeal fail, the Congress cannot view without the gravest apprehension the continuation of the present state of affairs. . . . The Congress will then be reluctantly compelled to utilise all the non-violent strength it might have gathered since 1920. . . . Such a widespread struggle would inevitably be under the leadership of Gandhiji. . . ."

"OPEN REBELLION"

Commenting on the resolution, Mahatma Gandhi said: "It will be a mass movement of a strictly non-violent character. It will include all that a mass movement can include. I do not want rioting as a direct result. . . . My intention is to make the thing as short and swift as possible. But if I am dragged into jail, it is difficult to say what I may do. But I can fast, as I have fasted before now, though I should try to avoid such an extreme step so far as possible." Discussing the possibility of negotiations, he said: "There is no room left for negotiations in the proposal for withdrawal. Either they recognise dependence or they don't. After that recognition many things can follow. After all it is an open rebellion. . . ."

In the period between the adoption by the Working Committee of its July resolution and the meeting of the A.-I.C.C. in August Mahatma Gandhi indicated that he was prepared to meet the Viceroy and discuss his demand with him and that he would call off the movement if he were convinced by anyone that in the midst of war the British Government could not declare India free without jeopardising the war effort. He intended to handle the movement gently, but he would not hesitate to go to the extreme limit if he found that no impression was produced on the British Government or the Allied Powers.

A Warning.—Publication of the Working Committee's July resolution aroused much hostile comment abroad in reply to which the Mahatma wrote: "... The Justice of the demand for the ending of British Power has never been questioned; the moment chosen for enforcing it is the target of attack. It is clear as crystal in the Working Committee resolution why this moment is chosen... We know that if India does not become free now, the hidden discontent will burst forth into a welcome to the Japanese, should they effect a landing..."

A part from Indo-British relationship Mahatma Gandhi made an important change in his policy in the summer of 1942 when he gave up his old belief that internal unity must precede political emancipation and declared instead that communal unity could only follow the removal of the third party.

Throughout this controversy, Pandit Jawaharlal Nehru steadfastly advocated that nothing should be said or done which would render India vulnerable to Japanese attack.

For a time there seemed to be some difference of opinion among the front rank Congress leaders on the wisdom of launching a political movement when the enemy was at the country's gates; but eventually unanimity was reached and the resolution given above was passed declaring that the withdrawal of British from India was necessary both for Indian independence and for effective resistance to the Axis and that if the British refuse to yield, the Congress had no alternative but to launch a campaign of civil disobedience.

AUGUST RESOLUTION

On the eve of the meeting of the A-I.C.C. in Bombay, the Working Committee of the Congress met and drafted the following resolution for submission to the A-I.C.C.:

"The Committee has viewed with dismay the deterioration of the situation on the Russian and Chinese fronts and convicts to the Russian and Chinese peoples its high appreciation of their heroism in defence of their freedom. This increasing peril makes it incumbent on all those who strive for freedom and who sympathise with the victims of aggression, to examine the foundations of the policy so far pursued by the Allied Nations, which has led to repeated and disastrous failure. It is not by adhering to such aims and policies and methods that failure can be converted into success, for past experience has shown that failure is inherent in them. These policies have been based not on freedom so much as on the domination of subject and colonial countries, and the continuation of the imperialist tradition and method..."

Constituent Assembly.—"The peril of today, therefore, necessitates the independence of India and the ending of British domination... The A-I.C.C. therefore repeats with all emphasis the demand for the withdrawal of the British Power from India. On the declaration of India's independence, a Provisional Government will be formed and free India will become an ally of the United Nations, sharing with them in the trials and tribulations of the joint enterprise of the struggle for freedom. The Provisional Government can only be formed by the co-operation of the principal parties and groups in the country... The Provisional Government will evolve a scheme for a Constituent Assembly which will prepare a constitution for the Government of India acceptable to all sections of the people. This constitution, according to the Congress view, should be a federal one, with the largest measure of autonomy for the federating units, and with the residuary powers vesting in these units."

"The freedom of India must be the symbol of and prelude to this freedom of all other Asiatic nations under foreign domination..."

"While the A-I.C.C. must primarily be concerned with the independence and defence of India in this hour of danger, the Committee is of opinion that the future peace, security and ordered progress of the world demand a World

Federation of free nations, and on no other basis can the problems of the modern world be solved... An independent India would gladly join such a World Federation and co-operate on an equal basis with other countries in the solution of international problems..."

The Coming Struggle.—"The A-I.C.C. would yet again, at this last moment, in the interest of world freedom, renew this appeal to Britain and the United Nations. But the Committee feels that it is no longer justified in holding the nation back from endeavouring to assert its will against an imperialist and authoritarian Government... The Committee resolves, therefore, to sanction for the vindication of India's inalienable right to freedom and independence, the starting of a mass struggle on non-violent lines on the widest possible scale, so that the country might utilise all the non-violent strength it has gathered during the last twenty-two years of peaceful struggle. Such a struggle must inevitably be under the leadership of Gandhiji..."

"... The people must remember that non-violence is the basis of this movement. A time may come when it may not be possible to issue instructions or for instructions to reach our people, and when no Congress Committees can function. When this happens, every man and woman, who is participating in this movement must function for himself or herself within the four corners of the general instructions issued."

"Lastly, while the A-I.C.C. has stated its own view of the future governance under free India, the A-I.C.C. wishes to make it quite clear to all concerned that by embarking on mass struggle it has no intention of gaining power for the Congress. The power, when it comes, will belong to the whole people of India."

The A-I.C.C. met in Bombay on the 7th August in a tense atmosphere. Maulana Abul Kalam Azad, opening the proceedings, refuted the suggestion that once India was given freedom she would ally herself with Japan. Mahatma Gandhi, who followed the President, maintained that he had no hatred for the British. "In fact," he remarked, "I am the greatest friend of theirs now, as they are in trouble. I have always believed that they would never lose."

Six amendments were moved, three of which stressed the need for a constitutional settlement as a condition precedent to the starting of any mass movement. After Pandit Jawaharlal Nehru, the mover of the resolution, had replied to the debate, the President, Maulana Abul Kalam Azad, appealed to the movers of the amendments to withdraw them and save time. Three amendments were then withdrawn, and the remaining three were rejected. The resolution was carried 13 members voting against it. The total number of members present was nearly 240.

Do or Die.—On the declaration of the result of the resolution, Mahatma Gandhi spoke for nearly 70 minutes in Hindi and for 20 minutes in English.

He observed that he had no objection to the transfer of power to Muslims. The Muslims would then have a body to administer the affairs of the country. That body would command the allegiance not only of Muslims but of Hindus and other communities as well.

Continuing the Mahatma said that he would write to the Viceroy intimating to him the contents of the resolution and the implications thereof. It would not be very long before the Viceroy's reaction was known. Meanwhile he would advise the members and through them other Indians to feel that every day that they had shaken off the bonds of slavery and that they were free men and women.

The Mahatma concluded: "Every man is free to go to the fullest length under *ahimsa* (non-violence), by complete deadlock, strikes and other non-violent means. Satyagrahis should go out to die and not to live. It is only when

individuals go out to seek and face death that the nation will survive. *Karenge ya Marenge* (We shall do or die)."

It was reported that on the eve of the A-I.C.C. meeting and during this session vigorous efforts were made by Congress leaders to contact Quaid-e-Azam Jinnah with a view to arriving at an agreement with the Muslim League.

Just as the Congress was eager to arrive at a settlement with the Muslim League, similarly it was obvious that the Congress would have accepted any genuine gesture from the Government and cheerfully submit to negotiations in respect of details. The view was widely held at the time that subsequent events would have taken a different course if a week or fortnight had been allowed to elapse after the adoption of the A-I.C.C. resolution.

GOVERNMENT CHARGE

Government, however, took a different view of the situation. They were convinced and they claimed they had evidence, that the Congress had no genuine desire to negotiate a settlement but that with peace on their lips they were secretly planning a widespread subversive movement. The Government, therefore, decided to act firmly and quickly.

Within a few hours of the adoption of the "Quit India" resolution by the A-I.C.C. and the termination of its proceedings, Mahatma Gandhi and the other Congress leaders were rounded up under the Defence of India Rules and kept under detention, completely isolated from the outside world. Strict measures were taken to prevent the movement from spreading or taking root. In a resolution of the Governor-General-in-Council published on the morning of the A-I.C.C. meeting Government expressed regret at the Congress resolution and affirmed their determination to meet the challenge contained in it. The resolution said *inter alia*:

"... The Governor-General-in-Council has been aware, too, for some days past of dangerous preparations by the Congress Party for unlawful, and in some cases violent activities, directed among other things, to the interruption of communications and public utility services, the organisation of strikes, tampering with the loyalty of Government servants, and interference with defence measures, including recruitment."

"The Government of India have waited patiently in the hope that wisest counsel might prevail. They have been disappointed in that hope. To a challenge such as the present there can only be one answer."

"The Government of India would regard it as wholly incompatible with their responsibilities to the people of India, and their obligations to the Allies, that a demand should be discussed the acceptance of which would plunge India into confusion and anarchy internally, and would paralyse her effort in the common cause of human freedom."

"Nor can the Government of India accept the claim of the Congress Party to speak for India as a whole... Acceptance of the proposals now put forward by the Congress Party must mean the abandonment of all those large and powerful elements in the population which have condemned the course of action proposed by the Congress Party... But for the resistance of the Congress Party to all constructive endeavours, India might even now be enjoying self-government."

No Flinching.—"British policy for India's future stands clear. It is that once hostilities cease, India shall devise for herself with full freedom of decision; and on a basis embracing all and not only a single party, the form of Government which she regards as most suited to her conditions; and that in the meantime Indian leaders shall fully participate in the Government of their country and in the councils of the Commonwealth and of the United Nations. The fullest

opportunity for the attainment of self-government by the people of India has been guaranteed by His Majesty's Government. . .

"There is nothing that the Government of India resented more than this challenge at so critical a juncture. But on them there lies the task of detaching India, of maintaining India's capacity to wage war, of safeguarding India's interests, of finding the balance between the different sections of her people without fear or favour. That task the Government of India will discharge in face of the challenge now thrown down by the Congress Party.

LEADERS ARRESTED

On the morning of August 9, Mahatma Gandhi and other Congress leaders were arrested in Bombay and simultaneously throughout the country a round-up of important Congressmen took place. The total number of arrests on that day amounted to a few hundred. In the words of an official publication, "the first reactions to the arrests were surprisingly mild. On August 9 there were disturbances in Bombay, Ahmedabad and Poona, but the rest of the country remained quiet. On August 10 disturbances occurred also in Delhi and a few towns in the United Provinces, but still no serious repercussions were reported from elsewhere. It was from August 11 that the situation began to deteriorate rapidly.

From then onwards, apart from the *fasts*, protests, meetings, and similar demonstration that were to be expected, outbreaks of violence, arson, murder and sabotage unfortunately took place, though in no case could they be regarded as a national part of the protest movement. In India takes these latter as directed either against communication of all kinds (including railways, posts and telegraphs) or against the police. The outbreaks started almost simultaneously in widely separated areas in the provinces of Madras, Bombay and Bihar and also in the Central and United Provinces. The damage done was extensive; and in many instances the manner in which it was done displayed a great deal of technical knowledge. Block instructions and control rooms in railway stations were smothered out by destruction; and the same technique appeared over and over again both in the selection of objects for attack—on the railways, in Post and Telegraph offices and lines, and on electric power lines and installations—and also in the manner in which the damage was carried out. On the other hand, industrial plant and machinery, even where it was fully employed on Government work, escaped any serious injury.

Violence.—In the course of a debate in the Assembly, Sir Reginald Maxwell declared that till the middle of November 1942, 49 fatal and 1,363 non-fatal cases amongst the police force were reported from general violence. This was also responsible for destroying or badly damaging 192 police stations and posts, 494 Government buildings, 318 railway stations and 509 post and telegraph offices. There were 103 cases of serious damage to railway track and 11,285 cases of serious damage to agricultural telegraph and telephone lines and installations. There were three cases in which military property and installations were destroyed or damaged. There were 11 fatal cases and 70 non-fatal cases amongst the military from mob violence. These figures would indicate the seriousness of the rebellion Government had to face in the country.

Muslims as a community kept out of the disturbances (so did the followers of Dr. Ambedkar, except for cessation of work for a few weeks in the Ahmedabad textile industry the industrial population was generally unaffected by the movement). The public services, the police, the post and telegraphs, the railways and urban utility services carried on as usual. Students were enthusiastic for a few months, but inevitably their zeal flagged as time passed.

Most of the moderate leaders condemned the less attractive features of the protest movement in unmistakable terms. Mr. C. Rajagopal-

achari was among the foremost of the critics. Many of them, however, disputed the Government's contention that the movement was initiated and inspired by the Congress, contending that it was more the expression of the peoples' frustration and disappointment at Britain's attitude towards Indian aspirations and an expression of the peoples' resentment over the arrest of Mahatma Gandhi and the Congress leaders. They were anxious that something must be done to put a stop to the movement and to restore normal political life. They suggested that negotiations be undertaken with the Mahatma both for a settlement for the Indo-British question and the inter-party disputes within the country.

In pursuance of this desire, Dr. Shama-prasad Mookerjee, Hindu Mahasabha leader, at present Minister of Industries and Supply requested the Viceroy to permit him to meet Mahatma Gandhi with a view to exploring the possibilities of a Congress-League settlement. This was turned down. Mr. Rajagopalachari made a similar attempt a few weeks later, but his request too met with the same fate.

THE FAST

There was complete frustration in the Indian political world. There seemed no way out of the deadlock, both Indo-British and internal. At this juncture, on the 9th of February 1943, exactly six months after his arrest, Mahatma Gandhi announced his intention to undertake a fast for 21 days. He had earlier written to the Viceroy reiterating his faith in non-violence, abhorring the violence both of the people and of the Government in the shape of repression, protesting against the charge that he and the Congress were responsible for all that had taken place in the country, demanding an opportunity to rebut that charge, and asking for facilities to go over the whole question in consultation with the members of the Congress Working Committee, with a view to an examination of the political situation *de novo*.

His letters to the Viceroy and the latter's replies are published *extenso* in past issues of *The Indian Year Book*.

Then was widespread demand for the release of the Mahatma or at least for facilities to enable him to consult the members of the Working Committee. The Opposition in the Indian Legislature raised the question of his fast through an adjournment motion and avoiding controversial issues, demanded his release both on personal grounds and on wider political considerations.

A couple of days later an All-Parties Conference was held at Delhi to voice a joint demand that in the interest of the future of India and of international good-will Mahatma Gandhi should be released immediately and unconditionally. To this the Viceroy replied that no change had occurred in the situation since February 10, to warrant such a step.

It is noteworthy that the Hindu Mahasabha expressed anxiety over the Mahatma's life.

Quaid-e-Azam Jinnah for his part refused to be associated with the conference on the ground that the Viceroy-Gandhi correspondence showed no change on the part of Mahatma Gandhi in the attitude towards the Muslim League except the iteration of the oft-repeated political demand having for its sanction a threat to resort to mass civil disobedience.

Government Unhelpful.—During the controversy a mild senility was caused by the resignation of three members of the Viceroy's expanded Executive Council, namely, Sir H. P. Mody, Mr. M. S. Aney and Mr. K. R. Sarker.

Meanwhile, the Mahatma successfully survived the 21-day toothless ordeal, although on two occasions his condition caused anxiety. On the conclusion of the fast the commotion which had prevailed between February 10 and March 4 gradually subsided.

Nevertheless, the situation created by the fast was further considered by the non-party leaders who met again, this time in Bombay, and issued a resolution requesting that "the Viceroy be approached on our behalf to permit a few representatives to meet Mahatma Gandhi authoritatively to ascertain his reactions to recent events and to explore with him avenue for a reconciliation."

In pursuance of this resolution representations were made to the Viceroy to let some of the non-party leaders meet the Mahatma, desiring to give the facilities sought, the Viceroy said that if Mahatma Gandhi was prepared fully to repudiate the Congress resolution of August 1942, to condemn the incitements to violence represented by his reference to "open rebellion," etc., and if he and the Congress were prepared to give assurances for the future, acceptable to the Government, then the matter could be considered.

The months that followed the termination of the fast were marked by comparative silence and inactivity. The disturbances, which broke out in August 1942 and continued with varying intensity for six months, virtually ceased in the spring of 1943. This was partly due to the atmosphere of anxiety and sorrow created by the Mahatma's fast in February 1943. In particular, the disappearance of violence in any form voiced by Mahatma Gandhi in his letters to the Viceroy, published in the first half of February 1943, served to damp the ardour of those who had imagined that either the Congress or the Mahatma had sanctioned acts of violence. The cumulative effect of these factors was the virtual cessation of some of those acts of violence which had marked the latter half of 1942.

Marking Time.—The apparent determination of Government to face the situation in the country should the fast prove fatal rather than give an "unrepentant rebel" facilities for normal political life, coupled with their refusal to encourage non-Gandhi Congressmen and non-Congress leaders to explore possibilities of an internal settlement in consultation with the Mahatma, produced a stalling stillness in the political atmosphere.

The only activity directly concerning the Congress or emanating from Congressmen was Mahatma Gandhi's letter to Quaid-e-Azam Jinnah in the summer of 1943 and an occasional move by released Congressmen to meet together and evolve an agreed policy in the absence of official Congress leadership.

In response to an appeal made by the Quaid-e-Azam in the Delhi session of the Muslim League inviting the Mahatma to write to him, the latter addressed a letter to the League leader offering to meet him. Not only were the contents of the letter not published, but Government refused to forward it to the Quaid-e-Azam.

Throughout this period there was no authoritative and comprehensive statement of Government's policy towards the Congress, although there were occasional announcements on specific issues. Lord Lindbrough, in his farewell address to the Central Legislature in the autumn of 1943, adopted an attitude of studied silence in respect of the Congress. People thought that it was done in order not to anticipate any new policy which his successor might unfold. This belief was reinforced by broad hints thrown by the Viceroy-designate, Lord Wavell, on the eve of his assumption of office.

One of the first acts of the Mahatma after his release in May 1944 was to release the text of his letter to Quaid-e-Azam Jinnah which was written from detention about a year previously and which was withheld by Government.

Here is the text of the letter: "Dear Quaid-e-Azam, When sometime after my incarceration, Government asked me for a list of newspapers I would like to have, I included *Dawn* in my list. I have been receiving it with more or less regularity. Whenever it comes to me I read it.

carefully. I have followed the proceedings of the League, as reported in the *Dawn* columns. I noted your invitation to me to write to you. Hence this letter. I welcome your invitation. I suggest our meeting face to face rather than talking through correspondence. But I am in your hands. I hope this letter will be sent to you and, if you agree to my proposal, that the Government will let you visit me. One thing I had better mention. There seems to be an 'if' about your invitation. Do you say I should write only if I have changed my heart? God alone knows men's hearts. I would like you to take me as I am. Why should not both you and I approach the great question of communal unity as men determined on finding a common solution, and work together to make our solution acceptable to all who are concerned with it or are interested in it?"

The publication of this letter produced no effect.

In the weeks immediately following his release Mahatma Gandhi concentrated on the collection of facts and opinions regarding what had happened during his detention and on efforts to gauge the feeling in the country as he emerged out of his detention.

About this time also the correspondence which passed between Mahatma Gandhi while he was a detainee in the Aga Khan's Palace and Lord Wavell, the Viceroy, saw the light of day. For details see *Year Book 1948*.

C. R. FORMULA

The next stage arrived shortly after. Mr. C. Rajagopalachari, who had spent a few days with Mahatma Gandhi while the latter was recuperating at Panchnag, announced in July that he had carried on negotiations on behalf of the Mahatma with Quaid-e-Azam Jinnah for a settlement on the basis of virtual agreement on the principle of Pakistan. The Quaid-e-Azam declined to express an opinion on the proposals, but said, he would submit the scheme to the League Working Committee if it was forwarded to him by Mahatma Gandhi himself. Mr. Rajagopalachari felt that it was futile to allow the Quaid-e-Azam if he could not himself wholeheartedly back it, to put the proposals before the League Working Committee. The personal negotiations, therefore, came to an end and Mr. Rajagopalachari released the correspondence between himself and the Quaid-e-Azam as he wished to take the public into confidence.

"My efforts to secure Quaid-e-Azam Jinnah's powerful help in pushing through an honourable settlement of the communal question have reached a stage when the public have to be taken into confidence," Mr. Rajagopalachari said in his statement. "The public will note from the correspondence now published that I had secured Gandhi's personal approval even during his last in February-March last year for the formula that I am now releasing. All parties may judge the formula on its merits. I felt that it was futile to allow Quaid-e-Azam Jinnah, if he could not himself wholeheartedly back it, to put my proposal before the Muslim League. Needless to say, I am taking the public into confidence with Gandhi's approval. Both he and I have approached the question in no bargaining spirit. The formula may now be regarded as our joint contribution to the solution of the communal problem and dealt with as such."

(The correspondence on this subject between Quaid-e-Azam Jinnah and Mr. Rajagopalachari was published in the issue of *The Indian Year Book* for 1945-46.)

Close on the heels of the publication of the Gandhi-cum-C.R. offer to the Quaid-e-Azam, Mahatma Gandhi made another gesture, this time to British authority. According to a British journalist, who had had a series of interviews with the Mahatma, the latter "is prepared to accept and to advise the Congress to participate in a wartime National Government in full control of the civil administration, leaving the Viceroy and the Commander-in-Chief in full control

of the British and Indian armies. It would be expected that the establishment of such a Government would be accompanied now by a guarantee of Indian independence after the war."

(For details see the issue of *The Indian Year Book* for 1945-46).

FIRM PROPOSAL

Mahatma Gandhi followed this up by writing direct to the Viceroy. He regretted the premature publicity in the Indian press given to his interview with Mr. Gelder of the London *News Chronicle* outlining his proposals for a solution of the Indian deadlock. But the Viceroy, in his reply, still insisted on what he called "a definite and constructive policy". Thereupon the Mahatma rejoined: "Here is my concrete proposal. I am prepared to advise the Working Committee to declare that in view of the changed conditions, mass Civil Disobedience envisaged by the resolution of August 1942 cannot be offered and that full co-operation in the war effort should be given by the Congress if a declaration of immediate Indian Independence is made and a National Government responsible to the Central Assembly be formed subject to the proviso, that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India. If there is a desire on the part of the British Government for a settlement, friendly talks should take the place of correspondence."

The Viceroy's reply said: "His Majesty's Government remain most anxious that a settlement of the Indian problem should be reached. But proposals such as those put forward by you are quite unacceptable. They are indeed very similar to the proposals made by Maulana Abul Kalam Azad to Sir Stafford Cripps in April 1942 and His Majesty's Government's reasons for rejecting them are the same as they were then."

"Without recapitulating all these reasons in detail, I should remind you that His Majesty's Government at that time made it clear: (a) That their offer of unqualified freedom after the cessation of hostilities was made conditional upon the framing of a constitution agreed by the main elements of India's national life and the negotiation of the necessary treaty arrangements with His Majesty's Government; (b) That it is impossible during the period of hostilities to bring about any change in the constitution, by which means alone a 'National Government,' such as you suggest, could be made responsible to the Central Assembly....

"It is clear, in these circumstances, that no purpose would be served by discussion on the basis which you suggest. If, however, the leaders of the Hindus, the Muslims and the important minorities were willing to co-operate in a transitional Government established and working within the present constitution, I believe good progress might be made. The period after the termination of hostilities for which the transitional Government would last would depend on the speed with which the new constitution could be framed. I see no reason why preliminary work on that constitution should not begin as soon as the Indian leaders are prepared to co-operate to that end."

Blocking the Way.—Commenting on the Viceroy's reply, Mahatma Gandhi said: "It is clear as crystal that the British Government do not propose to give up the power they possess over the 400 millions unless the latter develop strength enough to wrest it from them. I shall never lose hope that India will do so by purely moral means."

Political circles in India generally welcomed the Mahatma's double gesture to the Viceroy and Quaid-e-Azam Jinnah although some Liberal leaders questioned the wisdom of the acceptance of the Pakistan principle, while a Hindu Mahasabha spokesman derisively referred to it as "from 'Quit India' to 'Split India.'"

A fierce controversy raged for weeks. As for the Mahatma he said: "I myself feel firmly that Mr. Jinnah does not block the way, but the British Government do not want a just settlement of the Indian claim for Independence which is overdue, and they are using Mr. Jinnah as a cloak in denying freedom to India." He denied the interpretation put in certain quarters that the 1942 August Congress resolution had lapsed.

If the Mahatma was cold-shouldered by Whitehall, he met with poor response from Quaid-e-Azam Jinnah who in his address to the Lahore session of the League Council was highly critical of the manner in which the Gandhi-C.R. Offer was handled from Panchnag.

Thereupon the Mahatma sent a communication to the Quaid-e-Azam conveying to the latter the C.R. formula. This was the basis of a meeting between them which took place in September 1944. (For details see chapter on "The Muslim League").

CONSTRUCTIVE WORK

Meanwhile, Mahatma Gandhi gave further evidence of his disapproval of violence by advising underground Congress workers to give themselves up to authority on the ground that sabotage and all that it meant, including the destruction of property, was in itself violence.

"I swear by the constructive programme. Let me recount the items of that programme:—

- (1) Communal unity, (2) Removal of untouchability, (3) Prohibition, (4) Khadi, (5) Other village industries, (6) Village sanitation, (7) New or basic education, (8) Adult education, (9) Uplift of women, (10) Service of the so-called aborigines, (11) Education in health and hygiene, (12) Propaganda of *rashtra bhasha*, (13) Love of one's own language, and (14) Working for economic equality.

The Mahatma also seemed to contemplate a new drive among India's 700,000 villages evidently as a counterblast to the many post-war reconstruction plans being administered by Government and non-official agencies.

DESAL-LIAQAT TALKS

In the winter of 1944-45 an interesting development occurred which at least provided an opening for big political changes in the summer of 1945. Mr. Bhulabhai J. Desai, Leader of the Congress Party in the Assembly at the time, initiated negotiation with Mr. Liaqat Ali Khan, then Deputy Leader of the Muslim League Party in the Assembly. These led up to a proposal by the former which met with a measure of encouragement from the latter. At one time it was believed to have resulted in a pact between the two in their individual capacity, it being assumed that neither would have continued in his efforts without the tacit approval of the respective principals, namely, Mahatma Gandhi and Quaid-e-Azam Jinnah.

The facts, (as revealed by Mr. Liaqat Ali Khan in September 1945) showed that Mr. Desai had suggested a formula for an interim agreement between the Congress and the League. It is known that Mr. Desai discussed this formula with Lord Wavell and that, although its main provisions were varied, it provided the basis for the proposal made by the Viceroy in June 1945 and in a sense for the Simla Conference which met later. Here is Mr. Liaqat Ali's version (quoted in part), which is the only authoritative statement on the subject:

"Mr. Desai met me after the last autumn session of the Central Legislative Assembly and we informally discussed the prevailing distressing condition in the country, economic and otherwise.... Mr. Desai, during the course of the conversation, asked me about the attitude of the Muslim League with regard to some interim arrangement at the Centre and a temporary reconstitution of the Governor-General's Executive Council in a manner which would

secure for it the confidence of all the peoples... He told me his plan was to meet the Viceroy and Mr. Jinnah in this connection. I told him that in my personal opinion the proposals were such that they could be made a basis for discussion, but I did not see any prospect of his making any headway unless he could either get Mr. Gandhi to move in the matter personally or get his definite approval and open support for the move that he was making...

"During my talks with Mr. Desai, which were purely of a personal nature, I made it absolutely clear to him that whatever I had said was my individual view and I was not speaking either on behalf of the Muslim League or anyone else..."

TEXT OF PACT

"The following is the Desai-Liaquat Pact:—

"The Congress and the League agree that they will join in forging an Interim Government in the Centre. The composition of such Government will be on the following lines:—

(a) An equal number of persons nominated by the Congress and the League in the Central Executive (the persons nominated need not be members of the Central Legislature);

(b) Representatives of minorities (in particular the Scheduled Castes and the Sikhs);

(c) The Commander-in-Chief.

"The Government will be formed and function within the framework of the existing Government of India Act. It is, however, understood that, if the Cabinet cannot get a particular measure passed by the Legislative Assembly, they will not enforce the same by resort to any of the reserve powers of the Governor-General or the Viceroy. This will make them sufficiently independent of the Governor-General.

"It is agreed between the Congress and the League that, if such Interim Government is formed, their first step would be to release the Working Committee members of the Congress.

"The steps by which efforts would be made to achieve this end are at present indicated to take the following course:

"On the basis of the above understanding, some way should be found to get the Governor-General to make a proposal or a suggestion that he desires an Interim Government to be formed in the Centre on the agreement between the Congress and the League and when the Governor-General invites Mr. Jinnah and Mr. Desai either jointly or separately, the above proposals would be made declaring that they are prepared to join in forming the Government.

"The next step would be to get the withdrawal of Section 93 in the provinces and to form as soon as possible, provincial Governments on the lines of a coalition."

WAVELL PLAN

In the summer of 1946 Lord Wavell paid a visit to Great Britain and had prolonged consultations with members of the British Cabinet. On his return in June His Excellency unfolded the proposals of His Majesty's Government to ease the Indian political situation. He said in a broadcast to the people of India: "I have been authorised by His Majesty's Government to place before Indian political leaders proposals designed to ease the present political situation and to advance India towards her goal of full self-government..."

"This is not an attempt to obtain or impose a constitutional settlement.

"His Majesty's Government had hoped that the leaders of the Indian parties would agree amongst themselves on a settlement of the communal issue, which is the main stumbling-block, but this hope has not been fulfilled..."

"I propose, with the full support of His Majesty's Government, to invite Indian leaders both of central and provincial politics to take counsel

with me with a view to the formation of a new Executive Council more representative of organised political opinion.

"The proposed new Council would represent the main communities and would include equal proportions of caste Hindus and Muslims. It would work, if formed under the existing constitution. But it would be an entirely Indian council, except for the Viceroy and the Commander-in-Chief, who would retain his position as War Member.

"It is also proposed that the portfolio of External Affairs, which has hitherto been held by the Viceroy, should be placed in charge of an Indian member of the Council, so far as the interests of British India are concerned.

"A further step proposed by His Majesty's Government is the appointment of a British High Commissioner in India, as in the Dominions, to represent Great Britain's commercial and other such interests in India.

"The Council will work within the framework of the present constitution..."

The main tasks for this new Executive Council would be:—

(1) to prosecute the war against Japan with the utmost energy till Japan is utterly defeated;

(2) to carry on the Government of British India, with all the manifold tasks of post-war development in front of it, until a new permanent constitution can be agreed upon and comes into force; and

(3) to consider when the members of the Government think it possible, the means by which such agreement can be achieved....

The Invitees.—"I have considered the best means of forming such a Council; and have decided to invite the following to Viceroyal Lodge to advise me:—

Those now holding office as Premier in a provincial Government; or, for provinces now under Section 93 Government, those who last held the office of Premier;

The leader of the Congress Party and the Deputy Leader of the Muslim League in the Central Assembly; the leaders of the Congress Party and the Muslim League in the Council of State; also the leaders of the Nationalist Party and the European Group in the Assembly;

Mahatma Gandhi and Mr. Jinnah as the recognised leaders of the two main political parties;

Rao Bahadur N. Siva Raj to represent the Scheduled Classes; and

Master Tara Singh to represent the Sikhs.

"Invitations to these gentlemen are being handed to them today, and it is proposed to assemble the conference on June 25 at Simla, where we shall be cooler than at Delhi..."

"I also hope that it will be possible for ministries to re-assume office and again undertake the tasks of Government in the provinces now administered under Section 93 of the Constitution Act and that these ministries will be coalitions.

"If the meeting should unfortunately fail, we must carry on as at present until the parties are ready to come together..."

"With the approval of His Majesty's Government, and after consultation with my Council, orders have been given for the immediate release of the members of the Working Committee of the Congress who are still in detention. I propose to leave the final decision about the others still under detention as the result of the 1942 disturbances to the new Central Government, if formed, and to the provincial Governments..."

Simultaneously the British Government issued a White Paper on the subject. It said: "The main constitutional position remains, and the offer of March 1942 stands in its entirety without change or qualification... The Indian administration, overburdened with the great tasks laid upon it by the war against Japan

and by the planning for the post-war period, is further strained by the political tension that exists..."

CONGRESS ACCEPTS

Mahatma Gandhi gave a lead to the Working Committee by observing that the composition of the Simla Conference was "a very great advance upon all similar bodies." This was echoed by the Congress President who observed that "we are very near our goal of complete independence."

The Congress Working Committee met in Bombay after nearly three years. Most members seemed to welcome the political content of the Wavell Plan inasmuch as it dealt only with interim machinery without prejudice to the ultimate goal. After a few hours' deliberation, the Working Committee decided to take part in the Simla Conference and authorised its President to proceed to Simla. The other Congress invitees were asked to do likewise.

The acceptance of the invitation by the Congress was interpreted to mean that it agreed with the broad outlines of the Wavell Plan as an interim arrangement. The transfer of portfolios including the external relations, the appointment of a British High Commissioner and the authoritative assurance regarding the manner of the exercise of the Viceroyal veto made a good impression on Congress leaders and Mahatma Gandhi, some holding that it was an improvement on the Cripps Offer. Note was also taken of the benefits of co-operation between the Congress and the League in the task of day-to-day administration. Only the ideal of independence remained, but there too the interim arrangement promised to help.

THE CONFERENCE

The political centre of gravity then shifted to Simla. Mahatma Gandhi, Maulana Azad and Quaid-e-Azam Jinnah met the Viceroy on the day previous to the opening of the Conference and it was revealed that, in pursuance of the emphasis laid by the Mahatma on his individual capacity, he would not attend the meetings of the Conference, though he would stay on in Simla. The Conference opened at the Viceroyal Lodge on June 25, under the Presidentship of the Viceroy, to discuss the proposals of His Majesty's Government which were designed "to ease the present political situation and to advance India towards her goal of full self-government."

In his opening speech, Lord Wavell said *inter alia*:

"Before we begin on the agenda of this Conference, the outcome of which will have a momentous influence on the destiny of India, I feel there are a few words I should say to you. First, I welcome you all as men who by character and ability have risen to leadership in your provinces and parties... It is not a constitutional settlement, it is not a final solution of India's complex problems that is proposed. Nor does the plan in any way prejudice or prejudice the final issue. But if it succeeds, I am sure it will pave the way towards a settlement; and will bring it nearer..."

"You must accept my leadership for the present..."

(For correspondence exchanged by Lord Wavell and Quaid-e-Azam Jinnah during this period see the issue of *The Indian Year Book* for 1945-46.)

FAILURE

When the Conference reassembled on July 14 the Viceroy announced the failure of his efforts and said:

"As you know, my original intention was that the conference should agree upon the strength and composition of the Executive Council, and that thereafter the parties should send me lists of names. To these lists I would, if necessary, have added names of my own..."

"Unfortunately, the Conference was unable to agree about the strength and composition of the Executive Council, and on the 29th June I undertook, with the approval of the Conference, to endeavour to produce a solution not based on any formula agreed in advance..."

I received lists from all parties represented here except from the European Group, who decided not to send a list, and the Muslim League... I therefore made my provisional selections, including certain Muslim League names... I did not find it possible, however, to accept the claims of any party in full. When I explained my solution to Quaid-e-Azam Jinnah he told me that it was not acceptable to the Muslim League and he was so decided that I felt it would be useless to continue the discussion. In the circumstances, I did not show my selections as a whole to Quaid-e-Azam Jinnah, and there was no object in showing them to the other leaders. The conference has therefore failed.

"Nobody can regret this more than I do myself. I wish to make it clear that the responsibility for the failure is mine..."

"I have now to consider the next stage. I must remind you that whatever happens, the first two of three tasks mentioned in my broadcast—the prosecution of the war against Japan, and the carrying on of the administration and preparation of post-war development—must be performed by the Government of India for the time being in office..."

Following the failure, spokesmen of the Congress and the League gave their respective versions of the Simla Conference. (See the issue of *The Indian Year Book* for 1945-46).

Meanwhile, the British General Elections had been held. They resulted in an overwhelming majority for Labour. Of particular interest to India was the defeat of Mr. L. S. Amery who had directed Britain's policy towards India over a period of five years during which the Congress was very much *persona non grata* with the British Government.

Then came the surrender of Japan and the end of the Far Eastern War. This created a new situation in Indian politics inasmuch as the war emergency ceased. The King in his speech from the Throne at the opening of the new Parliament made this reference to India:

"In accordance with the promises already made to my Indian Peoples, my Government will do their utmost to promote, in conjunction with the leaders of Indian opinion, an early realisation of full Self Government in India."

Shortly after, the British Government announced general elections in India, both to the Provincial Legislatures and to the Central Legislature. Simultaneously with this announcement Lord Wavell was summoned to England for fresh consultations with the British Government.

A NEW SPIRIT

Shortly after the Simla Conference, the Government lifted the ban on the various Congress organizations, and Congress activity was resumed in full swing. Leaders who went straight from the prison to Simla, as it were, and had therefore no time to meet the people after their imprisonment, now had the opportunity to go round the country and survey the effects of the movement.

All confusion regarding responsibility for the disturbances in 1942-43 was dispelled by Pandit Nehru not only owning them up, but also applauding those who participated in them and sympathising with those who suffered in consequence. "Victims of repression" were designated "martyrs".

Condonation, nay, approbation of violence misled the people at large into the belief that the Congress policy of peaceful struggle had undergone a change. The depression and helplessness which characterized the political outlook in the preceding months soon gave place to a spirit of defiance and militancy. This found

expression in various demonstrations, accompanied inevitably in some cases by acts of violence, in connection with the trial of officers of the Indian National Army. Students and others, encouraged in this outlook by Congress Socialists and the Communists, created disturbances in several parts of the country and violence was so much in the air that the Congress Working Committee felt called upon to issue a warning to the public in this behalf. It passed the following resolution in December 1945:—

"After the arrest of the principal Congressmen in the August of 1942, the unaided masses took the reins in their own hands and acted almost spontaneously. If many acts of heroism and sacrifice are to their credit, there were acts done which could not be included in non-violence. It is, therefore, necessary for the Working Committee to affirm, for the guidance of all concerned, that the policy of non-violence adopted in 1920 by the Congress continues unabated and that such non-violence does not include the burning of public property, the cutting of telegraph wires, the derailing of trains and intimidation..."

"The Committee is further of the opinion that the constructive activities of the Congress, beginning with the spinning wheel and 'khadi' as the centre, are emblematic of the policy of non-violence and that every other Congress activity, including what is known as the parliamentary programme, is subservient to and designed to promote the constructive activities as explained by Mahatma Gandhi..."

An event of considerable importance to the Internal organization of the Congress occurred in the latter half of 1945 when it was decided that Communists should be expelled from the All India Congress Committee as a punishment for their opposition and obstruction to the policy and programme of the Congress for a considerable time.

Learning a lesson from the Simla breakdown and wishing to make yet another effort at a communal settlement, Maulana Abul Kalam Azad, who was resting in Kashmir, proposed that the Congress should clarify its attitude to the Muslims in order to reassure them that their interests would be safe in any future constitutional reconstruction.

His suggestion, on the details of which it is not necessary now to dwell, was hotly discussed for a few weeks until the matter came up before the Congress executive in September 1945. In an effort to clarify the Congress attitude to the separation demand and to remove the confusion arising from the apparently conflicting 1912 resolutions on the subject, the Congress Working Committee adopted a new resolution. It contained no new offer in the shape of an approach to the League view-point; nor did it make any reference to the "C.R." formula or Mahatma Gandhi's offer to Quaid-e-Azam Jinnah. It was just a reiteration of Congress policy with the emphasis on unity subject to the proviso that no territorial unit inhabited by a homogeneous people would be forced to stay in against its will.

Apart from this, the Congress Working Committee which in September 1945 held its first business session after August 1942, had a heavy agenda before it. The formation of a Labour Government in Britain, the end of the Japanese War, a fresh consideration of the Indian question in the light of the changed situation, Lord Wavell's second visit to Britain and the announcement of general elections in India—these were all post-Simla developments.

Clarification.—After taking into account the altered circumstances and the rapidly changing situation, the Working Committee decided that the Congress should contest the general elections "on the issue of immediate transfer of power" and "to demonstrate the will of the people." This announcement came at the tail-end of a two-thousand word statement split up into three resolutions drafted for the All-India Congress Committee. The first of these reaffirmed the August Resolution of 1942. The second reviewed the

various policies pursued by the Congress during the past sixty years and declared that the Congress policy would be "negotiation and settlement when possible and non-co-operation and direct action if necessary." All the three resolutions were evidently framed on the one hand, to emphasize the revolutionary ideology of the Congress and, on the other, to leave the door open in the event of the British Government announcing any new approach. The decision arrived at in August 1942 was justified by "the urgency of the situation and the perils by 'the confronted India' at the time. But the disturbances that followed were deplored ('in some places the people forgot, and fell away from, the Congress method of peaceful and non-violent action'), and the authorities accused of provocative action and 'brutal and ruthless repression', which 'goaded them (the people) to rise spontaneously to resist the armed might of an alien, imperialist power'."

The Congress review of the events of the months immediately preceding was full of disappointment and resentment over the British Government's determination "to hold on to its authoritarian power and to exercise it arbitrarily autocratically," yet there was no desire to allow frustration and pessimism to express themselves through any form of direct action. For the moment, Congress policy was one of negotiation and conciliation but the method of non-co-operation was doubtless held in reserve. This was evidently a continuation of the spirit which informed the Congress attitude at Simla.

The same spirit of working with available implements, however imperfect they might be, seemed to have actuated the Working Committee's decision in regard to the forthcoming elections. Vigorous protests were made against the manner and circumstances in which the authorities proposed to hold elections to the legislatures, but eventually the resolution on the subject recommended the Congress participation in the elections.

H. M. G. PROPOSALS

Between then and the meeting of the All-India Congress Committee the Viceroy had returned from London. His Excellency made a broadcast embodying the conclusions of His Majesty's Government.

These were that H. M. G. were determined to do their utmost to promote, in conjunction with the leaders of Indian opinion, the early realisation of Self Government in India. It was their intention to convene as soon as possible a Constitution-making Body, and as a preliminary step, they had authorized him to undertake, immediately after the elections, discussions with representatives of the Legislative Assemblies in the Provinces, to ascertain whether the proposals contained in the 1942 declaration were acceptable or whether some alternative or modified scheme was preferable. Discussions would also be undertaken with representative of Indian States with a view to ascertaining in what way they could best take part in the Constitution-making Body. Further H. M. G. were proceeding to the consideration of the content of a treaty which would require to be concluded between Great Britain and India. His Majesty's Government had authorized His Excellency, as soon as the results of the provincial elections were published, to take steps to bring into being an Executive Council which would have the support of the main Indian parties.

Not Acceptable.—The All-India Congress Committee which met towards the end of September 1945 adopted its Executive's recommendation to contest the general elections.

Two of the three political resolutions submitted by the executive were endorsed almost unanimously by the A.C.C. They first reiterated the "Quit India" resolution passed on August 8, 1942, while the second declared that the Congress policy was one of negotiation when possible and direct action

when necessary. Amendments calculated to "stiffen" the Congress attitude were negatived. One of these suggested that the Congress should abandon the "humiliating" path of negotiation; another sought not to "regret" but simply to "admit" acts of violence during the disturbances that followed the adoption of the "Quit India" resolution. Others wanted to denounce Communist "traitors" who had "allied themselves with the alien Government in sabotaging the people's struggle for independence."

The speakers, including Pandit Nehru, Sardar Vallabhbhai Patel and Mr. J. B. Kripalani, felt no regrets for what had happened but, on the contrary, expressed pleasure at the people's spirit of resistance to Government's "repression of their urge for freedom." Sardar Patel was inclined to replace "Quit India" by "Quit Asia" demand, for the world could have no freedom without a free India. Whereas the resolutions were couched in more or less moderate language, the speeches both of the leaders and the rank and file were keyed to a high pitch; they seemed to ask, "How can we forget and forgive?"

The resolution on the Wavell proposals, moved by Sardar Vallabhbhai Patel, stated: "The A-I.C.C. has carefully considered Lord Wavell's and the British Prime Minister's broadcasts on the steps proposed to be taken by British authority in India. These proposals repeat with unimportant variations, the offer made in March, 1942 by Sir Stafford Cripps on behalf of the British Government, an offer which was not accepted by the Congress. . . . Nothing short of independence can be acceptable to the Congress and the country. The proposals now made are, in the opinion of the A-I.C.C., vague, inadequate and unsatisfactory. . . ."

Civil Liberties.—The Central Assembly is still governed by the Act of 1919. To continue such an impotent and undemocratic Central legislature, constituted on a franchise of less than one per cent. of the population, can have no justification in the context of Indian freedom. If elections for the Central Legislature are to be held they must at least be on a properly revised roster, even though this might involve some little delay. . . .

"Further, free and fair elections are hardly possible when several organisations, like the Congress, Socialist Party, the Forward Bloc, and Kisan organisations are still under ban, when thousands are still held in detention without trial, or are undergoing sentences of imprisonment in connection with political activities; when in many places public meetings cannot be held without previous permission of the authorities; and when many persons are labouring under disqualifications arising out of their conviction for political offences. . . ."

"In spite of the handicaps that the Congress will labour under, as related above, and in order to demonstrate the will of the people, especially on the issue of the immediate transfer of power, the A-I.C.C. resolves that the forthcoming elections be contested, and directs the Working Committee to take all necessary steps in this behalf. . . ."

A Bombshell.—Then came the bombshell in the shape of an amendment by a Muslim Communist who wished the elections to be fought on the issue of "an agreed people's plan of convening a constituent assembly. . . . which will have the support of the major parties and all communities". In order to secure Hindu-Muslim unity he wanted to assure the Muslims that "the elected representatives of areas in which Muslims are in a majority will be free to constitute themselves into a constituent assembly and to decide for themselves whether to join the Indian Union or not." He was frequently interrupted by the House which had a marked grouse against Communists and against those who demanded further measures to placate the League.

Mian Iftikhar-ud-Din, an ex-President of the Punjab Provincial Congress Committee (now member of the West Punjab Muslim League),

who was a keen advocate of a Congress-League settlement, declared through an amendment that "the creation of an independent and democratic India must be such as will win the backing of all major sections of our people, especially the Muslims."

Pandit Nehru, who spoke next, and Sardar Patel, who replied to the debate, said that the Communists always found fault with them, whatever they did. The Congress had gone to the fullest extent possible, consistent with its nationalistic ideal, to meet Muslim fears—communal electorates, weightages, safeguards and recently, parity—and had nearly reduced itself to the position of a purely Hindu body; they could go no farther. If the Congress attitude was regarded as unreasonable, the whole question might be referred to an international tribunal for arbitration. The resolution passed unanimously.

MANIFESTO

The Congress election manifesto, issued a fortnight later, stated:

"For 60 years the National Congress has laboured for the freedom of India. During this long span of years its history has been the history of the Indian people, straining at the leash that has held them in bondage, ever trying to unloose themselves from it. From small beginnings it has progressively grown and spread in this vast country, carrying the message of freedom to the masses of our people in the towns as well as the remotest villages. . . ."

"The career of the Congress has been one of both constructive effort for the good of the people and unceasing struggle to gain freedom. . . . After the recent three years of an unprecedented mass upheaval and its cruel and ruthless suppression, the Congress has risen stronger than ever and more loved by the people by whom it has stood through storm and stress. . . ."

"The Congress has stood for equal rights and opportunities for every citizen of India, man or woman. It has stood for the unity of all communities and religious groups and for tolerance and goodwill between them. It has stood for full opportunities for the people as a whole to grow and develop according to their own wishes and genius. It has also stood for the freedom of each group and territorial area within the nation to develop its own life and culture within the larger framework, and for this purpose such territorial areas or provinces should be constituted as far as possible, on a linguistic and cultural basis. It has stood for the rights of all those who suffer from social tyranny and injustice and for the removal for them of all barriers to equality. . . ."

"The Congress has envisaged a free, democratic state with the fundamental rights and civil liberties of all its citizens guaranteed in the constitution. . . ."

"This constitution, in its view, should be a federal one with a great deal of autonomy for its constituent units and its legislative organs elected under universal adult franchise. . . ."

"A hundred and fifty years and more of foreign rule have arrested the growth of the country and produced numerous vital problems that demand immediate solution. . . . There is no way to solve any of these urgent problems except through freedom and independence. The content of political freedom must be both economic and social. . . ."

"The most vital and urgent of India's problems is how to remove the curse of poverty and raise the standard of the masses. . . ."

Co-operative Commonwealth.—For this purpose it will be necessary to plan and co-ordinate social advance in all its many fields, to prevent the concentration of wealth and power in the hands of the individuals and groups, to prevent vested interests inimical to society from growing, and to have social control of the minerals

resources, means of transport and the principal methods of production and distribution in land, industry and in other departments of national activity, so that free India may develop into a co-operative commonwealth. . . ."

"In International affairs the Congress stands for the establishment of a world federation of free nations. . . . In the Far East, in South-East Asia and in Western Asia, India has had trade and cultural relations for thousands of years and it is inevitable that with freedom she should renew and develop these relations. . . . She will also champion the freedom of all other subject nations and peoples, for only on the basis of this freedom and the elimination of imperialism everywhere can world peace be established. . . ."

"On the eighth of August, 1942, the All-India Congress Committee passed a resolution, since then famous in India's history. By its demands and challenge the Congress stands today. It is on the basis of this resolution and with its battle-cry that the Congress faces the elections for the Central and Provincial Assemblies. . . ."

"The Central Legislative Assembly is a body with no power or authority and is practically an advisory body whose advice has been constantly floated and ignored. . . . Yet, with all these and other handlings and drawbacks, the Congress has decided to contest the elections to show that the inevitable result of elections, however restricted, must be to demonstrate the overwhelming solidarity of the opinion of the voters on the issue of independence. . . ."

"So the Congress appeals to the voters for the Central Assembly all over the country to support the Congress candidates in every way at the forthcoming elections, and to stand by the Congress at this critical juncture, which is so pregnant with future possibilities. . . ."

The Congress election campaign was conducted on the assumption that the Congress could secure easy victories in general constituencies and that it should concentrate instead on Muslim seats. In many cases the Hindu Mahasabha candidates withdrew in favour of the Congress, either with a view to giving the Congress a free hand in the light of its unequivocal declaration of hostility to partition or because the Mahasabha realized that it had no chance in face of the strong wave of pro-Congress feeling that was sweeping over the country. . . .

ELECTION RESULTS

The elections fulfilled Congress expectations as far as general seats were concerned. Such Hindu Mahasabhaists as dared to oppose the Congress nominees were badly defeated. Moderates and Independents had no chance at all. In Sikh constituencies in the Punjab, the Congress captured one-third the number of seats, although in terms of votes recorded nearly half the electorate supported it. . . .

It was different, however, in the case of Muslim seats. In all the Hindu-majority provinces the Congress suffered a heavy defeat except in the United Provinces and to a smaller extent in Assam. Of the four Muslim-majority provinces the Congress emerged successfully in the Frontier, though even there the League did much better than in the general elections held ten years previously. In the Punjab and Bengal, the League secured signal triumphs. In Sind, the League captured the majority of the Muslim seats, while a rebel-section of the League and a pro-Congress group of Muslims secured sufficient number of seats to form a coalition with the Congress and thereby threaten the solidarity of the League there. . . .

All this while, the Congress was waiting events, expecting His Majesty's Government to implement the policy outlined by the Viceroy in his broadcast in September 1945. . . .

Then came Premier Attlee's statement in Parliament in March 1946 followed by the British Cabinet Mission's visit to India to settle

the basis of the country's future constitution. (For details see under *Government of India in the Year Book for 1948*).

On the eve of the Mission's return to England, the Congress announced its acceptance of the long-term project but turned down the specific proposals for an Interim Government. This decision was endorsed by the All-India Congress Committee which met in Bombay early in July 1946. It was an easy victory for the Congress executive.

Shortly after the A.-I.C.C. meeting, various provincial assemblies elected their representatives to the Constituent Assembly. Most of the "general" seats were filled by Congress nominees, who included representatives of the various cross-sections of Indian life, vertical and horizontal, communal and economic.

Certain statements made by the new Congress President—Pandit Nehru—were declared elected in place of Maulana Abul Kalam Azad, who relinquished his office as Congress President after a period of six years—regarding the status and powers of the Constituent Assembly and the Congress intentions in that behalf alienated the Muslim League, which was already labouring under a sense of grievance. For instance, the Congress President said that the Constituent Assembly would be a sovereign body with complete freedom to mould the future India. This was interpreted by the League to mean that decisions in the Assembly would be taken by a majority vote, leaving the Muslims helpless. Similarly, he said that the Congress was committed to nothing except to enter the Constituent Assembly, which raised a grave doubt in the League mind that the Congress did not accept the framework and procedure laid down in the State Paper of May 16, 1946.

GESTURE TO LEAGUE

These impressions were corrected by the Congress Working Committee early in August, 1946, but the mischief had already been done; for, late in July, the League decided altogether to withdraw its co-operation from the Mission's plan. The August 1946 resolution of the Congress Working Committee said:—

The Working Committee regretted to note that the Council of the All-India Muslim League, reversing their previous decision, had decided not to participate in the Constituent Assembly. In this period of rapid transition from dependence on a foreign power to full independence, when vast and intricate political and economic problems had to be faced and solved, the largest measure of co-operation among the people of India and their representatives was called for, so that the changeover should be smooth and to the advantage of all concerned. The Committee realised that there were differences in the outlook and objectives of the Congress and the Muslim League. Nevertheless, in the larger interests of the country as a whole and of the freedom of the people of India, the Committee appealed for the co-operation of all those who sought the freedom and the good of the country, in the hope that co-operation in common tasks might lead to the solution of many of India's problems.

The Committee had noted that criticisms had been advanced on behalf of the Muslim League to the effect that the Congress acceptance of the proposals contained in the Statement of May 16 was conditional. The Committee wished to make it clear that while they did not approve of all the proposals contained in this Statement, they accepted the scheme in its entirety. They interpreted it so as to resolve the inconsistencies contained in it and fill the omissions in accordance with the principles laid down in that Statement. They held that provincial autonomy was a basic provision and each province had the right to decide whether to form or join a group or not. Questions of interpretation would be decided by the procedure laid down in the Statement

itself, and the Congress would advise its representatives in the Constituent Assembly to function accordingly.

The Committee had emphasized the sovereign character of the Constituent Assembly, that is, its right to function and draw up a constitution for India without the interference of any external power or authority. But the Assembly would naturally function within the internal limitations which were inherent in its task, and would therefore seek the largest measure of co-operation in drawing up a constitution of free India allowing the greatest measure of freedom and protection for all just claims and interests. It was with this object and with the desire to function in the Constituent Assembly and make it a success, that the Working Committee passed their resolution on June 26, 1946, which was subsequently ratified by the All India Congress Committee on July 7, 1946. By that decision of the A.-I.C.C. they must stand, and they proposed to proceed accordingly with their work in the Constituent Assembly.

Immediately after the Viceroy invited the Congress to make proposals for an Interim Government, Pandit Nehru accepted the invitation on behalf of the Congress and sought Qaid-e-Azam Jinnah's co-operation. The League leader declined. (For the correspondence see *Year Book for 1948*).

INTERIM GOVERNMENT

Pandit Nehru then proceeded to Delhi and submitted to the Viceroy the names of twelve persons constituting the Interim Government. These included six top-ranking Congress leaders, namely Pandit Nehru, Sardar Vallabhbhai Patel, Dr. Rajendra Prasad, Mr. C. Rajagopalachari, Mr. Sarat Chandra Bose and Mr. Asaf Ali. This was on the basis of a Cabinet of fourteen. Two seats were to be filled later. Of the 12, three were Muslims, five caste Hindus and one representative each of the scheduled castes, Indian Christians, Sikhs and Parsis. The Congress also suggested the name of an Anglo-Indian as an additional member, but the Viceroy was apparently reluctant to increase the strength of the Cabinet.

On August 24, 1946, His Excellency the Viceroy announced the formation of the Interim Government. In the course of the broadcast, he said:

"Offer To League—Let me state clearly the offer which has been made and is still open to the Muslim League. They can propose to me five names for places in a Government of 14, of which 6 will be nominees of Congress and three will be representatives of the Minorities. Provided these names are acceptable to me and approved by His Majesty, they will be included in the Government, which will at once be reformed. The Muslim League need have no fear of being out-voted on any essential issue; a Coalition Government can only exist and function on the condition that both main parties to it are satisfied . . .

"As I have already made clear, I shall implement fully His Majesty's Government's policy of giving the new Government the maximum freedom in the day to day administration of the country. In the field of provincial autonomy, of course, the Provincial Governments have a very wide sphere of authority in which the Central Government cannot intervene . . .

"The War Member in the new Government will be an Indian, and this is a change which both the Commander-in-Chief and I warmly welcome. But the constitutional position of the Armed Forces is in no way changed. They still owe allegiance, in accordance with their oath, to the King-Emperor, to whom and to Parliament I am still responsible.

"The work of the Constituent Assembly should begin as early as possible. I can assure the Muslim League that the procedure laid down in the Statement of May 16 regarding the framing of Provincial and Group Constitutions

will be faithfully adhered to; that there can be no question of any change in the fundamental principles proposed for the Constituent Assembly in paragraph 15 of the Cabinet Mission's statement of May 16 or of a decision on a main communal issue, without a majority of both major communities; and that the Congress are ready to agree that any dispute of interpretation may be referred to the Federal Court. I sincerely trust that the Muslim League will reconsider their decision not to take part in a plan which promises to give them so wide a field in which to protect the interests and to decide the future of the Muslims of India."

The new Government assumed office on September 2, 1946. It could not, however, settle down to any very useful work of administration or preparation for the Constituent Assembly, because grave breaches of the peace in Calcutta and elsewhere, resulting in the deaths of thousands of persons and considerable loss of property, cast a gloom over the country. Even so, the Government strove to consolidate its position by establishing conventions intended to invest it with real political power. For instance, it stopped the practice of Secretaries having direct access to the Governor-General. It also began to function as a Cabinet with joint responsibility under leadership of the Vice-President, Pandit Nehru.

PREMIER'S BROADCAST

Broadcasting shortly after the formation of his Government, Pandit Jawaharlal Nehru said:—

"Friends and Comrades—Jai Hind—Six days ago my colleagues and I sat on the chairs of high office in the Government of India. A new Government came into being in this ancient land, the Interim or Provisional Government we called it, the stepping stone to the full independence of India . . .

"And yet we asked for no celebration of this historic event and even restrained our people's enthusiasm. For we wanted them to realize that we were yet on the march and the goal had still to be reached . . .

"Our hearts were heavy also with the terrible tragedy of Calcutta and because of the intensive strife of brother against brother. The freedom we had envisaged and for which we had laboured, through generations of trial and suffering, was for all the people of India, and not for one group or class or the followers of one religion . . .

"The Interim National Government is part of a larger scheme which includes the Constituent Assembly which will meet soon to give shape to the constitution of free and independent India . . .

"We shall take full part in international conferences as a free nation with our own policy and not merely as a satellite of another nation . . .

"We propose, as far as possible, to keep away from the power politics of groups, aligned against one another, which have led in the past to world wars and which may again lead to disasters on an even vaster scale. We believe that peace and freedom are indivisible and the denial of freedom anywhere must endanger freedom elsewhere and lead to conflict and war . . .

"In spite of our past history of conflict, we hope that an independent India will have friendly and co-operative relations with England and the countries of the British Commonwealth. But it is well to remember what is happening in one part of the Commonwealth today. In South Africa racialism is the State doctrine and our people are putting up a heroic struggle against the tyranny of a racial minority . . .

"We send our greetings to the people of the United States of America to whom destiny has given a major role in international affairs . . . To that other great nation of the modern world, the Soviet Union, which also carries a vast responsibility for shaping world events, we send greetings . . .

"Old Order Passes—We are of Asia and the peoples of Asia are nearer and closer to us than others. India is so situated that she is the pivot of western, southern and south-east Asia... China, that mighty country, with a mighty past, our neighbour has been our friend through the ages and that friendship will endure and grow..."

"I have not said anything about our domestic policy, nor at this stage do I wish to do so. But that policy will inevitably have to be governed by the principles by which we have stood all these years. We shall look to the common and forgotten man in India and seek to bring him relief and raise his standards of living. We shall continue our fight against the curse of untouchability and other forms of enforced inequality..."

We are perfectly prepared to accept and have accepted, the position of setting in sections, which will consider the question of formation of groups... We shall go to the Constituent Assembly with the fixed determination of finding a common basis for agreement on all controversial issues..."

Meanwhile, the Congress Working Committee met in Delhi and passed a resolution on the Calcutta carnage. For the text of the resolution see *Year Book* for 1948.

INTERIM GOVERNMENT

The history, since the formation of the Interim Government at the centre in June 1946 of the Indian National Congress as the party in the vanguard of India's political struggle, has been largely determined by the stormy and momentous events in India culminating in the granting of independence to the country and its inevitable partition.

After independence, India's problems continued no less to tax the ingenuity and resources of Governments, Central and Provincial, and of the majority party representing the people.

At the All-India Congress Committee meeting at the end of September 1946 the steps taken by the Congress Executive leading up to the formation of the Interim Government were ratified by an overwhelming majority. The resolution was moved by Maulana Abul Kalam Azad ratifying the Working Committee's decision. Twelve members out of about 250 present were against the motion. Mr. Jai Prakash Narain announced that he and his group would remain neutral on the resolution.

Maulana Abul Kalam Azad's resolution said: "The A.-I. C. C. having considered the direction of the Working Committee to the President of the Congress to accept the invitation of the Viceroy to form an Interim National Government, approved this decision and ratified the subsequent steps taken thereunder resulting in the formation of the Interim Government."

Dr. Pattabhi Sitaramayya, seconding the resolution, characterised it as a bridge and not a house to live in.

Two amendments, one of which directed the Government to demand the immediate withdrawal of British troops from India and the other to transcend the limitations imposed by the Cabinet Mission on the Constituent Assembly, were ruled out.

A second resolution on the agenda seeking to permit the Congress members of the Interim Government to continue as members of the Working Committee was moved by Pandit Govind Ballabh Pant.

Pandit Jawaharlal Nehru, Congress President, addressing the Committee declared that he was relinquishing the Congress Presidentship, consequent on his acceptance of office at the Centre.

Opening the session, the President giving a resume of the developments since the last meeting of the A.-I. C. C. early in July, explained how the Working Committee's decision not to participate in the formation of the Interim Government on

the basis of the Viceroy's statement of June 16 had to be revised in the light of altered circumstances.

Commending their resolution ratifying the Working Committee's decision to form the Interim Government, Maulana Abul Kalam Azad said that the step the Congress had taken was the only correct one. "Our achievement today is because of the methods we employed in the past," the Maulana said, and added, "today our goal freedom—is within sight. With the change in the circumstances and the particular situation in which we find ourselves we must change our methods as well. Today we are in such a position that, by joining Government, we could increase our strength enormously."

On the following day the A.-I. C. C. by a comfortable majority, passed Pandit G. V. Pant's resolution enabling members of the Interim Government to serve on the Congress Executive.

Before voting on it, Pandit Pant, replying to the debate, invited the House to understand its exact meaning. He made it clear that the resolution was permissive. It merely sought to remove an obstacle in the way of the President's choosing, if he wished to do so, members of the Interim Government as members of the Working Committee. "I did not mean that members in the Interim Government should necessarily be members of the Working Committee," he added.

On the following day the Congress Working Committee accepted Pandit Nehru's resignation from the presidentship, but requested him to carry on his duties till a new one was elected. The Working Committee, in a resolution, invited the attention of the provincial governments to the issue of 'Reform of the Land System'. The provincial governments were, accordingly, requested to send their proposals in this behalf to the Working Committee within two months.

New President.—In the middle of October, it was announced that, in the election of the President to the A.-I. C. C. the names of Maulana Abul Kalam Azad and Acharya Kripalani were proposed, but that as the former had withdrawn the latter remained the only candidate and would be duly elected.

Maulana Azad explained, "The reason which influenced my decision in April last not to seek re-election holds good even today."

Later Acharya Kripalani, in a statement on his election as President, said "I am not unconscious of my limitations... My first task I conceive is to exert my utmost in the cause of Hindu-Muslim unity so that the inhumanities and barbarities that recently disfigured and disgraced Calcutta and still do East Bengal become things of the past. My second concern will be the purification and consolidation of our organisation."

On October 24, 1946, the Congress Working Committee adopted a resolution on the disturbances in East Bengal, which said, "Communism can only be fought with nationalism and not with counter-communism. The riots in Bengal clearly formed parts of a pattern of political sabotage calculated to destroy Indian nationalism and check the advance of the country towards democratic freedom." The Committee warned the country against retaliatory outbreaks of communalism.

Nearly a month later, strong condemnation of retaliatory communal violence was made by the Congress Working Committee in a resolution adopted on Bihar. The Committee called upon all Congressmen to restore a sense of security and bring about reconciliation between Hindus and Muslims.

The Working Committee paid a tribute to the late Pandit Malaviya in a resolution. Other resolutions passed referred to the dispute of Indians in South Africa, the situation in East Africa and Indonesia.

STRUGGLE INEVITABLE

In the third week of November Pandit Nehru, speaking at the Subjects Committee of the 54th session of the Indian National Congress, drew a gloomy picture of the prevailing political situation. In a fighting political speech, he made grave and direct charges against the Viceroy and the Muslim League, hinting at an "inevitable struggle" if things did not improve. Pandit Nehru hoped, however, that the League would join the Constituent Assembly but, even if it did not, he declared, the work of constitution making would proceed. Pandit Nehru was speaking on a resolution declaring, on the eve of summoning of the Constituent Assembly (which was to meet on December 9), that the Congress stood for an independent sovereign republic.

Earlier the Committee passed by an overwhelming majority, only 30 opposing, Maulana Azad's resolution confirming and ratifying the decisions of the Working Committee and the A.-I. C. C., including the one on the formation of the Interim Government.

The following day, clear reference was again made to the "struggle ahead" and the need for preparing for it. A resolution was presented by the Working Committee for adoption by the Congress reviewing the events and tendencies of the six and a half years ending then since the last session of the Congress and calling upon the people to put an end to internecine conflict.

Moving the resolution, Pandit Nehru said, "Ours is not an empty threat. We have fought the British in the past and we shall fight them again if necessary."

Moving a resolution on the Indian States, Dr. Pattabhi Sitaramayya traced the development of Congress policy to date in which the question of the States' people was integrated with the British India's struggle for freedom.

Economic Democracy.—Mr. Shankarrao Deo's resolution suggesting amendments to the Congress Constitution was dropped and its place was taken up by an amendment by Babu Purshottandas Tandon as a substantive motion which said that "in view of the new conditions that had arisen, the Congress authorises the A.-I. C. C. to amend and revise the Congress constitution in order to make the Congress as widely representative of the Indian people as possible."

A further definition of the Congress objective was contained in a resolution adopted by the Working Committee, which said that, in the opinion of the Congress, *swaraj* could not be real for the masses unless it made possible the achievement of a society in which democracy extended from the political to the social and economic sphere, and in which there would be no opportunity for privileged classes to exploit the bulk of the people, nor for gross inequalities such as exist at present. A resolution on the revision of the Congress constitution altered the basis of the four-anna membership and pleaded for broader franchise in the election of Congress representatives.

Meerut Congress.—At the 54th Indian National Congress Session held at Meerut on November 23, Pandit Nehru and Sardar Patel lashed out at the Muslim League and the permanent officials, who were charged with acting as if they were members of the League.

Speaking on the resolution ratifying the decision to form the Interim Government, Sardar Patel, in one of the most fighting speeches of his career, said: "The sword must be met by the sword." This was a stern warning to those who, he said, were trying to achieve a political objective by violent means. "We are not resigning from the Interim Government," he asserted. It was for the League to make up its mind whether it was joining the Constituent Assembly.

Acharya Kripalani in his presidential address, said: "If the Congress had not taken up the challenge of British Imperialism in August 1942, we would not have been occupying the position we do today." He said that the British could

no longer deny freedom to them whatever their intentions. If today they missed their goal, the fault was theirs (Indians).

Moving the resolution on "retrospect", first moved by the Subjects Committee, Pandit Nehru, spoke with emotion about the resurgence of freedom fervour in the land. Administering a stern rebuke to the British members of the Services who, he said, "were in league with the Muslim League and with reactionism", he also referred to those killed in the 1942 movement. He conceded that the British Government might be sincere in their intentions but the British bureaucracy in India had not changed. Correcting the impression that the Congress Government might leave the Central Government in a huff, he declared they would refuse to resign—they would have to be dismissed.

New Working Committee.—At the end of November 1946, Acharya J. B. Kripalani, the Congress President, announced the personnel of the new Working Committee which would consist of the following 14 members: Maulana Abul Kalam Azad, Pandit Jawaharlal Nehru, Sardar Vallabhbhai Patel, Mrs. Sarojini Naidu, Dr. Rajendra Prasad, Khan Abdul Ghafar Khan, Sarat Chandra Bose, Rajagopalachari, Shankarrao Deo, Smt. Kamala Devi, Rafi Ahmed Kidwai, Jai Prakash Narain, Pratap Singh and Jugal Kishore (U.P.). Shankarrao Deo and Jugal Kishore were to be General Secretaries and Vallabhbhai Patel would continue as Treasurer.

Grouping Of Provinces.—At the end of December the Congress Working Committee decided not to clinch the issue of grouping of provinces beyond declining to pursue the proposal to refer it to the Federal Court. It left the decision to the A.-I. C. C. of which an emergency session was called in Delhi on January 6 following. The purport of the lengthy statement issued by the Working Committee on the occasion was that the statement issued by the British Government on December 6, 1946, giving their decision on the grouping issue, as well as other statements made subsequently in Parliament were merely additions to and variations of the British Cabinet Mission's Statement of May 16, 1946, on which the whole scheme of the Constituent Assembly was based.

The Congress Constitution Sub-Committee, in seven meetings held from December 12 onwards, laid down certain principles on which the new constitution was to be based. The drafting was entrusted to Mr. R. R. Diwakar, convenor of the Committee.

The Congress Working Committee, in a draft resolution, submitted to the A.-I. C. C. in early January, 1947, recommended agreement with the British Government's interpretation of the State Paper relating to grouping of the provinces. The step was stated to be due to the Congress anxiety to facilitate the work of the Constituent Assembly with the goodwill of all parties and to remove all complications created by a variety of interpretations. At the same time it was made clear that the Congress would not be a party to coercion by any province of any other province or part of a province.

The resolution explained that making a reference to the Federal Court on this issue had become purposeless and undesirable after the interpretation of the British Government. The A.-I. C. C. was firmly of the opinion that the constitution for a free and independent India should be framed by the people of India and on the basis of as wide an agreement as possible. There was to be no interference whatsoever by any external authority and no compulsion of any province or part of a province by any other province. Mr. Shankarrao Deo pointed out that the course of wisdom lay in seizing even an apparently adverse situation, namely, that created by the December 6 Statement, and turn it to the country's advantage.

The A.-I. C. C. passed on the following day the Working Committee's resolution advising acceptance of his Majesty's Government's December 6 Statement by 99 votes to 52. The main amendment for rejection of the statement, moved by

Babu Purshottamdas Tandon was lost, 64 voting for it and 102 against it. Pandit Nehru declared that the Congress was not going to commit itself at that moment to any reference to the Federal Court or to any authority.

The opposition comprised not only Socialists, who disapproved of a compromise and wished to give a revolutionary turn to Congress policy, but also members from Assam who sympathised with them. Even some known to be consistent supporters of the High Command also voted against the resolution. Mr. Jai Prakash Narayan who resigned from the Working Committee, but whose resignation was not accepted by the President, was permitted to oppose the resolution sponsored by the Executive. The Socialist leader declared that he refused to believe that the British were quitting India.

ATTLEE DECLARATION

A resolution calling upon the provincial and district committee to mobilise public opinion in the country "in view of the prospect of an early termination of foreign rule in India", to enable the Central and Provincial Governments to maintain close contact with the masses and respond to their needs and views and "thereby becoming fully democratic instruments of popular will and rule", was adopted at a three-day conference of the presidents and secretaries of Provincial Congress committees held at Allahabad at the end of February. The conference, by another resolution, appointed another committee to consider the A.-I. C. C. note on Congress reorganisation and submit its report before the conference.

The Congress Executive which met at New Delhi early in March considered the different interpretations of the Labour Government's "Quit India" announcement (Mr. Attlee's declaration of British withdrawal from India made in the House of Commons on February 20). It was generally agreed that the declaration should be welcomed as a bold and courageous enunciation of policy. On the question of the method of transfer, the Committee seemed to be of the view that the best course for Britain would be to hand over power to a Central authority in conformity with the British Cabinet Mission's Plan of May 16 as subsequently interpreted by the British Government and agreed to by the Congress. If however the authority so constituted was repudiated by certain elements in the country then, it was suggested, the secession of authority should be in favour of not existing provinces but of areas in which the dissidents predominated.

It was also discussed what the nature of the intervening period of 14 months before the final withdrawal of the British authority should be. The Punjab developments were deplored by the Committee which attributed the trouble to the possibility envisaged in the statement of February 20 of a transfer to "existing provincial governments".

Later the Congress Working Committee invited the Muslim League to nominate representatives to meet Congress representatives to consider the situation that had arisen from the impending transfer of power and to devise means to meet that situation. The Committee declared that the transfer of power, to be smooth, should be preceded by the recognition in practice of the Interim Government as a Dominion Government with effective control over the Services and administration, and the Viceroy and Governor-General functioning as the constitutional head of the Government. The Committee asserted that, in view of the tragic events in the Punjab, it was necessary to find a way out involving the least amount of compulsion that would necessitate the division of the Punjab into two provinces.

The Working Committee also welcomed the decision of a number of States to join the Constituent Assembly and trusted that all the States and their peoples should be effectively represented for the task of making a constitution for an Indian Union.

CONGRESS CONSTITUTION

The Working Committee also approved of the resolution regarding the constructive programme passed unanimously at the conference of presidents and secretaries of the Provincial Congress committees and other bodies like the All-India Village Industries Association.

At the end of March the Congress Constitution Committee, under the Presidentship of Dr. Pottiabhi Sitaranayana, commended that the Congress should ordinarily meet every three years, that all Congress elections should be triennial and that the Working Committee should consist of 21 members instead of 16 as then prevailing, as there would be three classes of Congress members—ordinary, qualified, and active. Each lakh of population would be entitled to send one delegate to the Congress provided there were 500 ordinary and qualified members in that area and also provided that no constituency should be bigger than five lakhs of population.

The Congress Working Committee which met early in May spread over two sessions, covered the prevailing political situation against the background of the talks which Mahatma Gandhi, the Congress President and other Congress leaders had during the previous month with the Viceroy and the developments subsequent to Mahatma Gandhi's departure, with particular reference to the North-West Frontier Province, which was discussed at length and which, according to Congress quarters, might become a "test case".

The following day the Committee sent to the Viceroy's House an important memorandum relating to the Congress stand on the issue of the division of India and expressing its strongest opposition to any proposal for fresh elections in the Frontier Province. It was made clear in the document that if there was to be a division of India, it should be as complete and thorough as possible, including the partition of the Punjab and the Bengal.

At the end of May important talks were conducted at New Delhi between Mahatma Gandhi and the Congress President, Acharya Kripalani, on one hand and the Socialist leaders, Mr. Jai Prakash Narayan, Shrimati Kamaladevi and others, on the other hand to bridge the widening gulf between the Congress and its Socialist wing.

PARTITION INEVITABLE

Meanwhile, events had moved fast in India. The country was engulfed in communal frenzy and carnage, especially in the northern parts. There seemed to be no alternative solution, however inadvisable, and unpalatable to the partitioning of the land. This inevitability was recognised in the British Government's Statement of June 3 envisaging the partition of India and a union of India with Indian States.

The Working Committee, ten days later, passed a resolution explaining the inevitable. The draft resolution for the A.-I. C. C. said that H. M. Government's proposals of June 3 were likely to lead to the secession of some parts of the country from India. However much this was to be regretted, the A.-I. C. C. accepted the possibility in the circumstances then prevailing. Welcoming the decision of the British Government to transfer power to the Indian people completely by the following August, the resolution appealed to Congressmen to forget their differences and petty disputes and to stand by vigilant, disciplined and prepared, to serve the cause of India's freedom and defend it with all their strength from all who might seek to do it injury.

On June 14, 1947, the A.-I. C. C. commenced a historic session at the Constitution Club at New Delhi. Pandit Govind Ballabh Pant, moving the resolution accepting H. M. Government's plan of June 3, said that this was the only way to achieve freedom and liberty for the country: the choice then was between accepting the Statement of June 3 and committing political suicide. Pandit Pant argued that it was better to accept the Statement of June 3 than fritter away the energies and to keep unwilling people in the Union.

A-I. C. C. Endorses.—Maulana Abul Kalam Azad, according to the resolution, said that the choice before the Congress was not which plan to accept and which to reject, but whether the prevailing state of indecision and drift should continue. The Congress stood by the ideal of united India and it also conceded to the principle of self-determination and was against coercing unwilling areas to join the Union. Mr. Purshotandus Tandon, the principal opponent to the resolution, declared in an impassioned speech that the A-I. C. C. must reject it and that it was not sufficient for accepting to say that an adverse vote would hurt the prestige of the Working Committee. Acceptance of the resolution would mean abject surrender to the British and to the Muslim League. The Working Committee had failed India, but India with the strength of millions behind her must reject this resolution. The Working Committee had accepted the plan in weakness and out of a sense of desperation.

Mahatma Gandhi, in a 40-minute address to the Committee, commended the Working Committee's resolution. If at that stage the A-I. C. C. rejected the Working Committee's decision, he said, what would the world think of it? All the parties had accepted it and it would not be proper to go back on its word. If the A-I. C. C. held so strongly on this point, continued Mahatma Gandhi, that this plan would do injury to the country, then it could reject the plan. The consequence of such a rejection would be the finding of a new set of leaders who could constitute not only the Congress Working Committee but also take charge of the Government.

After eight hours' lively debate, the following day, the A-I. C. C. endorsed the stand taken on their behalf by their Executive in accepting the British Government's June 3 proposals.

The official resolution was adopted by an overwhelming majority - in a house of 218, 157 voted in favour of the resolution and 29 against.

The 500-word official resolution recalled the policy of the Congress: "It cannot think in terms of compelling the people of any territorial unit to remain in an Indian union against their declared and established will" and explained the proposals embodied in the Statement of June 3 which "have laid down the procedure for ascertaining the will of the people concerned".

The resolution added: "The A-I. C. C. earnestly trusts that when present passions have

subsided India's problems will be viewed in their proper perspective and the false doctrine of two-nation will be discredited and discarded by all. The proposals of June 3 are likely to lead to the secession of some parts of the country from India."

At this session the A-I. C. C. passed unanimously a resolution telling the Princes that the Congress "cannot admit the rights of any state in India to declare its independence and to live in isolation from the rest of India."

FUTURE ROLE

On the eve of India's independence, Mr. Shankarrao Deo, General Secretary of the A-I. C. C. explained the future role of the Congress. If India's destiny was to be fulfilled, he declared, and if it had to take its proper place in the comity of nations, then unity was essential."

There was no other organisation more fitted for this task than the Congress, he added, and, therefore, its need was greater than before. Besides, at a critical period in her history India required for its progress one big political party large enough to guarantee a stable government and strong enough to maintain its hold and influence over the people. The Congress alone, he pointed out, could secure all the requirements.

The Congress, he continued, had proved its capacity to adapt itself to the need of the changing times. Disaster awaited them in all directions if the Congress failed to transform itself so that it could assume that great responsibility. The aim of the Congress was to create a new society based on social justice and equality.

On August 15, 1947, India celebrated Independence Day with great country-wide rejoicing.

The Congress Working Committee met at the end of September to consider, among other things, the situation arising out of the disorders in the Punjab, with particular reference to the refugee problem and the safety of minority in East and West Punjab. In a statement the Committee gave an assurance to the minorities that the Congress Government would continue to protect to the best of its ability their citizen rights against aggression. At the same time it emphasised that is expected from the minorities the same allegiance and loyalty to the State as from the majority community.

Mr. C. Rajagopalachari who had taken over the Governorship of West Bengal resigned from

the Congress Working Committee on November 10. Mr. Jai Prakash Narayan, another member, had already resigned but was invited to attend the last two meetings.

At the A-I. C. C. which met in mid November, Mahatma Gandhi declared that no Muslim in the Indian Union should feel his life unsafe and all those Muslims who had left India under coercion should be brought back. He thus gave the lead to two resolutions, earlier approved by the Working Committee, moved by Mr. Shankar Rao Deo and seconded by Mr. Jai Prakash Narayan: one laying down the "national policy" to be followed by the Government of India in dealing with relief and rehabilitation problems, and another on the question of protection of minorities in India.

KRIPALANI LEAVES

Pandit Nehru moved a resolution about the elimination of foreign rule and of the fundamental policy of the Congress. It was seconded by Mr. B. G. Kher. Acharya Kripalani asked the A-I. C. C. to relieve him of the responsibility of presidentship and to treat his decision "as irrevocable". Acharya Kripalani expressed dissatisfaction with the prevailing identifications of the Congress Executive with the Government at the Centre and asked how the Congress was to give to the Government its active and enlightened co-operation unless its highest executive or "at least its popularly chosen head is taken into full confidence on important matters that affect the nation".

Dr. Rajendra Prasad was later elected President of the Indian National Congress in place of Acharya Kripalani, who had resigned. Dr. Prasad resigned the ministership in the Central Government but retained presidentship of the Constituent Assembly. The proposal about Acharya Kripalani's resignation which came like a bolt from the blue to the majority of the A-I. C. C. members was proposed by Sardar Patel and seconded by Pandit Nehru. There was however, all round satisfaction with the choice and Dr. Prasad was unanimously elected.

The A-I. C. C. appointed a Committee to report to a special session of the A. I. C. C., which was to be held in the month of January following, on the revision of the Congress constitution in the light of the changed political picture in the country and the need for readjustment in the organisation and functions of the Congress.

THE LIBERALS

THE only item to be recorded in the activity of the All India Liberal Federation is a meeting of the council of that body, held in Poona on June 27, 1948 under the presidency of the Madras Liberal Leader Mr. T. R. Venkatrama Shastry. The council passed a resolution on Kashmir charging the Government of Pakistan with organizing raids and supporting attacks on Kashmir with its own army. The council also strongly condemned Razakar attacks on Hindus and on the villages bordering on Hyderabad, and urged the Government of India to take swift and effective action to put a stop to the outrages.

The last session of the All India Liberal Federation was held in Lahore in 1945. Since then there has been no meeting of the general body. A session was to have been held in December 1948 in Christmas week. Sir Cowasji Jehangir was even elected chairman of the Reception Committee. It was to have been a crucial meeting for one of the subjects to be discussed was the future of the Liberal Party. But the meeting was postponed and till the time of writing (May 1949) no date had been fixed for a session.

It was also reported that at the next session (whenever that may take place) the party would take a decision to dissolve itself. This report, however, was later denied.

Actually, there is very little to dissolve, for the Liberal Party has no organization in the sense the Congress or the Communist Party has an organization. The Liberals used to hold an annual session at which resolutions on important subjects were passed. The delegates to the session were for all practical purposes self-chosen. In between any two sessions there was no political activity worth speaking of. Individual members addressed gatherings or issued statements on their own. In fact, the Liberal Party was more a congregation of like-minded individuals than a party in the accepted sense of the term. Hence whether the party is alive or dead Liberals as individuals would continue to play the same part in the political life of the country as they had done before. They will offer sober well-informed, constructive criticism, they will act as mediators in disputes between one group and another, they will take a prominent part in the administration of the country and they will represent the nation with great distinction and ability at all international gatherings. Men like Mr. Alladi Krishnaswamy Iyer, Mr. M. C. Setalvad, Sir B. N. Rao, Raja Maharaj Singh and Sir A. Ramaswamy Mudaliar would all be classed as Liberals today if they were in active politics. Thus all in all, it is a fair generalization to say that while the Liberals have declined as a party, as individuals they have found much wider scope for service. In fact, there is no policy which can be called as distinctly liberal, for the policy and the outlook of the Liberals differ very little, if at all, from the policy and the outlook of the moderate elements in the Congress who are today in an overwhelming majority in that organization.

HISTORY 1918-1947

A definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (vide 1919 edition of this book) witnessed the birth of the National Liberal Federation which till the other day was the platform of Indian moderate leaders. Today liberalism in India is as good as dead. The country has become almost exclusively Congress minded, so that this chapter has only historical value.

The National Liberal Federation held its first session in Bombay in 1918. Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Naxpur Congress. The Liberal Party in India has always been the rallying point of moderately progressive opinion. It has consistently stood for a pure

type of nationalism and orderly progress through peaceful and constitutional means, as opposed to the revolutionary creed and policy of the Congress. During the first five or six years of its existence, the party played a useful and valuable part in politics and exerted a wholesome influence on public life. The death of Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned from then on. The Indian Round Table Conference brought it again to the forefront, but its influence again suffered partly as the result of the "reactionary provisions" of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organization. The return of the Congress to the constitutional path ousted it from Indian Politics.

At the time of writing the Liberal Party exists only in name, there being no place for a middle group in Indian affairs of the present day. Latterly scope has arisen for activity in between extremist groups, rather as mediators than as principals. This function of mediation has been filled by a group of leaders, consisting mostly of retired administrators and others who own no party affiliations or have severed party allegiance. Quite a few Liberal Party members have joined in the deliberations of this group in their individual capacity. Formed under the title of Non-Party Leaders' Conference, this group has itself crystallised into a centre party, throwing the Liberal Federation further into the background. Indeed, it was felt necessary to enter at a recent session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up.

CONSTRUCTIVE CRITICISM

The general elections for the provincial legislatures under the Government of India Act of 1935 confirmed the exit of Liberals from active political life in India. Few Liberal candidates contested the elections, but hardly any was successful. During the past two or three years the Liberal Party existed only in name. Its leaders, however, made their existence felt by occasional contributions to the discussion of public questions. They also played a valuable part in offering sober and constructive criticism of the policies and actions of the majority party, the Congress. Such criticism was all the more useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress was in power.

The elections of 1946 completed the rout of the Liberals who have ceased to be an effective factor in the country's political life. Their place was more or less taken by the right wing of the Congress which in its turn is the result of the development of extremism within the Congress itself.

Although the Liberals held no less progressive views than Congressmen, there was a fundamental difference between the two: the former had fixed Dominion Status within the Empire as their ambition, while the latter set "complete independence" as their goal; similarly in the matter of method, the Liberals were opposed to direct action and were wedded to constitutional forms of agitation to accelerate the pace of the country's political advance.

There is another direction in which the Liberal Party's sentiments may be said to be different from those of the Congress. Having an abiding faith in the British connection and being convinced of the potentialities for good of the British Empire, the Liberal Party constantly wishes well by the Empire and what it stands for. For this reason no member of the Party waived anything but success for the Empire in the struggle against aggression. Many of them gave public expression to their convictions in this behalf and to their undoubted desire that India should render full support to Britain in her wars.

Later, however, the bulk of the Liberals showed signs of impatience over the deadlock in the country. They were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces. They wished that the authorities should make an effort to end the political inactivity. Towards this end they made repeated appeals to the British authorities.

Not all of these were made in the name of the Liberal Federation. Indeed the most influential and well known exponents of the view-point of the Liberal Federation do not belong to that organisation. Take for instance, the Non-Party Leaders' Conference whose proceedings figured largely in Indian politics during the years 1942-1944. The President and more than one leading light of this Conference are not members of the Liberal Federation. It is nevertheless true that the views of both are identical on many subjects. It may therefore be appropriate to deal with the activities of these leaders in this Chapter.

THE MODERATE ERA

The activity of the Liberals and other moderate leaders during the few years preceding independence followed a dual policy. On the one hand, they were never slow to denounce any attempt to hamper the country's war effort, and, on the other, their demands were little different from those of the Congress.

The period when the Congress was in the wilderness, especially since the adoption of the August resolution till the release of Congressmen in June, 1945, may perhaps be described as the moderate era in Indian politics. Not that they retained their lost influence, nor that the masses abandoned their extremist tendencies which they had acquired from the Congress propaganda. If anything, extremism, feeding on itself, became more extremist. Nevertheless, it was a moderate's period in the sense that the moderate leaders occupied the public stage. The Congress exit into wilderness was partly responsible for this development. When the satyagraha movement was in progress, there was hardly any politics worth the name except the activities of the Liberals and other moderate leaders.

Another reason for public attention being directed towards moderate politics was the effort made by the British Government to meet the demands of moderate leaders. It cannot be said that the authorities did anything substantial to enhance the reputation, and strengthen the position, of the sober element in the Indian political world, on the contrary, the point was frequently made that, the way in which the Liberals were ignored gave additional impetus to extremism. But such opinion as was taken was the result of the outspoken representations made by the moderate leaders.

The year 1944-45 was marked by the jubilee session of the Liberal Federation which completed 25 years of public service. Another remarkable activity was the evolution of Sir Tej Bahadur Sapru and a Committee of non-party leaders of a compromise formula relating to India's future constitution. This was drawn up following the failure of the Gandhi-Jinnah negotiations in the autumn of 1944.

PEACE EFFORTS

During the year 1943-44 the activities of the Liberals and the peace efforts of moderate politicians generally were of a limited character. This was due partly to the stagnant nature of the attitude of both sides to the dispute, namely, Government and Mahatma Gandhi. Whereas the Government of India refused to move from the decision not to reopen the question unless the Mahatma accepted the "Quit India" resolution of August 1942 and forsook the policy underlying it, the Mahatma gave no indication that he would respond in

terms of the Government demand. Notwithstanding the hopes and speculations of those who variously claimed to know the Mahatma's mind, his own attitude seemed hardly to have varied from the sentiments expressed by him in his letter to Lord Linlithgow and the Government of India published on the eve of his fast in February 1943. Thus there was available to the intermediaries no common factor which they could exploit to bring about an understanding between the two opposite view-points.

Even so, efforts, though of a sporadic nature, continued to be made by unattached leaders to secure a change in the official policy towards the Congress or at least to induce Government to release the leaders so as to enable them to consider the altered situation. Embittered by their failure to move the Government following Mahatma Gandhi's fast, the moderate leaders urged the appointment of an impartial tribunal to investigate the charges made against Congress under detention or, in the alternative, the release of those leaders so as to enable them to review the situation and attempt a solution of the deadlock. To this, however, the Secretary of State replied in the House of Commons, saying that the Government of India had no intention of "stageing a trial" of Mahatma Gandhi and other detained Congress leaders. (See Year Book for 1943.)

In the winter of 1943-44 the annual session of the National Liberal Federation met in Bombay under the presidency of Kankar Sir Maharaj Singh. The session was remarkable for the diametrically opposite view points expounded by the President and the Chairman of the Reception Committee (Sir Cowasjee Jehangir).

While deploring the August resolution of the Congress, Sir Maharaj Singh criticised Government for failure to announce a complete change of policy at the commencement of the war, adding that "if Sir Stafford Cripps had come to India with his proposals in 1939 or early in 1940, instead of 1942, there would have been an excellent prospect of their acceptance." Under present conditions, he deplored, "we are face to face with a divided India, with thousands of our fellow-countrymen, including many prominent and popular leaders, in prison, the retention by European officials of the key departments of Finance, Defence and Home in the Government of India, a complete absence of popular government in large portions of India, swollen prices, general distress and famine in large and densely populated areas." Sir Maharaj complained that the advice of moderate leaders had been brushed aside by Government.

Sir Cowasji Jehangir took a different view of the problem. He blamed the Congress for the failure of the Cripps Mission and affirmed that it broke down owing to the eleven-hour raising of the issue of the Viceroy's veto. He cited Qaid-e-Azam Jinnah's opinion in support of the contention that the formation of a national Government of the lines of the Congress demand would have been totally opposed by the minorities in general and the Muslims in particular.

After drawing attention to the events that followed the August resolution, Sir Cowasji declared that if any progress was to be made it was essential that the Congress should not only withdraw the August resolution but also give an assurance to the British public and to the peoples of the Allied Nations that all people in India were behind this war and that they would unconditionally and enthusiastically help the war effort.

Two-nation Theory.—The unconditional release of Congress leaders, the treatment by the Congress leaders of the "Quit India" resolution of August 1942 as a dead letter, a conference of political parties and the formation of national composite governments at the Centre and in the provinces—these suggestions were embodied in a resolution, passed by the session. The conference also passed resolutions dealing with the war, India's position at the peace conference, Government's food policy and the Bengal famine.

Early in the summer of 1944, a session of the Non-Party Leaders' Conference met at Lucknow under the presidency of Sir Tej Bahadur Sapru. (See Year Book for 1943.)

In June 1944 the Council of the National Liberal Federation met in Poona and made a two-fold appeal one to the Government unconditionally to release Congressmen not found guilty of violence and the other to the Congress to treat the August resolution as a dead letter, to put it aside and take measures to arrive at a working arrangement with other political parties for the formation of a provisional Government.

The next meeting of the Council was held at Allahabad in October and expressed the opinion that the two-nations theory advanced by the Qaid-e-Azam was opposed to facts while his insistence on a plebiscite confined to Muslims was unfair to other communities and incompatible with democratic concepts. The Council also declared that the division of the country into two or more separate sovereign states was not a right solution for the Hindu-Muslim question.

CONCILIATION COMMITTEE

Soon after the failure of the Gandhi-Jinnah talks in Bombay Sir Tej Bahadur Sapru, President of the Non-Party Conference, announced his intention to set up a committee (called the Conciliation Committee), comprising eminent public men with no marked political affiliations, to examine the Indian communal question from a political and constitutional point of view. This was the outcome of a resolution passed by the Standing Committee of the Non-Party Conference.

Sir Tej Bahadur Sapru explained that he had placed before Mahatma Gandhi the idea of a committee of the kind now decided upon and the Mahatma had said:—"I shall unreservedly co-operate with it. You can call me whenever you like, put me any questions you like and ask me for any assistance you like."

Sir Tej Bahadur added that it was his intention that there should be on the committee no one who was a partisan or one who had expressed himself violently on political issues of the country. It was also the idea that there should be one or two retired judges who would bring a judicial mind to bear on the country's problems.

The basic conception of the committee was that the discussion of the communal and political problem should be lifted from the partisan level to the scientific and judicial level.

The effort of the committee would be to understand the views of each party, act as a sort of conciliation board by establishing contact with all parties and recommend some solution that they thought good on their own responsibility.

Personnel, Scope.—The personnel of the Committee was completed towards the end of the year. It included eminent leaders from different communities most of whom fulfilled Sir Tej Bahadur's qualifications, in particular that they should be experts, eminent and experienced and non-partisan in outlook. They included the Metropolitan of India, Sir S. Radhakrishnan, Sir Maharaj Singh, Sir Jasdish Prasad, Mr. N. Gopalaswami Iyengar, Mr. Tushar Kanti Ghosh, Mr. N. M. Joshi, Mr. P. K. Das, Sardar Sant Singh, Sardar Harnam Singh, Mr. K. B. Nahi Bux Hussain, Sir H. P. Mody, Dr. John Mathai, Dr. P. K. Sen, Mr. Frank Anthony and Mr. B. L. Rallia Ram.

The Committee began its work on December 29, 1944, with an opening address by the President, Sir Tej Bahadur Sapru, defining the exact scope and functions of the Committee. "Our essential duty," he said, "is to apply our minds to the basis of the constitution, not to detailed provisions of the constitution."

"Let me assure you," said Sir Tej Bahadur, "I have got some very encouraging letters and memoranda, even from Muslims." Sir Tej Bahadur mentioned that as many as nine memoranda were from Muslims; one valuable

memorandum had come from a very distinguished Muslim, who had approached the problem from an entirely independent point of view.

Sir Tej Bahadur had also received similar encouraging letters from quarters from which he did not expect any encouragement. He had received letters and telegrams from England.

"I have tried to approach Qaid-e-Azam Jinnah. He does not want to recognise the Non-Party Conference or this Committee. I have no quarrel with him. He may not recognise us. But we recognise ourselves. That is my answer. This Committee will go on. This Committee must discharge its duty."

He had tried to approach the Sikh leaders and had received an encouraging reply from Master Tara Singh. He had approached Dr. Syama Prasad Mookerjee and Mr. Savarkar. They had agreed to see him.

This Committee, Sir Tej Bahadur pointed out, was not established on the basis of representation of each caste or community; but he left it to the Committee to decide for itself on this question. He was anxious to get representation of the Scheduled Castes. At one stage Dr. Ambedkar seemed agreeable to help the Committee in this matter, but, later, he said he did not approve of some of the Committee's members—Sir Tej Bahadur did not know who were the sinners.

Mahatma's Reply.—The material on which the Committee based its discussions included memoranda which the committee had received from various organisations and individuals. Sir Tej Bahadur Sapru, sent to Mahatma Gandhi the committee's questionnaire for a reply, but the latter wrote back saying that he would prefer to reply to any specific questions that may be put to him with reference to his talks with the Qaid-e-Azam.

The following are some of the questions put to Mahatma Gandhi and the replies received from him:—

Question.—In his letter of September 17, Qaid-e-Azam Jinnah says that "the word (Pakistan) has now become synonymous with the Lahore resolution." Did you ask him whether in accordance with the Lahore resolution of the All-India Muslim League a scheme of constitution in accordance with the basic principles providing for the assumption finally by the respective regions of all powers such as defence, external affairs, communications, customs and such other matters as may be necessary, had been prepared? Was your attention drawn to any such scheme by Mr. Jinnah?

Answer.—"No, Qaid-e-Azam's position unfortunately was that while he could come as far as seeing me and trying to convince me of his position, he, the President of the League, could not discuss details with me, a mere individual. But so far as I could gather from our conversations, he had no prepared scheme. As the correspondence shows, he had referred me to two books, both of which I read, but neither of which could help me to understand his exact position. One thing he insisted upon was that if I first accepted the Pakistan of his conception, he could then discuss other things with me, even though I was but an individual."

Asked if it was true that the real breakdown between him and the Qaid-e-Azam came about on the question of central authority or Government, the Mahatma replied: "It can be said that the breakdown took place because we could not come to an agreement on the two-nation theory of Qaid-e-Azam. As the correspondence will show, I wanted to avoid a central Government. I suggested an authority acceptable to both the parties, but he would insist first on complete partition as between two nations and then an agreement between them as on foreign affairs, etc. He would not agree to anything simultaneous."

Mahatma Gandhi's attention was drawn to a passage in his letter to the Qaid-e-Azam dated September 28, 1944, in which he said:—"That if

It means utterly independent sovereignty so that there is to be nothing in common between the two, I hold that it is an impossible proposition. That means war to the knife" and was asked what he meant by "war to the knife."

The Mahatma replied: "War to the knife is a simple English idiom. I have never known it used in the literal sense. It simply means a determined quarrel between parties. I hold that if there is nothing in common between the two or nothing which does not come in conflict with each other's culture, there can be no friendly mutual agreement."

To another question the Mahatma replied "Although I could not agree to the two-nation theory, I agreed on the basis of members of a family desiring severance of the family tie in matters of conflict but not in all matters so as to become enemies one of the other as if there was nothing common between the two except enmity."

C.R.'s. Support—Mr. C. Rajagopalachari wrote to the Committee:—

"I have your circular letter of Dec. 3 about the Conciliation Committee. I need hardly say how warmly I wish you every success."

"As regards my views of which you have asked for a memorandum, they are contained in the 'C. R. Formula' which formed the subject matter of the Gandhi-Jinnah talks. I am unable to improve the terms of that formula."

"I may clarify a point which has been deliberately misrepresented by certain advocates of the Muslim League. It is only for fixing the Pakistan area of Punjab and Bengal that I have in my formula asked for examination of population statistics district by district. Once the area is thus delimited, my formula leaves the verdict on the issue of separation to the people inhabiting the delimited area as a whole. It is not the intention of the formula to take the plebiscite district by district..."

"My position after the failure of the Gandhi-Jinnah talks is set out in the introduction to the Gandhi-Jinnah talks published by the 'Hindustan Times'. I need add nothing to what I have stated there in about the communal issue. I wish, however, to add one other point for the consideration of the Committee. It is not psychologically possible to create an atmosphere of reasonableness unless Self-Government on democratic lines in some shape or other is a settled fact, and such form of Government as is functioning and threatens to continue is replaced by an agreed constitution. I therefore appreciate the stand taken by the Non-Party Conference. The federal part of the Government of India Act of 1935 should with suitable modifications, be introduced at once with or without fresh Provincial elections according to the convenience of the British Government..."

Cable to Wavell—While the Committee was still in session and before the formulation of its conclusions, Sir Tej Bahadur sent a cable to Lord Wavell, who was then in London discussing with His Majesty's Government proposals for a solution of the Indian political deadlock, communicating the following resolution unanimously adopted by the Committee:—

"In view of the internal situation particularly relating to the economic life of the people and in view of the rapid pace at which international events are marching, and in view of the necessity of India being represented in her own right and by her own representatives at all international conferences and peace conferences, if any, this committee strongly recommends that the following steps be taken at once:

"(1) All political prisoners and detainees be released immediately;

"(2) India should, by a royal proclamation, be declared an independent state and treated as a dominion equal and in no way inferior to any other dominion of the British Commonwealth of Nations, even though, pending the framing and coming into force of a new constitution, the Government of India may have to be

conducted in conformity with the provisions of the Act of 1935 subject to minimum necessary modifications:

"(3) (a) The proclamations issued in several provinces under section 93 of the Act should be withdrawn forthwith and the legislatures allowed to resume their normal activities; (b) Popular Ministries should be re-established in those provinces and allowed to function under the provisions of the Act; (c) In the formation of such Ministries the Prime Minister representing the largest single party in the legislature should be required as far as possible to include in the Ministry persons commanding the confidence of other parties in the legislature."

"(4) In addition to the restoration of autonomy in all the provinces of British India a National Government should replace the present Executive Council at the centre."

"For this purpose the committee would recommend for consideration the following two alternatives:

ALTERNATIVES

"(a) Section 5 of the Government of India Act, 1935 should be so amended as to provide for the issue of a proclamation by His Majesty bringing into being forthwith a federation of India without insisting on the entry of Indian States as a condition precedent as provided in sub-section (2) of the said section, Indian States being at liberty to accede to the federation in accordance with the terms of section 6 of the Act."

"(b) Part 11 of the Government of India Act, 1935 with the proposed amendments should be brought into force and steps taken immediately to hold elections to the two houses of the federation legislature and to appoint a Council of Ministers in accordance with the provisions contained in that part."

Provided, however, that in the formation of such a ministry, the Prime Minister representing the largest single party in the Legislature shall as far as possible, include in the ministry persons commanding the confidence of other important parties in the Legislature.

Schedule IX of the Act may be continued in force but should be so amended as to provide for altering the constitution and functioning of the Governor-General-in-Council on the following lines:

(A) Except for the Commander-in-Chief who may continue to be ex-officio member of the Executive Council in charge of war operations and matters ancillary thereto the entire Executive Council should consist of Indians commanding the confidence of the parties in the Central Legislature: the provision in sub-section (3) of section 36 which requires that three, at least, of the members should be persons who have been in the service of the Crown in India for a period of at least ten years being repealed.

(B) No officials belonging to the permanent services shall be nominated to either House of the Central Legislature. The nominated block in each of the two houses shall consist entirely of non-officials nominated by the Governor-General-in-Council.

(C) In the 9th schedule of the Act the provisions excluding from the control of the Legislature expenditure under heads Ecclesiastical, External Affairs, Defence, Tribal Areas and other items incurred by the Governor-General in his discretion shall be repealed.

(D) The Political Adviser to the Crown Representative should be an Indian with the rank and status of an Executive Councillor though he may not be a member of the Executive Council.

(E) The decision as to when the general elections to the Central and Provincial Legislatures should take place should be left to the National Government at the centre and the popular governments in the provinces.

"The Committee greatly appreciates your initiative in proceeding to London for the purpose, as it believes, of ending the present political deadlock in the country and trusts that the suggestions that it is now making will be of assistance to you and His Majesty's Government in solving the problem that faces you. The Committee is continuing its work."

The cable represented the first part of the Committee's work and contained its recommendations with regard to the interim period.

Quaid-e-Azam's Protest—The Quaid-e-Azam, who represented the principal factor in the internal deadlock, reacted unfavourably to the suggestions made in Sir Tej Bahadur's cable to Lord Wavell. He said:

"Sir Tej Bahadur Sapru and his associates have been passing off under different labels from time to time, first as 'all party conference,' then as 'no party conference' and now they have assumed the label of 'conciliation committee.'"

"They are nothing but handmaids of the Congress and have played and are playing to the tune of Mahatma Gandhi..."

"Two alternatives are offered. The Muslim aspirations and their national demands of Pakistan would be torpedoed by this subtle and flanking movement, if either of them is accepted."

"Muslim India will not accept any attempt to change the present constitution in any way which would directly or indirectly be on the basis of a united India. The question of Pakistan is the first and the foremost issue to be decided... I am confident that having regard to the solemn declarations of His Majesty's Government and the pledges and assurances given to the Muslims they will not go back as an honourable nation and coerce the Mussalmans or force or impose upon them a constitution against their will and without their approval and consent..."

Hindu-Muslim Parity—Within a week the Sapru Conciliation Committee unfolded its proposals for the future constitution of India which proceeded on the basis of parity between Hindus, other than the Scheduled Castes on the one hand, and Muslims on the other, in the constitution-making body, the future Central Legislature and in the Executive, the overriding condition being that the unity of India and joint electorates were accepted.

The Committee emphatically declared itself against Pakistan. Mr. N. M. Joshi dissented from this declaration, as also from the corollary that no province should elect not to accede to the future Indian Union or secede therefrom.

The Committee envisaged the transfer of Paramountcy to the Union, and recommended the appointment of a Ministry in charge of functions in relation to Indian States, with whom a body of three Indian States' advisers is to be associated.

A declaration of fundamental rights, the setting up of a minorities commission, and special proposals for minorities in the Punjab were included in the Committee's recommendations.

"It is needless to say that the recommendations do not constitute a full blue print for the future constitution," said the Committee. "They merely indicate the outlines which the Committee feels would suit the conditions in India. They are essentially suggestions made for the constitution of the country at large."

"These proposals are confined to British India only. When the Indian States decide to come into the Union, as the Committee hopes they will, it is obvious that arrangements will have to be made in consultation with them for necessary adjustments and additions."

THE CONSTITUTION-MAKING BODY

The constitution-making body shall be constituted in the manner prescribed in Clause "D" of the draft resolution of His Majesty's Government, brought by Sir Stafford Cripps, subject to the following modifications:—

(1) The total strength of the body shall be 100, distributed as follows: Special interests, namely, commerce and industry, landholders, universities, labour and women—16; Hindus, excluding the Scheduled Castes—51; Muslims—51; Scheduled Castes—20; Indian Christians—7; Sikhs—8; Backward areas and tribes—3; Anglo-Indians—2; Europeans—1; others—1.

(2) It became Clause "D" of His Majesty's Government's declaration provides for election by a joint electorate, composed of members of all Provincial Legislatures, under the system of proportional representation, that the Committee has decided to recommend that, in spite of the disparity in the population strengths between Muslims and Hindus other than the Scheduled Castes, the Hindu community should, in the interests of promoting communal unity, agree that the representation of the Muslim community on the constitution-making body shall be on a par with that given to the Hindus, other than the Scheduled Castes.

(3) No decision shall be valid unless it is supported by three-fourths of the members present and voting.

(4) His Majesty's Government shall enact the constitution on the basis of the valid decisions of the constitution-making body, supplemented wherever necessary by its own awards in matters in which the requisite majority for decision was not forthcoming.

Division of India—The Committee, having considered carefully the resolution of the Muslim League passed at Lahore in 1940, the various other resolutions of the League and the published version of the talks between Quaid-e-Azam Jinnah and Mahatma Gandhi, and having also considered the "C. R." and Gandhi proposals, is emphatically of the opinion that any division of India into two or more separate independent sovereign States is unjustified, and will endanger the peace and orderly progress of the whole country without any compensating advantage to any community, and that the political unity of India should therefore, be maintained.

Provisions should be made in the constitution for the accession from time to time of Indian States as units of the Union, on such terms as may be agreed upon. The establishment of the Union should not, however, be made contingent on the accession of any Indian State or of any minimum number of Indian States. The Union should be brought into being and should commence to function at the earliest possible date, even if no Indian State has acceded to it as a unit by then.

No province of British India may elect not to accede to the Union, nor may any unit—whether a Province or a State, which has acceded—be entitled to secede therefrom.

Provincial Boundaries—While it is not desirable that the new constitution should be delayed by the realignment of provincial boundaries on linguistic or cultural considerations, the Constitution Act shall indicate the machinery and prescribe the procedure for such realignment of the old Provinces, and for the creation of new Provinces after it has come into force, and on such realignment or creation of Provinces all consequential amendments may be made, in the constitution.

The Committee submits the accompanying suggestions for the consideration of the constitution-making body. They have been placed before the Committee by one of its members, who has great experience of the administration of Indian States and of the working of the Government of Indian Act (1935) in relation to them. As the Indian States are not represented on this Committee, and as the suggestions are of a very vital and far-reaching character, the Committee has thought it desirable to express

no opinion on the merits of the several alternatives suggested beyond stating that a clear definition of "a Head of the State" is necessary as the several resolutions adopted by the Committee assume the existence of a Head of the State and the exercise by him of certain powers and functions. The member responsible for these suggestions agrees that they, or any variant of them, involving the participation of the Indian States, cannot be finally adopted except with the consent of the Indian States.

Head of State—(1) There shall be a Head of the State (that is, Union) in India, who shall be the repository of (a) all such powers and duties as may be conferred or imposed on him by or under the Constitution Act; and (b) such other powers as are now vested in His Majesty the King of England, including powers connected with the exercise of the functions of the Crown in its relations with Indian States, provided that in relation to his powers, the Head of the State shall conform to the traditions, usages and conventions which are binding on the constitutional head of any State.

(2) The office of Head of the State shall have a tenure of five years, and ordinarily no person may hold the office for more than one term.

The head of the State shall be elected by an electoral college composed of members of the two Houses of the Union Legislature, either without any restriction as to their choice, or subject to their choice being confined to the Rulers of Indian States having a minimum population, or revenue, or both, to be named in a schedule to the Constitution Act.

(3) The Head of the State shall be elected by the Rulers of the Indian States referred to above from amongst themselves.

The Head of the State shall be appointed by His Majesty the King of England, on the advice of the Union Cabinet, either without any restriction as to his choice, or subject to his choice being confined to the Rulers of the Indian States referred to above.

(4) In case the third alternative is adopted, and a link with the British Crown is maintained, the Secretary of State for India, together with all the control that he or the British Cabinet exercises over Indian administration, should, in any case, be abolished.

(5) The head of a unit, other than an Indian State, shall be appointed by the Head of the State on the advice of the Union Cabinet.

UNION LEGISLATURE

(a) The Union Legislature shall consist of the Head of the State and two Chambers—the Union Assembly and the Council of State.

(b) The strength of the Union Assembly shall be so fixed that there shall be on the average one member for every 1,000,000 of the population.

(c) Ten per cent. of the total strength shall be reserved for the representation of the following special interests: Landholders; commerce and industry; labour; women.

(d) The remaining seats shall be distributed among the following communities: (1) Hindus, other than Scheduled Castes; (2) Muslims; (3) Sikhs; (4) Indian Christians; (5) Anglo-Indians; (6) other communities.

(e) (1) In case the Muslim community agrees to the substitution throughout of joint electorates with reservation of seats for separate communal electorates, in that case only this Committee would recommend that, in the interests of promoting national unity, the Hindu community should agree that in the strength of the Central Assembly, excluding the seats allotted to special interests, such as Commerce and industry, landholders, labour, etc., Muslim representation from British India shall be on a par with the representation given to the Hindus (other than Scheduled Castes), in spite of the great disparity in their respective population strengths.

The Committee desires to emphasise their view that if this recommendation is not to be implemented in its entirety, the Hindu community should be at liberty not merely not to agree to the claim for parity of representation, but to ask for a revision of the Communal Award.

(ii) The Committee considers that the representation given to the Sikhs and Scheduled Castes in the Government of India Act is manifestly inadequate and unjust and should be substantially raised. The quantum of increased representation to be given to them should be left to the constitution-making body.

(f) For the Union Assembly there shall be adult franchise, for seats other than those reserved for special interests.

(g) For the special interest, there shall be special constituencies. There shall be direct election to the Union Assembly. As for election to the Council of State, the question shall be decided by the constitution-making body.

DIVISION OF POWER

Lists of the matters in respect of which the power of making laws for peace, order and good Government, and the functions pertaining to the administration of these laws, shall fall with the sphere, respectively, of the Centre and the units, shall be embodied in the Constitution Act. The detailed drawing up of these lists should be left to the constitution-making body. The Committee, however, would recommend that the following principles, among others, should guide the constitution-making body in the distribution of powers and functions between the Centre and the units:—

(A) The powers and functions assigned to the Centre should be as small in number as possible, provided that they shall in any case include (i) matters of common interest to India, as a whole, such as foreign affairs, defence, relations with Indian States, inter-unit communications, commerce, customs, currency, posts and telegraphs; (ii) settlement of inter-unit disputes; (iii) co-ordination where necessary of the legislation and administration of different units; and (iv) such other matters or action as may be required for ensuring the safety and tranquillity of India or any part thereof, or for the maintenance of the political integrity and economic unity of India, or for dealing with any emergencies.

(B) While all matters not assigned to the Centre exclusively or concurrently must be declared to fall within the sphere of the units a list of these should, for greater certainty, be given in the Constitution Act, with the rider that all residuary powers—those not included in either of the two lists shall vest in the units.

(C) All customs barriers between one unit and another shall be abolished, and there shall be free trade within the Union, provided that, where the abolition of existing customs barriers affects prejudicially the finances of a unit, it shall be entitled to adequate compensation out of the revenues of the Union Executive.

THE EXECUTIVE

(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians; (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted, notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A). Where, on account of a whole community refusing to join or remain in a Cabinet that community goes, without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the

Cabinet may commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be collectively responsible to the Legislature.

(E) The Cabinet shall be led, guided and held together by a Prime Minister, who shall ordinarily be the leader of a party, which by itself, or in combination with other parties, is able to command a stable majority in the Legislature. A convention should be created that the offices of the Prime Minister and the Deputy Prime Minister should not be monopolised by any one community.

(F) The other members of the Cabinet shall be appointed on the advice of the Prime Minister.

(G) One of these Ministers shall be designated Deputy Prime Minister, and it shall be a standing rule that the Deputy Prime Minister shall not belong to the same community as the Prime Minister.

Cabinet to be Elected—(A) Subject to the provisions of Clause (E), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians and (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in clause (A) where, on account of a whole community refusing to join or remain in a Cabinet that community goes without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be elected by the Central Legislature in a joint session by the system of the single transferable vote. The elected Ministers shall hold office for the duration of the Legislature. The Legislature shall elect from among the Ministers a President and a Deputy President who shall not both belong to the same community.

There shall be a Minister in charge of the functions in relation to Indian States, and with him shall be associated a body of persons, not less than three and not more than five in number, who shall be called Indian States' advisers, and who shall be chosen in the manner agreed upon with the Indian States. The Minister shall consult the Indian States' advisers in all important matters, and shall obtain their concurrence in respect of certain matters to be specified in the Constitution Act.

THE JUDICIARY

(1) There shall be a Supreme Court for the Union and a High Court in each of the units.

(2) The strength of Judges in each of these courts at the inception of the Union, as well as the salaries to be paid to them, shall be fixed in the Constitution Act and no modification in either shall be made except on the recommendation of the High Court, the Government concerned and the Supreme Court, and with the sanction of the Head of the State (a Governor-General or President as the case may be), provided, however, that the salary of no Judge shall be varied to his disadvantage during his term of office.

(3) (A) The Chief Justice of India shall be appointed by the Head of the State and the other Judges of the Supreme Court shall be appointed by the Head of the State in consultation with the Chief Justice of India.

(B) The Chief Justice of a High Court shall be appointed by the Head of the State in consultation with the head of the unit and the Chief Justice of India.

(C) Other Judges of a High Court shall be appointed by the Head of the State in consultation with the head of the unit, the Chief Justice of the High Court concerned and the Chief Justice of India.

(4) A Judge or a High Court of a Supreme Court shall be appointed for life, subject to an age-limit prescribed by the Constitution Act, but he may by resignation addressed to the Head of the State resign his office.

(5) (A) A Judge of the High Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, the Supreme Court reports that the Judge ought on any such grounds to be removed.

(B) The Judge of the Supreme Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, a special tribunal appointed for the purpose by him reports that the Judge ought on any such grounds to be removed.

(6) As regards other matters connected with the appointment and function of the Judiciary, the provisions embodied in Part 6 of the Government of India Act of 1935 seem suitable, with such modifications as may be required for being fitted into the framework of the new constitution.

DEFENCE

The Committee strongly recommends that under the new constitution there should be a Portfolio of Defence which should be held by a Minister responsible to the Legislature, and that the actual control and discipline of the Army should be placed in the hands of a Commander-in-Chief under the new Government.

The Committee further recommends that a National Army should be created and developed as rapidly as possible. It is unable to suggest at this stage what the strength of this army should be, as this will depend, apart from the vital question of finance, on a number of other factors: such as the nature of the post-war world settlement and the efficacy of the international organisation for the maintenance of world peace. Among the measures which should be adopted for the creation of such an army, the Committee recommends the following:—

(1) (A) Such British units as temporarily may be required for the efficient defence of India, and such officers as may be needed for officering the National Army until an adequate number of Indian officers becomes available, shall be obtained by a treaty or agreement entered into by the Union Government and His Majesty's Government, specifying, among other things, the terms and conditions of their re-employment by the Union.

(B) As soon as the war is over, all direct recruitment of British officers to the Indian forces should cease. Such British officers as do not belong to the Indian Army and are not required for specific appointments should be reverted to the British Army Establishment.

(2) An institution should be established for the training in sufficient numbers of officers of all the three arms—air, land and sea—and all defects existing in the present system which prevent rapid Indianisation or the creation of Indian officers capable of assuming leadership should be forth with removed.

(3) If it is found that the present educational system does not produce a sufficient number of young men suitable in every respect for a military career, steps should be taken at once to remove this defect.

(4) University Officers Training Corps should be established where they do not exist and largely expanded, and measures taken not only for

ensuring the supply of officers to all vacancies in peace-time, but for the rapid expansion of the cadre in the event of a military threat to India. Such measures should aim at creating a reserve of young men with service training who can be rapidly absorbed as officers when expansion takes place.

(5) The Committee would emphasise that the maintenance of law and order is essentially the responsibility of the Unit Governments, and they should, if necessary, by increasing the strength of their police forces, equip themselves adequately for the discharge of this responsibility. The Committee would, however, make it clear that the services of troops on the Union Army Establishment should be available for being requisitioned only when the civil power finds itself unable to cope with any particular situation.

The Committee further recommends that a balance should be maintained between the respective arms and that special attention should be paid to the Navy, Air Force, mechanised units and such other branches as may from time to time be developed.

The Committee recommends that steps should be taken, even before the coming into being of the new constitution, to adopt and give effect to the measures as far as practicable.

(6) The orders now in force at the Centre regarding the representation of the communities in public services may continue in operation till the Union Government under the new constitution comes into being. The Committee, however, recommends that the 84 per cent. of the seats now allotted to the Sikhs, the Indian Christians, and the Anglo-Indians and Parsis may be split up between the Sikhs, the Indian Christians and the Anglo-Indians, and Parsis in the proportion of 34 per cent. for the Sikhs, 3 per cent. for Indian Christians and 1-5/6 per cent. for Anglo-Indians and Parsis. The special provisions relating to Anglo-Indians in certain services under Section 242 of the Government of India Act of 1935 are not to be affected by this recommendation.

MINORITIES COMMISSIONS

(A) The Constitution Act shall provide for the establishment at the Centre and in each of the provinces an Independent Minority Commission which shall be composed of a representative for each of the communities (not necessarily a member of that community) represented in the Legislature.

(B) Subject to the possession of such qualifications or experience as may be prescribed, the member representing each community, who need not necessarily belong to the same community, shall be elected by members of the Legislature belonging to that community.

(C) No member of the Legislature shall be eligible for membership of the Commission.

(D) The term of office of members of the Commission shall be the same as, and synchronise with the term of office of members of the Legislature concerned.

(E) The functions of the commission shall be:—(i) To keep a constant watch over the interests of minority communities in the area; (ii) without attempting to deal with stray administrative acts or individual grievances to call for such information as the Commission may consider necessary for discharging its functions; (iii) to review periodically—for example once every six months—the policy pursued in legislation and administration by the Legislature and the executive in regard to the implementing of non-justifiable fundamental rights assured by the constitution to minority communities, and to submit a report to the Prime Minister.

(F) The recommendations of the Commission shall be considered by a small committee of the Cabinet who shall as soon as possible place the report of the Commission before the Legislature with a full statement of the action taken or proposed to be taken in pursuance of the

recommendations of the Commission. In case any of the recommendations are not accepted wholly or in part, the statement should also contain full explanations of the decisions taken by the Government. Facilities shall be provided to the Legislature for a discussion of the report and the decisions of the Government thereon.

The Committee while strongly recommending to all communities and parties to accept the proposals says that in the event of their being unacceptable to the various communities and parties and their failure to reach an agreement on any other basis, His Majesty's Government should set up an Interim Government in India and proceed to establish machinery for drafting the new constitution generally on the basis of the principles underlying these proposals, enact it in Parliament and put it into operation at the earliest possible date.

SILVER JUBILEE SESSION

The Silver Jubilee Session of the National Liberal Federation was held in Lahore in March 1945 under the presidency of Mr. T. R. Venkatrama Sastri of Madras. He made a demand for an immediate declaration by the British Government granting Dominion Status to India and urged the release of political prisoners and Congress detainees including the members of the Congress Working Committee.

Mr. Sastri said: "The Government must declare immediately that India shall have the status of a Dominion at the end of the war. Her millions have fought on the battlefield for the cause of the United Nations. The Cripps' Offer contained that declaration... That declaration must be made forthwith and implemented, so far as it may be, by the British Government..."

"I should say that the Governor-General should have released the political prisoners and the Congress detainees long ago... They should be immediately released. Even for a solution of the present deadlock, mutual consultation between the members of the Working Committee of the Congress is necessary..."

Mr. Sastri dealt at length with the problem of minorities and said: "Pakistan is no solution for the problem of the minorities. The creation of separate foreign states does not really get rid of the minority problem altogether... What, again, of the expense of defence which each independent state will have to maintain? And would the defence organised by the separate states be adequate in the event of aggression?..."

"The Muslim League appeals to the principle of self-determination. This principle is a much misunderstood one... Whether Quid-e-Azam Jinnah, who has, so far, made the concession of Pakistan a condition of any discussion, constitutional or other, can now bring himself to put aside Pakistan and discuss the terms of a federal constitution is more than anyone can say..."

The States—Mr. Sastri then touched upon the problem of Indian States. He said: "The time has come now when the States should have representative governments, and the people of the states should be given their due share in a popular government..."

Referring to the industrialisation of India, Mr. Sastri remarked: "There have been many plans drawn up or in the process of being drawn up. I will not attempt to assess their exact value. The plans involve expenditure in astronomical figures: How they can be worked out is a matter for the experts to consider. But all seem to agree that without a National Government it will be impossible to put into effect any large-scale plan of economic policy..."

Mr. Sastri then referred to the plight of Indians overseas. He said: "The plight of Indians in the colonies and especially in South Africa deserve our active sympathy and help... The Government of India should take such steps as might be necessary to protect them..."

On the subject of Indianisation, the President said: "Recruitment in the services just now has an alarming aspect and needs our close attention. It is regrettable that the process of Indianisation in the services has not been accelerated. The recruitment in the officers' cadre in the Army is still disappointing. The Foreign and Political Departments are still largely kept a close preserve of the British..."

Mr. Sastri concluded: "There will be no place so long as Imperialism lasts. As for Britain's attitude to the future of India, words promise, but action denies... 'An independent India will be an asset even in the present war against Japan. Everything plainly indicates the need for unity and the united effort of all parties in India. None but the wilfully blind can fail to see it.'"

NATIONAL GOVERNMENT

Resolutions urging the British Government to form a National Government at the Centre and deploring the continuance of the political deadlock in India and asking the Government of India to release members of the Congress Working Committee and the other Congress leaders were adopted.

The resolution on the formation of a National Government said:

"(a) While adhering to its opposition to any division of India into Hindustan and Pakistan, the federation is of the opinion that without prejudice to the different viewpoints on controversial issues relating to the ultimate form of the future Indian constitution, the Congress, the Muslim League, the Hindu Mahasabha and other important political parties and interests should, during the period of the war, unite and co-operate with a view to the formation of National Government both at the Centre and the provinces and urges on the British Government the necessity of forming such a Government at the Centre and creating it on the same footing as a Dominion Government..."

"(b) The Federation deprecates the policy of the British Government in assuming the role of passive spectators and urges them actively to participate in the solution of the present political deadlock and take constructive steps to promote the establishment of a national government, both at the Centre and in the provinces, composed of important political parties and interests."

"(c) The Federation urges the British Government to announce without delay that they would be prepared to implement their promises to India on the basis of an agreement between the various political parties and interests or, in the absence of such agreement, if necessary, by themselves enacting a Dominion constitution for India within one year of the cessation of hostilities."

Other Resolutions—The Federation also passed a resolution demanding for Indians in South Africa full citizenship rights. Another resolution expressed deep regret and concern at the "misuse of the Defence of India Act and Rules on numerous occasions". The Federation also deplored racial prejudice existing between the white and non-white peoples of the world.

The Federation pressed upon the Rulers of Indian States to declare full responsible government as their policy as rapidly as possible and assured the people of the States of its full support in their constitutional methods for securing reforms and the redress of their grievances. The Federation, in another resolution, expressed profound concern at the food situation in the country. The Federation unanimously passed a resolution demanding that in the Imperial and International conferences India should be represented largely, if not wholly by non-official public men commanding the confidence of the people "until such time as a National Government can appoint its own proper accredited representatives."

Demanding complete nationalisation of India's Defence services within a short period, the Federation also urged that India's status

as envisaged in the post-war world and her future role as a bulwark of peace in Asia required a radical change in regard to her defence policy.

The President, Mr. T. R. Venkatrama Sastri, winding up the session, expressed gratification at the formation of a Ministry by the Congress in the Frontier Province and expressed the hope that this will be followed by the assumption of office by the Congress in those other Provinces where Section 93 rule continued.

Bombay Meeting—"The Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of any party," said a resolution passed by the Council of the National Liberal Federation of India held in Bombay in the winter of 1945.

The resolution further said:—

"The Council of the National Liberal Federation of India notes that the proposals now adumbrated in the broadcasts of the Prime Minister and the Viceroy are incomplete and must wait for the elections and consultations with the elected representatives to take their final shape..."

"Immediately after the elections, a Central Government should be formed consisting of the representatives of the major political parties with provision for representation of minority interests and no refusal of co-operation by any party should hold up the formation of such representative government."

CABINET MISSION PLAN

At the Poona session of the Council of the Federation in July 1946 an appeal was issued to the major political parties in the country to enter the Constituent Assembly frankly and fully accepting the basic principles and the necessary implications of the Cabinet Mission's plan.

The meeting issued the warning that, unless that was done there must inevitably be a complete breakdown of the functioning of the Constituent Assembly with consequences entirely fatal to the attainment of freedom by India in the near future.

While the Muslims were asked not to consider the use of the Constituent Assembly as a mere stepping-stone to the achievement of Pakistan, the Congress was asked not to act in the spirit of the announcement of its President that the Congress was committed to nothing except going into the Constituent Assembly.

The Council recognised that the minorities, particularly the Sikhs and the Scheduled Castes, had legitimate grievances regarding their position in the Constituent Assembly.

In the absence of Mr. T. R. Venkatrama Sastri, the President of the Federation, owing to illness, Sir Chimnabai Setalvad presided.

After the H.M.G. plan of June 1947, the Council of the Federation which met again in Poona, under the presidency of Mr. T. R. Venkatrama Sastri, expressed, in a resolution, its deep regret that it had not been possible to evolve a plan for the achievement of freedom of India which would also maintain its unity. A division of the country, in its opinion, was contrary to its economic and strategic interests and would weaken the country's position in the international sphere.

The Council, however, trusted that as partition had been accepted by the major political parties the Governments concerned "will act in a statesmanlike manner and enter into treaties which would safeguard the interests of the country as a whole particularly those relating to economic and defence matters."

The Council, in another resolution, welcomed the participation of many States in the Constituent Assembly and hoped "that in their own interests and those of India the remaining States, too, will decide to join the Assembly."

The Liberals lost one of their leading members in the death of Sir Chimnabai Setalvad in December 1947.

ALL-INDIA HINDU MAHASABHA

President : L. B. Bhopatkar.

Vice-Presidents : Dr. V. D. Savarkar; B. G. Kharade; Lala Narain Dutt; Mahant Digvijaynath.

General Secretary : Ashutosh Lahiry.

Secretaries : M. R. Dhanure; V. G. Deshpande.

Treasurer : Capt. Keshabchander.

AIMS AND OBJECTS

Besides the establishment of 'Akhanda Hindustan' the aims and objects of the Hindu Mahasabha as adopted at a meeting of the All India Council held in New Delhi on December 27, 1948 are as follows :

- (1) The establishment of a really democratic State in Hindustan, based on the culture and tradition of the land;
- (2) The organisation and consolidation of all sections of the people into one organised whole;
- (3) The creation of a new social order in which all nationals will enjoy equal rights and opportunities and share equal responsibilities;
- (4) The assurance to each national of the dignity of human values and full freedom of thought, expression, association and worship;
- (5) The revival and promotion of the ancient Indian motto of plain living and high thinking, and the glorious ideals of Indian womanhood;
- (6) Adoption of Hindi as the national language and Devanagari as the national script of India;
- (7) Making of Hindustan politically, economically and materially strong and self-reliant;
- (8) Removal of all forms of social inequalities and disabilities;
- (9) Reclamation of all those who have left the Hindu fold and welcoming of others into the community;
- (10) Ending of gross inequalities in the distribution of wealth, assurance of a decent standard of living to each national, and securing for workers and peasants their rightful share in the economy of the country;
- (11) Industrialisation of the country as rapidly as possible;
- (12) Promotion of cow protection and abolition of killing;
- (13) Cultivation of friendly relations with other nations with a view to maintaining international peace and progress.

PROGRAMME

The political and economic programme as adopted at a meeting of the Working Committee of the All-India Mahasabha at New Delhi on May 8 is as follows :

1. The Mahasabha disapproves of India's decision to remain in the Commonwealth.
2. It urges the Government of India to withdraw all restrictions on opposition parties and allow them full scope for free expression and association.
3. There is no longer any justification to hold a plebiscite in Jammu and Kashmir State.
4. Land should belong to the State. The minimum requirements of land for a family as a unit should be fixed. Tenancy legislation should be suitably modified to enable the tiller to enjoy the full fruits of his labour.
5. All key industries should be nationalized. Other industries should be left open to private enterprise.
6. All credit, transport and means of communication should be controlled by the State.
7. Concentration of industries in a particular area should be discouraged and industrial concerns distributed all over the Province.

8. Workers in Industries should be made part proprietors according to a definite scheme to be formulated for the purpose.

Other points in the political and economic programme recommended by the Working Committee at a meeting held in New Delhi on the 6th and 7th November, 1948 are :

1. Agriculture shall be gradually collectivized by creating large scale farming by uniting present farms into collective farms, and the yield of land shall be increased by the use of modern implements and scientific appliances.
2. Steps shall be taken to guarantee to each national a minimum income sufficient to keep him above want.
3. Steps shall be taken to see that capital does not get concentrated in a few hands.
4. To achieve the above objects a graduated tax shall be imposed on income and rights of inheritance shall be curtailed to that extent.
5. All nationals, manual, intellectual or otherwise, are liable to labour.
6. The State shall provide employment to all, and shall undertake the maintenance of the unemployed.
7. The State shall abolish all the so called distinctions between martial and non-martial races.
8. It shall make military training compulsory for all and shall keep every adult national militarily fit.

CONSTITUTION

Here are the more important clauses from the constitution of the Hindu Mahasabha.

Every Hindu, who is above eighteen years of age and accepts in writing the aims and objects of the Hindu Mahasabha, becomes a member of the Hindu Mahasabha on payment of annas four a year.

A Hindu means a person who regards this land of Bharatvarsha from the Sindhu to the Seas as his Fatherland as well as his Holyland i.e., professes any religion of Bharateeya origin including Vaishnavism, Sanatanism, Buddhism, Jainism, Sikhism, Aryasamaj or Brahmasamaj etc.

The Hindu Mahasabha organisation shall consist of the following committees and sabhas :—

- (a) The Hindu Mahasabha.
- (b) The All-India Committee of the Hindu Mahasabha.
- (c) The Working Committee.
- (d) The Provincial Hindu Sabhas.
- (e) The District Hindu Sabhas.
- (f) Taluk, Tahsil or Sub-divisional Hindu Sabhas.
- (g) Town and village Hindu Sabhas.

PROVINCIAL HINDUSABHA

There shall be one Provincial Hindusabha in each Province. The total membership of each Provincial Sabha shall not exceed 300. Out of these each Taluk, Tahsil or Sub-divisional sabha shall get at least one member on the Provincial Sabha and the remaining seats shall be distributed amongst the District Hindu Sabhas in proportion to their membership strength. The total membership of the Provincial Hindusabha may be increased with the permission of the All India Working Committee.

ALL-INDIA COMMITTEE

The All-India Committee shall consist of :—

- (i) President of the year, Ex-Presidents of Annual and special Sessions of the All-India Hindu Mahasabha, and all Ex-Working Presidents.
- (ii) Office-Bearers of the preceding year.

(iii) Every Provincial Sabha shall be entitled to elect one member on the All-India Committee irrespective of its membership strength. It will be entitled to elect five in all, provided its membership is not below 2000, and ten, if its membership is not below 5000. The Provincial Sabha enrolling more than 5000 members for the year shall be entitled to elect one member for every 2000 members, the maximum number for each Province being not more than fifty.

OFFICE-BEARERS

The Office-Bearers of the Hindu Mahasabha shall be :—

- (a) The President of the Annual Session, Ex-Officio,
- (b) A Working President if necessary,
- (c) Vice-Presidents upto 6.
- (d) One General Secretary.
- (e) Two Secretaries.
- (f) A Treasurer.

These office-bearers except the President shall be elected by the All-India Committee at its first meeting during the Annual Session of the Mahasabha from among its own members.

A.-I. COMMITTEE ELECTION.

Elections to the All-India Committee of the Hindu Mahasabha shall ordinarily take place by the end of November every year in a general meeting of the Provincial Sabhas. A list of such elected members must reach the All-India Head-office by the 15th of December.

WORKING COMMITTEE

The All-India Committee of the Hindu Mahasabha shall at its first meeting during the Annual Session of the Mahasabha elect a Working Committee and it shall be composed of :—

- (a) The Office-Bearers of the Mahasabha.
- (b) 20 representatives elected out of the members of the All-India Committee of the Hindu Mahasabha.
- (c) Three members nominated by the President from time to time out of the members of the All-India Committee.

The Working Committee shall meet as often as necessary.

POWERS AND DUTIES OF THE WORKING COMMITTEE

The Working Committee shall have power to :—

- (a) Take all necessary steps for carrying out the aims and objects of the Mahasabha.
- (b) Collect and invest or borrow funds, acquire, hold, manage, sell or mortgage properties movable or immovable and sign necessary documents for and on behalf of the Sabha.
- (c) Fix salaries and honorariums of workers and prescribe their duties.
- (d) Frame annual budget and submit the same for approval to the Sabha at its first meeting.
- (e) Prescribe rules regarding powers and duties of all office-bearers.
- (f) Fill up vacancies among its members and office-bearers during the course of the official year.
- (g) Direct, control and supervise the working of all the organisations subordinate to it and affiliate or disaffiliate or suspend such as it may think fit.
- (h) Appoint *ad hoc* Provincial Committee in place of Provincial Sabha for a definite period for efficient working of the organisation of the Provinces.
- (i) And generally to carry on the policy, administration and business of the Mahasabha.

The All-India Committee of the Hindu Mahasabha shall meet at least once a year and every time upon requisition of 50 members thereof.

The All-India Committee of the Hindu Mahasabha shall exercise all the powers and duties of the Mahasabha.

RULES REGARDING PROVINCIAL HINDU SABHAS

(a) Each Provincial Hindu Sabha shall organise District and other Sabhas and shall have power to frame a constitution for its organisation and to make rules for the conduct of its business which, however, should not be inconsistent with the constitution of the Hindu Mahasabha or any rule or rules framed by the All-India Committee of the Hindu Mahasabha or its Working Committee. Such rules or constitution framed by the Provincial Hindu Sabha shall be subject to the approval of the All-India Working Committee.

(b) Each Provincial Hindu Sabha shall generally submit an annual report of the work done during the year in the Province including its audited accounts to the Working Committee of the Hindu Mahasabha by the end of November.

(c) The accounts of all Provincial and Subordinate Hindu Sabhas shall be annually audited.

(d) All appointments and dismissals of workers of the Provincial Hindu Sabhas or other subordinate organisations and the fixing up of their salaries and honorariums shall be made by the Working Committee of the Provincial Hindu Sabhas or any other committee specially constituted for the purpose. In no case shall the appointments or dismissals or the fixation of salaries and honorariums be entrusted to any single individual, whatever position he may hold in the Sabha.

MAHASABHA SESSIONS

(a) The Annual Session of the Mahasabha shall ordinarily be held by the end of December at such place as may have been decided upon at its previous session.

(b) An extraordinary or propaganda Session may be summoned whenever necessary at any time and place determined by the Working Committee.

ELECTION OF DELEGATES

(a) Every Province shall be entitled to send delegates in the proportion of 1 to every 25 thousands of its Hindu population.

(b) Members of the All-India Committee of the Hindu Mahasabha shall be Ex-Officio delegates.

(c) Each provincial Hindu Sabha shall frame rules for the election of delegates to the Mahasabha within its jurisdiction and shall send the Reception Committee of the Mahasabha an alphabetical list of the delegates so elected containing full name, occupation, age, sex and address of each of the members of the said Committee at least seven days before the date fixed for the holding of the Session.

(d) Only those Sabhas shall be entitled to elect delegates or their representatives who have duly paid the prescribed share of their membership subscriptions to their next superior organisations and to the All-India Committee of the Hindu Mahasabha.

(e) The President may permit inclusion of a list of delegates from any province for sufficient reason in case the list has not been submitted within time.

(f) Any person enlisted as a member of the Mahasabha under Rule 4 hereabove is eligible to be elected as a delegate to the Annual Session of the Mahasabha.

VOTING

(a) Delegates alone shall be entitled to vote at the Mahasabha session or otherwise take part in its deliberations.

(b) The members of the All-India Committee of the Hindu Mahasabha shall pay delegation fee before they will have the right to vote.

FINANCIAL YEAR

The Financial Year of the Mahasabha shall be reckoned from the 1st of January to 31st December.

RECEPTION COMMITTEE

(a) The Reception Committee shall be formed by the Provincial Hindu Sabha of the Province where the Session is to be held, at least four months before the Annual Session and may include persons who are not members of any Hindu Sabha organisation. The members of the Reception Committee shall pay not less than Rupees three each.

(b) The Reception Committee shall elect its Chairman and other office-bearers from its own members provided no one shall be elected a chairman unless he is a member of the Hindu Mahasabha.

The function of the Reception Committee shall be to make arrangements for holding of the Session, to collect funds for purpose, to elect the President of the Session in the manner set forth in Rule 24 hereunder, to make all necessary arrangements for the successful holding of the Session, reception and accommodation of delegates, guests and visitors, as far as practicable.

The Reception Committee shall, within three months, submit a printed report of the proceedings of the Session as well as statement of receipts and expenditure to the Working Committee of the Mahasabha.

The receipts and expenditure account of the Reception Committee shall be audited by an auditor appointed by the Working Committee of the All-India Hindu Mahasabha. Half of the balance left over shall go to the All-India Committee of the Hindu Mahasabha and the other half to the Provincial Hindu Sabha of the Province where the Session is held.

PROCEDURE FOR ELECTION OF PRESIDENT

The Reception Committee shall invite the various Provincial Hindu Sabhas by the end of October to send to it not more than three names of persons who are, in their opinion eligible for election to the Presidency of the Session and the Reception Committee shall, by the 10th of November submit to all the Provincial Sabhas the list of names so suggested. Each Provincial Sabha shall make final recommendation of any one of the names by the 25th of November. The Reception Committee shall meet on 30th November to consider such recommendations. The person recommended by the majority of Provinces and by the Reception Committee which shall have one vote, be declared President-elect of the next Session. In case of equality of votes the Reception Committee shall have a casting vote. But in case an emergency arises by resignation, death or otherwise of the President thus elected, the matter shall at once be referred to the Working Committee of the Mahasabha whose decision shall be final.

Provided that, in no case shall a person be elected as President, who belongs to the Province in which the Mahasabha Session is to be held.

The President of a special or extraordinary Session shall be elected by the Working Committee of the Mahasabha subject to the above proviso.

SUBJECTS COMMITTEE

All-India Committee of the Hindu Mahasabha together with 1/20th of the members of the Reception Committee, provided their number in no case exceeds twenty, shall constitute the Subject Committee for the Session. The President shall have the right to nominate not more than ten additional members to the Subjects Committee.

The Subjects Committee shall meet at least one day before the open Session of the Mahasabha. The President-elect shall preside at this meeting and the out-going secretaries shall submit a draft programme of the work for the ensuing Session of the Mahasabha.

The Subjects Committee shall meet as often as necessary during the pendency of the Mahasabha Session.

POLITICAL ACTIVITY SUSPENDED

Following the murder of Mahatma Gandhi the Hindu Mahasabha suspended its political activity by a resolution passed at a meeting of the Working Committee on Feb. 14, 1948. The following is the full text of the condolence resolution:

The All-India Working Committee of Hindu Mahasabha is meeting under the shadow of a great tragic event which has stirred the soul not only of India but of the whole world. Mahatma Gandhi has been removed by the cruel hand of an assassin and India has lost her greatest son who, for the last 30 years, moulded her politics in his own inimitable way and had succeeded in winning freedom for India. Gandhi has been rightly styled the "Architect of India's Freedom" and a unique personality in the history of mankind he towers above all as a saint and as a political leader.

The news of Mahatma's assassination shocked and stunned the whole country. For us it is a matter of shame and humiliation that the alleged assassin was connected with the Hindu Mahasabha. In spite of some differences on political issues, the Mahasabha cherished feelings of admiration and reverence for him as a leader who lived and worked for India's freedom and for the service of humanity at large. The Mahasabha unequivocally condemns this foul act and as an organisation disassociates itself from the same. The Mahasabha has all along been wedded to constitutional methods for the attainment of its objectives. It will not tolerate any act of terrorism in Free India for the achievement of its ends.

The Working Committee deeply deplores and condemns the senseless looting, arson and depredation of the property of the members and workers of the Hindu Mahasabha in some provinces and specially in Maharashtra. This was inspired mostly by anti-social elements out to exploit the present situation for party ends and to create strife and disorder in the country. It is an outrage of the sacred memory of Mahatma Gandhi. In Mahatma's specially, senseless rowdism degenerated into a virulent campaign against the Brahmin community and the Working Committee must in fairness record that the situation would have further deteriorated if the Bombay Provincial Government had not taken firm action to quell the same.

The Mahasabha was all along anxious to make the hardwon freedom of India safe against internal disruption or external aggression. Although it criticised the policy and measures of the Government, it did so on democratic lines in the interest of the nation and the country. No democracy worth the name is conceivable unless there is an effective opposition to the party in power. Opposition does not mean rebellion or an attempt to unroot the very state itself or jeopardise its very existence. On the contrary, it is a well-recognised parliamentary method to protect it and to make its administration healthy and progressive. We want to assure all our fellow citizens that, whatever our differences may be, the Mahasabha will not fail to be the first in the field to rally round the banner of the State wherever the security of India is imperilled or whenever there is a crisis in body politic endangering the safety of the State.

Earlier, in a press statement issued on Feb. 2, Mr. L. B. Bhopatkar, the President declared that the Mahasabha had advocated only peaceful and constitutional means. It was not fair to penalize the Hindu Mahasabha as a body unless and until its guilt was proved. It had never played the game of power politics and had the greatest love and reverence for the Mahatma.

Simultaneously the members of the Working Committee also issued a statement condemning unequivocally the murder of Mahatma Gandhi. They declared that the Mahasabha had been opposed to terrorism in any shape or form and was pledged to orderly evolution of Indian life. The members then warned the country that enemies were alert and that the country would be ruined if the people let themselves be carried away by frenzy or civil war. The leaders appealed to the people to close their ranks, respond to the call of Nehru and co-operate in the task of maintaining law and order. They wound up their statement by calling upon all local branches of the Hindu Mahasabha to hold meetings and pass resolutions condemning the assassination.

For sometime before the assassination of Mahatma Gandhi the working Committee had been thinking in terms of a reorientation of the policy of the Mahasabha to suit the changed condition in the country since 1947 August. After the assassination of the Mahatma the alternative before the Mahasabha appeared to be shedding its political programme or shedding its communal complexion by admitting members irrespective of their religion. Eventually the Mahasabha decided at its meeting on Feb. 14, to suspend political activity.

Meanwhile the Government took strong action. In almost all provinces leading members of the Mahasabha and R.S.S. were taken into custody. There was a great deal of mob violence against the person and property of the Mahasabha and the R.S.S., particularly in Maharashtra where demonstrations assumed an anti-Brahmin turn. Sometime elapsed before the Government were able to bring the whole situation under control. Altogether it seemed as though the Mahasabha would never recover from the blow it had suffered. Most leaders were in jail, almost all property had been looted or destroyed and nearly all the local Sabhas were in dissolution. Propaganda of any kind was out of the question.

A RECOVERY

But the storm blew over. A number of issues like Kashmir and Hyderabad were coming to the fore. Active anti-Mahasabha feeling was gradually dying and conditions were slowly evolving in which it was just possible for the Mahasabha to re-enter the political arena from which it had been driven with such sudden violence only six months before.

The first sign that a change was taking place in the political climate of the country was a statement made by the general secretary of the Mahasabha, Mr. Ashutosh Lahiri on July 6. Mr. Lahiri declared that there was among the rank and file of the Mahasabha members certain impatience at the continued inactivity of the Mahasabha. National unity and strong leadership were necessary at a time when the Congress was heading for disintegration. But it was not just revival that Mr. Lahiri was pleading for. For the Hindu Sabha as it existed before the advent of freedom had no longer any functions to fulfil. Neither had Hindu-Muslim unity any meaning after the severance of the Subcontinent. The Mahasabha had to resume political activity but the policy needed to be reoriented.

The Hyderabad State Mahasabha was speaking up on the question of the State's future. In a resolution passed on July 14 it declared that the craftiness displayed by State authorities smelt of foreign influence. It noted that Kasim Razvi was flinging insult upon insult and challenge upon challenge and wondered how long the Government of India could allow the State of affairs to continue without damaging its own prestige. It warned the Government of India against all proposals for plebiscite, for a plebiscite, it argued would open the door wide for foreign influence and intrigue. Finally the resolution expressed the hope that the Government would wake up to the danger in good time and act quickly and strongly.

On August 7, the Working Committee of the Hindu Mahasabha met in Delhi to discuss the question of resuming political activity. A sub-

committee of five was appointed to investigate the question. On the following day the Working Committee met again and decided to revise its decision of February 15 and resume political activity in order to make its contribution 'towards strengthening those basic factors in the political life of free India which would secure speedy fulfilment of the objectives of a free nation.' It also decided to summon a meeting of the All-India Committee of the Sabha and recommend reorientation of policy and objectives so that it might once again function as a political organization this time open to all citizens. At a meeting on August 9, the Working Committee passed a resolution urging decisive action against Hyderabad to prevent another 'grim tragedy similar to that of West Punjab.' The resolution explained that indecisive attitude has resulted in wide-spread arson, loot, murder, forcible conversion of Hindus, and unless immediate military action was taken Hindus in the State would be faced with extermination.

The draft of the new constitution of the Mahasabha (relevant clauses are reproduced in the earlier part of this section) was made public on September 10. In general, it aimed at reconstructing the organization on a new basis embracing all sections of the population with a new programme for the development of the country.

There were two alternative suggestions for the membership of the Mahasabha. According to one, a "Hindu" would include all persons who regarded India as his motherland and believed that all sections of the people of this country, irrespective of religion, constituted a nation. The main purpose was to discard the religious appellation of the term "Hindu" and to make it a purely geographical concept, so that it might indicate one common nationality for the people of Hindustan, whatever their religion.

According to the other suggestion, the present definition of the word "Hindu" would be retained, but a new class of associated membership would be created for non-Hindus who regarded India as their motherland and accept, in writing, the new political and economic plan of the Mahasabha.

On December 10, 1948 four members of the Working Committee issued a statement in which they urged the Government of India to lift the ban on the R.S.S. They said that it was patent to all that the R.S.S. was concerned with the social and cultural consolidation of Hindus. Government had been saying that they were out to protect fundamental rights, but the continued ban, the Mahasabha leaders argued, created doubts about Government *bona fides*.

REORIENTATION OF POLICY

On December 26 took place the most important meeting of the Council of the Mahasabha during the year when by an overwhelming majority it decided to revive its political activities and adopted a programme which was indistinguishable from that of political and economic socialism.

The session lasted three days: from 25th Dec to 27th. Among other decisions arrived at at the same meeting was one to retain the original definition of Hindu (one who possessed any religion of Indian origin). A second resolution said that the continuation of the ban on the R.S.S. was unjustified and demanded the immediate release of the members of the R.S.S. who had been jailed. The meeting also demanded the release of the members of the Hindu Mahasabha who had been put into prison following the assassination of Mahatma Gandhi. Yet another resolution declared that the present Central Legislature had no authority to legislate on questions affecting the social and economic structure of Hindu Society. The meeting also defined the aims and objects of the Hindu Mahasabha.

Dr. Shyam Prasad Mookerjee who attended the Session is understood to have advised the Mahasabha that it was but proper that after the achievement of freedom the Mahasabha should function only as a social and cultural organ-

ization. The Mahasabha could not remain an exclusive organization of the Hindus and that if it was to work in the political sphere as well it had to open the door to members of other communities.

Mr. Bhopatkar in his opening address said that deliberate attempts were made to poison the public mind against the Mahasabha as a communal organization now meant to be scrapped. But the fact was, that the Mahasabha was not a whit less secular or democratic than any other organization functioning in the country at present.

FULL TEXT OF RESOLUTIONS

Here is the full text of the resolutions passed. The aims and objects of the Mahasabha which were also the subject of a resolution are outlined in an earlier part of this section:

Draft Constitution

The All-India Committee challenges the right of the present Constituent Assembly to frame Constitution for India, as the members of the Legislatures which elected the Assembly were elected on entirely different issues and were, besides, not elected on the basis of adult franchise.

Release of Hindu Sabha Prisoners

The All-India Committee of the Hindu Mahasabha notes with pain that a number of prominent Hindusabhaitees who were arrested following the tragic murder of Mahatma Gandhi are being still detained in jail though no specific charges have been preferred against them. The Mahasabha is of opinion that the continued detention of Sri Gogte, a leading Hindusabhaite of Maharashtra and Sri Vasantrao Golwalkar, Secretary, Ahmedabad City Hindusthani in particular, for so long a time is unwarranted and is causing great bitterness. The Mahasabha demands that they be forthwith released.

The Mahasabha also expresses its resentment at the irksome conditions imposed on various Hindu Mahasabhaitees in different Provinces and particularly on Sri V. G. Deshpande, Secretary of All-India Hindu Mahasabha, when they were released after incarceration following the murder of Mahatma Gandhi. The Mahasabha thinks that such treatment to Hindu Mahasabha men are indefensible and all restrictions put on their liberty should be withdrawn.

Rashtriya Swaraj Sewak Sangh

(a) The All India Committee of the Hindu Mahasabha is definitely of the opinion that the continuance of the ban on the R.S.S. is wholly unjustified, the facts so far produced by the Government in support of the ban are not at all convincing, and that the Government should make known the specific charges against the Sangh which compelled such a drastic action.

The Committee notes that the Sangh has been functioning for the last 25 years and its work and activities have received wide appreciation from leaders irrespective of political parties. An organisation which has done such an outstanding service to the people of the land, spread over a quarter of a century, should not have been banned without compelling reasons.

The Committee thinks that the charges so far brought forward are mostly puerile and lack definiteness. The Sangh has been holding its physical training exercises openly, every morning and evening, at stated times, and at definite public places known to everybody and their meetings have been presided over from time to time by many persons of outstanding eminence belonging to all shades of opinion including high-placed Government officials. The charges, therefore, that the Sangh is a secret organisation are baseless, grossly unfair and are not sustainable by facts.

The charge that the Sangh has been collecting arms and ammunition is equally unfair. The Government should come out with concrete facts in justification of such a charge, such as how many convictions have been secured against

members of the Sangh for infringement of the Arms Act, and how many arms have been recovered from the members of the Sangh. It is a course to such extraordinary powers could have been justified, only if the normal course of operation of law in this respect would have demonstrably failed. More vague charges would not satisfy the public.

The allegation that the Sangh is a private army is fantastic. If mere holding of physical training exercises converts an organisation into a private army, there are other volunteer organisations in the country which should have been equally treated as such.

The Committee is of the opinion that the charge that the Sangh has no published programme or constitution of its own is quite beside the point; since the Sangh has so long been functioning really as a non-political organisation, wholly occupied with social and cultural work, helping materially to build up discipline, character and obedience to leadership amongst the younger generation and was doing in that way a most vital constructive work in the country. The tragic events following the vivisection of the country compelled members of the Sangh, as it did thousands of other non-political persons, to take active part in organising defence of their hearths and homes and protection of their women-folk and children; and they have been denied opportunities of transforming their organisation into a body with a published programme and constitution of their own. This could not have been a sufficient excuse for banning an organisation of such a pre-eminent usefulness.

The Mahasabha notes that the Sangh has been successful in sending over more than 50,000 persons in jail within the short period of a fortnight, and every part of the country has responded splendidly to the call for Satyagraha, creating new problems for the Government which could have been easily avoided. The incarceration of such a large number of persons is bound to create great bitterness in the country and will ultimately prove to be disastrous to the internal unity and solidarity, which the political situation in the country now so imperatively demands. The Mahasabha, therefore, urges on the Government that the ban be withdrawn and the members of the Sangh be forthwith released.

This meeting of the All-India Committee of the Hindu Mahasabha notes with grave concern the arrest and detention of eminent Hindu Mahasabha leaders like Dr. L. V. Pananjali, President, C.P. Hinduasabha, Sri N. Panchanatham Iyer, President, Sri M. V. Ganapathi, General Secretary, Madras Provincial Hinduasabha, Sri Srinivasa Iyer and other Hinduasabha men who had not offered Satyagraha in connection with the R.S.S. Movement. The meeting demands the release of all these leaders forthwith.

Common Political Platform

Whereas the present Government, dominated by a party which has, in fact, been responsible for encouraging and appraising the worst type of communalism, has started a systematic campaign of suppressing all the democratic and national parties, groups and organisations dubbing them as communal, and

Whereas it is necessary to mobilise all patriotic forces for building up a strong democratic State in Hindustan;

This Committee hereby empowers the President to form a Committee including the representatives of the Provinces in order to rally all the national elements on a common platform so that their full weight may be felt in the politics of the country.

Restoration of Temples

Whereas it is well known that numerous Hindu temples like Vishwanath Temple at Banaras, Krishna Janma Mandir at Mathura and Shri Rama's Janmasthan temple in Ayodhya were either taken over or demolished from time to time in pre-British times, this Committee urges upon the Government that all such places be

restored to the Hindus and the places of worship wherever demolished may be allowed to be rebuilt on the same sacred sites.

Hindu Code

The All India Committee is of opinion that the present Legislature is not competent to legislate on matters effecting such far-reaching changes in the social and economic system of the Hindus as contemplated in the Hindu Code, as the Central Legislature was elected on the only issue of drafting a Constitution for Free India, and the Electorate has not been given any opportunity to express its opinion on such a radical measure of social reform. The Committee is of opinion that a Legislature elected on this specific issue alone is entitled to undertake such a legislation.

Refugee Problems

This Committee has observed with great regret that arrangements made by the Central and Provincial Governments for the relief and rehabilitation of the refugees from those parts of India which have now been included in Pakistan have fallen far short of the needs of the situation.

The Committee, therefore, urges upon the Government to take the following steps in connection with the relief measures, viz :

- (1) To accelerate the construction of suitable buildings to accommodate the refugees;
- (2) To take active steps for providing means of livelihood to the refugees;
- (3) To grant to the refugees, loans on more liberal scale on easy terms and in proper cases to compensate them for the losses suffered by them on account of partition of India and if necessary, to impose a special tax to raise funds for these purposes;
- (4) To take immediate steps for the removal of all restrictions regarding the removal from Pakistan of all the moveable property like household goods and furniture, valuable securities, records belonging to Banks, Joint Stock Companies and other commercial concerns, machinery and mill stores and books, scientific apparatus belonging to individuals and educational institutions or Joint Stock Companies. Immediate steps should also be taken to facilitate the sale or exchange of immovable property left by refugees in Pakistan to prevent its deterioration, destruction or misuse.
- (5) With a view to facilitate, expedite and popularise the relief and rehabilitation operations this Committee suggests that effective representation should be given to non-officials by associating non-official relief associations and representative refugees.
- (6) This Committee strongly urges upon the Government that there should be an exchange of population between East Bengal and West Bengal in proportion to the exodus of Hindus from East Bengal.

Red Fort Trial Defence

The meeting of the All India Committee of the Hindu Mahasabha expresses its deep sense of gratefulness to Rashtrapati L. B. Bhopatkar for having organised the legal defence of Veer Savarkar, ex-President of Mahasabha in the Gandhi Murder Trial as also to all those who assisted him and particularly, Mr. P. R. Das.

STATES HINDU MAHASABHA

The All India States Hindu Mahasabha be requested to merge with the All India Hindu Mahasabha. The Working Committee calls upon the Hindu Mahasabha branches in the States and in the newly created Unions of Indian States to get themselves affiliated with All India Hindu Mahasabha and that individual Units of the State Hinduasabhas be approached for the purpose.

In January Mr. Bhopatkar announced the formation of a 20-member committee with the aim of forming a common political platform by rallying all really democratic and nationalist forces in the country for building up a strong

democratic State in Hindustan. Arguing the necessity for the formation of a united nationalist party Taj Narain, the working President of the U.P. Provincial Mahasabha said that there was a great deal of frustration and discontent in the country. Alongside of this there was among the young people a spirit of indiscipline and contempt of lawful authority, there was no will to work to solve the economic crisis.

When Mr. Savarkar was acquitted Mr. Bhopatkar called for a meeting to congratulate Mr. Savarkar on his acquittal and said that there should be a public enquiry to find who was responsible for implicating him in the murder of Mahatma Gandhi.

PRESS CONFERENCE

About a week later, on January 3, 1949, Mr. Bhopatkar held a press conference in New Delhi at which he said that the Mahasabha had been compelled to resume political activity mainly because of the policy pursued by the Congress Government. Mr. Bhopatkar explained that his party stood for the formation of a secular and democratic state in India as much as any other party. "In the appraisal of political values, it is more the objectives than the structure of a party that should count", he said. If the policy and programme of the Hindu Mahasabha were perfectly in tune with the principles of democracy and nationalism, then there was no reason why it should not work politically.

Asked about his party's relation with the R. S. S. Mr. Bhopatkar denied that any relationship existed between the two organisations.

Referring to the charge that the Hindu Mahasabha was a communal organisation, Mr. Bhopatkar said that it was true that the party was open only to the Hindus and was in that sense a communal body. But it was incorrect to say that it stood for communalism. According to him, communalism was a mental attitude which aimed at securing for a particular community what was not legitimately due to it.

The difference between a communal party and a communalist party, he added, must be clearly understood. The former meant a party whose membership was open only to a specific community, while the latter meant a party which was not only open to a particular community but was also bent upon furthering its own interests in utter disregard of rightful claims of the other communities.

The difference between the two was very much similar to that between "capital" and "capitalism". The Hindu Mahasabha might be a communal party, but it was "untrue" to style it as a communalist party, he added.

Mr. Bhopatkar said, "I ask its worst detractors to point out a single instance where the Mahasabha has made a demand for what exceeds the due and proper share of the Hindu community, or where the Mahasabha has deviated even a little from the path of nationalism and democracy, pure and simple. It is obviously improper as also illogical to put the Mahasabha in the same category as the Muslim League."

The Mahasabha, he added, was threatened with a ban because it had refused to open its doors to all. The party had, times out of number, made it absolutely clear that the path of non-violence must be maintained and strengthened at any cost and sacrifice, and that it was ready and willing to implement to the best of its abilities all such efforts as would be "genuinely directed to that end."

"If in spite of such repeated declarations on the Mahasabha's part," he continued, "the authorities chose to ban it, there was no help. But I may state that even if they ban the Mahasabha, they are bound to fail in banning the spirit behind it, which is the spirit of fair and square deal to all, the spirit of justice to all and injustice to none, irrespective of caste or religion as also of majority and minority."

In reply to a question, Mr. Bhopatkar said that a ban on his party would not come to him as a surprise.

Regarding the criticism levelled against the Hindu Mahasabha's resolution empowering its President to form a Committee "to rally all the national elements on a common platform", Mr. Bhopatkar said that the resolution, instead of being criticised, should have been welcomed by the critics of the Hindu Mahasabha as embodying, at least according to them, right move in the right direction. "But curiously enough, the critics have done otherwise and have even characterised it as an act of military on the part of the Mahasabha", he added.

Explaining the Mahasabha's attitude towards the R. S. S., Mr. Bhopatkar said that the R. S. S. was an organisation entirely independent of and separate from the Mahasabha. "Even in the worst days of the British rule, nobody dared charge the R. S. S. as a secret society or a private army or a body engaged in terrorist activities", he said.

Mr. Bhopatkar said that in his opinion the minorities in India should enjoy all the fundamental rights as the nationals of India. "Only they should not get preferential treatment at the expense of the majority because they happened to be smaller in number," he concluded.

LONDON DECISION

The Mahasabha drew up its economic and political programme at a session of the Working Committee which began on May 7, 1949. This programme is given in full elsewhere.

On the question of linguistic provinces, the Working Committee later passed a resolution recording its dissatisfaction at the findings of the Pattabhi Committee. The resolution stated that the decision of the Pattabhi Committee was in utter disregard of the promises given by the Congress and also that of the unanimous demand in this behalf by Maharashtra, Karnata, Kerala and other provinces.

The Committee also congratulated Mr. Savarkar on his "honourable acquittal", in the Gandhi Murder Trial and his counsels, Mr. Bhopatkar, Mr. P. R. Das and others for having arranged the defence.

The political situation, especially the suppression of civil liberties and continuance of Section 144 in Bengal, Bihar and Orissa, also came up for discussion.

The session opened with a speech by Mr. Bhopatkar who asked the Hindu Mahasabha workers all over the country to throw off the stupor in which they seemed to have fallen and be ready to face all odds to revitalise the provincial and other organisations.

Referring to the decision in London at the Dominion Premiers' Conference there about India's staying on in the Commonwealth, Mr. Bhopatkar said: "The Indian leaders may say that the King's headship is only symbolic of free association and that no functions would be attached to it, and that India would be free to leave the Commonwealth at will; but that is easier said than done. History evidences the fact that, though it is very easy to enter the bull-dog's fangs of the Anglo-Saxon race, it is very difficult to get out of them."

Mr. Bhopatkar characterised the London decision as the "height of inconsistency" and as a "sad betrayal of the trust reposed in the Indian leaders by the people." He said that it amounted to an entry by the back-door into the capitalist-imperialist bloc of the U.S.A. and the U.K. Mr. Bhopatkar also disapproved the report of the committee on linguistic provinces and said that it had shelved this long-standing grievance and thereby had not only embittered provincial feeling but had also arrested the growth of the provinces.

RASHTRIYA SEVAK SANGH

It may not be out of place to mention here that the R. S. S. launched a Satyagraha movement on December 9, 1948 which lasted about forty days. The withdrawal was due chiefly to the good offices of third-party men, particularly Mr. G. V. Ketkar, editor of the *Kesari*, who met

both Sardar Patel and Mr. M. S. Golwalkar who was in Seoni Jail in the C. P. The satyagraha movement was withdrawn on January 20, 1949 and Mr. Golwalkar issued a statement explaining the reasons for the withdrawal. Mr. Golwalkar said "having been apprised by Mr. Ketkar of the general situation in the country and the attitude of Government regarding the present movement of the R. S. S., of the wide sympathy and goodwill shown and expressed by a number of prominent third party citizens, I deem that the time has come for discontinuing the present movement. In order to promote a congenial atmosphere and also to bring about an atmosphere for the sympathetic efforts of these third party friends for solving the present deadlock. I, therefore, advise those of my Swayamsevak brothers who are in charge of the movement to discontinue the same and communicate their decision all over the country. I also request all Swayamsevak brothers to immediately and implicitly abide by the decision reached by the organisers of the movement."

Mr. Ketkar, in releasing Mr. Golwalkar's statement about the unconditional withdrawal of *satyagraha*, said that no stipulations of any sort nor any assurances were given by him to anyone, and as far as Government were concerned, there was no commitment whatsoever.

An upshot of all this was a redrafting of the constitution of the R. S. S. by the Madras Liberal leader T. R. Venkatraman Shastri after an interview with Mr. Golwalkar in jail. Mr. Venkatraman Shastri later submitted the draft constitution to Sardar Patel.

It says that "the R. S. S. will have no politics of its own and will be wedded to purely cultural work".

The constitution describes the aims and objects of the R. S. S. Efforts will be made to weld together the many and diverse groups within the Hindu fold, and to revitalise Hindu society on the basis of its religion and culture.

The programme of the R. S. S. will be to give physical training by means of exercises and games, arrange occasional talks and lectures to impart intellectual training, inculcate love for the ideals of Hindu "dharma" and culture, celebrate festivals of cultural importance and establish agencies and institutions to disseminate knowledge of the Sangh's ideals and activities.

HISTORY

The beginnings of the Hindu Mahasabha can be traced to the first years of the present century, almost simultaneous with the awakening of Muslim consciousness in 1906 and in vigour equal but opposite to that of the Muslim communal organisation.

During the first twenty-five years of its life, the Hindu organisation had to struggle for its existence, what with the proverbial indifference of the Hindu masses, the inherent inability of majorities the world over to organise, and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus. All this time, however, the causes which hampered the growth of the Hindu organisation were gradually, if imperceptibly, neutralised.

For instance, the Hindu community's indifference began to give place to communal consciousness as a result of a number of Hindu-Muslim riots in which the majority community came out second best. The waves of conversion from the Hindu fold, partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions, opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith.

In addition to the reasons stated above, the political gains secured by the Muslim community under the Minto-Morley and Montagu-Chelmsford Reforms schemes taught the Hindu community to come together and set up an organisation to voice its claims in future adjustment.

Even the wider platform of national emancipation and Hindu-Muslim unity from which the Congress appealed to the Hindu mind gave signs of weakness, because Hindu-Muslim concord, far from coming within reach, threatened to go beyond grasp.

It is, however, wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress, or even the Muslim League of the past six or seven years. The Hindu Mahasabha undoubtedly consolidated its position in recent years; most Hindus, not excluding Congressmen professing nationalistic ideals, have a sneaking sympathy for the Mahasabha, but when it came to a question of elections to representative institutions, the Mahasabha failed to make an appeal to the Hindu electorate to the exclusion of the Congress.

Just as the Muslim League, in spite of its not very flattering success at the polls in 1937, became a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha gave proof of considerable following among the Hindus and even of a certain amount of power. In 1940, for the first time in its history, the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government. This was, however, neutralised subsequently as far as official recognition was concerned; at the Simla Conference, for example, not only was the Hindu Mahasabha denied representation but its demands found no place.

Election Rout.—Speaking for the present, however, it is highly doubtful whether the status attained by the Mahasabha will continue. It was only recently that the Mahasabha struck out a path of its own, to the point of hostility to the Congress, having in the first twenty or twenty-five years of its existence contented itself with occupying a status subordinate to that of the Congress and seeking only to emphasise the communal claims of the Hindus as distinct from their national claims.

Such importance as the Mahasabha enjoyed in recent years as the opposite number of the growingly aggressive Muslim League almost disappeared when the Congress set its face squarely against the League; the Mahasabha lost its *raison d'être*. In the result the Mahasabha faded badly at the general elections of 1945-46—it was routed.

During the War years, the Mahasabha figured prominently—advocating, from the communal point of view, more aggressive opposition to the Muslim claims than the Congress and, from the political standpoint, a less militant programme and policy than the Congress. Even in respect of the latter the Mahasabha became less and less "soft." For instance, at the last session of the All-India Committee of the Mahasabha, some of its leaders, including a Knight, renounced their titles as a protest against the British policy towards Hindus in general and the Mahasabha in particular. Broad hints were thrown at the prospect of a movement to be launched by the Mahasabha for "national liberation and the vindication of Hindu rights."

When the Congress went into the wilderness in August 1942, the Hindu Mahasabha came into the limelight as it was the only organisation to which the Hindus could look up both for urging the Hindu cause as against the militant communalism of the Muslim League and generally to propagate nationalism which, so to say, went by default as the result of the then Congress policy. When the Congress returned to public life the Mahasabha had no place.

Arya-Samaj.—Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths. A Hindu leader, for instance, remarked: "Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which

the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold. In a country like India where a religious unit tends inevitably to grow into a cultural and national unit, the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic, but assumes the wider significance of a political and national movement. If the Muslim increase in population, the centre of political power is bound to be shifted in their favour."

For these reasons, the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj, an allied organisation which worked for the reclamation to Hinduism of those who had been converted to other faiths.

Apart from the denominational aspect of its activities, the Hindu Mahasabha claims that India belongs to the Hindus—the term "Hindus" being interpreted as meaning people belonging to the Hindu race, irrespective of their denominational affiliations. It has been argued that "the minority problem of Europe is pre-eminently a racial one and not religious because there is only one religion, Christianity, which is common to all. The minority problem of India, on the other hand, is, if anything, pre-eminently religious and not racial at all."

(For an early history of the Hindu Mahasabha see past issues of *The Indian Year Book*.)

Modern History—Just as the history of the All-India Muslim League as we know it today dates from 1937 or more, generally speaking from the inauguration of the 1935 constitution; similarly the modern history of the Hindu Mahasabha dates from the start of the same constitution. The Communal Award, which formed the basis of elections to the Legislatures under the 1935 constitution, and the attitude of neutrality observed by the Congress towards it provided the *raison d'être* for the agitation of the Mahasabha since 1934-35.

About this time there appeared on the Mahasabha platform Mr. V. D. Savarkar, the ex-revolutionary who had just been released after long years of incarceration with a virile programme for the regeneration of the Hindu community. The cleavage between the Congress and the Hindu Mahasabha was further accentuated. Mr. Savarkar's attitude of hostility towards Congress may be illustrated by the following words: "The Hindu Sangatanists had to face the apathy on the part of orators of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patriotism of these pseudo-nationalists, like Caesar's wife, was above suspicion. Thus, unaided and betrayed at home, the brave band of the Hindu Sangatanist leaders and missionaries had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical riots, hooliganism, assaults and assassinations by the Muslim fanatics on the other, while the British Government out of its political hostility to the Hindus was sworn never to take the side of the Hindus whenever Hindu interests clashed with the interests of the traditional 'favoured wife' of the British. . . ."

Bhai Parmanand said: "the best way to bring about Hindu-Mahomedan unity is to strengthen the communities. . . . Let the Hindus cease to be Hindus, but the Mahomedans shall be Mahomedans for all time to come. . . . If the Congress had not engineered the theory that liberty can only follow Hindu-Muslim unity, liberty today would not be hampered and confined as it is."

Referring to the last phase of the Hindu-Muslim relationship before partition, Bhai Parmanand said, "The situation has got only two

solutions. One is the partition of the country into two, and the other to allow a Muslim State to grow within the State. That is sure to take us to a period of trial of strength and in that case the Hindu Mahasabha alone and not the Congress can offer the right solution. I am convinced that if the Congress had not thought of Hindu-Muslim unity, if Mr. Gandhi had not made his ill-fated pact with the All Brothers, it could have made a significant contribution to the achievement of freedom. It would then not have nurtured an enemy to its ideals within its own territories."

Similarly Dr. Moonje also speaking before the partition remarked that "during the last 18 years the Congress has developed a tendency that may aptly be called a pro-Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress. . . . The Muslims have no idea of patriotism, or nationalism, if shown of Muslim communalism; nor do they care for *Swaraj* in India, if *Swaraj* does not offer to them a domineering status in the administration of the country. . . ."

"What is the cure for such a mentality? It has now reached its culminating point; it is no mere bluff. It has now begun to demand division of India into Muslim India and Hindu India."

Dr. Moonje claims that "in any country it is always the right of the majority community to establish *Swaraj* and to create its own nationalism, to maintain internal law and order and to defend the *Swaraj* from external aggression."

For a period of six or seven years since 1937, Mr. Savarkar was Hindu-India's No. 1, until, owing to his ill health, his place was taken by the Bengali leader Dr. Sarna Prasad Mukerjee. In 1937 the Mahasabha declared as its goal the attainment of complete independence by all legitimate and peaceful means. In 1944 some prominent Mahasabha leaders gave up their titles as a token sacrifice for their ideals.

IN THE LIMELIGHT

The declaration of war in September 1939, followed as it was by numerous efforts by Viceroy to get leaders of Indian opinion to agree on the political and constitutional issues with a view to unifying and intensifying India's war effort, brought the Hindu Mahasabha very much into the limelight.

It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Government of India, a fact which was appreciated by the annual session of the Mahasabha in 1940. When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question, the Hindu Mahasabha insisted that it alone had the right to speak in the name of the Hindu community. The resolution passed by the Mahasabha welcomed "the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha, which is the most outstanding body representing the Hindu community's interests."

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the governance of India by means of an expanded Central Executive Council, the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon, and stoutly resisted the claims of Mr. Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation.

This status of equality with the Muslim League, in the eyes of authority, the Mahasabha has lost, witness, for instance, the neglect it suffered at the time of the Simla Conference.

Indian States—A somewhat later development in the outlook of the Hindu Mahasabha was its attitude towards Indian States.

Presumably as a result of Muslim agitation in certain Hindu States, the Hindu Mahasabha leadership took the side of the Princes. It is also conceivable that Hindu leaders tried to emulate the example of League leadership in regard to the authority and prestige of some Muslim Princes whose administration was criticised by their Hindu subjects. An example of the new trend in Mahasabha thought was to be found in a strong plea made by Mr. Savarkar to maintain Hindu States and strengthen them in all possible ways. Mr. Savarkar envisaged a bright future for the Indian Princes who, he thought, would be required to play a great part in laying the foundations of a united and free India.

During 1939-40 the Hindu Mahasabha was considerably exercised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias. Anxiety was also expressed over the statements made by the Secretary of State for India on this subject, which were interpreted by the Mahasabha as conceding too much to the Muslims. The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the statements made by the Viceroy and Mr. L. S. Amery as highly "unsatisfactory and disappointing" in that they contained no reference to India's right to independence, which was the declared goal of the Mahasabha, and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain.

The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life, the Committee thought, required clarification as it was capable of the interpretation that if the Muslim League, the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them. This would mean negation of the principle of democracy and an incentive to the minorities to obstruct and revolt.

DIRECT ACTION THREAT

The annual session of the Mahasabha met at Madurai in South India in December, 1940 and passed a resolution appreciating the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co-operation of the Hindu Mahasabha.

The resolution added that while reiterating faith in the goal of complete independence, the Hindu Mahasabha was prepared to accept Dominion Status of the Westminster type as the immediate step.

The resolution also called upon the Government to recruit Hindus for the army and the navy, make military training compulsory for Indians, and to promote the establishment of war industries in India. The resolution concluded: "In case the Government fails to make a satisfactory response to the demands embodied herein before March 31, 1941, the Mahasabha will start a movement of direct action." A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above.

Nothing happened, however, on the expiry of the ultimatum. The All-India Committee of the Mahasabha which met in the summer of 1941 resolved to postpone the direct action contemplated at Madurai. The resolution on this subject referred to the correspondence that had passed between Mr. Savarkar and H.E. the Viceroy in pursuance of the Madurai resolution, and to the pronouncements made from time to time by the Secretary of State for India in connection with the political situation in India. It noted that the Viceroy

had turned down "some of the fantastic communal demands" put forward with regard to the extension of the Viceroy's Executive Council and also that the Secretary of State for India had, under pressure of public opinion created by the Hindu Mahasabha, criticised adversely the so-called Pakistan proposal.

About this time communal rioting broke out in several places, including Ahmedabad, Dacca, Bombay, Cawnpore and Bihar Sharif. Hindu Mahasabha circles were unanimous in ascribing the riots to a design on the part of some Muslim leaders to force the issue of Pakistan. Mr. K. M. Munshi, a well-known Congress leader and former Home Minister of the Government of Bombay, left the Congress on the issue of non-violent approach to the communal rioting. He started an Akhand Hindusthan (Indivisible India) campaign which was very popular in Hindu circles.

Difficult Position—When the Cripps proposals (see the chapter on "The Indian National Congress") were announced, the Hindu Mahasabha was one of the earliest to reject it on the ground of the unity of India. This did not, however, mean that the Mahasabha refused to co-operate in any case. In fact, Mr. Savarkar agreed to join in a Government at the centre, in spite of the Mahasabha's opposition to the other parts of the Cripps formula.

The months that immediately followed the Cripps visit witnessed a strong denunciation by Hindu Mahasabha leaders of the demand for Pakistan, rendered more fierce by the proposal of leaders like Mr. C. Rajagopalachari to settle with Mr. Jinnah and the Muslim League on the basis of Pakistan. When Mr. Rajagopalachari's move was condemned even by the bulk of Congressmen (see chapter on the "Indian National Congress") it is easy to understand the opposition of the Mahasabha leaders.

When disturbances broke out in the country after the arrest of the Congress leaders on August 9, 1942, the Mahasabha President appealed to his followers not to extend any active support to the Congress move, as the Congress resolution was bound to prove detrimental to Hindu interests and to the integrity and strength of India as a nation and State. At the same time he urged Government to appease Indian discontent by an unequivocal Parliamentary declaration giving India the status of a completely free and equal partner in the Indo-British Commonwealth, equal to that of Great Britain herself, and by investing India with actual political power.

The position of the Hindu Mahasabha was indeed unenviable. It could not unduly condemn the Congress which had now given up the cry of "No Swaraj without communal unity" and had instead gone all out to win freedom for the country irrespective of what the Muslims said or did. Thus one of the major grievances of the Hindu Mahasabha against the Congress had been removed. At the same time the policy of the Congress was opposed to that of the Hindu Mahasabha which was one of responsive co-operation. The Mahasabha would very much like the Congress demand for India's political emancipation being conceded without delay, but would not at the same time support the Congress methods.

Right Wing—The period when the Congress was behind prison bars witnessed the growth of certain new elements within the Hindu Mahasabha. A right wing came into being—rather the right wing forces which were already there came to the fore. This comprised leaders like Dr. Syama Prasad Mookerjee who were, in comparison, for example, with Mr. Savarkar, less communally minded, and more politically conscious.

For a time there was a tussle between the old and the new forces, and the official policy of the Mahasabha fluctuated in consequence. In August 1942 the Working Committee of the Mahasabha demanded immediate declaration of India's independent status and negotiation by Britain with the principal parties in

India to solve the political deadlock and establish an Indian National Government. The relevant resolution stated that if the British Government did not respond to the demand the Mahasabha would be compelled to revise its programme and devise ways and means whereby Britain and her Allies "will realise that India as a self-respecting nation can no longer be suppressed." In pursuance of this resolution Dr. Mookerjee sought permission to meet Mr. Gandhi, but the Viceroy declined to give it.

This tendency to move away from the communal basis of the Mahasabha was checked when, in December 1942 the Viceroy, speaking at Calcutta, referred to the geographical unity of India and advised Indians to preserve Indian unity. This was naturally interpreted as disapproval of Pakistan and any proposal to divide the country. The extremists in the Mahasabha were jubilant and the advocates of compromise thought it expedient to take the Viceroy's hint and abandon all efforts to settle with the Muslim League on the basis of Pakistan. The prospects of a rapprochement between the Hindu Mahasabha and the Muslim League, such as they were, were rendered more remote as the result of the Viceroy's Calcutta speech.

The proceedings of the annual session of the Hindu Mahasabha which met at Cawnpore a few days after the Calcutta pronouncement were naturally coloured by the latter.

The feeling of self-satisfaction engendered by Lord Linlithgow's speech at Calcutta in December 1942, which was voiced at the Cawnpore session of the Mahasabha, was somewhat shaken by developments in the summer of 1943. Quid-e-Azam Jinnah, who was doubtless upset by the Viceroy's pronouncement on the geographical unity of India, made a conciliatory gesture to Mahatma Gandhi in his presidential address at the annual session of the All-India Muslim League at Delhi in April, 1943. He said that if Mahatma Gandhi were keen on a settlement, he had only to write to him from the Aga Khan's palace. Mahatma Gandhi did write to him expressing a desire to meet him. Although the Mahatma's letter was withheld from the Quid-e-Azam, the fact of the Mahatma's response to the Quid-e-Azam's invitation amounted, in the eyes of the Mahasabha, to a readiness to concede the Quid-e-Azam's demand. The Working Committee of the Mahasabha took such a serious view of the possibility of "a complete transfer of power to the League" that it felt that "under the circumstances the Hindus may have to meet and fight the danger of Pakistan single-handed", and urged the Hindu community to "prepare and be ready".

Savarkar Resigns Early in the autumn of 1943 Mr. Savarkar staged one of his periodical exits from the leadership of the Mahasabha. More than once before he had announced his resignation of its presidency, but on each occasion he was induced to stay on. A similar development was expected on this occasion, too. But he stuck to his decision, in spite of the fact that the Mahasabha re-elected him President for another year. Obeying his doctors, who advised complete rest, Mr. Savarkar declined to go to Amritsar to preside over the Silver Jubilee session of the Mahasabha whose deliberations were guided by Dr. Syama Prasad Mookerjee, Working President.

The session which celebrated the silver jubilee of the organisation, was inaugurated by the Maharaja of Coimbatore, whose late father was the first President of the Hindu Mahasabha. Raja Narendra Nath, ex-President, in a short speech asserted that the Hindu Mahasabha was not a communal organisation but had come into being to infuse the spirit of nationalism among the people. He was followed by Bhai Parmanand and Dr. Moonje, who stressed the need for Hindu unity and claimed that India belonged to the Hindus and should have its constitution based on the Vedas just as the pan-Arabic countries were endeavouring to base their constitution on the Quran. He made a stirring appeal to the audience for the militarization of the Hindus.

Organisationally speaking, the Hindu Mahasabha suffered a number of reverses in 1944. This was due mainly to the fact that Mahatma Gandhi was out, and, to the extent that he is the Congress, the latter organisation once again came on to the stage, thereby depriving the Hindu Mahasabha of the position which it had held in public life for two or three years previously as the opponent of the Muslim League.

Common Platform—Even so, the Mahasabha was not completely out of the picture; for it was not slow to make its opinion felt on the many situations which arose as the result of the attempts made on behalf of the Congress to placate the Muslim League. Throughout this period, the Mahasabha, which had previously occupied the front of the stage as a counterblast to the Muslim League, contented itself by attacking the principal actors, the Congress and the League, and latterly the British authority. Symptomatic, perhaps of the resentment felt by the Mahasabha leaders at this persistent relegation to the background were the series of protests made by the Mahasabha culminating in the renunciation in August 1945 of their titles by some prominent Mahasabha leaders.

The failure of Mahatma Gandhi to evoke response from the Viceroy to this gesture soon after his release (see chapter on "The Indian National Congress") led the Mahasabha Working Committee to express deep concern at the constitutional deadlock which "continues to exist at a time when the war menace to India has become so real and so imminent" and regret that "Government have taken no practical steps towards resolving the deadlock and the establishment of national coalition Governments at the Centre and in the provinces."

A resolution passed in July 1944 said: "The Working Committee reiterates that no communal settlement will be acceptable to the Hindus which has not the approval of the Hindu Mahasabha, and it will be a fatal mistake for Congress leaders to come to a patched-up agreement with the Muslim League so long as it persists in its Pakistan ideology and refuses to identify itself with the national interests of India as a whole. The Working Committee declares that the suicidal policy of appeasement, specially jeopardising Hindu rights, has not proved a success in the past, nor will it be so in the future. Instead of this policy being pursued, there should now be all-India efforts for uniting all progressive parties and organisations throughout the country who believe in the unity and integrity of India on a common Indian national demand, and both Hindu and Muslim public opinion should be effectively mobilised on such lines. In the preparation of, and in giving effect to such a scheme, the Hindu Mahasabha will be glad to offer its wholehearted co-operation."

C. R. Formula Condemned—Ironically enough, within a few weeks of the adoption of this resolution, Mr. C. Rajagopalachari published the details of his negotiations with Quid-e-Azam Jinnah on the basis of the Gandhi-cum-C. R. Formula conceding the right of secession on certain conditions (see chapter on "The Indian National Congress"). This roused vigorous protests from Mahasabha leaders. Mr. Savarkar remarked:—

"From the 'Quit India' the Congress has inevitably landed on 'Split India'. The Hindu Mahasabha had foretold that just as the Swaraj-Khilafat ended in strengthening the Khilafat forces and gave birth to the Pan-Islamic movement, the Swaraj-Pakistan movement could result in strengthening the Pakistan forces." He added that this offer had completely justified the policy of the Mahasabha in refraining "from being duped into the movement of 'Quit India', which has now ended in such a miserable fiasco."

"It is really unjust," observed Mr. Savarkar, "to look upon Mr. Rajagopalachari as the villain of this tragedy. The fact is that a Muslim Raj in India has always been looked upon by Gandhiji and a large number of

Congressmen as cent per cent. Swaraj." He contended that neither Mahatma Gandhi nor Mr. Rajagopalachari had the authority to make a gift of any of the Indian provinces.

Mahasabha auspiciousness was accentuated by the prospect of Gandhi-Jinnah negotiations. Mahasabha leaders were so much disturbed by the fear of fresh concessions to the Quaid-e-Azam that Dr. Mookerjee sought clarification from Mahatma Gandhi on the latter's intentions.

Outlining his impressions of his talk with Mahatma Gandhi, Dr. Mookerjee made three points. The first was that Mahatma Gandhi's mind was still open to conviction and if he felt satisfied that what he had done was injurious to India as a whole or to a particular province, or even to a particular community, he would not hesitate to retrace his step. Secondly, Mahatma Gandhi's personal views on the question of partition of India were still the same as they were two years ago. In the third place, Mahatma Gandhi was most anxious that all people, including Congressmen, should, without reserve, express their opinion on the C. R. Formula so that he might correctly appreciate the country's reaction.

Appeal to U. N.—Dr. Mookerjee said that the real solutions for settling Hindu-Muslim differences was to find out from the spokesmen of the respective communities in what manner minority rights required protection in provincial spheres and the Centre. It was clear, continued Dr. Mookerjee, that Quaid-e-Azam Jinnah's settlement with Mahatma Gandhi could be only on the basis of Pakistan. He had not even stated what his Pakistan was, though he had emphatically indicated that the C. R. Formula did not give him the Pakistan he wanted. The Quaid-e-Azam's demands would now increase, of which indications had already been given.

Even after it was known that the Gandhi-Jinnah negotiations had broken down the Working Committee of the Mahasabha passed a resolution condemning the Rajagopalachari Formula and Mahatma Gandhi's Scheme "as being destructive of the integrity of India and being detrimental to the interests of the Hindus as well as of the country as a whole," and reaffirming that "no communal settlement will be binding on the Hindus unless arrived at with the consent of the Hindu Mahasabha."

In a second resolution, the Committee reaffirmed that India was one and indivisible and called upon the United Nations to make an unequivocal declaration recognising the right of India as such a nation.

The Working Committee further resolved that, in the event of failure on the part of Britain to satisfy the fair and just demand made by India, the other Allied Nations should not permit Britain to delay any longer the removal of India's bondage on the pretext of communal, sectional or other differences, mostly created by the policy of divide, and rule and seriously fettered with the object of continued exploitation of the Indian people.

The Working Committee was further of the opinion that continuance of the undemocratic Government, not at all responsible to the people of India, had resulted in the estrangement between India and Britain which would not fail to be a menace to world peace and world order.

The Working Committee authorised the President to cable the resolution to President Roosevelt, Premier Churchill, Marshal Stalin and General Chiang-Kai-Shek.

HINDUSTAN CONSTITUTION

The annual session of the Mahasabha was held at Bilaspur on Christmas Eve in 1941. Dr. Syama Prasad Mookerjee presided.

The proceedings of the session were signalled by the adoption of a draft constitution for the future free India embodying the principles for which the Mahasabha stands. The draft said: "Hindustan shall be a free State and her constitution shall be styled 'The constitution of the Hindustan

Free State.' Historically, politically, ethnologically and culturally, Hindustan is one whole and indivisible, and so shall she remain. The form of Government shall be democratic and federal. The federal legislature shall be bicameral in structure. Elections to the legislatures, whether federal or provincial, shall be on the basis of adult franchise and of 'one man one vote.' The federal government shall be distributed between the central and provincial legislatures in a manner so as to give an adequate measure of autonomy to the provinces, with residuary powers at the centre. The power of the Government, whether federal or provincial, shall be divided into legislative, executive and judicial, with the executive responsible to the legislature and both responsible to the people and with the judiciary independent of the executive. Distinctions between martial and non-martial races shall no longer exist, and the military strength of the Hindustan Free State shall, as far as possible, be equilibrated amongst its various provinces, consistently with its standard of discipline and efficiency. The States should be brought into the federation of Hindustan. Responsible government should be introduced, on the principles stated above."

It was laid down that "the fundamental rights of a free state, namely, that all citizens domiciled in Hindustan shall, in general, enjoy rights and privileges and be subject to the obligations of citizenship and shall, in particular, enjoy fundamental rights."

The principal resolution of the session expressed the opinion that an agreed scheme of reforms which would solve her political problems and a united front were the pretexts which were being put forward by British politicians to enable Britain to defeat Hindustan's claim to freedom. The resolution declared that "a major surgical operation like Pakistan" was not in the best interests of Hindustan. Without prejudice to the Mahasabha's demands for complete independence and the right to frame its constitution, the resolution called upon the British Government to prove their *bona fides* by taking immediate steps to implement the Cripps scheme, shorn of clauses giving power of secession to provinces, and to dissolve the legislatures as the first step with a view to forming a Constituent Assembly elected not on the basis of the Communal Award but on the basis of a joint electorate with reservation of seats where necessary.

Wavell Plan Condemned—When Lord Wavell broadcast his plan for an Interim Central Government the Working Committee of the Mahasabha registered its strong protest against the proposal which it described as a "deliberate device on the part of the British Government to perpetuate British Rule over India to camouflage the issue of India's independence, to break the solidarity of the Indian nation, to reduce the Hindus who constitute about 75 per cent. of India's population to a minority by the introduction of parity between caste Hindus and Muslims and the Scheduled Castes, and to divide the politically-minded Hindu community into separate entities as Caste Hindus and the Schedule Castes."

The resolution continued: "The said plan negates the principles of nationalism, freedom and democracy for which the Second World War is said to be waged and fought by the Allies. Even a fully Indianized Executive Council under the existing constitution without any collective responsibility with the Viceroy's veto and the overriding power of the Secretary of State intact can be no substitute for a truly National Indian Government responsible to the people based on the recognition of Indian independence...."

"It is obviously a step in retrogression of the Cripps proposal and a monstrous extension of the so-called communal award which has proved to be the fountain source of all communal bitterness and political strife."

"The Indian National Congress has bartered away the political rights of the caste Hindus by repeated secret negotiations and by its open failure to defend such a right whenever they were trampled under foot. The Congress has ceased to be a national organisation by its persistent negotiations with the Muslim League, a body outside the Congress on communal issues and by its latest acceptance through (Gandhi) of an equal political status with an avowedly communal and reactionary organisation like the Muslim League. . . . Any decision taken behind the back of the Hindu Mahasabha, which alone is the accredited political organisation of the Hindus and which has been in the past recognised by the Government itself as a major political organization, shall not be acceptable to the Hindus of India."

"The Working Committee demands that a referendum be taken of the Wavell plan and the opinion of the people be ascertained before it is put into operation."

"The Working Committee therefore declares that the Wavell Scheme even if it be accepted by the Simla Conference will be repudiated by the Hindus and if enforced will be resisted by all possible means."

Titles Renounced—Government's "increasingly hostile attitude towards the legitimate rights of Hindus" came in for violent criticism at the meeting of the All-India Committee of the Mahasabha held at Delhi in August 1945. The meeting witnessed the unprecedented spectacle of some Mahasabha leaders renouncing their title as a protest against Government's policy.

Opening the session of the All-India Committee Dr. S. P. Mookerjee, the President, said that a new situation had been created by the Wavell offer. Dr. Mookerjee added Lord Wavell had not invited the Hindu Mahasabha to the Simla Conference, because the Viceroy feared opposition from the Mahasabha, who not only opposed the offer but also charged the British Government with unwillingness to part with real power.

Referring to Quaid-e-Azam Jinnah, Dr. Mookerjee said, the Quaid-e-Azam had now changed his demand from parity with Hindus to that of parity with the rest of India. Dr. Mookerjee claimed that the Mahasabha was the only national organisation and challenged any one to prove that the policy and programme of the Mahasabha was inconsistent with national aspirations. He strongly demanded that the future of India should be based on unity and drew support from the speeches of Pandit Nehru.

The resolution on titles said: "As a mark of protest against the increasingly hostile attitude of the Government towards the legitimate rights of the Hindus, the Working Committee of the All-India Hindu Mahasabha calls upon all Government title-holders who are office-bearers or who are members of the Council or committees of the provincial or district Sabhas to relinquish their titles. No Government title-holders shall therefore be eligible for any elective office or offices in the Hindu Mahasabha."

The principal political resolutions ran as follows: "On the termination of the world war causing untold misery and sufferings to millions of people in India and the other countries both in the east and the west, we call upon His Majesty's Government to redeem the pledge of liberation of oppressed humanity from both political and economic fetters. . . . In view of the glorious part played by the Indian Army in achieving victory in theatres of war, and particularly by the Hindus, who formed about 70 per cent. of the combatant forces and won as many as 27 Victoria Crosses out of 31 won by Indian soldiers, the United Nations should stand by India's demand for justice, fairness and see that no injustice is done to the Hindus in this crisis. . . ."

"To make agreement between political parties and communities a condition precedent to the freedom of India is a pretext for Imperialism to cling to power. . . . We call upon

the British Government immediately to repeal the communal award, which is unfair, undemocratic and anti-national. The Hindu Mahasabha has all along rejected the communal award. We are of the opinion that the election should be based on the genuine democratic principle of one man, one vote. . . . The Mahasabha insists that any Constituent Assembly or any body entrusted with the work of drafting India's new constitution should proceed on the basis that India is and shall remain one and indivisible and further, that any majority community shall not be reduced to a minority or equality. . . .

"The Hindu Mahasabha is opposed to the pernicious principle of parity between Hindus and Muslims. It is inherently unjust to reduce a majority of three-fourths to the same position as a minority of one-fourth. . . . The Hindu Mahasabha is of the opinion that the Wavell Plan, which envisaged no real transfer of power to Indian hands, was doomed to failure because it was based on inherently unjust proposals of parity. . . .

"His Majesty's Government can call for the co-operation of all nationalist elements, Hindus and Muslims, who are willing to shoulder responsibility for tackling the triple issues of the integrity of India, opposition to parity and the demand for complete independence without a weakening or crippling of the Hindus."

Memorandum.—As remarked earlier, the Mahasabha receded into the background with growing political activity on the part of the Congress. Such influence as it had over the Hindu mind suffered as the result of a new declaration of Congress policy towards Pakistan and the proposed partition of India. The Working Committee of the Congress in the Autumn of 1945 adopted a resolution on the subject which set its face squarely against the division of the country (See Chapter on the "Indian National Congress"). Then followed months of electrifying activity in which the Congress successfully eclipsed the Mahasabha. It was only in very few constituencies that the Mahasabha could put up its own candidates, but hardly any could come on top. Most of the Mahasabha nominees forfeited their deposits. The Hindu electorate solidly voted Congress.

When, therefore, the British Cabinet Mission arrived in India in the spring of 1946 and carried on negotiations with the Indian political parties, the Mahasabha was not much in evidence. Mr. J. B. Bhopatkar, Acting President of the Mahasabha, met the Mission and submitted a ten-point memorandum. The points made out were: (1) immediate declaration of independence of India; (2) formation of an interim government with complete transfer of all power and authority of Government of India to this Government; (3) recognition of India's integrity and indivisibility; (4) opposition to territorial self-determination; (5) India's constitution to be of the federal type with (6) provisions for the grant of the utmost measure of autonomy to the federating units, the provinces and the States, but with residue of powers vested in the Centre; (7) the governing principle of the constitution to be democracy, which means the rule of the majority; (8) representation in legislatures on the principle of adult franchise; (9) no division of India into British India and the Indian States; and (10) the setting up of a sovereign constituent assembly.

The memorandum stated that, as all sovereignty in respect of India was vested in the Indian people, it was the right of Indians to be fully and completely free.

As regards the Interim Government, the memorandum said that it should be composed of eleven representatives elected by the eleven provincial legislative assemblies, who should co-opt four members representative of such minorities as were not represented on it. These 15 members need not be members of Legislative Assemblies.

The Constituent Assembly itself should be as small a body as possible and should be composed of members elected by the Provincial Legislative Assemblies with power to co-opt representatives of such minorities as were not represented on it and some experts, if necessary.

The constituent body should be a sovereign one which would decide the terms of a treaty with Great Britain. It would decide all matters by a majority vote, and these decisions should be binding on all.

The memorandum emphatically declared that historically, ethnologically, politically and even culturally India was one whole and indivisible nation and it must remain so in future.

The Sabha was opposed to the principle of territorial self-determination which it said would prove as dangerous as Pakistan itself.

After that, however, the Mahasabha was completely out of the picture. The annual session of the organization, which was to have been held early in the year, was postponed. Instead, the Working Committee met in Calcutta towards the end of September, when the unprecedented communal outburst at Calcutta provided grist to the Mahasabha mill. It expressed the view that the Muslim League should be declared an illegal body and dealt with as such, if it persisted in its attempt to indulge in unconstitutional and illegal activities. The committee urged the new Central Government and the Governor-General to exercise their powers for the maintenance of peace and tranquillity in the country. It also declared that the "Direct Action" declared by the Muslim League against British imperialism was a camouflage and was a manoeuvre to inflame the fanatical mass mind against the Hindus. It recorded its firm conviction that "the Calcutta massacre was organized and planned to terrorise and intimidate the Hindus in order to frighten them into acceptance of Pakistan."

FOUR-POINT PROGRAMME

In the historic events which led up to the independence of India, the stand of the Hindu Mahasabha was what it had always been—communalism as a cure for communalism.

At the twenty-seventh annual session of the All-India Hindu Mahasabha at Gorakhpur at the close of 1946, Mr. B. L. Bhopatkar, in his presidential address, outlined a four-point programme to propagate "the ideas and ideals for which the Hindu Mahasabha stands and to indicate to the Hindus the right lines of their defence against Muslim aggression".

Mr. Bhopatkar declared that, in the crisis then prevailing, it was the duty of the Hindu Mahasabha to run to the help of the rest of the Hindus. The work of the Mahasabha to be carried on was suggested on the following lines:—

Firstly, it must educate both the Hindu masses and classes in the ideology of the Mahasabha and make them communally conscious.

Secondly, it should organise a Hindu front composed of Caste Hindus, Scheduled Castes, Sikhs and others with a view to confronting successfully all "open or veiled aggression" in any part of India.

Thirdly, it should remould the Hindu mind by making it more self-reliant and, if necessary, even militant.

Fourthly, to carry out this stupendous work, the Mahasabha should start a fund called "The Hindu Reconstruction and Relief Fund".

In his review of events over two years ending with December 1946, Mr. Bhopatkar said that the Simla proposals were manifestly pro-Muslim and, therefore, unfair and unjust to the Hindus, Sikhs and the Scheduled castes. They surreptitiously introduced the principle of parity between Caste Hindus and Muslims.

Recalling the Mahasabha's appeal to Hindus, Mr. Bhopatkar urged them to realise the danger

inherent in the Cabinet Mission's proposals and said that the danger lay in the 'proposed three-tiered constitution'.

Mr. Bhopatkar declared that there were occasions in a nation's history when communalism had to be met by communalism and nationalism was required to be purified through the fire of communalism.

"Mr. Bhopatkar urged the Constituent Assembly which seems to be determined to frame India's constitution," the abolition of distinction between martial and non-martial races and to see that the military strength of Hindustan was as far as possible equilibrated among its various provinces.

Inaugurating the session, Dr. Syama Prasad Mookerjee declared that, if all members of the Constituent Assembly remained united and proceeded with their task without any anxiety to appease the Muslim League or to make any surrender of the fundamental issues of Indian unity and liberty, "there is no power on earth that can ultimately stand in the way of our attaining the goal."

He urged the Constituent Assembly to frame a constitution for a free India based on sound and democratic principles, making provision for all minority interests. Whether the Muslim League accepted such a constitution or not, he declared, India should acquire sufficient strength to enforce it on her people.

To his mind it seemed almost certain that India would have to pass through another stage of bitter struggle before she attained her complete freedom.

At this four-day session more than half a dozen resolutions were passed and eloquent tributes were paid by delegates from almost every province to the great qualities of leadership of Mr. Bhopatkar, the new President, after the voluntary retirement of Dr. Syama Prasad Mookerjee.

Hindustan National Guards.—The highlight of the session was the unanimous adoption of the resolution embodying a future programme for Hindus envisaging the formation of the Hindustan National Guards for the purpose of self-defence.

Resolutions urging the intensification of the "Suddhi" (purification) movement protesting against the League Ministry in Sind, inviting Muslims of other provinces to convert Sind into a complete Pakistan province, and warning the Sind Government that should it pursue that policy Hindu India would really rescue the Sind Hindus, were also passed. Dr. B. S. Moonje, moving his resolution on the future constitution of India, said that any constitution without a strong centre would never be accepted by the Hindu Mahasabha.

Mr. N. C. Chatterjee's resolution on Noakhali said that that calamity was likely to spread to other areas in Hindu minority districts in Bengal and regretted that the Governor-General and the Governor of Bengal, who had a special responsibility to protect minorities, had failed miserably to discharge their obligations.

At the close of the session a new Working Committee of the All-India Hindu Mahasabha was elected. The following is a complete list:—

President: Mr. J. B. Bhopatkar, *Vice-Presidents:* Dr. V. D. Savarkar, Dr. Syama Prasad Mookerjee, Mr. B. G. Khaparde (in case Bhai Farmanand refused to accept), Mr. N. C. Chatterjee, Mahant Digvijayanath and Dr. B. S. Moonje, *General Secretary:* Mr. Anantosh Lahiri, *Secretaries:* Mr. Dhandhere (Poona) and Mr. V. G. Deshpande, *Treasurer:* Captain Deshabhandar.

Working Committee Members: Mr. Gangadhar Tulmala (Sind), Mr. Mahendra Bewan (Gujarat), Kumar Sureshprakash Singh (Oudh), Mr. Rajmounar Narsinhrao (Andhra), Mr. Ramnath Kalia (Delhi), Mr. Panchanatham (Madras), Mr. R. K. Pande (Maharashtra), Mr. K. D. Dhandhere (Bombay), Mr. Indra Prakash (Punjab), Mr. R. A. Kanitkar (Berar), Mr. L. V. Paranjpe (C.P.), Mr. Satishsingh (Assam), Mr. D. N. Muckerjee (Bengal), Mr. K. Shivanand

(Tamilnad), Mr. R. N. Man (Maharashtra), Mr. Chandkiran Sharda (Ajmer), Mr. Chandralal Baner (N.W.F.P.), Kumar Ganganand Sinha (Bihar), Rani Phulkumari of Sherkot (Jadives) and Mr. G. A. Gavaani (Scheduled Caste).

Nominations: Lala Narain Duttji, Dr. Gokulchand Narang, Mr. Gangaram Khanna, and Mr. Lakmishanker Verma.

The Working Committee of the All-India Hindu Mahasabha, which met at New Delhi on February 1947, reiterated the views and demands of the general body a month earlier. It passed a resolution expressing the opinion that "the Constituent Assembly, as it is, is a properly constituted legal body with full sovereign power and authority and competent to frame the political constitution of 'Akhand Hindustan'". The Mahasabha was of the opinion that now as the Congress and other representatives had started the work of the Constituent Assembly they should complete it whether the League joined it or not or even if the British Government withdrew the Cabinet Mission's proposals.

Fair Play to All The Committee also felt that the Karachi resolution of the Muslim League declining to join the Constituent Assembly marked a definite departure from the path of constitutionalism in favour of direct action.

It urged the Princes to join the Constituent Assembly, giving adequate representation to their own people and to introduce responsible government in their own States as speedily as possible.

The Working Committee appointed a committee to draft the outlines of a constitution for Akhand Hindustan "broad-based on the principles of equity, democracy, justice and fair play to all communities and interests".

The Committee reiterated its opinion that the Cabinet Mission's proposals envisaging a three-tiered constitution should not have been accepted by the Congress. What was needed was a strong central government paramount enough to make all the provinces and States work in union with each other.

The Committee appointed another committee consisting of the President and 32 members from different parts of India for collecting a fund to implement the constructive programme of the Mahasabha outlined at its Gorakhpur session. It also authorised the General Secretary in co-operation with two others to take the necessary steps to organise a *Suddhi* (purification movement).

At another session of the Working Committee in New Delhi the following month, a resolution was adopted declaring that, except for the

deadline, H.M.G.'s Statement of February 20 on the withdrawal of British power by June 1948 was vague and likely to lead to unrest and strife in India. The resolution opposed transfer of power to provincial governments "with regard to areas which are not fully represented in the Constituent Assembly owing to their own perversity".

The Mahasabha called upon the Constituent Assembly to proceed with the completion of its task to provide for a strong Centre.

By another resolution the Working Committee congratulated the Hindus and Sikhs of the Punjab for having built up a common anti-Pakistan front. Expressing grave concern at the riots in that province, the resolution declared that these riots were brought about by "a combination of the agents of bureaucracy and the Muslim League to terrorise Hindus and Sikhs so that they may give up their anti-Pakistan agitation."

The Committee finally called upon the British Government to transfer power and responsibility to a strong and independent Central Government which could effectively control the destinies of the whole of India (Akhand Hindustan).

Integrity of India The reaction of the All-India Committee of the Hindu Mahasabha to H.M.G.'s announcement of June 3 was in keeping with its avowed policies. The Committee reiterated its opposition to partition of the country and declared that there would not be peace in India unless the separated areas were brought back into the Indian Union and made its integral parts. The Committee declared the tentative allocation of territories in the proposed partition of the Punjab and Bengal was "unjust and unfair to the non-Muslims".

The main resolution moved by Mr. N. C. Chatterjee and seconded by Dr. Gokulchand Narang *inter alia* said, "The cardinal principle of the Hindu Mahasabha has always been the unity and integrity of India, and under no circumstances would it be a party to the vivisection of India in any shape or form."

Deploring that the Indian National Congress, after solemn assurances to the Hindu electorate that it stood by the unity of India, had agreed to the partition of India without a referendum, the Committee declared that "the Hindus were not bound by this commitment of the Congress".

As the principle of partition had been accepted both for the Punjab and Bengal and as the communal ministry in Bengal had been pursuing a policy detrimental to Hindus, the Committee urged the Viceroy to promulgate Section 93 of the Government of India Act of 1935 pending the appointment of two regional ministries.

The Committee resolved that July 3 be observed as a day of countrywide protest by peaceful "hartal" and holding public meetings wherever possible.

On the eve of independence Mr. L. B. Bhopalkar, President of the All-India Hindu Mahasabha, called upon the Hindus not to participate in the August 15 celebrations decided upon by the Indian National Congress.

Direct Action in U.P.—Meanwhile, the U.P. Hindu Mahasabha's direct action movement against the U.P. Government had begun in Lucknow. After many demonstrations Hindu Mahasabha volunteers attempted to hoist the Hindu Mahasabha flag in a Lucknow park and were taken into custody. The movement was started after the ten demands of the Mahasabha on the Government had broken down.

The demands were based on communal lines about representation in Government service and about effective defence provisions in the provinces against disturbances.

During the course of the movement several Hindu Mahasabha workers were arrested. The U.P. Government also directed the District authorities to put in charge of receivers the estates and commercial and industrial establishments of persons arrested under the movement.

The campaign was carried on, besides the U.P., in Bihar and elsewhere. The movement was called off in the third week of September as, it was declared, the communal situation needed the undivided attention of all the people.

At the opening session of the All-India Hindu Convention, which met in New Delhi on August 9, 1947 under the Presidentship of Mr. V. D. Savarkar, there was commotion and uproar. Mr. Savarkar, winding up the proceedings, said, "If Hindus do not organise and assert themselves, realise the grave danger that lies ahead and work to get the severed areas back, there will be numerous other Pakistans in our midst in the next few years."

The Convention passed a resolution expressing opposition to the partition of India on the basis of religion and urging the Hindus not to accept the division of the country and criticising the Indian National Congress for having acceded to it without getting a verdict from the people on this issue.

In September, the Working Committee of the All-India States Hindu Mahasabha met in Baroda under the Presidentship of Pandit Ananda Priyaji, the Working President, and passed a resolution disapproving the action of Junagadh State in joining the Pakistan Dominion. Another resolution on Hyderabad requested the Nizam to join the Indian Union forthwith.

THE MUSLIMS

HITHERTO this section used to appear under the title Muslim League. There are three reasons why the old title has had to be discarded, first, almost all Muslim bodies have given up political activity in the old sense of the term. Second, the Muslim League, or to give it the new name Indian Union Muslim League cannot be considered as the direct heir of the old Muslim League of undivided India. The reasons for this assumption will be given later. Even if the Indian Union League is accepted as the constitutional successor of the old League it does not enjoy the predominance in Muslim politics that the older body did.

We can now proceed to give a general review of Muslim politics.

LAST MEETING

The All-India Muslim League held its last meeting in Karachi on December 14 and 15 in 1947, where it resolved to break up into two independent bodies one for India and the other for Pakistan. Two conveners were appointed to call meetings of the council one to consist of old members resident in India and the other of those resident in Pakistan. These councils, were to frame the two constitutions. Further, the meeting decided to appoint an *ad hoc* Committee consisting of elected representatives of not more than three each from the Pakistani and Indian bodies for the purpose of dividing the assets which amount to 72 lakhs and the liabilities of the All-India Muslim League. It was also agreed that in the event of difference of opinion in the committee the matter in question was to be referred to the Qaid-e-Azam. As it turned out this committee never met, while the working Committee of the Pakistan League decided not to transfer any amount at present to Indian Union League. Later the Secretary of the Pakistan Muslim League applied for permission to the Sind Chief Court to draw 2½ lakhs annually from the interest accruing from the All-India Muslim League Fund. If this request is granted it would follow that the Pakistan League had established its claim to the entire deposits belonging to the All-India Muslim League. The reasons why the assets and liabilities Committee did not meet or why the Pakistan League Working Committee decided not to transfer any funds to the Indian Union Muslim League are not known. In any case, whatever political or constitutional authority the Indian Union League possesses today is derived from the resolutions passed at the last meeting before it broke up of the All-India Muslim League in Karachi on December 14 and 15, 1947. The more important resolutions passed at the meeting are given below : It may also be mentioned here that at the meeting of the States Muslim League held in Karachi on February 4, 1948 opinion was not unanimous on the issue of splitting the League. The members from Hyderabad, for instance, were not in favour of division. Later an *ad hoc* Committee appointed by the President of the States Muslim League advocated dissolution and merger with the Indian Union and Pakistan League bodies respectively. Here are the full texts of the more important resolutions passed at the Karachi meeting on December 14 and 15.

"The Council of the All-India Muslim League, having reviewed the situation and the happenings in various parts of the Indian sub-continent since its last meeting held in New Delhi on the 9th June, 1947, places on record its deep sense of sorrow and its feelings of horror at the widespread acts of organised violence and barbarity which have taken place. The Council also views with grave concern the rising tide of communal antagonism against the Muslim minority in the Indian Union where, in spite of the repeated declarations by the Congress that minorities will be dealt with justly and fairly and that their rights and interests will be fully safeguarded and protected, Muslim life and property continue to be insecure, their trade, business and other means of earning their livelihood

are in a state of suspense in many parts of the country, and they are being subjected to various disabilities merely because they happen to be Muslims. The Council expresses its deep regret that although the division of India has taken place on the basis of an agreement to which both the Congress and the Muslim League were consenting parties, certain influential sections of people in the Indian Union, including persons holding responsible positions, have been acting contrary to the spirit of that agreement and are branding the Muslim minority in the Indian Union as disloyal, because of their support of the very solution of the long-standing political problem which the Congress itself had ultimately and finally accepted and ratified, notwithstanding the most categorical declarations and assurances by representative Muslim leaders in the Indian Constituent Assembly and outside that the Muslims in the Indian Dominion had completely identified themselves with the country in which their lot had been cast. This Council strongly condemns and deplores that, in spite of the strict injunctions given privately and publicly by the Qaid-e-Azam and the Muslim League not to harm the minorities in any way, unfortunately acts of violence were also committed in certain parts of Pakistan inflicting loss of life and sufferings on the non-Muslim minorities.

PLEDGE TO MINORITIES

"The Council reminds the Governments of both the Indian Union and Pakistan that they jointly gave the most categorical assurances to their respective minorities of full protection of life and property and of full guarantee of their rights and interests, and it most emphatically urges upon the Governments of Indian Union and Pakistan and the authorities concerned that the pledges given to the minorities be fulfilled in all sincerity. The Council hopes that both the Governments will realise their responsibility in this behalf and prepare, after joint deliberations, a charter of minorities' right which will ensure an honourable existence of the minorities in the two Dominions. The Council further hopes that the two Dominion Governments will be able to conclude agreements and treaties which will promote and stabilize friendly relations between the two dominions.

"This session of the Council of the All-India Muslim League places on record its deep sense of horror and grief at the widespread acts of violence which have been happening in Ajmer for sometime past. In view of the deep regard and devotion which the Mussalmans have for the Dargah Sharif of Ajmer this Council urges upon the Government of the Indian Union to ensure the protection of the Dargah Sharif and of the honour, person and property of the people living in that holy city. The Council further urges upon the government of the Indian Union to take effective measures for the protection of mosques, *imambaras*, holy shrines, tombs and other sacred places in the Indian Dominion and to see that all such places which have been subjected to sacrilege and outrages are immediately restored to their original condition and effective arrangements made for their future protection.

"The Council of the All-India Muslim League views with great satisfaction the attainment of its main objective, namely, the establishment of Pakistan, and congratulates the Mussalmans of the Indian sub-continent on the sacrifices they have made for the achievement of their national goal. The Council feels confident that the unique struggle of the Muslim League for the establishment of a fully independent sovereign State, under the superb leadership of Qaid-e-Azam Mohammad Ali Jinnah, and its ultimate triumph in the birth of the largest Muslim State and the fifth largest of all States in the world, will go down in history as the most outstanding world event of modern times. The Council now calls upon the Mussalmans of Pakistan and all other loyal citizens of the State to

make the greatest possible contribution towards the building up of this new-born State so that in as short a time as possible it can attain an honourable position in the comity of the nations of the world as an ideal democratic state based on social justice, as an upholder of human freedom and world peace for which Islam stands, and as a country which will be strong in arms, rich in moral and material wealth, and in which all its citizens will enjoy equal rights and be free from fear, want and ignorance.

"Now that the main object of the All-India Muslim League has been fulfilled and India has been divided into two independent and sovereign States, certain changes are inevitable in the structure, objective, and policies of the All-India Muslim League Organisation. It is obvious that the Mussalmans of Pakistan and India can no longer have one and the same political organisation.

TWO LEAGUES

"The Council therefore resolves :—

1. (i) that in place of the All-India Muslim League there shall be separate Muslim League organisations for Pakistan and Indian Union,
 - (ii) that all members of the Council of the All-India Muslim League for the time being who have become ordinarily residents of the territories comprised by Pakistan or have settled therein and all Muslim members of the Pakistan Constituent Assembly who are primary members of Muslim League do hereby constitute the Council of the Pakistan Muslim League,
 - (iii) that all members of the Council of the All-India Muslim League who have become ordinarily residents of the territories comprised by the Indian Union or have settled therein and all Muslim members of the Indian Union Constituent Assembly who are primary members of the Muslim League do hereby constitute the Council of the Indian Union Muslim League,
 - (iv) that a Convener each be appointed of the Pakistan Muslim League and the Indian Union Muslim League, with instruction to convene at very early dates meetings of the two respective Councils as defined above, for the purpose of electing Office-bearers, framing the constitution and transacting such other business as arises by virtue of this decision,
 - (v) that the following be elected the Conveners respectively :

for the Pakistan Muslim League :—
Honourable Mr. Liaquat Ali Khan,

for the Indian Union Muslim League :—Mr. M. Mohamed Ismail, President, Madras Provincial Muslim League,
 - (vi) that the meeting of the Council of the Pakistan Muslim League will be held at Karachi and that of the Indian Union Muslim League at Madras.
2. That all primary members of the All-India Muslim League who are now ordinarily residents of Pakistan or have settled therein should be deemed *ipso facto* to have become primary members of the Pakistan Muslim League, and all members of the All-India Muslim League who are now ordinarily residents of the Indian Union or have settled therein be deemed to have become *ipso facto* primary members of the Indian Union Muslim League.

3. That when meetings of the respective Councils of the Pakistan Muslim League and the Indian Union Muslim League are convened, each Council shall elect its representatives, not exceeding 3 in each case, as members of a joint *ad hoc* Committee for the purpose of deciding how the Assets and Liabilities of the All-India Muslim League are to be equitably divided as between the Pakistan Muslim League and the Indian Union Muslim League. In the event of a difference of opinion in the *ad hoc* Committee the issues in dispute will be finally decided by the Quaid-e-Azam.
4. That in case of dispute regarding the membership of the Council a written declaration by an existing member of the Council of the All-India Muslim League to the effect that he is ordinarily resident of or has settled in Pakistan or Indian Union shall be conclusive.
5. That the existing Central Parliamentary Board of the All-India Muslim League shall continue to function in accordance with the Constitution and Rules for the Muslim League Organisation in Pakistan till such time as the Council of the Pakistan Muslim League meets and for the Muslim League organisation in Indian Union till such time as the Council of the Indian Union Muslim League meets.

MUSLIM POLITICS

The chief features of Muslim politics since the partition of the sub-continent are 1. a decline in strength and influence of the Indian Union Muslim League. 2. the rise in power of a number of non-League bodies like the Momins, Shias and more especially the Jamiat-ul-Ulema-e-Hind with which Maulana Azad is associated, 3. the dissolution of purely communal-political bodies, and a shift in their emphasis from political work to social, cultural, religious and educational work, 4. a concerted drive for communal harmony through the employment of peace missions. When at last the testing-time for Hindu-Muslim understanding came during the campaign in Kashmir or the police action in Hyderabad not only were peace and harmony fully maintained but Muslims of all shades of opinion declared with one voice their loyalty to the Indian Union and unqualified support to the Indian Government in the action they had taken against the Hyderabad State. There was, no doubt, at any time where Indian Muslims stood on that issue.

On the morrow of the Mahatma's assassination a number of communal-political bodies were dissolved by order of Government or they agreed to dissolve themselves or they just changed their field of operation from politics to culture though towards the end of the year signs of reversion to older programmes and politics began to appear. Controversy centred chiefly round the need for continuing the political activities of the Muslim League between the body that called itself the Indian Union Muslim League on the one hand and non-League Muslims on the other. While the Union Leaguers maintained that religious and cultural interests of Muslims could be safeguarded only through a political organization of Muslims, non-leaguers denied that there was any need for communal-political organization in a state which is resolved to be secular in character, and that safe-guards must be looked for from the good-will of the majority or specific provisions in the Constitution Act. Further, the non-League Muslims denied that the Madras meeting of ex-leaguers had any constitutional status since once the All-India body was dissolved (as was done at Karachi) a second body to take the place of the first could be recreated only by a general convention. It was pointed out that at the meeting of the Muslim League council held in Madras on March 10, 1948 only 30 out of 147 attended, and these thirty came chiefly from Madras, Bombay and the C.P. The overwhelming majority of the new office-bearers too belonged to the South, while the bulk of the Muslims in the Union and also

the more influential lived in the North. The U.P. for instance which could be regarded as the spiritual home of the old League was almost wholly unrepresented. Moreover the decision which came out of the Madras League proved totally unacceptable to the overwhelming body of Muslim opinion in the country. The decisions of the Madras meeting were in fact almost immediately repudiated by most of the old League bodies, the dissolution of which meanwhile went on apace. Some of these old bodies simply took on a new name, others reformed themselves on a non-communal basis, while yet others gave complete freedom to their members to join any party they wished with the recommendation that the most suitable party to join was the Indian National Congress.

Outside the League circle Maulana Azad worked tirelessly (partly on his own and partly through the Jamiat-ul-Ulema) to change the political outlook of the Muslims and to bring them into the Congress fold. For this purpose he issued an appeal on January 29, 1948 for a fund of 15 lakhs, for starting two weekly papers, one in English and one in Urdu and for carrying on a general campaign among Muslims so as to create in them a non-communal secular mentality. Maulana Azad's lead was followed by a great many leading Muslims. For instance, at a meeting of Muslim bodies of all shades of opinion including League held at Coimbatore on January 21, 1948 it was decided to follow wholeheartedly Maulana Azad's lead. Again at the Gujarat Muslim Conference held on February 21 and 22, 1948 a decision was taken to support Maulana Azad in his attempt to lead the Muslims back into the Congress. This meeting was presided over by Syed Abdulla Brelvi, who asked Muslims to abjure communal politics. He hoped that the meeting of the Muslims in Madras (which had not taken place then) would decide on dissolution. If Muslims were to be taken into Provincial Cabinets he declared the League Parliamentary Parties must be liquidated. The movement in favour of joining the Congress was further strengthened by the decision of the Momins to merge with the Congress. This decision was taken at a conference of Momni workers held at Kamptee in the C.P. The President of the Conference Abdul Quayum Ansari exhorted the Muslims to share power with other groups in the country in order to build up a free and powerful India. Muslims began to come into the Congress in large numbers. For instance in the Darbhanga District of Bihar 4,000 Muslim League members signed the Congress pledge, while according to a report by the Advocate-General of Assam the Muslims of Nowgong joined the Congress in a body. In Bombay this trend was particularly marked. The Bombay Provincial League proposed that the members of the League Party in the Bombay Corporation should join the Congress National group, though the Muslim League Corporation Party itself at a meeting held later decided to form itself into a non-communal party called the Peoples' Party. Later the working Committee of the Bombay Provincial League passed a resolution declaring that the League as such would take no part in politics and issued instructions to all affiliated bodies and Provincial Parliamentary Board that members were free to join any political party in pursuance of the Madras decision. At a meeting of leaders of Muslim Progressive Group held in Bombay on May 1, 1948 under the Presidentship of Dr. Abdul Hamid Kazi a statement was issued declaring that for political purposes all Progressive Muslims should join the Congress and for cultural purposes they should join the Jamiat. The General Council of All-India Majlis-e-Ahrar declared in a resolution passed at a meeting on January 14, 1948 that there was no need for any political party except Congress and that the Majlis-e-Ahrar, should from then on devote itself only to social service under the name Khudam-e-Khalq (servants of the people). Finally, a conference of Jamiat workers held in Bareilly (U.P.) asked its members to join the Congress and not participate in elections from the Jamiat platform. The affinity between the Congress and certain Muslim points of view

was further demonstrated by the passing of a resolution at a meeting of Nationalist Muslims at Nagpur advocating the merger of Bhopal State with adjoining States Union or the C.P. and Berar.

Similar developments were taking place in the Indian States. For instance, the Travancore and Cochin League bodies withdrew from all political activity and dissolved their parties in the legislature while the Executive Committee of the Mysore State Muslim League made it clear that it was concerned exclusively with the people of the State and had nothing whatever to do with outside bodies.

THE JAMIAT-UL-ULEMA

The body on whom Maulana Azad partly relied for support was the Jamiat-ul-Ulema whose rise in number and influence is one of the chief features of Muslim politics since the partition of the sub-continent. The Jamiat has had a long history of co-operation with the Congress and was one of the main political opponents of the League at a time when it needed great courage for a Muslim to oppose the League. The establishment of the Indian Union and the consequent eclipse of the League in India gave the Jamiat and an allied body the Majlis-e-Ahrar the opportunity for which they were waiting. The Jamiat began at once to grow in strength and influence. For instance, the Gujarat where it is a comparative newcomer it claims it has about 10,000 members who devote their attention to social and educational questions.

The Jamiat-ul-Ulema-e-Hind held its 15th annual session on April 27-28, 1948 in Bombay. On April 27 Pandit Nehru addressed the session and asked the Jamiat to work tirelessly for a secular state and strengthen the Indian nation. The session which was inaugurated by Maulana Azad decided to sever its connection with its counterpart in Pakistan, to eschew politics and devote its time to work for the amelioration of Muslims through religion, culture and education.

In 1949 the Jamiat held a session in Lucknow on April 17 under the Presidentship of Maulana Hussain Ahmed Madni. The session was attended by over 10,000 Muslims. Messages came from the Governor-General, the Prime Minister, the Deputy Prime Minister and the President of the Congress wishing the conference success and hoping that the deliberations of the conference will help to find the nation together and to build a secular state. The President of the session in his address reiterated the Jamiat's resolve to fight communalism and instil the concept of a united nation in the Muslim mind. He supported the adoption of Hindustani in both the Devanagari and Urdu script as the language that was born in India and was the mother-tongue of Hindus and Muslims alike. By another resolution the Jamiat transformed into a non-political body which was to concentrate on itself religious and cultural uplift of Muslims. Maulana Hifzen Rahman, who moved the resolution, explained that with the advent of freedom the political mission of the Jamiat could be taken as fulfilled. He exhorted the Muslims to learn the Devanagari script as a gesture of good-will and said that an attempt should be made to explain the principles of Islam in both scripts to promote better understanding between all sections of the people. Another speaker asked the audience not to look to Pakistan for inspiration or guidance. To do so, he declared, was detrimental to the real interests of the Indian Union Muslims. Reformation in Islamic civilization was necessary to ward off communalism. The speaker also pleaded for separate arrangements to give religious instruction to Muslim children. Earlier a conference at Bareilly had opposed the division of Kashmir.

PEACE ATTEMPTS

All through the period a number of attempts were made to promote peace and understanding between Hindus and Muslims, attempts which were to bear fruit later in the Hyderabad crisis. One of the means adopted was the despatch of

peace missions. Thus, peace missions of journalists and students from West Punjab toured East Punjab, while similar missions from East Punjab paid a visit to West Punjab. A goodwill mission headed by Maulana Abdul Rauf from Bareilly went to Pakistan and told meetings which it addressed that the only way of ensuring that Muslims in the Indian Union were well-treated was to treat the Hindus in Pakistan with generosity. Another goodwill mission organized by the Jamiat toured Hyderabad State. The object of the mission was to find out what service the members of the mission could be in the promotion of Hindu-Muslim Unity and concord. Other means to promote harmony were also adopted. In Gurgaon district for instance, an inter-tribal dinner of Meos and Jathas was arranged after which a peace pact was made between the two. The Meos were to give up cattle-lifting and cow-slaughter while the Jathas were to guarantee the Meos safe-passage. Thus communal and tribal animosity which went back to years seemed to disappear almost overnight. Cow slaughter has been a cause of frequent trouble in India, and attempts were made to persuade Muslims to give it up of their own accord. Thus at a joint meeting of Congress Muslims and the Jathas in September a resolution was passed appealing to Muslims not to sacrifice cows on the ensuing Eidul Zohra day. Yet another obstacle in the way of friendliness between the two communities was the forcible occupation of some of the 350 odd mosques by refugees in Delhi and the conversion of the rest into Gurudwaras or temples. It will be remembered that the restoration of the mosques was one of the conditions laid down by Mahatma Gandhi for giving up the fast which he undertook while in Delhi. By October about 250 mosques had been restored and it was expected that the remaining 100 would be handed in to the rightful owners in a short time. It may be mentioned that the mosques were willingly vacated by the refugees who were promised alternative quarters.

Stories of oppression of Muslims in India were stoutly denied by leading public men who bore ample witness to the secular nature of the Government of India's general policy and outlook. Thus Haj Kumari Anrit Kaur said in a speech which she delivered in London that Muslims in the Indian Union had the same rights as others and were living in perfect peace. Sir Mohamed Ueman, an ex-Governor of Madras said in answer to charges made in the Pakistan press that Muslims were far from being persecuted. They had the fullest religious liberty and there was complete peace and harmony between all communities. Maulana Azad in a speech which he made in Calcutta said that India was a secular state where Muslims had equal rights and privileges. It was the settled policy of the Government of India to fight communalism in every shape and form; no quarter would be given to communal organizations which engaged in political activity. All this constitutes so to say the general background of Muslim Politics. We may next proceed to give a chronological account of happenings as they affected Muslim Politics.

ARREST OF MUSLIM GUARDS

In a Home Ministry Statement issued on February 8, 1948 the Government of India declared the Muslim League National Guards and Khakhs organization unlawful. The ordinance was a direct consequence of the Government of India's determination to suppress all communal military formations on the morrow of the Mahatma's assassination. The ordinance applied only to the Chief Commissioners' Provinces which were directly under the Government of India, but the Governors' Provinces were expected to follow suit. The Government of India explained in a statement that the National Guards and the Khakhs were communal, semi-military and disposed to violence. They were collecting arms and were drilling with the ultimate object of disrupting the country in alliance with outside forces. The Muslim Guards with the R.S.S. shared the blame for creating a poisonous atmosphere in the country. The Khakhs for their part were

wedded to a doctrine of hate and violence and were carrying on ceaseless propaganda to prepare the Muslim mind for a Jihad. The statement declared that communal-military organizations had no place in the country as all citizens must rely for protection on forces of the Government.

When the Government of India's statement was issued Mr. Mohamed Ismail, the convener of the League Council hastened to appeal to Muslim Guard organizations to voluntarily suspend activity in response to the Government's order. Muslim Guard organizations in certain places like Ahmedabad and in West Bengal had, in fact, voluntarily dissolved two days before the official ban was imposed. Police raids were, however, carried out in Bombay, Poona, Nagpur, Jabalpur and Madras; some members of the organization were arrested. This led to a protest from Hajj Hassan Ali Ibrahim, the President of the Bombay Provincial League, who denied all Government charges about political disruption and maintained that Muslim Guards were only engaged in social service. Two other Muslim Leaders Hajj Ismail Saif and Mr. Hossain Imam also declared in a statement that in view of the fact that Government had full Muslim co-operation and that the Guards were in the process of breaking up, round up and arrest of Muslim Guard members had no justification.

LIQUIDATION OF LEAGUE BODIES

Meanwhile voluntary liquidation of Muslim League organisations was proceeding apace. Such of the organisations as did not break up excluded politics from their activity and decided to confine themselves to cultural pursuits. To give a few instances the following League organizations were reported as having been wound up in this order: Kaira Muslim League, Thana District League, Bhiwandil Nizampur Municipal Borough, Bombay Suburban Muslim League, Ahmednagar Muslim League, Assam Muslim Guards, Assam Provincial League, Lucknow City League, Surat Municipal League, the Ahmedabad Muslim League decided to confine itself to cultural activity.

In view of these developments it was generally expected that the Madras meeting of the Indian Union Muslim League Council would decide on voluntary liquidation. In the event however these expectations were disappointed. Bitter controversy preceded the Madras meeting, while Mr. Mohamed Ismail, the convener, held that the Madras meeting was legal and constitutional and that its decisions were binding on all members of the old organization resident in India. Dr. Syed Tajuddin, Mr. Abdul Latif Farooki and Mr. Shafie Mohammad, all from Madras criticized Mr. Ismail's decision to convene a meeting of the old League. The former two declared in a statement that the Muslim League stands automatically dissolved after the Karachi session, that the Madras body was a new organization and that therefore members were not bound by its decision. They further pointed out that there was no room in the country for communal organizations any more. The Muslim League Parliamentary Party in the Central Legislature went a step further. At a meeting held February 29, under the presidency of Nawab Mohomed Ismail it decided by a majority vote to dissolve with effect from February 30. The members from Bombay and Madras opposed the move and advocated postponement till the Madras meeting in March. But the majority took the view that in the highest legislative organ of a secular state the existence of a communal party was anomalous. Under a system of joint electorates such as they were going to have a communal party had little meaning. All questions that came up before the Assembly needed either a political or economic approach. In answer to a proposal that a decision should be postponed the majority contended that the Karachi resolutions were *ultra vires*, hence the organization that was to meet in Madras was not properly constituted. As a matter of fact, a Muslim League Party as such had ceased to exist in the Central Legislature long before the

decision to formally shut down the party was taken; members had been free to vote as they liked. But the decision to dissolve left the 27 members of the Muslim League in the Assembly unattached both in theory and in practice.

UNION MUSLIM LEAGUE

On March 10, 1948 the council of the Indian Union Muslim League met in Madras. Only 30 out of 147 members attended the meeting. After a discussion which took place behind closed doors and lasted 10 hours the meeting decided to retain the League organization which in future was to devote itself principally to religious, educational, social and cultural ends. A new constitution was to be framed by a sub-committee appointed for the purpose. This was the first meeting of the Indian Union half of the League after the break-up meeting of the parent organization in Karachi. The decision to retain the organization was greeted with a chorus of disapproval in the Muslim political world. Even in its home-town of Madras 10 members quit the Madras Legislative Muslim League Party. In their letter of resignation they explained that the decisions of the Madras meeting were in the interest neither of the country in general nor of Muslims in particular. Criticism from elsewhere was equally scathing.

The Madras decisions had indeed little or no influence on the general drift towards secularization in the political life of the country. On March 18 the West Bengal Muslim League Parliamentary Party was dissolved. The Assam League Parliamentary Party followed suit two days later, on March 20. It assumed a new name and drew up a new programme but continued to remain in operation. On March 30 the Bombay League Parliamentary Party after a meeting that lasted two days decided to shed its communal character and form itself into a new party called the Fourth Party open to all who subscribed to the programme drawn up at the Madras meeting. Economically the programme followed a middle course between Marxian and laissez-faire. It opposed nationalization but asked for full opportunity for employment for all. Other items in the programme were liquidation of illiteracy and support for small scale industry. On May 31 the U.P. Muslim League meeting in Lucknow decided to give up politics and confine its activities to social and cultural spheres. The party in the Legislature was dissolved, and the Parliamentary Board abolished.

HYDERABAD CRISIS

While the relations between India and Hyderabad were moving into a crisis Muslims of all shades of opinion and from every part of India spoke up in a manner that left no doubt about their loyalty to the country of which they were citizens. Muslim opinion in India was particularly roused by Kasim Razvi's reported boast that part of his mission was to free Indian Muslims from Hindu bondage and that when the Indian Army marched into Hyderabad Muslims in India would rise as one man against the Government. Five leading Muslim members of the Constituent Assembly Hossain Imam, Begum Aizaz Rasul, Hajj Ismail Saif, Mohomed Syed Taher Jaffer Imam and Naziruddin Ahmed at once replied with a statement in which they said that Kasim Razvi's boast was utterly fantastic and that Indian Muslims would remain solidly behind the Government in whatever action they might take against Hyderabad. This was followed by a similar statement by the President of the Indian Union Muslim League who said that there was no support whatever among Muslims for Kasim Razvi's fanaticism. Messages from Muslims poured in from all parts of the country denying Kasim Razvi's claim to be world-be saviour of Islam and pledging absolute loyalty to the Indian Union.

Thus Professor Abdul Majid Khan on April 28 in New Delhi and Abdul Quayyum Ansari on April 29 in Calcutta declared that all Muslims were loyal to the core and would not be seduced from their duty. Mr. Mohomed Ismail asked

Muslims at a meeting in Madras on May 9 to wholeheartedly co-operate with the Government in the maintenance of law and order. Anjuman Pukhtoon, the Pathan representative, organized a meeting in Bombay started of which they mination to stand by the country of which they were the citizens. Mr. Abdul Sattar, Muslim League M.L.A., vigorously protested against Kesho Razvi's statement about liberating Indian Muslims. A meeting of the Muslims of Bihar condemned the policy of the Nizam and asked for the disbandment of the Razakars. A joint statement issued by a number of prominent Muslims in New Delhi on June 10, 1948 appealed to the Nizam to consent to the Draft Agreement. Haji Hassanally P. Ibrahim, President of the Bombay Provincial League requested Mr. Mahmud Ismail to hold a meeting of the Working Committee to reassess public opinion about Muslim intentions.

Such reassurance was badly needed as suspicion still lingered that Muslims were in secret sympathy with the Nizam's Government and might make trouble if India decided to take action against Hyderabad. For their part the Muslims were a little bewildered for they did not know what exactly they were expected to do beyond what they had already done. This sense of bewilderment was forcibly expressed by Mr. S. G. Kazi, the General Secretary of the C.P. Muslim League and by Syed Abdur Raut Shah, the President. The former in the course of a call to Muslims to unite with the Hindus in the face of the threat from Hyderabad appealed to the Government to remove all suspicion and devise practical means of achieving closer understanding between Hindus and Muslims. The latter in a statement issued on September 8 expressed the view that Muslims were suffering from a feeling of isolation and frustration and that Government should somewhat modify its attitude of critical aloofness.

DECLARATIONS OF LOYALTY

Meanwhile as the day of police action in Hyderabad was drawing near, renewed declarations of support came from leading Muslims and representative Muslim bodies. Indeed there was hardly any Muslim organisation or leader who did not make it plain beyond a shadow of doubt that Muslims were as much a part of the Indian nation as the Hindus were and would fight for their country as wholeheartedly as the Hindus did if the call ever came. Instances on the statement issued in Patna on August 12 by 26 prominent Muslim leaders of Bihar including Dr. Syed Mahmud, Sir Sultan Ahmed, Nawab Ali Sajjad, Nawab Mubarak Ali advocating the formation of a united front in the face of the threat from Hyderabad. The Bihar Leaders' statement was followed by a statement from League leaders in West Bengal who warned Pakistan to keep off Hyderabad which they said was a purely domestic issue. Those who signed that statement included the President of the Calcutta Jamiat and a former mayor of the city.

Then there was the Khoja Conference that met in Bombay on August 13 under the Presidency of Huseinbhoy A. Lalljee. The Shias, too, who number twenty millions sent in their message of loyalty through the President of the All Parties Shia conference on August 15. On September 19, the Mulla Sahib of Dawoodi Bohra Community asked the Government of his community's complete support.

When police action was in full swing the Maharajkumar of Mahmudabad of the C.P. Socialist Party in a statement welcomed the Government of India's action intended to set free an oppressed and helpless population from a barbarous tyranny. The Muslims of Jubharpore scathingly condemned Razakar atrocities at a public meeting while a meeting of the Muslims of Outback described the issue between India and Hyderabad as antiquated feudalism vs. progressive democracy.

Everyone heaved a sigh of relief when the police action ended without a single untoward incident. Maulana Azad issued a statement in New Delhi on September 20 congratulating the

Muslims on their unanimous support of the Government. He said that Muslim behaviour had created a tremendous impression at home and abroad. The future of the Muslims in India was now assured. The President of the Indian Muslim League spoke in a similar manner in a message on the 1st day. He said that the loyalty of the Muslims was proved; suspicion and doubt had now lifted.

Four months later at a meeting of the Muslims of Calcutta on January 28, 1949 Maulana Azad sounded a hopeful note. India, he declared, was a secular state where all communities had equal rights and privileges. In all Provinces the League was liquidated while the communal situation in general was improving. If communalism reared its head again it would be mercilessly put down. In conclusion Maulana Azad appealed to the Muslims for unqualified support to the Government of India.

The Pakistan Press had indeed reported mass arrests of Muslims in India during the police action. These reports were, however, denied by the Government of India who explained that there was no need for such arrests as the Muslims were wholly with the Government in its decision to restore order in Hyderabad. The only action of any importance which the Government took was the detention of the President of the Bombay Provincial League under Public Security measures soon after he had arrived in Bombay from Karachi on September 6.

A certain communal element remained in the politics of the Indian Union Muslim League, whose working Committee held an important meeting in Madras on February 1 and 2, 1949. It passed a number of resolutions one of which offered assistance and co-operation to the Government in view of the threat of anarchy, a second welcomed the genuinely friendly attitude of India and Pakistan in their mutual relations and the determination to solve the issue of Kashmir in a peaceful and democratic manner. Another resolution reiterated the demand for separate electorates and requested the Constituent Assembly to reconsider the question and do justice to minority communities. The Committee also appealed to the Government to help the return of those Indians who wanted to return from Pakistan. It deplored the action of the Government in totally banning cow-slaughter and asked for the relaxation of the measure in the case of non-servicable cattle.

Down below are given more particulars about the Indian Union Muslim League and the full texts of the resolutions which it passed at various meetings.

INDIAN UNION MUSLIM LEAGUE

President, M. Mohamed Ismail Sahib, M.L.A., M.C.A., Madras.

Secretary, Mahboob Ali Baig Sahib, B.A., B.L., M.L.A., M.C.A., Bezawada.

Treasurer, Haji Hassanally P. Ibrahim Sahib, M.L.A., Bombay.

WORKING COMMITTEE

M. Mohamed Ismail Sahib, M.L.A., M.C.A., Madras; Mahboob Ali Baig Sahib, B.A., B.L., M.L.A., M.C.A., Bezawada; Haji Hassanally P. Ibrahim Sahib, M.L.A., Bombay-3; S. A. Rauf Shah Sahib, B.A., L.L.B., M.L.A., Nagpur City-2; B. Pocker Sahib, B.A., B.L., M.L.A., M.C.A., Madras; K. T. M. Ahmed Ibrahim Sahib, B.A., B.L., M.L.C., M.C.A., Madras; A. A. Khan Sahib, M.A., L.L.B., M.L.C., M.C.A., Poona Cant.; Abdul Khader Mohamed Shaik Sahib, M.L.A., M.C.A., Surat; Haji Mohamed Ismail Sahib, B.A., B.L., M.L.A., Bellary; K. M. Seethi Sahib, B.A., B.L., M.L.A., Telicherry; N. Malabar; Abdulkarim Hattika, B.A., Bombay; 3; M. A. Majid Khan Sahib, Varamjpet, South Coorg; H. M. Ismail Sahib Tabish, Bangalore; Mohamed Yusuf Shariff Sahib, Nagpur.

The following are members from the Indian Union Muslim League to the Ad Hoc Committee for dividing the assets and liabilities of the All-India Muslim League:

K. M. Seethi Sahib, M.L.A.

Haji Hassanally P. Ibrahim Sahib, M.L.A.

Mohamed Hidayat Ali Sahib, M.L.A.

CONSTITUTION

At a meeting of the Council of the Indian Union Muslim League held on March 10, 1948 in Madras a sub-committee was constituted to frame a constitution and the sub-committee was asked to submit its report before June 10, 1948, that is to say, within three months. The members of this sub-committee are: M. Mohamed Ismail Sahib, M.L.A.; A. A. Khan Sahib, M.L.A., M.C.A.; Haji Hassanally P. Ibrahim Sahib, M.L.A.; S. A. Rauf Shah Sahib, M.L.A.; Abdul Khader Hattika Sahib; B. Pocker Sahib, M.L.A., M.L.C.; Mahboob Ali Baig Sahib, M.L.A., M.C.A.; Mohamed Raza Khan Sahib, M.L.A.; Ismail Tabish Sahib, M.L.A.; P. K. Mohideen Kutty Sahib, M.L.A.; K. M. Seethi Sahib, M.L.A.; H. Yusuf Shareef Sahib, M.L.A.; Abdul Khader Shaik Sahib, M.L.A., M.C.A.; Abdul Abdus Sattar Haji Ismaeq Sait Sahib, M.C.A.

Meanwhile according to a resolution passed at the same Madras meeting the present constitution of the All-India Muslim League will remain the constitution of the Indian Union Muslim League with certain minor changes such as change in name.

Certain directives were given to the constituent sub-committee about the lines on which the new constitution was to be drawn up. For instance, the constitution should be independent of the constitution of the Pakistan League, the framers should keep in mind the radically changed conditions in the country and the supreme necessity for Hindu-Muslim unity, communal good-will and understanding in general. Further, the new constitution should provide for the League joining any other political party that can deliver the goods for the people.

MARCH RESOLUTIONS

Here are the full texts of the more important resolutions passed at the Madras meeting of the Council of the Indian Union Muslim League held on March 10, 1948:

"... It shall be the wholehearted and devoted endeavour of the Muslim League to bring about perfect harmony and good-will and mutual understanding among the various sections of the people of the country ensuring the swiftest possible progress of the people towards prosperity and happiness. This meeting calls upon all the Muslims to co-operate in every possible way with other organisations and parties in the matter of the establishment of peace and harmony between the various communities.

"... The Muslim League shall now devote its attention principally to the promotion of the religious, cultural, educational and economic interests of the Muslims of the Union.

"With a view to contributing to the post-independence nation-building activities in the country this meeting formulates and adopts the following constructive programme... In the execution of the said programme the parties may combine or co-operate under any name they choose with any other parties, groups or individuals in the land whose economic programmes are identical with or approximate as far as possible to the said programme.

"... The following principles shall be observed in the production and distribution of wealth:

The State shall guarantee to each man full opportunity for employment and provide for social security in the case of sickness, disability, old age, unemployment and death in the shape of insurance or out of a fund to be built up with contributions by the employees, employers and the State in such proportions as may be fixed.

The State shall prohibit all interests of whatsoever kind . . .

The institution of property shall be recognized by the State but only as a trust of which the owner shall be the trustee with himself, his family and dependants as first beneficiaries to the extent of comfortable subsistence and with the nation as a whole as the beneficiary of the remainder in the manner and to the extent that may be considered just and equitable by the State, according to the circumstances, prevailing at any particular time; provided however that the owner shall not be precluded from using the remainder for further creation of wealth, if not so required by the State . . .

The State shall prohibit the use of liquor and gambling and wagering of whatsoever kind or character.

The State shall prohibit corners and monopolies and anything which results in locking up wealth or means of production with a view to any person deriving undue advantage, by doing so, over others.

The State shall prohibit the acquisition of wealth through manufacture and sale of liquor, gambling and wagering, corners, monopolies and human exploitation and shall besides punishing the offender confiscate all property acquired as aforesaid . . .

All lands and minerals and other things found in the earth or on its surface shall be the property of the State, subject to the proviso that land already in possession of any person shall not be taken away from him but shall be available to him for personal cultivation and use only; and the possessor of the land in which mines and minerals have been found above the surface shall not be entitled to any share of the produce, the whole going to the State in the case of surface mineral. If the State allows the persons possessing land in which minerals have been discovered below the surface to work the mines the person possessing the land shall be entitled to 1-5th share in the net profits.

The person in possession of land who is unable to cultivate it personally shall lease it to any one, who is willing to cultivate it on a nominal rental, covering land revenue and such benefit of the improvements which the persons in possession might have made in the past, as the State may determine.

In the case of building, the owner shall be entitled to the income of the land based upon the calculation mentioned above as much nominal rental for the structure, as the State may fix . . .

The State shall provide means of improved agricultural and irrigation facilities and shall not charge any fee thereupon which is based upon capital expenditure.

Grazing land shall be open to all for free grazing.

All Railways, Airways, Posts and Telegraphs, irrigation and generation of electric current and mines shall be the property of the State but nationalization shall be confined within the narrowest scope possible to be determined by the largest measure of public utility in other directions.

The State shall provide free and compulsory primary education and shall give adequate aid to institutions imparting secondary and higher education and undertaking scientific research.

Illiteracy shall be liquidated in the shortest period possible by making provision for adult education.

Free medical service including hospitals shall be established to improve public health, with periodical medical and free x-ray examinations in the case of children attending schools and colleges.

"This meeting of the Council of the Indian Union Muslim League views with great alarm the communal disturbances that have taken place in certain parts of the Indian Union resulting in loss of life, damage and destruction of

property and desecration of mosques and mausoleums and deeply sympathises with the victims of such disturbances and appeals to Muslims as well as others to continue to keep calm and peaceful even under provocations and co-operate with the Government in their efforts at keeping law and order, peace and good-will in the country."

"This meeting views with great regret and grave concern the arrests and detention of Muslims and searches of houses, mosques and other sacred places and other coercive and discriminatory steps taken against the community including workers of the Muslim League, former members of the Muslim National Guards and Muslim Labour Unions in the different provinces of the Indian Dominion after the 15th August 1947 without making any definite charges against them and bringing them to trial, thereby causing a sense of insecurity in the minds of the Muslims of the Dominion, and requests the Central and the Provincial Governments to order the immediate release of all those who are under detention."

"This meeting places on record its definite opinion that in view of the fact that the Muslim National Guards were intended for, and were always engaged in peaceful and lawful activities mainly consisting of social service, the action of the Central and the Provincial Governments in banning the Muslim National Guards is absolutely unwarranted and unjustified. But however this Council confirms that the Muslim National Guards Organisation do stand discredited and disbanded as already announced by the Convener of the Indian Union Muslim League."

MAY RESOLUTIONS

Here are the full texts of the more important resolutions passed at a meeting of the Working Committee of the Indian Union Muslim League held on May 30 and 31, 1948.

"While appreciating the sincere and earnest efforts made by the Government of India for the speedy rescue of abducted women, the restoration of the places of worship and the rehabilitation of the unfortunate people who were forced to leave their hearths and homes under extraordinary and unfortunate circumstances and who have now returned to their new places, this meeting appeals to the Government of India to continue their laudable efforts in this behalf with greater vigour and request the Indian States concerned to show greater earnestness and extend better co-operation to the Government of India in achieving this object."

"The Working Committee views with gratification and hope the strenuous endeavours made by the Indian Dominion and Pakistan through Inter Dominion Conferences to settle their outstanding differences and to find a solution of the problem of minorities in both the Dominions and expresses its wish and prayer that the said endeavours might meet with unqualified success so that both the Dominions might live and prosper as good neighbours with happy and contented minorities."

"The Working Committee views with satisfaction the marked and steady improvement in the inter-communal situation in the country in spite of the most unfortunate happenings which took place after 15th of August 1947 and appeals to all the communities in India to adopt an attitude of toleration and mutual respect and to live in perfect harmony and peace."

"The Working Committee records its emphatic protest against the resolution moved by Mr. Ananthasayanam Iyengar in the Dominion Parliament regarding communal organisations and accepted by the Government of India inasmuch as it will, if implemented undoubtedly tend to suppress the right of association and self-expression, guaranteed to the citizens of the Dominion of India in the Draft Constitution and stifle the only mode of political expression open to minorities like Muslims and request the Government of India not to take any action in pursuance of the said resolution so as to interfere

with the right of political association of religious and communal minorities which is not denied to them in any other civilised country."

"The Working Committee views with grave concern the continued incarceration of several members of the Muslim League and the Muslim National Guards Organisation in spite of the social and peaceful character of their activities and in spite of the dissolution of the Muslim National Guards Organisation and the undertakings given by the detenus concerned that they will not have anything to do with the organisation banned by the Government, and urges on the Government the necessity and justice of ordering their immediate release."

"This meeting views with alarm and resentment the failure of the Draft Constitution of India prepared by the Sub-Committee of the Constituent Assembly, to provide for effective representation in the Legislatures of the country for minorities like Muslim by taking away their right of electing representatives through separate electorates which has been recognised by successive Governments of the land and which they have been enjoying uninterruptedly for a long time and appeals to the Constituent Assembly to retain the existing method of representation enjoyed by Muslims so as to enable them to send their true and real representatives to the Legislatures and also to recognise the right of imparting religious instruction to the Muslim boys and girls in educational institutions."

"This meeting views with grave concern and anxiety the steps taken by some Provincial Governments by which Muslims have been completely excluded from certain services and the Home Guards and the selections of Muslims already made for certain appointments have been cancelled and points out to the Government that such steps raise a legitimate apprehension in the minds of the Muslims that a policy of unjust discrimination is being pursued against them by such Governments and appeals to the Governments concerned to extend to the Muslims a just and fair treatment to which they are legitimately entitled as citizens of the Indian Union."

"This meeting greatly deprecates the action taken by some Provincial Governments to abolish some of the important educational facilities which Muslims were enjoying hitherto and which have admittedly contributed to a very large extent to the little progress which Muslims have made in the educational field like the Muslim educational institutions which are open to non-Muslims also and the special Muslim Inspectorates and expresses its apprehension that the said action will have the sure effect of retarding the progress of Muslim education and depriving the Muslims of the fundamental right of retaining their culture which is guaranteed to them by the Draft Constitution."

FEBRUARY RESOLUTIONS

And here finally are the full texts of the more important resolutions passed at a meeting of the Working Committee of the Indian Union Muslim League held in Madras on February 1 and 2, 1949:

"This meeting places on record its deep sense of grief at the sad demise of Qaid-e-Azam Mohamed Ali Jinnah whose invaluable and unique services to the Country in general and the Muslims in particular have secured for him an abiding and unique place in the history of the world and whose inestimable leadership would have been of grave service and utility in the present international troubles and prays to Allah for the peace of his soul."

"This meeting congratulates the Muslims of the Indian Union on their having clearly and unambiguously demonstrated their identity with the interests of the Indian Union despite the unwarranted and unjustified suspicions engendered in certain quarters about their attitude and the various difficulties placed in their way. This meeting appeals to the Muslims, particularly in view of the confusion, anarchy and violence prevailing in some of the adjoining

countries and of the game of power politics in which the powers of the world are now engaged, to continue in their active assistance to and co-operation with the Government in eliminating all subversive activities from the land and in maintaining law and order so that the hands of the Government may be strengthened and the State may become an increasingly powerful and effective instrument of not only bringing prosperity and happiness to the people of the land but also of establishing lasting peace, good-will and happiness in the world."

"This meeting views with gratification the continued and steadfast adherence of the Muslims of India to the Indian Union Muslim League, their sole representative organisation and appeals to them not to be misguided by the interested and baseless propaganda that is still being carried on in certain quarters against the League in spite of the fact which must be obvious to every right and fair-minded person that a political organisation alone can really and effectively safeguard the religious, cultural, economic, educational, social, and other rights and interests of the Muslims and invites the pointed attention of the public to the utter failure on the part of the Muslims belonging to the so-called non-communal organisations even to raise their voice in defence of matters vitally affecting the religion and culture of the Muslims, such as Personal Law, religious instruction and the legitimate place of Urdu in the scheme of education as borne out by the recent proceedings of the Constituent Assembly."

"This meeting reiterates its firm conviction that the only just, equitable and effective method of enabling minority communities to elect their real representatives enjoying their confidence and able to voice forth their feelings needs and grievances and to create in their minds a sense of security and contentment and a feeling of cordiality towards sister communities is to provide for their representation through separate electorates and that as such, separate electorates will be a potent factor for creating and maintaining contentment, cordiality and harmony in the country as a whole, apart from their vital need in the interests of the minority communities, and regrets that the Constituent Assembly has decided to abolish such electorates."

"This meeting therefore request the Constituent Assembly to reconsider the matter and do justice to the minority communities by restoring separate electorates and further strongly condemns the attempts made in some quarters to abolish even the reservation of seats provided for in the Draft Constitution in accordance with the decision of the Constituent Assembly arrived at last year."

"This meeting lends its unequivocal support to the laudable efforts of Pandit Jawaharlal Nehru, the Prime Minister of India and the Government of India to meet the aggressive action of the Dutch in Indonesia and to put an end to colonialism in Asia and elsewhere by mobilising the public opinion of the world in general and of the Asian Countries in particular and congratulates Pandit Nehru on the wise and bold steps taken by him to vindicate the cause of justice and the honour of the Indonesian Republic."

"This meeting welcomes and fully endorses the genuine, helpful and friendly attitude of both the Governments of India and Pakistan in regard to their mutual relations in general and in regard to the Kashmir question in particular and fully supports the decision of both the Governments to solve the problem by the democratic method of free and peaceful plebiscite and earnestly hopes that the cordial relations started so happily would be further strengthened and perpetuated."

"This meeting views with alarm and grave concern the failure of the Constituent Assembly to provide for the continued preservation and protection of the Personal Laws of the Muslims and other religious communities, religions instruction in educational institutions and the imparting of primary education through the medium of the mother-tongue in spite of the

repeated efforts and representations made by the representatives of the Muslim League in that behalf and earnestly appeals to the leaders of the Majority Party in the Constituent Assembly to have these important and vital matters reconsidered and justice done to the communities concerned."

"This meeting views with grave concern the provisions so far passed by the Constituent Assembly subjecting to Legislative interference even the fundamental rights of a Citizen regarding life and personal liberty."

"This meeting recalls the resolution passed by the Working Committee at its meeting held in May 1948 regarding the unsympathetic attitude adopted in some provinces towards Muslims in the matter of appointments in Public Services and appeals to the Central and Provincial Governments to be just and generous to Muslims in the matter of recruitment to Public Services especially in view of the fact that they were underrepresented in Services for several decades and as an earnest of that policy to direct the appointment of those Muslim Candidates who were selected but were later informed that their selections were cancelled on the ground that the percentage of representation available for Muslims was already filled up."

"This meeting invites the attention of the Central and the Provincial Governments to the great hardship caused to Indian Nationals who went to Pakistan for business and other purposes and who now desire to come back and settle down in the Indian Union by their not being allowed to do so when they apply for the necessary permission in 'A form' and requests them that in the case of such applications permission may be freely given so that our nationals may not meet with difficulties in returning to and living in their native places. This meeting further requests the Governments concerned to reconsider all those cases wherein they have refused such permission and also permit Indian nationals who came here from Pakistan with temporary permits to settle down here if they express a bona fide desire to do so and to drop the prosecutions pending against some of them for failure to return to Pakistan within the prescribed time."

"On a consideration of the resolution of the Central Council of the Travancore State Muslim League on the formation of the Kerala Muslim League Federation, this meeting approves of the principle of forming such a federation consisting of the District Muslim League of Malabar and the State Muslim League Organisations of Travancore and Cochin and of affiliating the same to the Indian Union Muslim League."

"This meeting deploras the action taken by certain Provinces and States totally prohibiting the slaughter of Cattle without any reference to the economic utility of the Cattle concerned and to the fact that beef forms an important article of food for Muslims and a very large number of members of other Communities, particularly the poor among them. This indiscriminate prohibition is a source of serious hardship not only to the consumers but also to the very large class of poor people dealing in meat. The prohibition of the slaughter of non-serviceable cattle will, moreover, work as a heavy handicap on the agricultural economy of the land. This meeting, therefore, urges upon the Central, Provincial and State Governments to have the said prohibition relaxed so as not to cover at least the non-serviceable cattle."

HISTORY

The awakening of political consciousness among Muslims in the sub-continent as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties, and differences set

in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire to a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on an aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation.

An attempt was made early in 1934 to consolidate the community by healing the splits within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as one of the most powerful organisations of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation although the success of League nominees was not very striking. Doubtless Qaid-e-Azam Mahomed Ali Jinnah, who was the guiding spirit behind this new activity, was handicapped by fiaspicious tendencies and reactionary forces in distant provinces beyond the sphere of his direct influence. This was soon rectified by the growing influence of the leader and the League among the Muslims.

The leader's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the sub-continent. At Lucknow in 1937 its creed was tightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounted to a demand for secession.

The Muslim League gathered strength as the years rolled by, especially during the war when the Congress was in jail and there was no effective opposition to the League. An attempt was made by Lord Wavell in the summer of 1945 to form a coalition government including the Congress and the League as a temporary measure without prejudice to the claims and aspirations of the two organizations. This move failed and elections were ordered through the country. The League came on top at the polls, and soon after the British Government sent a Cabinet Delegation to settle the Indian problem once and for all.

The Delegation, after elaborate investigation and personal discussion, came to the conclusion that Pakistan was impracticable and inadvisable. It decided to set up a Constituent Assembly to frame a three-tier constitution, comprising a limited union centre, three groups of contiguous provinces (one in the north-west, the second in the centre and the third in the east), and 11 provincial constitutions. It also decided to set up an interim government, pending the evolution of a future constitution. The League at first accepted the British Cabinet Mission's proposals, but later went back on its decision and resolved upon direct action. In the late autumn of 1946, the League again decided to co-operate and sent its nominees to the Interim Government at the centre formed earlier by the Congress.

Down below the foregoing events are reviewed in greater detail.

Shortly after the 1936 elections, the Qaid-e-Azam explaining the position of the League members of provincial legislatures *vis-à-vis* other groups said: "The constitution and policy of the League do not prevent us from co-operation with others. On the contrary, it is part and parcel of our basic principle that we are free and ready to co-operate with any group or party from the very inception, or inside the legislature. If the basic principles are determined by common consent."

These words engendered a hope that the League might be induced to co-operate with the Congress and negotiations were started, but it soon became apparent that the two could not come together. The situation was rendered more difficult by the attitude of stiffness adopted by the Congress and its President, Pandit Jawaharlal Nehru. The Qaid-e-Azam refused to convert the League into "an understudy of the Congress" and firmly upheld the position of the Muslim community. The Congress, for its part, found as the result of the elections that it did not have the support of the Muslim community. Very few Congress Muslims were put up as candidates for the elections, and even the few who were put up failed. The Congress, therefore, sought to bring in the Muslims by an appeal to economic considerations, explaining that the Congress was out to alleviate the sufferings of the masses, Muslims as well as Hindus, and to uplift the nation as a whole. In this process the League and its leaders came in for a great deal of criticism at the hands of the Congress leaders. On behalf of the League the Qaid-e-Azam retorted: "The Congress have not the monopoly, nor are they the sole custodians of Indian nationalism. As I have always maintained, the Muslim League is prepared to join hands with any progressive party in the fight for the country's freedom, but to achieve this the question of minorities must be settled satisfactorily. Here I am not talking of only Muslims but all minorities. Further, we are not prepared to merge ourselves into any organisation, however great it may be, and however advanced its programme and policy may be unless it is determined by common consent."

In what may be described as non-Muslim provinces that is, those in which the Muslims are in a minority—the Congress, however, formed Ministries without the co-operation of the Muslim League. Attempts were made to arrive at an understanding with the Muslim League, but they failed mainly on account of the Congress demand that wherever such an understanding was reached the Muslim League should cease to be a separate parliamentary body and merge itself into the resultant Congress-League Party. When the Muslim League refused to join the Government minority representation was secured by appointing non-League Muslims as ministers.

Simultaneously an attempt was made to approach the Muslim masses direct through an economic and political programme. For a time this appeared to succeed, but eventually failed to achieve its object. The League leaders counteracted the Congress propaganda by pointing out to the Muslim masses that their true interests lay in their organisation under the banner of the League which alone could serve them truly. The League's counter-drive succeeded in a large measure aided by allegations that in provinces where the Congress was running the Government the Muslim minorities were not treated well. The widening gulf between the Congress and the League gave an additional stimulus to the consolidation of the Muslim forces under the League which found fruition at the Lucknow session of the League in the autumn of 1937.

Complete Solidarity.—The session was unique in several respects. For the first time in the history of the Muslim organisational movement, complete unity was achieved, and every section of Muslim opinion, including those which till then had been opposed to the League or outside it, rallied round the League. There was no dissentient voice and Muslim political

unity was complete. The Muslim League emerged the one strong and influential political organisation of the Muslim community.

The session changed the creed of the League to "the establishment in India of full independence in the form of a federation of free democratic states in which the rights and interests of the Muslims and other minorities are adequately and effectively safeguarded in the constitution." (For details of the proceedings of this session, see *Indian Year Book*, 1938-39.)

The foundations of Muslim solidarity laid at the Lucknow session of the League in the autumn of 1937 proved very strong indeed. The League grew from strength to strength in the two succeeding years and League's spokesmen claimed that it was the only mouthpiece of the Muslims, and one might have been inclined to recognise that claim but for the existence of other organisations in the community with more or less following and influence, not excluding a large number of Muslims who were members of the Congress.

With the outbreak of the war and the changes it wrought in Indian politics, the League found itself in an extremely advantageous position. Whereas the Congress lost through the resignation of its ministries such bargaining power as it had while in office, the League acquired some indirect power through the international complications that resulted from the war.

Again, whereas the Congress had alienated the sympathies of the Indian Princes by sponsoring and encouraging agitation for responsible government for the States people, the League earned the friendship of the Princely order by condemning such activities and upholding the rights and privileges of the Indian Princes in any revision of the Indian Constitution. In yet another direction the League manoeuvred itself into a comfortable position; whereas, the Congress categorically withheld its co-operation from the war, the League abstained from taking any such attitude and merely insisted on the satisfaction of its claims prior to making up its mind. Even this was only its official attitude. Most of its individual members were in favour of wholehearted co-operation with the war effort.

NO MAJORITY RULE

Side by side with the demand for the redress of Muslim grievances and the assertion that their full and free consent should be obtained before any change in the Constitution was attempted, the League continued its campaign against the Congress ministries (see past issues of the *Indian Year Book*). Apart from the "atrocities" which, the League declared, had been perpetrated on the Muslim minorities in the provinces administered by the Congress, the League made a fresh point which was soon to become the nucleus of a serious development in Indian politics.

In a resolution passed in September 1939, the Working Committee of the League said: "The developments that have taken place, especially since the inauguration of the provincial constitution based on the so-called democratic parliamentary system of government and the recent experiences of over two years, have established beyond any doubt that it has resulted wholly in a permanent communal majority and the domination by the Hindus over the Muslim minorities, whose life and liberty, property and honour are in danger, and even their religious rights and culture are being assailed and annihilated every day under the Congress Government in various provinces.

"While Muslim India stands against exploitation of the people of India and has repeatedly declared in favour of a free India, it is equally opposed to domination by the Hindu majority over the Mussalman and other minorities and vassalisation of Muslim India, and is irrevocably opposed to any federal objective which must necessarily result in a majority community rule under the guise of

democracy and parliamentary system of government. Such a constitution is totally unsuited to the genius of the peoples of the country, which is composed of various nationalities and does not constitute a national state."

This attack on provincial autonomy and on majority rule was an altogether new line which was struck almost for the first time by the League. Till then the Muslim demand had always been for effective safeguards for the protection of the Muslim community's religious, cultural and other rights; now the Muslims began to question the very basis of democracy and declared that western democracy in the sense of rule by majority was unsuitable. This was later developed into the theory that Muslims were a nation by themselves and not a minority in the Indian population. And by and by this theory in its turn led to a demand for a separate State.

In the succeeding weeks numerous attempts were made to ascertain the grievances of the Muslims and to find out whether they were genuine—in other words, whether the Congress ministries had been guilty of oppressing them or even neglecting their interests. But very little came out of them.

Meanwhile, discussions in the political field continued and early in October 1939 the Viceroy called into consultation leaders of all sections of opinion in India with a view to ascertaining their wishes in the matter of constitutional reform. On the conclusion of these consultations, the Viceroy issued an exhaustive statement on Britain's War aims *vis-à-vis* India.

It gave the Muslim community the requisite assurance concerning its status in future adjustments. This is reflected in the resolution passed by the Working Committee of the League which met in Delhi towards the end of October 1939. The Committee hailed the Viceroy's statement as a new charter of hope for the minorities and as a recognition of the League's right to a decisive say in future constitutional arrangements. From this resolution one can infer that the League found in the Viceroyal declaration an acknowledgment of the League's status as an essential factor in any political development on the all-India plane.

SEPARATION

To return to the Muslim League. As already stated, the idea of Muslims being a nation gathered strength during 1939-40, in which period a number of schemes for the formation of a Muslim bloc of autonomous states were mooted. For a time they were not regarded seriously, but from the proceedings of the annual session of the League held in April 1940, it became clear that the Muslim League was serious about partition. At Lahore, the Muslim community, as represented by the Muslim League, declared in unmistakable language for Muslim independence.

The principal resolution of the session which was in effect the first categorical demand for Pakistan, a resolution which was carried unanimously, ran:—

"While approving and endorsing the action taken by the Council and the Working Committee of the All-India Muslim League, as indicated in their resolutions dated the 27th of August, the 17th and 18th of September and 22nd of October, 1939, and the 3rd of February, 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of Federation embodied in the Government of India Act, 1935, is totally unsuited to and unworkable in the peculiar conditions of this country and is altogether unacceptable to Muslim India.

"It further records its emphatic view that, while the declaration dated the 18th of October, 1939, made by the Viceroy on behalf of His Majesty's Government is reassuring in so far as it declares that the policy and plan on which the Government of India Act, 1935, is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless

the whole constitutional plan is reconsidered *de novo* and that no revised plan will be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims unless it is designed on the following basic principles, namely; that geographically contiguous units are demarcated into regions which should be so constituted, with such territorial readjustments as may be necessary, that the areas in which the Muslims are numerically in a majority, as in the north-western and eastern zones of India, should be grouped to constitute 'independent States' in which the constituent units shall be autonomous and sovereign and that adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them, and in other parts of India where the Mussalmans are in a minority adequate, effective and mandatory safeguards shall be specifically provided in the Constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them.

"This session further authorises the Working Committee to frame a scheme of Constitution in accordance with these basic principles, providing for the assumption finally by the respective regions of all powers such as Defence, External Affairs, Communications, Customs and such other matters as may be necessary."

Stir in Country.—This created a stir in the country, among Congressmen and Hindu subalterns alike and also among some Muslims. True the novelty of the idea caught the Muslim imagination, but even among Muslims there were many who questioned the wisdom of the step suggested in the Lahore resolution. Apart from destroying Indian unity which had been built up after years of strenuous effort, it was argued by many, the Lahore scheme would place the Muslim minorities in Hindu provinces in a very unenviable position.

The evolution of Muslim League thought in 1940-41 followed the lines laid down in April 1940, when the Pakistan resolution was adopted at Lahore. The emphasis and weightages, proportion of representation and share in services, guarantees and safeguards—notions which had held the political field for decades—were swept aside. All these devices pre-supposed the continuance of Muslims as members of a State, more or less secure and safeguarded, enjoying greater or less share of power, but scarcely likely as a community ever to occupy a dominant position. The Quid-e-Azam refused to think of an arrangement which would not give the Muslims equal power and authority with the majority community. He proposed that India should be divided into two spheres, Muslim and Hindu, each was to be autonomous internally and for purposes of a Central Government with minimum powers, the two should collaborate as equals.

PAKISTAN

The Pakistan ideal began to exercise the Muslim mind. Every development affecting the future of India in any way was viewed against the background of Pakistan. The threat was held out that "any move by the Congress to widen political power in India without the League's approval will meet with the League's resistance."

The annual session of the League was held in Madras amidst scenes of great enthusiasm in the middle of April 1941. The Quid-e-Azam, who presided, urged the British Government to give up their policy of appeasement towards those who were bent upon frustrating the war effort and to come to terms with those who were willing to co-operate with it.

The most important resolution of the Madras session was that which changed the creed of the League:—

"(1) The establishment of completely independent States formed by demarcating geographically contiguous units into regions which shall be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India shall be grouped together to constitute independent States as Muslim free national homelands in which the constituent units shall be autonomous and sovereign:

(2) That adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the above-mentioned units and regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them:

(3) That in other parts of India where the Muslims are in a minority, adequate, effective and mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

MASS PROPAGANDA

The Quid-e-Azam never showed any slackening of his demand for Pakistan thereafter although he expressed willingness not to raise that question in a pointed form while the war was in progress, provided, however, that in any transitional arrangements for the transfer of power from British to Indian hands steps were taken to ensure that the League got a fair share.

Perhaps the greatest victory scored by the League so far is to be found in the British War Cabinet's formula brought by Sir Stafford Cripps in the spring of 1942, in which the British Government offered to give to Indian provinces the right to choose whether they would join any union that might be formed at the end of hostilities or would stay out and form their own State, separately or in collaboration with other provinces similarly willing to stay out. This was a full concession to the League demand, which was stoutly opposed by the Hindu element of the population and by nationalist forces, although the Quid-e-Azam himself would have liked the concession to be more specific and categorical.

CRIPPS SCHEME REJECTED

The proposals of the British War Cabinet were examined carefully by the Muslim League Working Committee which, whilst rejecting the scheme, expressed gratification that the possibility of Pakistan was recognised by implication by providing for the establishment of two or more independent unions in India. It regretted that the proposals of His Majesty's Government embodying the fundamentals were not open to any modification and therefore no alternative proposals were invited.

Not a Sub-Group.—When Mahatma Gandhi on behalf of the Congress evolved the "Quit India" slogan and developed it up to the stage of the A-I-U-C.C. resolution, the Quid-e-Azam made a series of public statements repudiating the Mahatma and the Congress and warning his community against the dangers of playing into the hands of the latter. (See *Indian Year Book* of 1945-46).

When the August disturbances broke out he advised the Muslims to keep aloof from the Congress movement. He regretted that the Congress has finally declared war and has launched a most dangerous mass movement in spite of numerous warnings and advice from various individuals, parties and organisations in the country.

READY TO TAKE OFFICE

About a week after the commencement of the disturbances the Working Committee of the League met in Bombay and passed a resolution calling upon the British Government to guarantee to the Muslims the right of self-determination and assure them, without delay, that they would abide by the verdict of a plebiscite of the Muslims in favour of Pakistan and expressing the willingness of the Muslim League to negotiate with any party for the setting up of a provisional government in order to mobilise the resources of India for the defence of the country and the successful prosecution of the war, conditional on the grant of the Muslim demands.

In the winter of 1942 Mr. Rajagopalachari had prolonged talks with the Quid-e-Azam at Delhi and, presumably in pursuance of some tentative understanding with the League leader, sought the Viceroy's permission to meet Mahatma Gandhi with a view to eliciting the latter's reactions to his proposals for a Hindu-Muslim settlement. When permission was refused there was widespread criticism of the Government's attitude, and the Quid-e-Azam too evidently thought that there was no use pursuing that line. He, therefore, turned his attention to securing power for the Muslims in general and the League in particular irrespective of what the Congress did. Thus almost for the first time in recent years, he called upon the British authorities to start a provisional Government with Muslim support. He had all the while pleaded for the continuance of the *status quo* in the absence of a settlement on the basis of Pakistan, but now he made the demand that, settlement or no settlement, the Muslims should not be kept out of power on the plea that the Congress was in prison.

A session of the Muslim League was held at Delhi late in the spring of 1943. The Quid-e-Azam, who presided, made a three-hour speech in the course of which he said:—"Nobody will welcome it more than myself, if Mr. Gandhi is now really willing to come to a settlement with the Muslim League. Let me tell you that will be the greatest day, both for the Hindus and the Muslims. If that is Mr. Gandhi's desire, what is there to prevent him from writing direct to me? Who is there that can prevent him from doing so? (Renewed Cheers). What is the use of going to the Viceroy? Strong as this Government may be in this country, I cannot believe that they would dare stop such a letter, if it is sent to me. It will be a very serious thing indeed, if such a letter were stopped..."

No 'Hindu Rule'.—"When we passed the Lahore resolution, we did not use the word 'Pakistan' at all," the Quid-e-Azam continued.

"Who gave us this word? (shouts of 'Hindus'). Let me tell you this is their folly... I say to Hindus and British friends, we thank you for giving us the word."

Deprecating talk of some sort of loose Federation, the Quid-e-Azam declared, "There is no such thing as a loose Federation. When a Central Federal Government is established, it will tighten and tighten until the units are pulverised in the matter of real power and are reduced to the same status as Indian States at present. We are opposed to any such scheme."

After charging Mahatma Gandhi and other Congress leaders with systematic and deliberate attempt to establish Hindu rule in India, the Quid-e-Azam said, "Let us close that chapter... I make this appeal to the Hindu public. If your leaders are on this path, as I say they are, and if you do not approve of it, it is your responsibility. The responsibility of the Hindu public, to come forward and say 'stop this internecine war. Declare a truce. Let us sit as two equals, and come to a settlement... Why should not the country say: 'Unite and drive the British out? It is no use appealing to other nations of the world.'" For resolution see 1947 Year Book.

In response to the Quid-e-Azam's appeal at the annual session of the League, Mahatma Gandhi a few weeks later wrote a letter to the League leader expressing his willingness to meet him; presumably to discuss with him the Congress-League relationship and the Hindu-Muslim question generally. The Government of India refused to forward the letter to the addressee on the ground that it was against their policy to give detenus any facilities for political intercourse. Government intimated to the Quid-e-Azam that Mahatma Gandhi had addressed a letter to him but that they had decided to withhold it.

COMMITTEE OF ACTION

The year 1948 had two plenary sessions of the Muslim League. In addition to the session at Delhi held in the summer, a session was held in the winter at Karachi. At the Karachi session the Quid-e-Azam said: "During several years we have made remarkable progress, and it is admitted by our friends and even by our opponents today. We have shown that not merely to India but to the world, and we have fully established that we are a nation." We shall never rest content until we seize the territories that belong to us and rule over them...

"We have survived the opposition which first came from Government and the bureaucracy when we undertook the reorganisation of the Muslim League. For reasons of their own, that opposition has slackened. Then came a terrific onslaught from the Congress—mass contact and challenges—and then the Congress Ministries were formed..."

The Quid-e-Azam asserted that the Hindus were responsible for holding up the progress of the country. He asked: "Can we Mussalmans of India accept Akhand Hindustan, Hindu Raj over the entire sub-continent? Is it possible to expect Muslim India to agree to Akhand Hindustan and Hindu Raj on the continent? This is their proposal..."

A committee of action consisting of not fewer than five and not more than seven members and with a proper secretariat to organise, co-ordinate and unify the activities of the League was suggested by the Quid-e-Azam. "It will be the duty of this committee to examine the various suggestions received for the uplift of the Muslims," he said. He appealed for funds to carry on the activities of the League. He said that he appealed nearly two years ago for a sum of Rs. 10,00,000; but so far he had received only Rs. 5,50,000. With that money at their disposal they could make a beginning. The Quid-e-Azam also suggested the setting up of an All-India Parliamentary Board—a supreme body to supervise the elections and dispute regarding elections.

Letter to Jinnah.—Shortly after the release from jail in May 1944, Mahatma Gandhi released to the press a copy of the letter which he had written to the Quid-e-Azam from the Aga Khan's Palace. (See chapter on "The Indian National Congress"). In this letter the Mahatma expressed a desire to meet the Quid-e-Azam to discuss the communal question. The Quid-e-Azam, who was holidaying in Kashmir, refused to comment on the letter. In about two months time Mr. Rajagopalachari published details of his offer to the Quid-e-Azam for a settlement on the basis of the concession of the principle of Pakistan. It aroused a diversity of reaction among Muslims, some of whom thought that the C.R. Formula contained the germs of settlement, while others felt that it did not go far enough to meet the Muslim demand. The majority of the Leaguers, however, thought it best to let the Quid-e-Azam decide the issue.

GANDHI-JINNAH TALKS

The Gandhi-Jinnah talks which were scheduled to take place in August had to be put off owing to the Quid-e-Azam's ill-health. They actually began in September.

The negotiations lasted full three weeks at the end of which the Quid-e-Azam made the following statement, at the same time releasing for publication the voluminous correspondence that had passed between him and Mahatma Gandhi during that period.

"Mr. Gandhi from the very commencement of our talks made it clear that he had approached me in his individual capacity and that he represented no one but himself. However, he assured me that he was really open to conviction and conversion to the Muslim League Lahore Resolution of March 1940..."

"I regret to say that I have failed in my task of converting Mr. Gandhi..."

"We have, therefore, decided to release to the Press the correspondence that has passed between us..."

"Nevertheless, we hope that the public will not feel embittered, and we trust that this is not the final end of our effort..."

(For the full text of the Gandhi-Jinnah correspondence see the issue of the *Indian Year Book* for 1945-46).

Commenting on the failure, Mahatma Gandhi said at a press conference that it was a matter of deep regret that he and the Quid-e-Azam could not reach an agreement but there was no cause for disappointment. "The breakdown is only so-called; it is an adjournment *sine die*," he said. "Each one of us must now talk to the public and put our view-points before them. If we do so dispassionately, and if the public co-operate, we may reach a solution of the seemingly insoluble at an early date."

"My experience of the precious three weeks confirms me in the view that the presence of the third Power hinders the solution..."

To this, the Quid-e-Azam replied, "It is a pity that he thinks that the presence of a third party hinders a solution, and it was very painful to me when he said, 'a mind enslaved cannot act as if it was free.'"

Things drifted for the next few months until the publication of press reports relating to certain secret negotiations between Bhulabhai Deval, then leader of the Congress in the Central Assembly, and Mr. Liaquat Ali Khan, then Deputy leader of the Muslim League Party in the Central Assembly.

SUCCESS IN ELECTIONS

The next phase of Muslim activity was in connection with the Wavell proposals in the Simla Conference. This, together with the part played by the Muslim League and its leader, are exhaustively dealt with in the chapter on "The Indian National Congress" in the issue of *The Indian Year Book* for 1945-46.

After the breakdown of the Simla Conference the Working Committee of the Muslim League passed a resolution emphasising the urgent need for fresh elections to the Central and Provincial legislatures. The League Committee invited the attention of the Government to the resolution unanimously adopted at the annual session of the All-India Muslim League held in Karachi in December 1943 demanding fresh elections to the Central and Provincial legislatures on the ground that these legislatures were getting out of touch with public opinion and could no longer be said to be representative of the true needs and sentiments of the people. The Committee stressed the urgent necessity for giving effect to the terms of that resolution. The Working Committee was convinced that fresh elections to the Central and Provincial legislatures should no longer be delayed because important questions awaited solution which could only be properly dealt with by representatives in touch with public opinion and the sentiments of the people.

The Muslim League and its leader then carried on a campaign demanding early general elections throughout the country. In August 1945, the Government announced that general elections would be held in the winter of 1945-46 and the spring of 1946.

The Muslim League plunged into the elections heart and soul. In one of his first electioneering speeches the Quid-e-Azam said: "This is a war that can be fought only with silver bullets" and, after the manner of Mr. Churchill, "give me those silver bullets and I will finish the job." He added, "We are determined not to submit to any scheme of an All-India Union, interim or otherwise, and we will resist any attempt to impose such a union upon us. The just and only solution of India's constitutional problem lies in the establishment of Pakistan and Hindustan."

As the elections drew near, the Quid-e-Azam said that the deadlock in this country was not so much between India and Britain as between the "Hindu Congress" and the Muslim League. The British Government were putting the cart before the horse in proposing an All-India constitution-making body before a settlement of the Pakistan issue. The League leader also revealed his intention to include Assam in the eastern zone of Pakistan.

The elections to the Central Assembly resulted in a hundred per cent success to the League. Applauding the electors, the Quid-e-Azam said that the Congress had adopted a cowardly policy and had run away. It didn't dare to put up any Muslim candidate on the Congress ticket, knowing full well that the fate of those candidates would be the same as that of the Nationalist Muslims. Like the central elections, the elections to the Provincial Assemblies were fought on the issue of Pakistan also, in which, except in the Frontier Province and in a few isolated cases in other provinces, the Muslim League scored a signal triumph. In Madras, Bombay, the C.P. and Orissa it secured cent per cent success. In Bihar, Assam and the United Provinces, especially in the last-named, a few non-League Muslims were returned, but the large majority were Leaguers. In Bengal, the heart of what was called Eastern Pakistan, only a couple of non-Leaguers could come in; all the other Muslim seats were captured by the League. At the other end, in the heart of "Western Pakistan", namely the Punjab, the League annexed all the seats except about a dozen which went to supporters of the Unionist Party, which had held sway in the province for about ten years. In Sind, out of a total of 35 Muslim seats, as many as 27 went to the League; of the remaining eight, four went to pro-Congress Muslims and the other four to a group which had cut itself away from the official League. In the Frontier Province, however, the League's hopes failed, for the majority of the Muslim seats went to the Congress. Even here, the League put up a better show than in the previous elections held ten years ago. Thus the League was able to establish its claim to represent the vast majority of the Muslims of India.

LEAGUE MINISTRIES

In terms of Ministries, however, the League did not fare so well. Bengal was the only province in which a League Ministry could be formed without its supporters having to depend on the votes of other groups. In the Frontier, of course, the Congress formed the Ministry with the League as the main Opposition party. In the Punjab again, in spite of the fact that the League formed a solid group of 75 in a House of 175, it had to remain in Opposition, a Government having been formed with the aid of a coalition of a dozen non-League Muslims, 30 odd Sikhs and a large number of Hindus. In Sind, a League Ministry was formed by the Governor, but it had a precarious existence, faced as it was by an opposition of nearly equal strength. Thus, out of the four Muslim majority provinces, there were League Ministries in two, a Congress Ministry in the third and a pro-Congress coalition Ministry in the fourth.

This, the League did not mind because it had already stated it did not think in terms of Ministries. As the Quid-e-Azam observed on the morrow of the elections, "We have secured a thumping verdict throughout India, the elections

showing a clear result of not less than 90 per cent. of the Muslim votes cast in favour of Pakistan." The claim was more or less right in so far it related to the proportion of successful Leaguers returned at the polls. An analysis of the voting figures showed, however, that the pro-League percentage was much lower.

Early in 1946 there was an indication of a big move on the part of Britain finally to settle the Indian political and constitutional question. The British Premier, in March 1946, made the famous declaration announcing the Labour Government's policy and the despatch of a Cabinet Delegation to settle the Indian question on the spot. Commenting on this the Quaid-e-Azam said: "The Congress is threatening the British that it will not work the constitution but will use it for the purpose of preparing the people for a final struggle if the British Government did not surrender to the Congress demand for immediate formation of an All-India federal constitution to be framed by a constituent assembly. To prevent bloodshed a bribe is offered to the British of a flourishing trade in India, in common with the Indian capitalists, if they make peace with the Congress. This is a dream, for they fail to take into account that there are one hundred million Muslims and that there is a powerful mass organisation, the All-India Muslim League, which cannot remain a spectator."

The weeks that followed the arrival of the British Cabinet Mission was a period in which the Quaid-e-Azam went all out to sustain his Pakistan claim. He went to the extent of telling the Sikhs that they as a nation were entitled to a State of their own and that he was not opposed to it as such provided they showed where it could be created.

The Quaid-e-Azam saw no room for the Muslims to compromise on the issue of Pakistan, which, he said, was the question of their very existence. Asked by an interviewer if this statement inferred a loyalty to the community before loyalty to the country, he replied: "There is no country in that sense. I do not regard myself as an Indian. India is a State of nationalities, including two major nations, and all we claim is a distinct sovereign State for our nation, Pakistan." He admitted that 25 million Muslims would be excluded from Pakistan as minorities in Hindustan, but he thought that they could not help that in any case. Under Pakistan, they would be better off, because it was fortunate that there would be a corresponding minority of 25 million Hindus in Pakistan.

MUSLIM LEAGUE CONVENTION

Early in April, while the British Cabinet Mission was sojourning in Delhi, the Quaid-e-Azam convened an All-India Muslim Legislators' Convention, attended by about 360 members of the various provincial legislatures. Addressing the Convention, the League President said, "We are prepared to sacrifice anything and everything, but we shall not submit to any government formed without our consent. This Convention is going to lay down once for all, in unequivocal terms, what we stand for, we stand unanimously for Pakistan. We shall fight and die for it, if necessary; achieve it we must, or we perish."

TWO ASSEMBLIES

The following resolution which was unanimously adopted by the Convention said *inter alia* :—

"This Convention of the Muslim League legislators of India, Central and Provincial, after careful consideration hereby declares that the Muslim nation will never submit to any constitution for a united India and will never participate in any single constitution-making machinery set up for the purpose..."

"First that the zones comprising Bengal and Assam in the north-east and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west of India, namely, Pakistan zones where the Muslims are a dominant majority, be constituted into a sovereign independent State and that an unequivocal undertaking be given to implement the establishment of Pakistan without delay.

"Second, that two separate constitution-making bodies be set up by peoples of Pakistan and Hindustan for the purpose of framing their respective constitutions.

"Third, that the minorities in Pakistan and Hindustan be provided with safeguards on the lines of the All-India Muslim League resolution passed on March 23, 1940, at Lahore.

"Fourth, that the acceptance of the Muslim League demand of Pakistan and its implementation without delay are the *sine qua non* for the Muslim League co-operation and participation in the formation of an Interim Government at the Centre..."

The Muslim League's negotiations with the Cabinet Mission are dealt with in the Chapter "British Cabinet Delegation", which relates to the period from April to October 1946.

INTERIM GOVERNMENT

The Muslim League was in no mood to be reconciled to the interim arrangement at the Centre and, in pursuance of the Lahore resolution of 1940 on Pakistan, began to intensify its agitation in favour of the partition of India based on the two-nation theory. It had reason to congratulate itself when due to this agitation and more to the communal frenzy and blood orgy that swept the land, the seven-year-old demand was at last granted by H. M. Government's plan of June 3, 1947.

In an interview the Quaid-e-Azam declared that the Interim Government should not be allowed to do anything administratively or by Convention which would in any way prejudice or militate against the problems of the future constitution of India, and that the Muslims would certainly resist any attempt which directly or indirectly prejudiced or militated against their demand of Pakistan. He added that the only solution of the Indian problem was the division of British India into Pakistan and Hindustan, whose constitutions should be drawn up by two Constituent Assemblies.

In a letter to the Viceroy dated November 17, 1946, the Quaid-e-Azam asked for the postponement of the Constituent Assembly *sine die*. He also contested the claims of the Congress that it had accepted the Statement of May 16. After referring to the disturbances in Bihar, he said that all energy should be concentrated upon restoring peace and order in the country. These points were contained in his reply to the letter from the Viceroy dated November 5, 1946, in which the Viceroy hoped that the Quaid-e-Azam would arrange to summon the League Council with a view to their accepting the State Paper.

Further to this the Quaid-e-Azam in a statement later said categorically that no representative of the Muslim League would participate in the constituent Assembly and that the Bombay resolution of the Muslim League Council, passed on July 29, 1946, stood in its entirety.

While in London, in December 1946, to get the British Government's clarification on the grouping issue, the Quaid-e-Azam in a broadcast to the United States, said: "The sooner Britain declared its intention of giving effect to Pakistan the better would be the chance of avoiding a terrible disaster."

Referring to the Punjab arrests and the ban on the Muslim National Guards in the province at the end of January 1947, he said: "The repercussions of this one more wild and inimical action against the Muslim League on the part of the Punjab Government will be terrible all over Muslim India, and I appeal to the Viceroy im-

mediately to intervene and save the situation which otherwise may take a very serious turn for which the entire responsibility would vest with the Viceroy and His Majesty's Government."

'DISSOLVE CONSTITUENT ASSEMBLY'

On January 29, the All-India Muslim League Working Committee met at the old Government House at Karachi under the Chairmanship of the Quaid-e-Azam to consider whether a definite change in the Indian political situation had taken place since the last meeting of the League Council, as a result of the British Government's Statement of December 6 on grouping and the subsequent Congress decision, to warrant the convening of the Council to revoke its original decision to enter the Constituent Assembly. In a lengthy resolution the Working Committee not only refused to summon its Council which on July 29, 1946, withdrew the League's acceptance of the Cabinet Mission's plan but also called upon his Majesty's Government to declare that the plan had failed in view of the rejection by the Congress of the British Government's Statement of December 6. The resolution, which closely followed the views expressed by the Quaid-e-Azam on his return from London, criticised the A. I. C. C. resolution as nothing more than "a dishonest trick and juggling of words by which the Congress had again attempted to deceive the British Government, the Muslim League and public opinion in general". The resolution further asserted that Congress, having thus rejected "the final appeal of His Majesty's Government" by its action in the Constituent Assembly converting it into a body of its own conception, had destroyed all fundamentals of the Statement of May 16, and every possibility of a compromise. The resolution on republic passed by the Constituent Assembly was illegal and *ultra vires* as it went beyond the limited powers and terms of the plan. By the appointment of a number of committees the method of procedure of framing the new constitution had been destroyed. The League, therefore, expressed the opinion that the Constituent Assembly should be forthwith dissolved.

A few days later the Working Committee urged on the Governors in Bombay, Madras, Central Provinces, Bihar, the United Provinces and Assam to use their special powers for safeguarding Muslim minority interests after declaring that the Congress ministries in those provinces had failed to protect the Muslim population. "The great Bihar mass slaughter," said another resolution, "expressed the utter failure of the Congress Government to give protection to Muslims", and the Committee demanded the immediate appointment of impartial judicial tribunals of the highest order to investigate the matter. The External Affairs Department of the Government of India was censured by the Committee for imposing a fine on Frontier tribesmen of Rs. 75,000 in cash. Expressing grave concern over Punjab developments the Committee, in another resolution charged the Government of that province with resorting to "Fascist methods" of "gagging public opinion and prosecuting political opponents."

The Quaid-e-Azam addressing a group of Bihar Muslims in their refugee camp, repeated emphatically his old demand by saying that the Muslim League would not "yield an inch" in their demand for Pakistan.

AGITATION IN N.-W. F. P.

After the resignation of the Punjab Ministry early in March, Quaid-e-Azam appealed for complete unity among Muslims. "If we establish complete unity, co-operation and harmony among ourselves," he declared, "it will not be difficult to settle with other communities or parties and the British Government." He said that he hoped that the Punjab example would soon be followed by Dr. Khan Sahib.

In April the Quaid-e-Azam saw the Viceroy in connection with the political talks initiated by the latter. The conversations, beyond being "friendly and informal", had no results.

The same month Pandit Jawaharlal Nehru, inaugurating the United Provinces Political Conference at Ahow, indicating the pressure which India felt on the insistent Muslim demand, declared that those who demanded Pakistan could have it, but on condition that they did not coerce other unwilling parts of India to join Pakistan. Denouncing this demand for a partition of Bengal and the Punjab as "a sinister move actuated by spite and bitterness," the Quid-e-Azam in a statement later said: "I do hope that neither the Viceroy nor His Majesty's Government will fall into this trap and commit a grave error." He reiterated his demand for the creation of a Muslim national state consisting of six provinces.

The problem of the North-West Frontier Province was one of the most important aspects of the demand for Pakistan. When he declared that he was unable to disagree with the decision of the Frontier League leaders taken on May 1 not to call off the movement against the Khan Sahib Ministry, the Quid-e-Azam, in a lengthy statement issued a few days later, made a fervent appeal to all Muslims particularly leaders to do everything in their power to remain peaceful. The League movement in the Frontier, he said, was started because the people, and especially the Muslim Leaguers and the League organisation in the province had been sought to be crushed by the Khan Sahib Ministry by "fair means or foul" ever since the Ministry was formed at the end of June. The resolution of the Frontier Congress demanding a free Pathan State of Paktoons was condemned by the Quid-e-Azam as a direct breach of the acceptance by the Congress of His Majesty's Government's plan of June 3. He said: "I want the Muslims of the Frontier to understand that they are Muslims first and Pathans afterwards and that the province will meet with a disastrous fate if it does not join the Pakistan Constituent Assembly." A month later he appealed: "To all the different elements in the Frontier Province and the tribal areas to forget past disputes and differences and join in this with the Government of Pakistan in setting up a truly democratic Islamic State." He assured the tribesmen that Pakistan would like to continue agreements and allowances until new agreements were negotiated. This statement was issued after the referendum in the North-West Frontier Province had shown that an absolute majority of the Pathans was desirous of joining Pakistan.

FUTURE POLICY

In a series of answers given by the Quid-e-Azam to Reuter's correspondent in New Delhi in response to questions put by him relating to Hindustan and Pakistan, the Muslim leader outlined the nature and content of the Pakistan demand:-

The relationship between Pakistan and Hindustan would be friendly and reciprocal for the mutual interests of both.

All the armed forces must be divided completely and an alliance pact or treaty between Pakistan and Hindustan in the mutual interests of both against any aggressive outsider must be arranged.

As to a federation of Pakistan States, even if there was to be partition of Bengal and Punjab, such a move would have disastrous results, the caste Hindus being the greatest sufferers under such a scheme.

As regards the Muslim attitude towards the States, the policy was and would be not to interfere with them with regard to their internal affairs.

While Muslims expected as rapid a progress in the various States towards the establishment of full responsible Government, it was primarily the concern of the ruler and his people.

The theory of Pan-Islamism was discredited but the Muslims would certainly establish friendly relations and co-operate for mutual good and world peace and would always stretch out their hand of friendship to the Near and Middle East and the Far East.

The minorities in Pakistan would be citizens of Pakistan and enjoy all rights, privileges and obligations of citizenship without any distinction of caste, creed or sect and would be treated justly and fairly.

On June 9, 1917 the Muslim League accepted the British Government's scheme of June 3 "as a compromise." The League leader commended the resolution placed before the Council of the All-India Muslim League accepting the scheme.

Answering the doubts and misgivings of Muslims from Hindu majority areas the Quid-e-Azam was reported to have assured them that they need have no fears on the score of protection of their interests.

The Quid-e-Azam issued a statement on the Muslim League attitude towards the States at the end of July. The League, he declared, had no intention of coercing any State into adopting any particular course of action. The League recognized the right of each State to choose its destiny.

CHANGE OF OUTLOOK

On August 15, 1917, on the declaration of Indian Independence Mr. Jinnah became the Governor-General of Pakistan with the title of Quid-e-Azam.

Consequent on the partition of the country, the future of the Muslim League and the future of Muslims in India began to exercise the minds of the Muslim community. In November a final decision was taken.

Addressing the conference of Muslim leaders of the Indian Union that he had convened at Calcutta, Mr. H. S. Suhrawardy, ex-Premier of Bengal, said: "This shall be the main spring of our policy: 'we shall serve our country' (meaning India). He added: "Clearly, unequivocally, and without fear, with our hand on our hearts, we can declare that we are loyal citizens of the State and shall remain so expecting that the State will guarantee us our rights and will not take advantage of our loyalty to destroy our culture and will not consider that any attempt that we may make to look after our interests is an act of disloyalty. We, therefore, will never be anti-national and whatever we do, whatever organisation we may join, we shall serve our country."

"We pledge our support to the Government of Pandit Jawaharlal Nehru, not merely lip support, but true and loyal support, not merely because he is the head of the State, but because in him we have found a true man of outstanding and mighty stature, whose great moral qualities compel admiration and loyalty."

"To Mahatma Gandhi, we offer our homage and our tribute. He has proved himself to be a shining light in a darkening world, and may his efforts in the cause of peace and unity pierce the gloom of our hermits and establish the glorious reign of mutual friendship, goodwill, toleration and co-operation."

Mr. Suhrawardy emphasised that the Muslims of India must strive for peace and unity, peace within the State, co-operation between the two Dominions of India and Pakistan, and unity amongst the communities of each Dominion based on the realisation that they were all citizens of the State in which they lived and to which they owed unstinted allegiance.

Referring to the two-nation theory, Mr. Suhrawardy said that with the division of India they had made a clean sweep of it.

The conference adopted a resolution urging both the Governments of India and Pakistan to make an early and affirmative declaration that they renounced war for all time and were resolved to settle their differences by peaceful methods. One of the 18 resolutions passed at the conference, which was attended by 200 leaders, expressed the view that the solidarity of Muslims should not be impaired so that Muslims as a whole might be enabled to establish neighbourly and friendly relations with the non-Muslim co-citizens and co-operate with them

for the welfare and prosperity of the State to which they belonged as well as to safeguard their rights, and liberties adequately. The conference called upon the Governments of India and Pakistan to adopt a common policy regarding the States.

NON-LEAGUE MUSLIMS

A conference of West Bengal Muslims held simultaneously at Calcutta issued a call to the Muslims of India to join the Indian National Congress to make that organisation strong, to keep reactionary forces down and ensure real service to the masses. The conference called upon all Indian Muslims to follow the lead given by the conference called by Maulana Abul Kalam Azad to meet in Delhi. It characterised as disruptive the move of Mr. H. S. Suhrawardy in calling a conference in view of his past political activities. The conference also expressed the opinion that the Muslim League demand for Pakistan based "on the false and fantastic two nation theory" had resulted in the division of the country and was solely responsible for "the unparalleled calamities and immeasurable sufferings" that had befallen the country and its people. It urged all Indian Muslims to thoroughly dissociate themselves from the League forthwith, abjure the two-nation theory, which, it said, was fraught with even greater potential dangers and unequivocally affirm sincere, true and faithful allegiance to India.

By another resolution the conference endorsed the policy enunciated by Pandit Jawaharlal Nehru of leaving the choice in the matter of accession to the people of the Indian States. The Conference congratulated the Government of India on taking prompt steps in aid of Kashmir. It also deplored the attitude of Pakistan and the statements of responsible authorities in that State.

The Conference expressed its confidence in the activities of the Jamiat-ul-Ulema-ul-Hind and said that it was the only competent body to guide Muslims in all Islamic matters.

Mr. R. Ahmed, in his presidential speech, appealed to Indian Muslims to discard the two-nation theory and join hands with progressive forces to build a truly democratic State.

MAULANA AZAD'S LEAD

A third convention of Indian Muslims which met at New Delhi at the invitation of Maulana Abul Kalam Azad, Education Minister, passed a resolution advising Muslims in the Indian Union "to wind up the Muslim League and all other communal and political organisations and join the Indian National Congress which stands for unity, democracy and progress."

Addressing the convention, Maulana Azad said that for the past ten years the Muslim League had been spreading "poison" among the Muslims and leading them along a dangerous path. The tremendous task before those who had come to attend the convention was to remove the evil effects of that propaganda.

Maulana Azad said he did not favour the idea of forming a new Muslim organisation to lead the Indian Muslims towards nationalism. The Muslims of India should join the Indian National Congress and that left no room for any new communal or political party.

India stood at the cross roads, declared the Maulana. The people of India must decide once and for all whether they were going the way of communalism or nationalism and also whether they wanted democracy or Fascism. The people must make their irrevocable choice. They must cease to think in terms of their own community and work for the good of the people as a whole.

Referring to the large gathering of Indian Muslims which was to be held at Lucknow the following month, Maulana Azad emphasised the need of inviting Muslims of all shades of thought, including the Muslim Leaguers to attend that conference.

THE SIKHS

THE most notable event in the Sikh world during the year was an attempt by the Shiromani Akali Dal to hold a conference of Akalis and to celebrate martyrdom day in Delhi. This decision was taken at a meeting of the Dal at Amritsar. The authorities in Delhi objected to the holding of a big political conference on the Ramilla Grounds on account of the ban on public meetings in the capital, but appeared to have no objection to the holding of a religious gathering, or to a meeting of the executive committee of the Dal. Pandit Nehru wrote a letter to Sardar Baldev Singh that owing to tension in Delhi the conference might be limited to a general meeting and held in the Gurudwara Rahahgumj. The facts are not quite clear. Master Tara Singh appeared to have agreed at first and later changed his mind. In any case large contingents of Sikhs converged on Rahahgumj Gurudwara shouting slogans. About 1,000 Sikhs are believed to have met at the Gurudwara and passed resolutions. A group of Sikhs tried to march in procession from Old Delhi to New Delhi *via* Chandni Chowk. The authorities took stringent police measures. Pickets were posted at strategic points and armed police stood by. Master Tara Singh who was to have presided over the conference was taken into custody near Delhi. The General Secretary and the organizing Secretary of the Shiromani Akali Dal were also detained at Delhi Station. The Government later issued a communique declaring that at first Master Tara Singh agreed with the Government point of view but later changed his mind and gave instructions that ran counter to Government policy.

The general body of the Shiromani Akali Dal upheld the Working Committee's stand at a meeting in the Rahahgumj Gurudwara which was cordoned off by the police. The meeting regretted that in spite of the conciliatory attitude of Master Tara Singh Government behaviour was most provocative. At another meeting the Dal decided to observe March 2 as protest day against the arrest of Master Tara Singh. The protest was to take the form of hartals and prayers in Gurudwaras.

The general attitude of the Akali Dal was severely criticised by a number of Sikh leaders all over the country. For instance, four prominent Sikh leaders of Delhi, Sardar Sant Singh, Sardar Uffam Singh Duggal, Sardar Raghubir Singh and Sardar Daljit Singh condemned the policy of Master Tara Singh which they said would weaken and prejudice the cause of the Sikhs. A meeting of Sikhs in Lucknow affirmed that the Panth was not in danger, that the Sikhs were pledged to the establishment of a secular state and would not tolerate any propaganda of a communal nature.

Baba Khurak Singh veteran Sikh leader and founder-president of the Gurudwara Prabandhak Committee advised the Sikhs to support the Government at a critical time when it had to face so many baffling problems. Master Tara Singh's policy was singularly inopportune. He (Baba Khurak Singh) did not like his country plunged into anarchy and confusion which was really tantamount to any invitation to foreign powers to intervene and stay on to exploit the country.

Sardar Baldev Singh appealed to Sikhs to preserve law and order and stand by the Government. The Panthic Party in the East Punjab Legislature joined the Congress without any reservations whatever. It decided once and for all to cast its lot with the national organization. It was a pity Master Tara Singh did not realize his responsibility to the community and the country.

Giani Gurumukh Singh Musafir, the President of the East Punjab Congress Committee said that it was impossible to conceive that Pandit Nehru or Sardar Patel would be unfair to anyone, least of all to Sikhs. The Sikhs should help to maintain law and order as national solidarity was the only way to peace and prosperity.

The Executive Committee of the All-India National Sikh Party met in Delhi under the Presidentship of Sardar Sant Singh and unanimously passed a resolution appealing to the Akalis to call off the protest day observance. The resolution also asked the Government of India and the press not to associate the entire community with the policies of a section, but to win the confidence of the Sikhs who had suffered a great deal from the partition of the sub-continent.

On the protest day, however, was not given up. There were hartals and processions in East Punjab particularly Jullundur, Amritsar and Patiala. In Amritsar there was a clash between two groups of Sikhs which necessitated imposition of the curfew.

THREE GROUPS

Broadly speaking three groups may be distinguished among the Sikhs. One group forming the main body of the Central Akhali Dal is led by Master Tara Singh. It is in favour of maintaining the separate identity of the Sikh community. The second group is represented by the Panthic Durbars led by the Maharaja of Patiala. This group favours discarding separate identity of the Sikhs. In 1949 February the Working Committee of the Durbars held a meeting in Patiala at which it decided not to have a political programme and not to fight elections as a party. To find a workable programme for the advance of Sikh culture it appointed a sub-committee. In addition to the Panthic Durbars there is also a large body of Sikhs who follow the Congress and think that the Sikhs should not have a separate organization.

Most Sikh demands came from a feeling that just as Hindus have India and the Muslims have Pakistan there must be some part of the sub-continent which the Sikhs could call their own. More concretely the Sikhs ask for the creation of a new administrative unit in East Punjab with the Sikh States as a nucleus. Alternatively they demand that the overwhelmingly Hindu district of Gurgaon should be separated from East Punjab so as to secure an even balance between Hind and Sikhs in the new Province so formed. The Sikhs also claim that Punjabi and not Hindi should be the provincial language.

SIKH MEMORANDUM

On May 10 a meeting of Sikh legislators was held in New Delhi at which a resolution was unanimously passed demanding that reserved seats should be given to Sikh Scheduled Castes in the legislatures of East Punjab and the Patiala and East Punjab States Union.

Twenty-five Sikh members of the East Punjab Legislature and the Constituent Assembly, including three provincial Ministers, attended the meeting.

By a resolution, the meeting also pressed for a provision of the same safeguards for Sikhs as were granted to other minorities under the new constitution. This move was evidently aimed at securing for the Sikh community reserved seats on a population basis in the future legislatures of Delhi and the U.P.

Seats reserved for the Scheduled Castes section of the Sikhs would, however, be deducted from the quota reserved for the entire community in the provincial legislature.

Giani Kartar Singh, a prominent Sikh leader, told journalists after the meeting that he was still committed to the agreement arrived at between himself and Mr. Bhimsen Sachar, that the question of language and Sikh representation in the services should be referred to the Centre for arbitration. On the same day Mr. Bhimsen Sachar and Dr. Gopichand Bhargava, Minister for Education and Finance, met Sardar Patel to discuss these two Sikh demands.

Much of this agitation eventually culminated in a four-page memorandum presented by Sikh members of the Minorities Advisory Committee of the Constituent Assembly to the sub-committee which was specifically set up to consider the Sikh case. This memorandum can be regarded as the most authoritative statement of the demands made by the Sikhs from time to time since Independence. The following demands were set out in the memorandum:

1. To avoid becoming a permanent minority equality of representation must be secured in East Punjab or the boundaries of the Province must be so redrawn that the resulting province contains a majority of 'Punjabi-speaking people.'
2. There must be adequate weightage in the Central Legislature. When the Anglo-Indians, for instance, are given six seats the Sikhs must have proportionate representation.
3. In the U.P. and Delhi cognizance must be taken of recent migrations. For instance, in the U.P. there would be about 500,000 Sikhs and in Delhi about 100,000.
4. In the East Punjab and Central Cabinets there must be a convention which assigns a certain number of seats to Sikhs. One seat must be assured in the Central Cabinet, while in the East Punjab Cabinet if the present boundaries are retained one half of the seats must be allotted to Sikhs.
5. In all committees, commissions and delegations there must be one Sikh.

The theory on which the claims are justified is that as in undivided Punjab the Sikhs are opposed to communal majority rule. In fact, the opposition is even stronger today because the proportion of Sikhs in East Punjab has increased on account of the partition. Other grounds for justification are Sikh suffering in the cause of undivided India, Sikh contribution to the defence of the country and distribution of the community on the strategic borders of India. The creation of a Punjabi-speaking Province is justified on linguistic principle which is recognized by the Congress. The new province it is claimed can be formed by cutting off the Districts of Rohtak, Gurgaon and the Tehsils of Bhiwani and Hansi in the Hissar District. To make the area more compact the East Punjab States could merge with the new province. The Sikhs finally remind the Congress of its promise to Sikhs that the Congress will not be a party to any solution of the communal problem that does not satisfy the Sikhs.

About the same time as Sikh members of the Constituent Assembly handed in their memorandum four Sikh Scholars issued a lengthy statement discussing the question of what the Sikhs really want. 'Only a little imaginative sympathy is needed,' the statement said, 'to realize the great and unprecedented sufferings of the Sikhs in the recent terrible happenings in the Punjab.' After describing the sufferings the statement added, '... Almost 40 per cent of the entire Sikh community can be described as refugees in some form or other.' The statement then goes on to say that being a self-reliant and sturdy people all that the Sikhs need is opportunity—opportunity to create, construct and thus carve out their prosperity as they did in the West Punjab. Among the most urgently-needed relief were the following. 1. An Announcement that the question of the Gurudwaras left behind in Pakistan was being taken up by the Government of India with the Pakistan Government. The Nankana Sahib Gurudwara should be created a free city like the Vatican. The other Gurudwaras in Pakistan should be administered by the Nankana Sahib authorities. An equivalent of the land attached to the Nankana Sahib and other Sikh shrines in Pakistan should be allotted to the S.G.P.C. in the East Punjab thus giving the Sikhs an opportunity to re-establish their educational and social life; 2. As

the worst sufferers among land-holders they should be given a generous share in the new colony areas in Hisar and Karnal Districts to make up for their losses in the colony areas of Pakistan; 3. All Sikh refugees no matter where they come from West Punjab, N.W.F.P., Bahawalpur or Sind should be accommodated in East Punjab. This will provide a homeland for Sikhs in India; 4. In their rehabilitation policy Government should make no distinction between landlords and tenants; 5. To provide houses work on new townships should be taken in hand immediately, and the site of the new capital should be announced without delay.

RESERVATION OF SEATS

On March 5, 1949, came a stirring appeal from Sardar Patel to the Sikhs to give up "Separatist and disruptive tendencies." The appeal was made in the course of an address at the first convocation of East Punjab University in Ambala.

The Deputy Prime Minister urged Master Tara Singh and his followers to give up their present agitation and to co-operate with Government in building a new and strong Punjab.

Sardar Patel said he felt ashamed that Government had no alternative but to arrest Master Tara Singh for his activities which, he maintained, would have led India to disaster.

"I have repeatedly appealed to my Sikh friends," said Sardar Patel, "to unite, to give up sectional jealousies and their intestine quarrels. I want to ask them whether all that they have suffered and whether all that they have had to bear has gone in vain. Do they not try to take a lesson from what has happened? The Sikhs are being made to fight among themselves and then to fight with the Hindus for a share and spoils of office, language, territory, seats in Government, seats in the legislature and so on."

It may be that Sardar Patel's words found an echo in the hearts of the Sikhs. For in the deliberations in the Minorities Advisory Committee that took place about two months later the Sikhs gave up their demand for reservation of seats when Muslims and Christians gave up their claims for reservation. This represented a startling change as the Committee had accepted the whole principle of reservation for religious minorities at previous meetings.

The Committee accepted, except for one dissenting voice, a resolution moved by Dr. H. C. Mookerji, leader of the Indian Christian community and Deputy President of the Dominion Parliament, that there should be no reservation of seats in the legislatures for any community in India, excepting Scheduled Castes.

The Committee, however, accepted a unanimous proposal made by the Sikh representatives of East Punjab that backward sections among their community should be included in the Scheduled Castes for the purposes of representation in the provincial legislatures.

The minorities, including the Sikhs, would also have the right to claim fair representation in the Services consistently with the maintenance of efficiency in administration under the draft Constitution.

On May 25 the Constituent Assembly unanimously passed the recommendations made to it by the Minorities Advisory Committee through a resolution moved by Sardar Vallabhbhai Patel.

HISTORY

The Sikh minority of India has been greatly agitated over its position, integrity and safety in the future set-up. Before independence they were much concerned about their future in a province where the Muslims were in a majority.

The Sikh All-Parties Committee in a representation to Sir Stafford Cripps declared that the proposals were unacceptable to them

because "instead of maintaining and strengthening the integrity of India, specific provision has been made for separation of provinces and the constitution of Pakistan and the cause of the Sikh community has been lamentably betrayed."

"Why should a province that fails to secure three-fifths majority of its legislature in which a religious community enjoys statutory majority, be allowed to hold a plebiscite and given the benefit of a bare majority. In fairness this right should have been conceded to communities who are in permanent minority in the legislature."

"Further, why could not the population of any area opposed to separation be given the right to record its verdict and to form an autonomous unit? We are sure you know that the Punjab proper extended upto the banks of the Jhelum excluding Jhelum and Multan districts, and the trans-Jhelum area was added by the conquest of Maharaja Ranjit Singh and retained by the British for administrative convenience. It would be altogether unjust to allow extraneous trans-Jhelum population which only accidentally came into the province to dominate the future of the Punjab proper."

"We give below the figures which abundantly prove our contention:—

From the boundary of Delhi to the banks of the Ravi river the population is divided as follows:—Muslims—4,505,000; Sikhs and other non-Muslims—7,646,000.

From the Delhi boundary to the banks of the Jhelum river excluding Multan and Jhang districts:—Muslims—8,288,000; Sikhs and other non-Muslims—9,348,000.

To this may be added the population of the Sikh states of Patiala, Nabha, Jind, Kapurthala and Faridkot, which is about 2,600,000. Of this the Muslims constitute barely 20 per cent. and this reduces the ratio of Muslim population still further.

"We do not wish to labour the point any more. We have lost all hope of receiving any consideration. We shall resist, however, by all possible means separation of the Punjab from the all-India union. We shall never permit our motherland to be at the mercy of those who disown it."

Sikhs and Pakistan.—After the withdrawal of the Cripps' offer the Sikhs were somewhat in the limelight in connection with several proposals, unofficially moved, to determine the allocation of territories and powers in the event of a compromise between the Muslim League and the Congress. The virile and compact community of Sikhs, mostly confined to the Punjab, had an important say in regard to the question of Pakistan. With a view to softening Sikh opposition to Pakistan and thereby strengthening the demand *vis-à-vis* the rest of India, Quaid-e-Azam Jinnah made more than one attempt to reassure the Sikh community and thereby induce them to join him in the scheme of Pakistan on the basis of guaranteed safeguards for their interests. At one stage it looked as though a section of the Sikh leadership was favourably inclined towards the Quaid-e-Azam's gesture. Some of them seemed to be impressed with the argument that, whereas in an All-India Federation the Sikh community would be a drop in the ocean, they would not be a negligible factor in Pakistan not only because of their proportion in the population of the Punjab, but also by virtue of statutory guarantees offered to them by the Muslim leader. Eventually, however, the Quaid-e-Azam's overtures were turned down because the bulk of the Sikh community was opposed to Pakistan.

At the same time there began to grow up in the Sikh community a tendency to exclusivism and self-reliance. This was due, on the one hand, to the growingly militant Muslim League campaign for Pakistan and, on the other, a feeling that Hindu leadership might not hesitate to sacrifice the Sikhs for a settlement with League on the all-India plane.

The advent of the War and the supply by the martial race of Sikhs of a large number of recruits for the Allied armed forces invested this community with added importance in the eyes of British authority. Thus, for instance, a Sikh leader found a place in the expanded Executive Council of the Governor-General, and, later still, the community was given representation in the Simla Conference called by Lord Wavell to consider his proposals for the establishment of an Interim Government at the Centre. Today a Sikh leader holds the Defence portfolio in the National Government.

Whereas the bulk of Sikh opinion continued to be hostile to the idea of partitioning India into Hindustan and Pakistan, there was a small section of opinion which suspected the possibility of the Congress compromising with the Muslim League in its Pakistan demand. This section tended to take the destinies of the community in its own hands and forestall a possible division of the country by entering into advance arrangements with the League in the event of the creation of Pakistan.

The latter school tended to form the Sikh community into a water-tight entity apart not only from the Muslims but also from the Hindus, with whom they have close social and inter-marital relations. The fear that, in its anxiety to reach an all-India political settlement, the Congress might sacrifice the interests of the Sikhs was used by the Akali Group in the Sikh community, which was thus divided into two strong groups, one owing allegiance to the Congress and the other being hostile to that institution. In the general elections held in April 1946, the Akalis captured two-thirds of the number of seats reserved for them in the Punjab legislature, while the Congress got the remaining one-third, although an analysis of the voting figures revealed that the Congress candidates secured the support of nearly half the electorate.

Official Recognition.—In the British Cabinet Mission's proposals the Sikhs were recognized as an important minority like the Muslims but unlike Indian Christians, Anglo-Indians or even Scheduled Castes, who all came under the term "General"; yet the Sikhs were not given the communal veto which was accorded to the Muslims in determining the future constitution. This constituted a sore point with the community whose spokesmen wrote to the Secretary of State for India as follows:

"Since the British Cabinet Mission's recommendations for the future constitution of India have been published, a wave of rejection, resentment and indignation has run throughout the Sikh community. The reasons are quite obvious.

"The Sikhs have been entirely thrown at the mercy of the Muslims. Group B comprises the Punjab, the N.W. F. P., Sind and Baluchistan, and the representation given to each community will be Muslims 23, Hindus nine and Sikhs four. Can anybody expect from this assembly, constituted as it is, any consideration or justice for the Sikhs? The Cabinet Mission recognises the very genuine and acute anxiety among the Sikhs lest they should find themselves subjected to a perpetual Muslim majority rule. If the British Government are not aware of the Sikh feelings, the Sikhs will have to resort to some measures in order to convince everybody concerned of the Sikh anxiety, in case they are subjected to a perpetual Muslim domination. The Cabinet Mission has not only put under Muslim domination the non-Muslim areas of the Punjab and Bengal but the whole province of Assam where the non-Muslims are in overwhelming majority. This is evidently done to placate the Muslims.

"This is how I read the recommendations of the Cabinet Mission. But as the issues are very grave and momentous, the Sikh representatives, assembled here today to consider the situation created, have advised me to seek clarification from you and find out if there is any hope of such amendments as may save the Sikhs from perpetual domination.

Three queries.—So I put three questions :

"(1) What is the significance of recognising the Sikhs as one of the main communities ?

"(2) Suppose the majority of Section B frames a constitution under section 19 (v) but the Sikh members do not agree, does it mean deadlock or does the opposition of the Sikhs members mean simply dissociation ?

"(3) Is there any hope of obtaining for the Sikhs the same right as is given to the Muslims and the Hindus under section 15 (ii) and 19 (vi) ?"

The Secretary of State replied :—

"The anxieties of the Sikhs were kept prominently in mind when we were drafting the Cabinet Mission's statement, and I can certainly claim that that of the various alternatives open to us the best one from the Sikh point of view was chosen. You will, I am sure, admit that, if India had been divided into two sovereign States, or if the Punjab had been partitioned, either of these decisions would have been far less acceptable to the Sikhs than the one which was actually reached.

"I have considered carefully the detailed points you raise at the end of your letter. I fear the Mission cannot issue any addition to, or interpretation of, the statement. There is, however, no intention whatever to prejudice the position of the Sikhs in the Punjab or in the North-West Group, nor do I think their position has been prejudiced, for, it is inconceivable that either the Constituent Assembly or any future Government of the Punjab will overlook the special place in the province of the Sikhs.

"If you and Sardar Baldev Singh would care to see the Cabinet Mission and the Viceroy in the first week of June, we shall be glad to see you."

Sikh hostility to the Mission's proposals and the fear that they might be placed at the mercy of the Muslims in their own homelands unified the community, with the result that even Congressmen among them had to submit to the will of the majority. Although the Congress, towards the end of June, accepted the long-term proposals of the Mission, the Sikh community, under the leadership of the newly-formed Panthic Board (representative of all Sikh interests) decided not to participate in the proposed Constituent Assembly. The decision was reversed in response to the appeal made by Pandit Nehru to the Congress Sikhs, but was again reversed owing to a misunderstanding caused by Pandit Nehru's instructions. Then followed a series of negotiations between Sikh leaders on the one hand and the Congress and the League on the other. Eventually, the Sikh community decided to withdraw its rejection and to take part in the constitution-making effort on the understanding that the Congress would do everything in its power to safeguard the rights of the Sikhs. As a result of this decision, Sardar Baldev Singh, a leader of the community, was taken on as a member of the Interim Government formed in the Autumn of 1946 and continued to remain as Defence Member in the National Government.

ANXIETY FOR FUTURE

The Sikh concern to safeguard their interests in the future constitution of India was first expressed at the close of 1946 at a meeting of the Prathindhli Panthic Board at Amritsar.

A call to the Sikhs to carry on their struggle till a satisfactory provision was made for their future interests was sent out at a meeting, Presided over by Bawa Harkishan Singh, President of the Panthic Board, the meeting discussed the position created by Sir Stafford Cripps' statement in Parliament on the British Award of December 3 on the grouping issue and adopted the following resolutions :

"That, as on June 30, 1946, the Secretary of State for India informed to Master Tara Singh, in reply to his letter dated May 25 that it was not possible for the Cabinet Mission to make any addition to the statement, dated May 16, 1946,

or to give an interpretation of that statement. The statement dated December 6, 1946, is not only an interpretation of that statement but makes a substantial addition to that statement. Furthermore, the Prathindhli Panthic Board feels that the statement of December 6 has been made to placate the intransigence of the Muslim League and to the detriment of the minorities especially the Sikhs.

"For the reasons explained above the Panthic Board views with indignation the last statement of His Majesty's Government and calls upon the Sikhs to carry on their struggle till a satisfactory provision for safeguarding their interests is made in the future constitution of India."

In mid-January, Giani Kartar Singh and Sardar Ujjal Singh, Sikh members of the Constituent Assembly, emphatically asserted that the Sikhs would withdraw from the Assembly if they were not conceded the right of communal veto in the Punjab and the North-West group.

On the question of representation of Sikhs on the Minorities Advisory Committee the Sikh delegates demanded equal representation for the major minorities—Sikhs, Depressed Classes, Muslims and Hindus—and urged that the Chairman of the Committee should be a person of the highest integrity like Mahatma Gandhi.

JUNE 3 PLAN

After the publication of H.M.G.'s Plan of June 3, the Sikhs were seriously perturbed. About a fortnight after the announcement of the British Plan Sardar Baldev Singh, according to the President of the Shiromani Akali Dal, wrote to Lord Mountbatten that the Sikhs could not submit to any award which "does not maintain the solidarity of our population and does not consolidate our shrines in East Punjab."

Later, however, Sardar Baldev Singh showed readiness to accept the Boundary Commission's decisions "whatever these may be."

Subsequent utterances of Sikh leaders nevertheless, created the contrary impression that they could not willingly accept the Boundary Commission Award.

At the end of June the Akhali High Command of the Sikhs drafted a charter of eight demands at Amritsar which, in effect asked for the establishment of a separate state of Punjabi-speaking Hindus and Sikhs in Eastern Punjab. Further a secret circular containing these demands is reported to have been sent round to Sikh organisations in the districts which were also advised to collect facts and figures of populations and property.

The Sikh leaders then went on to prepare for action if this became necessary. A month later, large crowds of Sikhs tried to enter Gurudwara Nankana Sahib at Lahore in defiance of the Magistrate's ban and were dispersed by the police who opened fire. "Jathas" started from Amritsar and many members were arrested. Thousands of persons secretly gathered at the Gurudwara and passed a resolution "not to accept the Award which did not satisfy the just interests of the Sikhs."

BOUNDARY COMMISSION AWARD

At the discussions of the Panthic Board of Sikhs held at Amritsar in the third week of August, two resolutions on the Award of the Boundary Commission were passed. One of them said :

"The award of the Chairman of the Boundary Commission is most unjust to Sikhs. The legitimate claims of the Sikh community have been completely disregarded. The sacred shrines of Nankana Sahib and Kartarpur Sahib have been placed in West Punjab. East Punjab has not been awarded any of the rich colony areas in the Lyallpur, Sheikhupura and Montgomery districts. The integrity and solidarity of the Sikh community have been completely disregarded and even the traditional homeland of Sikhs, the Majha tract, has been cut up. Such an award obviously cannot be acceptable to Sikhs, and they cannot be happy and contented unless this grave injustice is remedied."

In the opinion of the Panthic Board the situation created by the Award might to some extent have been remedied by a scheme of transfer of populations and exchange of property between Muslims and Non-Muslims of the Punjab and the Pakistan areas by a mutually acceptable modification of the boundary in certain places and by making special arrangements for sacred shrines, particularly Nankana Sahib.

The other resolution of the Board appealed to Sikhs to desist from all kinds of violence and endorsed the appeal made by Sikh leaders condemning arson, loot, murder and other crimes.

At a press conference at Jullundur at the end of December Giani Kartar Singh, the Sikh leader declared that the Shiromani Akali Dal would give its fullest co-operation in the establishment of a democratic secular state in India. Disapprove as it did the establishment of a religious state in India, the Dal, he said, did not want any more concessions for the Sikhs than those given to other minorities. The Sikhs did not want separate electorates, but in the matter of reservation of seats generously, he hoped, would be shown towards them.

Early in January 1948, it was announced that Master Tara Singh, the veteran Akali leader, had resigned from the Working Committee of the newly formed Panthic Durbur of which the Maharaja of Patiala was the chief leader.

While Master Tara Singh had declined to disclose the reasons for this sudden withdrawal of the support which he had lent only the previous month, it was gathered that Sikh public opinion had been gradually swinging in favour of the Shiromani Akali Dal whose President Giani Kartar Singh, had declined the invitation of the Panthic Durbur to join it. He had obtained the verdict of the Akali Dal in this matter, which refused to recognise the leadership of the Maharaja of Patiala in Panthic matters.

DEMAND FOR SAFEGUARDS

The Sikh community spoke with many voices and had many organisations to voice its grievances. In the middle of February, Giani Kartar Singh, President of the Shiromani Akali Dal, declared in a statement that the Sikhs would resist any ban on their political organisations. The statement followed press reports that the Akali Party had requested Sardar Patel to give it fifteen days' time to consider voluntary liquidation of the Shiromani Akali Dal. The report, Giani Kartar Singh said was false and baseless.

All the Sikhs, however, were much exercised about the weightage of their community in the future constitution of the country. A number of Sikh organisations in East Punjab sent telegrams to the All-India Congress Committee and the Indian Ministers reminding them of their promises to give special weightage to Sikhs in the future constitution. A few Sikh leaders went to Delhi to present their case before Congress leaders.

In a speech at Jullundur, however, Pandit Nehru definitely told the Sikhs that their demand for weightage could not be conceded. This was a great disappointment to the Sikh community—the worst sufferer from the partition of the Punjab. They found themselves in a minority in East Punjab and without the lever of a third party to keep them in a tactical position.

At a press conference Giani Kartar Singh, President of the Shiromani Akali Dal, announced that the Working Committee of the Akali Dal had advised all members of the Panthic Assembly Party, both at the Centre and East Punjab, to join the Congress Assembly parties forthwith. The merger of their Assembly Party, the Akali leader explained, was unconditional.

Master Tara Singh, one of the foremost leaders of the community, however, disapproved of the idea. His attitude constituted a detraction from the Akali decision specially in the light of what he had said at Ludhiana a few days previously: "The Akali Dal will merge in the Congress for six months; it will, however, preserve its individuality and entity of the Panth."

THE LEFT WING IN INDIAN POLITICS

FOR many years after 1919 the Indian National Congress was the party of the Left in Indian politics. And all the Left Wing parties of today (except the Communists) which are now separate from the Congress began as protestant groups within the Congress itself. Thus the Socialist Party, the Forward Bloc, the Republican Socialist Party, the Revolutionary Communist Party, the Peasants' and Workers' Party which together with the Communist Party constitute the Left Wing today were all in the Congress some time or other.

Broadly speaking the parties of the Left in the Congress differed from the moderates on two points. First, the Left Wingers were opposed to all compromise with the British, and were in favour of complete independence outside the British Empire as the institution was then called. Second, they believed in some kind of economic equality and collectivism, and worked hard to bring the workers and the peasants into the national movement. The Left Wing groups generally worked together and were at their best whenever the Congress launched a movement against the authorities.

When the Congress decided round about 1934 to take office the Left Wing groups made a strong effort to get a Socialist programme accepted by that body; but the effort failed. It is from the failure of this attempt to convert the Congress that the gradual separation of the Left Wing groups from the main body of the Congress began. The Socialist Party, for instance, was formed soon after.

Until lately the position of the Left Wingers was not easy. For the Congress under the dual leadership of Mahatma Gandhi and Pandit Nehru had a complete plan of action both for urban and rural conditions, a plan which could also be described as Socialist—of the Gandhian type. Pandit Nehru, in fact, has the reputation of being a Socialist himself. Once he even went so far as to describe himself as half-Communist. In any case, the Congress had not only a plan but had the power to vitalize it by action. For a long time, therefore, the parties of the Left were unable to make much headway; they had nothing strikingly different from the Congress to offer. But with the cessation of war and the advent of freedom came a great deal of unrest among the peasants and industrial workers. Many battling political problems also presented themselves. To make the situation worse there were incompetence, corruption, low morality among those who were running the Government machinery. All this inevitably resulted in dissatisfaction and discontent with the party in power and helped the growth of Left Wing opposition in the country. It must be mentioned, however, that though conditions were favourable the Left Wing groups did not score any striking success against the party in power. Some of the reasons for this failure are fairly obvious. The parties of the Left had no coherent, workable plan. They did not possess the necessary strength which comes from a vast country-wide organization. And they were very much disunited among themselves. Thus though the Left Wing parties were strong enough to harass the Government at many points nowhere did they have the capacity to form an alternative Government.

ATTEMPT AT UNITY

In April 1949, some kind of attempt was made at a conference of Left Wing groups to see if they could unite into a single party with a common programme of action. The man who sent out the invitation to the conference was Mr. Sarat Chandra Bose, founder-President of the Republican Socialist Party. The Conference which met in Bombay was attended by the members of the Republican Socialist Party, the Forward Bloc and the Peasants' and Workers' Party. It broadly agreed that the time had come for all parties of the Left to get together and form a strong bloc. One of the

chief objects of such a bloc, the conference explained, would be the removal of 'the reactionary leadership of the Congress.' The more positive aspects of the policy of the bloc would be 'Scientific Socialism' subject to such changes as were necessary to suit Indian conditions. Mr. Bose who was the leading figure all through explained that the Bombay Conference was only the first step towards the formation of a United Leftist Party. Attempts would soon be made to contact other parties such as Socialists and Communists who were not represented at the Conference. For this purpose the Conference would set up a 'Provisional Leftist Co-ordination Council.'

On the whole, it is unlikely that Mr. Sarat Bose's attempts would succeed. Neither the Socialists nor the Communists showed any disposition to join hands with Mr. Bose. And so long as these two parties remain aloof all attempts to form a Left Wing Bloc will inevitably end in failure.

MINOR LEFTIST PARTIES

We shall now proceed to give a brief account of each of the Leftist Groups mentioned at the beginning of this article. The Socialists and the Communists will have fuller treatment than the others as they are the biggest and the most powerful of the parties on the Left. In fact, the others can hardly be described as parties. They are more in the nature of groups which have formed round a dominating personality. The Republican Socialist Party, for instance, is formed round Mr. Sarat Chandra Bose and has hardly any following outside West Bengal. The Peasants' and Workers' Party, which is led by Mr. S. S. More and Mr. K. M. Jeddje, is wholly confined to Maharashtra.

The Forward Bloc was started by Mr. Subhash Chandra Bose in 1938, because of a suspicion that the Congress might in the ultimate resort compromise with the British Power and agree to take less than complete independence. It had some vogue during the war on account of its affiliations with the I.N.A. But when the Congress took up the I.N.A. cause and made it part of its own history the Forward Bloc found the ground cut from under its feet. In 1948, it split into two groups, one led by Mr. R. S. Ruikar and the other by Mr. K. N. Jogdekar. At a conference in Calcutta, Mr. Ruikar declared that the Party stood for Socialism which was to be achieved by co-ordination of parliamentary and extra-parliamentary methods. In this, Mr. Ruikar explained, the policy of the Forward Bloc differed from that of the Socialists.

The Radical Democratic Party functioned as a proper political party till 1948. In that year, it withdrew from politics proper and gave itself over to the propagation of a doctrine which it called 'new humanism'. Today it is no longer a political party organised for the capture of power. The Radical Democratic Party is yet another instance of a party built round a dominating personality. After his return to Indian politics in 1936, Mr. M. N. Roy spent four years in the Congress trying to convert it to his own point of view. When he failed, he left the Congress to form a party of his own. He made no concession whatever to nationalist sentiment and came out flatly in support of the Allied cause in the war. To him the cause of Socialism was higher than that of nationalism. He tried to build his party mainly on the industrial front and did not hesitate to accept help no matter from what quarter it came. His acceptance of a subsidy from the Government brought him much unpopularity. He met the charge of bribery by declaring that the money had made no difference to the policy of his party, the money was used in support of a cause in which he had always believed. In other words, as someone neatly described the situation, Mr. Roy was paid to be of his own opinion.

Broadly speaking Mr. Roy's party stood for a secular state on a Socialist basis. At one time it had a membership of 150,000.

The Socialist Party of India

General Secretary, Jayaprakash Narayan.

Joint Secretaries: Suresh Desai; Prem Bhasin; Rohit Dave; Madhu Limaye.

Members, National Executive: Acharya Narendra Deva; Dr. Ram Manohar Lohia; Achut Patwardhan; Aruna Asafali; N. G. Gore; Dr. K. B. Menon; P. M. Nambiar; Sibnath Banerjee; Ajit Roy; Bipin Pal Das; Ram Nandan Mishra; Basuwasising; Kamaladevi Chattopadhyaya; Asoka Mehra; Yusuf Meherally; Maganlal Bagdi; Chotubhai Purani; Surendra Dwivedi; Damodar Swarup Sethi; Munshi Ahmedkhan.

The numerical strength of the Party is not very great chiefly because (as Socialists explain) membership was restricted to active workers only, that is to say, those who did fourteen hours work for the party every week. Candidates for membership have also had to go through a period of probation. With the broadening of access to the Party under the new constitution however Socialists expect that membership will increase to a level commensurate with the Party's influence in the country.

The figures for the various Provinces are as follows:—

Andhra, 42; Assam, 68; Bengal, 970; Bihar, 3,068; Bombay, 718; the C.P. and Berar, 431; Central India, 206; Delhi, 92; Gujarat, 263; Hyderabad, 60; Karnataka, 246; Kerala, 152; Madras, 69; Maharashtra, 348; Orissa, 329; Punjab 385; Rajputana, 471; Tamilnad, 400; the U.P., 3,241; Vindhya Pradesh, 258; total, 12,360.

The Party has three members in the Bombay Legislature (Mr. Purushottamdas Trikomdas, Mr. Yusuf Meherally, Mr. Peter Alvares) and one in the Constituent Assembly (Damodar Swarup Sethi). The poor representation in the Legislatures is explained by the fact that the Legislatures were elected before independence and through a restricted franchise. Besides, the Party attached little value to Parliamentary activity and gave all its energy to extra-Parliamentary work in Trade Unions, Co-operatives and so on. The Party boycotted elections to the Constituent Assembly; a lone member, however, found himself elected as he happened to be the President of a Provincial Congress Committee at the time. After independence, however, the Party tried to measure its strength against the Congress in two places. In the by-elections to the Provincial Assembly in the U.P. the Socialists signally failed, while in Bombay City, they won both the by-elections to the Assembly and many seats in the Corporation.

In general the Socialists claim that the Party's influence in the country is out of all proportion to its representation in the Legislatures. The Party is strongly entrenched in industrial areas, where the Socialist trade union, the Hind Mazdoor Sabha has a large membership. In the working-class, the Socialists are specially influential among coal-miners, railway workers, dock workers, textile workers, and workers in the sugar industry. Among peasants, the Socialists have always had great influence. As early as 1936, they set up a Kisan Sabha, and today under a new name Hind Kisan Panchayat the Party has its largest following in Bihar and the U.P. The Socialists have a youth organization called 'Samajwadi Yuwak Sabha'. The Kashitrya Seva Dal is not affiliated to any party, but a majority of the members of the organisation sympathize with the ideals of the Socialist Party. In fact, Socialists claim that their influence in the country is much greater than any figures can indicate for a Socialist or a near-Socialist ideology is now part of all national thinking.

The Party publishes 21 weeklies in different languages—the best-known of which is the *Janata*, published in English—while the Central Office issues a fortnightly letter. A foreign news bulletin is also issued and is sent to Socialist Parties, trade union offices and leading journals in foreign countries.

The various branches of the Party conduct training camps where members are instructed in Party policy and where a knowledge is also given of subjects of special interest such as agrarian economics, trade union theory and practice, and so on. Local centres too, often conduct study circles. In big industrial areas like Jombay labour schools and colleges are organized where workers can get instruction in subjects which are of importance in their day-to-day work.

The Socialist Party observes all 'national days' such as 30th January, 15th August, 2nd October and the whole of the national week. In addition it celebrates special occasions like 1st May, as indication of the international solidarity of labour, 9th August, as the day on which the final struggle for independence was launched, and 14th November as Kisan day.

CONSTITUTION

There are two classes of members, individual members and affiliated members. As regards individual membership any person who is above 18 and who accepts the objects, policy, programme and the discipline of the Party is eligible provided he does not believe in or observe caste or communal distinctions. Affiliated members are not individuals but groups of persons like a trade union, a kisan sabha, organizations of professional men, of youth or just cultural organizations, provided as before they accept the objects, policy, programme, and the discipline of the Party. An individual member pays a minimum membership fee of one rupee a year, an affiliated trade union an affiliation fee of five rupees and an additional fee of four annas a member, while a kisan sabha pays an affiliation fee of five rupees and an additional fee of two annas a member.

The smallest territorial organization is a ward or local unit comprising all the individual members resident in that area. Above a ward unit is a Constituency Branch. Above the Constituency Branch are District and City Branches. Above these again are the Provincial organizations, and finally at the very top is the national organization.

The organization at each of the different levels mentioned above consists in the main of a larger deliberative body called Council and a smaller executive body called Committee. The Council lays down the policy and programme, considers reports and statements of accounts and elects the office-bearers such as Chairman and Secretary. The Executive Committee carries out the policy and programme laid down by the Council, organizes branches, supervises their work and generally initiates such activity as may further the objects of the Party in the area which comes under its purview.

At the national level the organization consists of a National Conference, a National General Council and a National Executive. The National Conference which consists of delegates elected by individual and affiliated members is the highest constitutional organ of the Party. It lays down the policy and programme of the Party for the ensuing year. It elects the Chairman, the General Secretary and members of the Executive. It can amend the Constitution. Its decisions are binding on all the members of the Party, the various branches of the Party and the affiliated organizations. The National Council is a smaller body than the National Conference and consists of one-fifth of the number of delegates to the National Conference. It meets at least once between any two Conferences and takes such decisions on policy and organization as are not inconsistent with the decisions of the National Conference. The National Executive which is the highest executive organ of the Party consists

of a Chairman, a General Secretary and 23 members all elected by the National Conference. The Chairman of the Executive Committee also presides over the General Council and the following meeting of the National Conference. During the year in which he is chairman he acts as the chief spokesman of the Party.

A unique feature of the National Conference is that at least 10 per cent of the delegates elected by individual members from each Provincial Branch should be women.

The National, Provincial, District and City Secretaries of the Party are all full-time workers.

Part of this constitution was to come into force on May 1, 1949, and the rest on a date to be fixed by the Executive Committee.

SOCIALIST PROGRAMME

The final object of the Party according to the constitution adopted at the Patna Conference in 1949 is the establishment of a democratic Socialist society in India. The Party will also work with Socialist forces in other countries for the eradication of imperialism, racialism, colonialism, and all other forms of national oppression and economic inequality among nations and create a democratic Socialist world.

At the same conference the Party adopted a concrete programme which could be put into effect immediately. The programme involved the following points:—

The creation of a land army for the cultivation of new lands and the State to care for its food and clothing and allowances. Recruitment to the army be made from all sections of the people and a national service year for the purpose be made obligatory in colleges.

Forthwith stoppage of legal or illegal evictions and fresh settlements by the landlord, harvest to the tiller and security of home-lands; no increase in land revenue; planned redistribution of land to each within a three-year period a minimum of 12½ acres and the maximum not to exceed 30 acres per farming family and adequate arrangements for rehabilitation.

Development expenditure to be made through *gaon* and *zilla* sabhas and co-operative societies; voluntary effort for small-scale irrigation, manuring, cattle pastures and the like.

Vast State aid to small and medium-scale industries; polytechnic schools for all sections of the population; scientific research for small-unit inventions and bottom as well as top planning.

Nationalisation of banking, insurance, mining, electricity and British assets and their management by autonomous corporations.

Living wage for all salaried and wage earning sections; dearness allowance to be pegged to price index.

Reduction of prices and recognition of the principle of parity between agricultural and industrial prices; co-operative trading between city and village in select districts.

Overhaul of administrative and recruitment standards, grades promotion to be revised as for a free country; institution of an Indian Economic Service.

Clear demarcations of rights and functions of State, Government and political parties and no curtailment of civil liberties.

Planned state aid for the rehabilitation of refugees.

A SHORT HISTORY

The Socialist Party was really born in the Nasik Jail in the early thirties when Mr. Jayaprakash Narayan, Mr. Achyut Patwardhan and Mr. Asoka Mehta who were all fellow prisoners,—met together and talked about their plans for the future. The Party was formally launched in May 1934 in Patna with Mr. Jayaprakash Narayan as organizing Secretary. For many years the Party worked inside the Congress as well as outside. Inside the Congress

it focussed attention on economic questions, fought for affiliation of working class and peasant organizations and worked tirelessly to give Congress ideology a Socialist orientation. Socialists and Congressmen strongly disagreed on many points. But the Socialists had no desire to push their differences with orthodox Congressmen to the point where a rupture became unavoidable. The reason for this was fairly obvious. Socialism as an economic system was not feasible until the country was free from foreign rule. Hence the unity of the Congress as the spear-head of the national struggle had to be maintained at all cost. With the acceptance of office by the Congress, the rift between Socialist and orthodox Congressmen began to grow. Socialist criticism of the Congress became harsher and the general attitude of the Party more hostile. The Socialists were opposed to the very idea of office acceptance, which connoted to them a slackening of the national will to freedom. Then came the war, the 'quit India' movement, and finally the Government ban on the Socialist Party. Following the imposition of the ban the leaders of the Party went underground and from there kept up an unceasing attack on the British authority all through the war. At the end of the war the Congress Governments returned to power, and lifted the ban on the Socialist Party. The Socialist leaders came out of their prisons and hiding places with a new consciousness of their strength and power in the country. They were also full of self-confidence born out of their underground struggle against the British Power. The Party, in fact, underwent an experience which was akin to rebirth. Under the circumstances, there did not seem to be any particular reason why the Socialists should not organize on their own now that freedom was nearly won and the old need for unity in the Congress did not exist. Accordingly when the Party met in Conference at Kanpur in 1947 March it took the first step towards independence of the Congress. It decided to drop the word 'Congress' from its title and throw open membership of the Party, to Congressmen and non-Congressmen alike.

A resolution passed at the same Conference declared that the aim of the Party was to establish 'democratic socialism' as opposed to 'totalitarian communism'. If constitutional means failed to bring 'democratic socialism' the party would be forced to resort to a revolutionary struggle. Even open dictatorship might become necessary for a short period before the country was safe for democracy.

DIFFERENCES WITH COMMUNISTS

The Kanpur Conference also defined the attitude of the Party to the Communists. The Socialists and the Communists had worked closely together for many years, so closely indeed that at the Lahore session of the Socialist Party just before the War Mr. Jayaprakash Narayan unfurled the Red Flag and declared that there was no difference worth mentioning between the policies of the two Parties. Serious differences, however, arose during the war when the Communists supported the war effort and the Socialists opposed it. Subsequent controversies embittered feeling to such an extent that relations were broken off beyond hope of repair. A statement issued at the Kanpur session explained the differences between the two Parties thus:

"The Communists do not consider any party other than their own to be either revolutionary or socialist; accordingly, a policy of unity is to them only a means of infiltration into other parties in order either to capture or destroy them. So there can never be unity with the Communists.

"The war years revealed a yet more fundamental obstacle to unity or co-operation with the Communist Party. These years showed conclusively, what was previously only vaguely felt, that the Communist parties all over the world are completely under the control of the Russian Government. Their policies everywhere are attuned to the policies of that Government

and, under ideological cloak of communism, they function everywhere as its permanent and loyal fifth column.

"The Communists in this country, as elsewhere, are often described as leftists, but they are neither leftists, nor rightists.

"There is a third basic difference between the Socialist Party and the Communist Party. The Socialist Party aims at the establishment of democratic socialism, whereas the objective of the Communist Party is totalitarian communism. The Socialist Party desires to establish a proletarian democracy, a *Kisan Mazdoor Raj*, while the Communists desire to establish the dictatorial rule of their party over the workers and peasants. There can be nothing in common between the two parties working for such divergent aims."

ATTITUDE TO RUSSIA

The statement then went on to describe the Socialist Party's attitude to Russia:

"Denunciation of the Communist Party as a Russian fifth column is represented by the Communists as hostility to Russia herself, and they denounce the Socialist Party in turn as anti-Russian. This is only an example of their dishonest tactics. The Socialist Party declares that it is not only not hostile to the Soviet Union but is even its friend. The Party firmly believes that free India, in her own interest, must live on the friendliest possible terms with Russia. While the Party shall always endeavour to promote this friendship, it wishes to make it clear that this friendship must always be on the basis of complete equality and that free India will never brook any interference with her affairs by any country, however friendly.

"The party wishes further to make it clear that while it does believe that valuable work has been done in Russia in the sphere of planning and nationalized economy, and while it also believes that it is not for outsiders to meddle in the affairs of Russia, the Party considers it a duty to the Socialist movement in this country to draw lessons from the success and failure in Russia."

The Kanpur Conference of the Socialists also had an important effect on Congress-Socialist relations. It made the difference between Socialist and Congress ideology clear beyond any doubt. From then on, Socialists and Congressmen drifted further and further apart till the Socialists completely broke away from the parent organization. Before this happened, there was an uneasy period during which the Socialists seemed to be at once in the Congress and out of it. This situation produced a great deal of bitterness between Socialist Congressmen and non-Socialist Congressmen. The latter complained that the Socialists in the Congress were trying to have it both ways. On the one hand they wanted to fight the policy of the organization of which they were members. On the other, they did not wish to lose any of the advantages which membership of the organization offered in that fight. Congressmen contended that if the Socialists wanted to remain in the Congress, they ought to conform to Congress policy. But if they wished to pursue a policy of their own then they ought to leave the Congress. That was the alternative as Congressmen saw it. The Socialists too for their part were beginning to realize that loyalty to their convictions was not compatible with loyalty to the Congress. If they wished to retain their Socialist faith, they should resign from the Congress. Accordingly at the 1948 Conference of the Party at Nasik the Socialists finally decided to leave the Congress and function as an independent political party.

CASE AGAINST CONGRESS

The Socialist case against the Congress was stated in a series of resolutions passed at the 1949 annual conference at Patna may be summarized as follows:—

The Congress ideology is capitalist. The Congress believes whole-heartedly in free enterprise and thinks that prosperity can be attained

by supplying more and yet more incentive to the capitalist. No bold or progressive policy has issued from any of the Congress Governments. On the other hand they have inflicted fresh burdens on the poor.

The more specific charges ran as follows:—

The Central Government promised an economy of control and regulation with a National Planning Commission to regulate the flow of economic life. The promise has not been carried out. The Government has not even set up a Planning Commission let alone entrusting it with executive power. The failure to plan and regulate has led to lack of co-ordination between different branches of the Government, thus preventing a full and adequate use of the productive resources of the country. The Government has no long-range import and export policy. It lives from hand-to-mouth and is susceptible to pressure from organized business interests.

The Government follows a policy of appeasement towards the industrialist while it is over-critical of organized labour. The very mention of the word 'strike' serves in the nature of a red rag to the Government. The Essential Services (Prevention of Strikes) Bill shows that the Government is doing its best to crush all independent labour organizations.

The industrial truce agreement promised a fair wage to the worker. Far from keeping the promise, the Government's decontrol and de-rating policy actually resulted in lowering the real wage of the working man.

The budget proposals of the Government are frankly weighted in favour of the capitalists. While the Government made every concession to rich businessmen and industrialists, it taxed the necessities of the poor. It also decided to maintain a group of Princes in affluence and idleness at the cost of anything between one and a half rupees and five to the general tax-payer.

The Provincial Governments are delaying the abolition of zamindari and jagirdari systems. In fact, instead of working out a policy of redistribution of land some Provincial Governments are actually permitting the zamindars to increase the area of their home farms, thus indirectly encouraging capitalist farming, and the ejection of tenants, which is already occurring in parts of the U.P. What is even worse, the primary and essential producers are denied any relief in rent or rise in wages in proportion to the cost of living and of cultivation.

In general, the Government is more partial to industry than to agriculture. In the employment of foreign capital, for instance, it places more emphasis on big industrial projects than on the rehabilitation of agriculture. No effort is made to plan a large-scale investment in agriculture from a new angle commensurate with its position as the hub of the country's economic life.

In the political sphere there is steady and persistent encroachment on the liberties of the people. Certain sections of the Penal Code and the Criminal Procedure Code are being unfairly used to limit freedom of speech, press, assembly, association, movement. Efforts are made to usurp the power of the judiciary by circumscribing the use of the *habeas corpus*. There is also much emergency legislation. There is, for instance, an Act in Madras Province which empowers a police official of the status of sub-inspector to shoot people without permission from magistrates. There is, in fact, an unmistakable tendency on the part of the police to use more force than is necessary. The police machinery is also being used to help vested interests against workers and peasants. Government officials often connive at the maintenance of bodies of goondas by landlords for the purpose of terrorizing peasants.

The Government machinery is far from impartial in certain aspects of administration. For instance, there is discrimination in the matter of enrolment of non-Congressmen in the Home Guards, Raksha Dal, Prohibition Guards.

The I.N.T.U.C. and Congress-dominated Kisan Sabhas are given full freedom to carry on political activities such as holding meetings, organizing voluntary corps while similar freedom is denied to non-Congress organizations.

Such, broadly speaking, were the principal charges which the Socialists brought against the Congress and the Governments which the Congress had formed at the Centre and in the Provinces.

PATNA CONFERENCE

The seventh (and also the latest) Annual Conference of the Party met at Patna from 6th to 10th May 1949. Mr. Yusuf Meherally was elected Chairman, but owing to illness he could not attend the Conference. Acharya Narendra Deva therefore deputized for him and presided over the deliberations.

In his opening address, the Chairman emphasized that the Socialist Party was pledged to strengthen the democratic State, was opposed to the use of violent methods and wanted Socialist instruments of production by a democratic procedure. As such, it was just the party that supplied the need of the hour. He exhorted the gathering to move forward with unflinching steps and undiminished faith towards their party's goal.

Acharya Narendra Deva then declared that the reasons why the Socialists lost the by-election in the U.P. was that "there was a paucity of workers and lack of experience of elections." He added:

"Intensive work in a selected area is much more desirable than merely propagandist work carried out over a wide territory."

"We have a word of commendation for Government's diplomatic success in dealing with smaller Princes, but to say that there has been a bloodless revolution in the States is not justified by facts."

The Conference passed sixteen resolutions the more important among which concerned the political situation, the economic situation, the food crisis, a programme of action for the country, commonwealth relations, ejection of tenants, civil liberties, the new constitution and foreign settlements. (A fuller summary of some of these resolutions is already given under the heading 'Case Against Congress'.)

The political resolution blamed the Communist Party and the Congress for spreading frustration among the people, and pledged the Socialist Party to the organization of the people in trade unions, kisan panchayats, co-operatives, sevdals as steps towards the establishment of a Socialist State.

The resolution on the economic situation criticized the Government for trying to appease the capitalist and richer classes and ignoring the interests of labour and the common man.

The resolution on the ejection of tenants regretted the delay in eliminating intermediaries between the Government and the tenants—condemned the ejection of tenants by zamindars in parts of the U.P. and deplored that in many parts of the country the Governments were adopting repressive measures against genuine kisan workers.

The resolution on national language asked that no attempt should be made to replace a Provincial language by the national language as the medium of instruction at the primary or secondary stage. The recognition of Hindi as the national language can only come about by gradual stages. But a beginning should be made in this direction by making a study of Hindi compulsory at the secondary and university levels. A common inter-provincial culture could be promoted if the different linguistic groups in the country could agree on a common script.

The resolution on the refugees deplored the lack of system in dispersing relief even after a lapse of one and a half years. The refugees can become an asset to the country if rehabilitation

is properly planned through the establishment, for instance, of co-operative colonies, collective farming, co-operative industries. The exchange of urban property should be effected through Government agency and not as between private individuals. Land in rural areas should be granted to the actual tillers and no attempt should be made to recreate a feudal tenure. Also care will have to be taken that the unit of allotment does not fall below the requirements of an economic holding.

Some of the other resolutions passed at the Conference are given below :

COMMONWEALTH RELATIONS

"Throughout her long years of struggle for Purna Swaraj the Indian people pledged themselves to end every vestige of foreign interest and influence in our national affairs. The critical situation that has developed in Asia after the end of World War II requires that India should retain the fullest freedom in order to play her part effectively for the maintenance of her freedom and peace between nations.

"Britain retains imperialist possessions in Malaya and she has still an extensive stake in other parts of Asia and Africa. Britain is also lending her support to other imperialist powers that have possessions in Asia like Holland and France. The people of Asia are determined to end the domination of European powers and they look to India for moral support and co-operation. Britain still retains through her investments a considerable control over some of India's vital resources like high-grade coal, manganese, mica and over some shipping, banking and financial interests.

"Under these circumstances, it is essential that India should break away from any formal association with Britain and the Commonwealth. The Indian people could then welcome a specific treaty of co-operation with the Labour Government of Britain mutually beneficial in such spheres where British policy has freed itself from imperialist and financial domination.

"During recent weeks Britain has contracted considerable military and diplomatic commitments through the Brussels Pact. She is thus pledged in alliance with European powers who are denying freedom to other colonial people in Asia who are struggling to attain their freedom.

"In view of Britain's new commitments in the North Atlantic Pact she has definitely decided to join the American power bloc against Soviet Russia. Neutrality would become a farce if India were to retain her tie with the British Commonwealth which is itself tied up to the Atlantic Pact. All these considerations make it essential for India to break the link with the Commonwealth. The change in the balance of power in Asia caused by the collapse of the Kuo Min T'ang, demands that India should stand completely free from any alliance with Britain, particularly in respect of Asian *status quo*. India cannot unite the countries of Asia in a powerful peace bloc, while these nations are struggling against European domination, and while she remains tied up to the British Commonwealth. While welcoming India's association with the United Nations and with other regional alliances within the framework of the U.N.O., India must repudiate every commitment which negates her neutrality at that would drag our people in the vortex of international rivalries.

"The Socialist Party therefore calls upon the Indian people to fulfil the solemn pledge that is sanctified by the sacrifices of hundreds of her sons and daughters and assert her fullest sovereignty by terminating her link with the British Commonwealth. Only such a step will clear this new relationship of every trace of suspicion and disharmony and open the door for the co-operation of equals on such terms as may be conducive to mutual benefit and world peace."

INDIAN CONSTITUTION

"In the opinion of this Conference of the Socialist Party the Constitution of India as is framed and being finalised by the Constituent

Assembly is disappointing to lovers of democracy and socialism. It lacks faith in democracy, is permeated with conservatism and is likely to lead to executive despotism and in certain circumstances even to dictatorship. It recognises the principles of adult franchise and parliamentary responsible government. But the legislative authority is vitiated by bicameralism and adversely affected by the ordinance making power of the executive. The system of responsible government is also crippled by Governor's discretionary powers which authorise him even to suspend the Council of Ministers and assume to himself the full charge of executive authority for a fortnight. The Draft Constitution also fails to provide democratic institutions to centrally administered areas. The people are lulled in a belief that the individual freedom is made absolutely secure in the Constitution while as a matter of fact, citizen's liberties can be restricted and suspended not only by the legislature but also by the executive through ordinances which can be issued between the sessions of the legislature. The provision with regard to property rights is so badly drafted that, if it is allowed to stand, it will lead to a lot of litigation and make economic legislation transfer of property to public ownership difficult. Even the directive principles of state policy fail to require the State to promote the establishment of democratic socialist order based on the organisation of agriculture, industry and credit on co-operative basis. The State is not required even to prohibit private monopolies. The Constitution, thus, deserves to be recast before it is finalised. For this purpose, a new Constituent Assembly elected on adult franchise should be convened, specially because the present Constituent Assembly cannot by any stretch of imagination be called fully representative of the people of the country."

FOREIGN SETTLEMENTS

"This Conference takes note of the increasing intensity that the struggle for democracy and reunion with India of a part of our people is assuming in the foreign settlements. The people of Goa are passing through conflict and a reign of terror which relies on the use of Portuguese and African troops for its continuance and has sent Punishottam Kakodkar, I. Loyola, Ram Heide, Evagrio George and many others to long terms of penal servitude in fortress prisons of Portugal and Goa. The people in the French settlement of Mahe have witnessed the suppression of their free Provisional Government with the threat of cruisers of France standing in port.

"While expressing astonishment at the refusal of the United Nations Human Rights Commission to take note of the utter denial of human liberties by the Portuguese, this Conference appeals to the freedom and socialist movements of Europe, particularly of France and Portugal, to impress upon their peoples and Governments the folly of maintaining these tiny settlements on Indian soil and thus of preserving a source of threat to the peace of the world. The Conference assures the population in these foreign settlements of the support of the Socialist Party and expresses its firm belief that, notwithstanding all the terror or the cunning, their reunion with India is a certainty and cannot be long delayed."

THE COMMUNIST PARTY OF INDIA

General Secretary : B. T. Ranadive.

President : Muzaffar Ahmed ; S. A. Dange ; Gurmukh Singh ; Mohanad Ismail ; S. S. Mirajkar ; Kalyanasundaram.

The Communist Party was started in 1924 but it did not become legal till 1943 when because of its support to the war effort the British Government lifted the ban which had been in force for nearly twenty years. The legalization order enabled the party to meet for the first time

in open session when it held a party congress. This session framed a constitution for the party and chalked out a programme.

The strength of the Party was about 7,000 in 1942. In 1946 it rose to 60,000. Today the Party claims a membership of about 80,000.

The Communist Party controls the All-India Trade Union Congress, the All-India Kisan Sabha and the All-India Students' Federation. It is represented in the Bombay Provincial Assembly by S. A. Dange, in the Madras Provincial Assembly by K. A. Nambiar and P. Venkateshwarulu, in the West Bengal Assembly by Jyoti Basu and Ratanlal Bhattacharya, and in the Constituent Assembly by Somnath Lahiri.

The parts of India where it has great influence are Malabar, Andhra, West Bengal, Telangana and East Punjab.

The party conducts eleven weeklies in all the major Indian languages (*Lokayug* in Marathi, *Janayug* in Gujarati, *Janayug* in Hindi, *Nayanaana* and *Azadi* in Urdu, *Janashakti* in Kannada, *Deshabhimani* in Malayalam, *Praja Shakti* in Telugu, *Svadeshini* in Bengali and *Janashakti* in Tamil) including one in English. (N.B.—Most of these papers are now under a ban.)

The Party's chief organ of propaganda, *The People's Age*, is skillfully got up and ably edited through the mode of expression is sometimes very crude and intemperate. The Party has an efficient publications department and a well-kept showroom. The F.S.U. (Friends of the Soviet Union) organizes periodical exhibitions and shows films with a political moral. (N.B.—The Communists say that the F.S.U. and the Communist Party are absolutely separate bodies). Besides holding innumerable meetings and conferences, the Communist Party observes Lenin Day on January 21, May Day on May 1, and October Revolution Day on November 7.

The Party derives its strength from the fanatical devotion of its members, their capacity for self-sacrifice, and the thoroughness and unanimity with which the party as a whole goes to work whenever the call is sounded.

CONSTITUTION

As regards the structure and organization of the party anyone who is above eighteen years of age and is a citizen of India can become a member of the Party provided he wholeheartedly believes in Communist philosophy, is willing to do field-work and agrees to carry out the programme chalked out from time to time.

Application for membership has to be endorsed by at least two members of the Party and when a candidate is accepted he must take an oath of loyalty to the Party and agree to pay a monthly contribution to the Party funds. Discipline is very strict.

The nucleus round which the whole structure is built is the 'cell' consisting of two or three members. Their duty is to spread the faith among the people with whom they live. Such 'cells' may be established in a mill or factory, workers' quarters, civic ward and so on, whenever conditions are propitious.

The hierarchy consists of a series of village, town, district and provincial congresses with their respective executive committees. Each committee generally consists of five members with two in reserve and an elected secretary. The congresses may meet once a year while the day to day work between any two congresses is carried on by committees. Periodical reports are sent from one body to another which is immediately above it.

The supreme body of the Communist Party of India is the All-India Party Congress which generally meets once a year. The Congress elects the Secretary of the Party and also its Central Committee which is the executive body of the Congress. The Committee makes a report to the annual Congress which among other things has the right to change the Party's policy or constitution. Each member of the Committee is

assigned the responsibility for some particular aspect of Party work. For instance, one member is in charge of Party newspapers, another directs work in allied organizations, a third looks after accounts, a fourth conducts Party schools and study circles and so on. Within the Central Committee itself there is a smaller body called the Politburo whose Secretary is identical with the Secretary of the Party. The Politburo is the most influential body in the whole organization being for all practical purposes the maker of the Party's policy.

AIMS AND OBJECTS

The basic aim of the Party as defined in the preamble to the Constitution is 'the organization of the toiling masses in the struggle for the victorious anti-imperialist and agrarian revolution for complete national independence, for the establishment of a people's democratic state led by the working class, for the realization of the dictatorship of the proletariat, and the building up of socialism according to the teachings of Marxism-Leninism'.

In more concrete terms the aims as described in a statement issued by the Central Committee of the Party after the Congress in Calcutta in 1948 January are as follows:—

(1) Complete severance from the British Empire and full and real independence.

(2) A democratic government representing the workers, peasants and other sections of the petty-bourgeoisie, opposed to collaboration with Anglo-American imperialism, allied to the democratic States working for peace and freedom of all nations.

(3) A constitution based on adult suffrage and proportional representation, guaranteeing full freedom and democracy to the common man and fundamental economic rights.

(4) Self-determination to nationalities including the right of secession. A voluntary Indian Union, autonomous linguistic Provinces.

(5) Just and democratic rights of minorities to be embodied in the constitution; equality and protection to the language and culture of minorities; all disabilities, privileges and discriminations based on caste, race and community to be abolished by law and their infringement to be punishable by law.

(6) Abolition of Princedom and feudal rule in the Indian States and the establishment of full democracy... The urgent and primary task inside the States is abolition of Princedom and feudal rule and establishment of a people's Democratic State.

Accession before that is only slavery of the States peoples both to Princely autocracy and to the bourgeois rulers of the Indian Union. It is only after the people of the States become completely free that they can have real liberty to decide the question of their relation with the rest of India. At that stage the question will be decided by the wishes of the people.

(7) Freedom of the tribal and other backward peoples from economic, cultural and political oppression, extension of full democratic rights to them, prompt and adequate State aid for their development, so that they may rapidly catch up with the advanced nationalities.

The people of all contiguous, compact, predominantly tribal areas shall have regional autonomous areas within the Provinces... The people of such areas or Provinces shall have the right to secede from the State by democratic verdict.

(8) Co-operation between the Indian Union and Pakistan for economic help, military and political alliance for defence, to pursue a democratic foreign policy in co-operation with the democratic States against the Anglo-American bloc.

(9) Abolition of all forms of landlordism without compensation and distribution of land to the tillers of the soil. Abolition of landlordism must mean confiscation of khas lands

of the non-cultivating land-owners and ensure land to the sub-tenants and share-croppers. Liquidation of rural indebtedness and abolition of usury; living wage for the agricultural labourer.

(10) Confiscation by the State of interests of foreign capital in banks, industrial and transport concerns, plantations, mines, etc., and nationalisation of these concerns.

(11) Nationalisation of big industries, big banks and insurance companies, guarantee of workers' control, minimum living wage, eight hours' day, etc.

(12) Economic plan to develop India's resources and removal of Big Business from strategic economic points. Control of profits in the industries in private hands.

(13) Repeal of all repressive legislation.

(14) Elimination of the bureaucratic administrative State apparatus and the establishment of a democratic administration with elected officials guided by people's committees.

(15) General arming of the people and the establishment of a democratic army.

(16) The right to free education and compulsory primary education.

(17) Equal democratic rights to women.

EXPULSION FROM CONGRESS

During the Second World War, the Communist Party in India supported the British Government against the declared policy of the Indian National Congress, though individual Communists, regular members of the Congress and subject to Congress discipline. This open defiance of official Congress policy resulted in bitterness and conflict between Congressmen and Communists and a loud demand arose for the expulsion of the Communists from the Congress. A number of grave charges were made against the Communists such as disloyalty, spying, bribery, collusion with the British authority, betrayal of the country's cause, and so on. When Mahatma Gandhi came out of prison he addressed a letter to the General Secretary of the Communist Party in which he asked him to answer a number of charges. Was it true, the Mahatma asked, that all Communists were compelled to eat meat? Was it true that there was communal ownership of women among them? Did the Communist Party keep any accounts? Were the accounts regularly audited by qualified accountants? Mr. P. C. Joshi, the then General Secretary of the Communist Party, answered, repudiating the charges contained in the Mahatma's letter as well as those made against the Communist Party from time to time during the war. He said that there was no compulsion among Communists to eat meat. Communists recognized the institution of marriage and provided plenty of privacy for married people. He invited Mahatma Gandhi to come and see for himself how the Communists lived from day to day. Finally, he offered to send his books to the Mahatma and have them scrutinized by any qualified accountants he chose. Mahatma Gandhi eventually asked the late Mr. Bhubabhai Desai to investigate the whole question and make a report. The report came out after some months and the conclusions to which the investigation pointed amounted to the virtual acquittal of the Communists of almost all the charges including the one about betrayal of Congress leaders into the hands of the police. A Congress sub-committee which included Pandit Nehru also investigated certain of these charges such as spying and came to the conclusion that most of them were frivolous and beneath notice.

The fact remains, however, that Communists were unable to rehabilitate themselves in public estimation though at the end of the War they began to conduct a virulent anti-British campaign and announced whole-hearted support of the National Government formed by Pandit Nehru. The new attitude though in complete harmony with orthodox patriotism failed to clear the Communists of the charge of unpatriotic conduct during the War. Neither did

it save them from eventual expulsion from the Congress, a step which that body authorized in 1945. The Communist Party, however, did not immediately go into opposition to the Indian National Congress. For a time the majority group in the Central Committee continued to offer partial support to the policy and programme of the National Congress, and later to the Government's formation of which the Congress had authorized. In other words, the group pursued what orthodox Communists would call 'right deviation policy'. For instance, it emphasized the need for more production and disapproved of strikes as a political weapon. It joined the other parties in asking the peasant to grow more food when orthodox Communism would demand a frontal attack on the whole land system. Whenever the Government took any action, which the Party disapproved, it put the blame on the bureaucracy and gave the Ministers the benefit of the doubt. Alternatively, it laid the responsibility for whatever it regarded as shortcomings on Sardar Patel whose policy it argued was different from that of Pandit Nehru or Mahatma Gandhi who, it further maintained, truly represented the Congress. Finally, this group in the Party upheld the Congress acceptance of the British Government's plan of 1946 June as a contribution to national freedom. Not all Communists in the Central Committee approved of the policy described above. In fact, a minority group led by Mr. B. T. Ranadive strongly opposed any sort of co-operation with the policies of the Congress or the Muslim League. This group denounced the Congress leaders as 'bourgeois collaborators with British and American imperialism', and asked that the Party should return forthwith to its original faith and start organizing the masses for the seizure of power so that they might establish a real democratic Government in the country.

COUNTRY-WIDE ACITATION

Whatever the differences in the inner councils of the Party, agitation among workers and peasants or in the country at large had never really ceased. The Communists were throughout active in a hundred different places among the R.I.N. ratings in Bombay, the World Tribesmen in Daham, the textile workers at Amalner and Colambore, the railway workers at Golden Rock, and among the peasants of Malabar and Telangana. Strikes occurred in Kanpur, Madras and in the industrial areas of Calcutta. There were peasant demonstrations in Bengal, Bihar and the U.P. The Communists also initiated political movements in some of the former States of Rajputana, and Central India, and in Kashmir and Travancore.

Thus trouble was being stirred up from one end of the country to the other, just at the moment when the nation needed peace and quiet to consolidate its newly-won freedom. As time passed it was becoming clear that Government could not permit this agitation to go on without detriment to the larger economic and political interests of the country. But it refrained from taking any action against the Party as a whole, yet, for it was anxious to preserve the whole structure of political liberties which the nation had so long enjoyed. What Government did do was to meet local agitation by local measures intended to maintain law and order and keep the economic life of the place going.

It is also possible that part of the reason why the Government did not take decisive action was that the annual Communist Congress was due to meet in Calcutta later in the year, when the Party was expected to define its general attitude to the Government of the country and decide its course of action. The Government was possibly aware of the struggle in the Central Committee and was waiting to see which of the two policies 'reformism' or 'revolution' would eventually prevail at the Party Congress. Actually there was little doubt about the final issue. For all the time that the agitation was in progress opinion among the rank and file was slowly swinging away from the point of view represented by Mr. Joshi, the majority leader towards the policies advocated by Mr. Ranadive,

the minority leader. Feeling was greatly exacerbated by repeated clashes with the Government, and members came to the conference in a fighting, defiant mood. The result was a complete victory for the group led by Mr. Hanadive; Mr. Joshi who had been the General Secretary of the Party for twelve long years failed to get elected to the Central Committee.

CALCUTTA CONGRESS

The Congress opened at Calcutta on February 28. There were about 800 delegates from India and 15 delegates from the Communist Parties of Yugoslavia, Australia and Burma. Among the foreign delegates who addressed the meeting were Mr. L. L. Sharkey, the President of the Communist Party of Australia and U. Tian Tun, the leader of the Communist Party in Burma.

The Congress first adopted a resolution moved by Mr. S. A. Dange paying homage to the memory of Mahatma Gandhi. By another resolution the Congress condemned 'the dastardly murderous assault' on the Indian People's Theatre Association's reception to foreign delegates of the South-East Asia Youth Conference on February 27.

Mr. B. T. Ranadive then presented his political thesis. He criticized the past policies of the Party and said that the Party had failed to realise that the 'bourgeoisie' had betrayed the cause of freedom and passed on to collaborate with Imperialism. The Congress and League leadership were busy transferring the burden of the crisis to the shoulders of the workers, peasants and the middle classes in order to keep up the old social order and maintain capitalist profits.

The Congress called upon the youth of South-East Asia ruthlessly to expose and fight all Imperialist intrigues and designs, intensify the struggle for real freedom and people's democracy, and take a foremost part in all these struggles.

CRITICISM OF CONSTITUTION

The new Central Committee in a statement setting out the policy of the Party criticized the draft constitution of India:

"The Constituent Assembly manned by the same leaders as lead the 'National Government' has prepared an authoritarian constitution. The toiling people will not get anything except the right to vote at long intervals. It provides for arrest without warrant and detention without trial. It authorises the Provincial Governors to act in their discretion, legislate by ordinance and rule by proclamation. It makes the reactionary provision for Second Chamber in the Provinces, allows for nomination of members to the Second Chamber by Governors, thus ensuring that the vested interests and their spokesmen will get a dominant voice in the Chamber.

"The model constitution for the Provinces does not accept the basic right of nationalities to self-determination, it does not provide for proportional representation without which the progressive political parties and the various minority groups cannot get fair representation. It does not provide for regrouping of tribal and other backward areas and formation of autonomous regions or Provinces without which these backward people cannot economically and culturally protect and develop themselves.

"Under the constitution the basic and fundamental rights of the toiling people, such as right to work, right to living wage, equal pay for equal work, right to old age, sickness and unemployment aid, do not find a place as fundamental rights constitutionally guaranteed by the State.

"But the property and privileges of the vested interests are granted legal and constitutional protection by a clause in the fundamental rights that no property of a person or corporation shall be taken over for public use except by payment of adequate compensation, thus preventing through a constitutional guarantee all plans of nationalisation of industries including foreign concerns."

ATTACK ON GOVERNMENT

The Central Committee then turned on the National Government including in one wild orpy of denunciation the Government's economic, social, political and foreign policy.

"Since August 15 the so-called National Government has been carrying out the plan of the Indian bourgeoisie to oppose nationalisation, suppress the workers, intensify their labour and freeze wages in the name of stopping the wage-price spiral.

"It is ruthlessly suppressing all peasant movements to the complete satisfaction of the landlords. Even its halting agrarian reform proposals are saddled with compensation to the landlords and with no provision for land to the tillers. They retain landlordism under a different form. The proposed agrarian legislation is an attempt to split the peasant movement and to broaden the basis of the present bourgeois Government.

"The Provincial Governments under the guidance of the Central Government have passed Public Safety Acts which are freely used against the democratic movements of the workers, peasants and students.

"The so-called National Government is crushing the States people's struggles against the princely order and suppressing agrarian struggles in the native States. It is saving Princedom and side-tracking people's attention from democratic struggles by parading accession as a big popular triumph.

"In the matter of minorities it is following a communal policy. Oppression of minorities has become a deliberate policy, as is evidenced from Patel's praise of the RSS and alliance with the Hindu Mahasabha. So firmly is communalism entrenched in the so-called National Government that even after Gandhi's assassination by an RSS man, no more than a mere show has been made of arrests and prohibition measures, in spite of angry anti-communal outbursts of the common people. The 'National Government' instead of really suppressing communal bodies has taken the opportunity to suppress the Communists. . . .

"The policy pursued by the Nehru Government is one of collaboration with British and American imperialism. The British and American imperialists are securing strategic positions in India by 'agreement' with the 'National Government' who has agreed to no discrimination against foreign capital but encouragement to it, no nationalisation, no tariffs which are not agreed to, and joint concerns for the exploitation of the Indian people. This policy logically means no full-scale industrialisation of India but the growth of only such industries as suit the interests of American and British capitalists.

"The foreign policy of the Nehru Government illustrates the same collaboration.

"From the very beginning Pandit Nehru adopted a line of forming a so-called third bloc—a line which represented the interests of Big Business inasmuch as it kept India away from the Anti-Imperialist Democratic Camp. At a time when the Anti-Imperialist Democratic Camp is engaged in a life-and-death struggle with the Imperialist Camp led by American Imperialism Nehru refuses to take the side of the former camp and poses neutrality. This so-called neutrality between the aggressor and the non-aggressor, between the war-monger and the peace-loving and between the expansionist and the freedom-loving camps is only a mask to cover collaboration with the Anglo-American imperialists.

"Recent months have torn the mask of 'neutrality' from the Nehru Government's foreign policy. On all crucial issues the Indian delegation in UNO, has taken an anti-democratic and pro-imperialist stand. It voted for 'Little Assembly' devised to paralyse the democratic forces inside UNO, it voted against immediate withdrawal of foreign troops from Korea, and on the question of representation of Ukraine in

the Security Council it allowed itself to be exploited by American imperialism.

"On the questions crucial for the peoples of Asia in particular, on the American-directed Kuomintang war against the Chinese people and the French colonial war in Viet Nam, it has remained silent and refused to act. On the question of the Japanese Peace Treaty, it has virtually lined up with Anglo-American imperialism. Over the American-backed Dutch war against the Indonesian people, it has approved of the betrayal of the Indonesian freedom struggle, achieved through by the U.S.-sponsored and dominated Good Offices Committee and welcomed by President Truman.

"The British Imperialists are giving open hints about an anti-Soviet bloc including their overseas Empire. Along with this come reports about an alliance of South East Asian countries embracing India, Pakistan, Burma and Ceylon in agreement with Britain. There are also reports about Military Missions from Britain coming to India to keep her defence properly organised.

"This shows how the 'National Government' representing the Indian bourgeoisie is dragging India into an anti-Soviet and anti-democratic bloc, in a scheme of defence of American and British Empires in the East."

So ran this astonishing indictment. The speeches made at the Congress, the resolutions passed, and finally the statement of policy issued by the new Central Committee left no room whatever for any compromise. To the Government watching the proceedings of the Congress the statement looked like a declaration of war. It had to take warning.

ACTION AGAINST COMMUNISTS

A month later the machinery of the Government began to move against the Communist Party. On March 25, 1949, the Government of West Bengal declared the Communist Party illegal in that Province, and almost immediately arrested a number of leading Communists. The main charge of the Government was that the Communists were arming the people for the purpose of capture of power. On April 2, the Government of Bombay rounded up seven communist leaders including Mr. S. A. Dange, President of the All India Trade Union Congress and Mr. S. S. Mirajkar, President of the Provincial Trade Union Congress. The authorities explained that the activities of the arrested men were dangerous to public safety and tranquillity. The Government of Madras which had for long been harassed by Communist activity in Malabar and the Andhra Districts tightened its security measures still further, and sent troops to some of the disturbed areas. Action against the Communists extended in fact to almost all the Provinces in India. Simultaneous arrests of Communists were effected at Cuttack in Orissa, Nagpur and Amraoti in the C.P., Jharia and Patna in Bihar, and at Simla in East Punjab.

GOVERNMENT EXPLANATION

As the arrests were generally made under Public Safety Acts without benefit of trial Government felt that some kind of explanation was necessary for the action which they took. Dr. Rajendra Prasad, who was then the President of the Congress, justified Government measures in a speech, stating that there was enough evidence and more in the possession of the West Bengal and Madras Governments to outlaw the whole Communist Party. The late Mr. Kisan Shanker Roy who was then the Home Minister of the Government of West Bengal gave more concrete reasons for the measures which he authorized. He said in Calcutta:

"The Communist Party's long-term plan is to wage a classless campaign, open and underground, for the next six months, in preparation for a projected armed rising and a violent seizure of power.

"They are trying to collect arms at different places, some of which have been recovered in the recent searches. Secret bulletins of the

Party seized by Government show that the Communist Party, in its bid for power, is trying to organise countrywide strikes in the hope of paralysing the present Congress Government. They further show that armed mass risings all over India are the ultimate aim of the party."

"For two months, this party has lain low. Some of its members have gone underground and have been organising their illegal activities secretly. Posters, bulletins and news sheets of the Party are now making their appearance and it appears that the Communist Party, with the help of their sympathisers and supporters, is now deliberately seeking to embark on a programme which will bring it into a clash with Government."

"This is the party's short-term policy. Its long-term policy, as set forth in the surreptitious literature, which has come to our possession, is to wage a ceaseless campaign, open and underground, for the next six months in preparations for a projected armed rising and violent seizure of power."

The Government of Madras issued a pamphlet in which it described different aspects of Communist activity in the Province and made specific charges against the Party:

In a village in Tanjore district the harvest of crop over an area of 1,300 acres was held up as the result of an engineered agrarian dispute. In a near-by district the kisas carried away the entire produce on the plea that "the fruits of their labour rightly belonged only to them." Elsewhere the cultivators refused to surrender the share of the produce which they had undertaken to do as well as the land tax. These naturally hinder the production of food grains at a time when people are on the verge of starvation.

Besides these assaults on the economic front, Communists have been playing a dangerous political game. They terrorise people in outlying areas into submission to a ruthless party rule which has in many cases deteriorated into parallel government. That the Communists have taken the law into their own hands is proved from reports that in Andhra and Malabar districts they hold Communist 'Praja Courts' which try those opposed to their party and pass sentences of death on them—these sentences seem also to have been executed in some cases."

Violence is known to have accompanied campaigns designed to establish a Communist regime. Land vacated by frightened and fleeing landlords is distributed to cultivators by local workers of the Party who confer "title deeds" on the new owners. When revenue authorities or the police later appear on the scene in small parties they are invariably beaten up. There are besides armed dacoities and highway robberies which are either directly Communist-inspired or facilitated by the chaotic conditions created by them. The pamphlet concluded:

"They have stirred up class hatred and unleashed violence. They have strangled the productive machinery of the country by their policy of sabotage. They have challenged and attacked the very foundations of democracy and virtually declared war on the popular Government. They have used the peasants and labourers as pawns in their political game. In their fanatical zeal to see the 'Red Star' over the country, they have stained the land with the blood of innocent, misguided workers. They have wrecked the morale of public life, and violated all canons of political morality."

Finally a definitive explanation came from the Prime Minister himself. In a speech which he delivered in Delhi, Pandit Nehru stated that neither the Central nor the Provincial Government had any intention of preventing the Communists, or for that matter any other political party, from propagating their views and trying to win over the people to their own way of thinking. But no Government worth the name could watch a section of the people conspiring to overthrow them by violent means and then do nothing about it.

"The policy of the Communist Party of India had recently undergone a revolutionary change," the Prime Minister said. "A party had every right to change its policy whenever it liked, and there had been drastic and sudden changes in the policy of the Communist Party in the past. It had occasionally reversed its policy overnight. But this time the practical effects of the change had been dangerous for India's security services."

"Unrest among labour had grown considerably and there were strikes in factories. A large number of arms was being collected, preparations were being made to overthrow Government by violent means and the security services were faced with a grave danger of being sabotaged."

"The West Bengal Government had evidence to prove all this and it had, therefore, to resort to the extreme course of banning the Communist Party. Steps had to be taken to protect the security services or the entire life in the country would have been imperilled. Government had to order the arrest of the people who were planning violence against them."

"The Central Government, had no desire to declare any party unlawful, but they could not tolerate any violent activities directed against them."

Pandit Nehru then observed, "I have sympathy for their principles, but we had to put them down because the Communists of India were aiming to create unrest among the people and seize power by creating chaos in the country."

He then went on to add that "Government's action against the Communists should not be misunderstood. It had nothing to do with India's stand in international politics and it should not be taken to mean an expression of her sympathy for one bloc or opposition to another. It was India's domestic affair. If there was war in the world, India would not necessarily join it on the side of one group."

Mr. N. M. Joshi, the Secretary of the A.I.T.U.C., protested against the actions of the Provincial Governments in a speech in Madras, and said that the Government had not produced any evidence so far of violence committed by persons detained in prison without trial.

Meanwhile a report from Lucknow declared that the Central Government was in correspondence with Provincial Governments on the question of banning the Communist Party.

RAILWAY STRIKE

A year later the Communists again came into conflict with the Government over the question of strike on the railways. Briefly the facts are as follows:

The railwaymen served the Government with a notice that they would go on strike on a certain fixed day if their grievances were not redressed. As the day fixed for the strike approached the Government offered certain terms, and also expressed its willingness to negotiate with a view to a permanent settlement. The Committee of the Railwaymen's Federation decided by a majority to accept the offer. A minority mostly Communist insisted that the railwaymen ought to go on strike on the day fixed. And some of the railway unions dominated by Communists decided to go forward with their preparations for the strike, regardless of the decision of the Federation.

About three weeks before the day fixed for the strike police all over the country carried out simultaneous raids to round up Communists who were suspected of instigating railwaymen to strike. In Bombay city and suburb 22 persons were arrested including two prominent office-bearers of the B.B. & C.I. Railwaymen's Union. In Calcutta 20 arrests were made after thirty places had been raided and searched. In the whole Province of West Bengal the number of total arrested exceeded 50. Arrests were likewise made in Trichinopoly in Madras Province and in Mysore. Six Communists were arrested in Ahmedabad District and two in Khara and Anand Districts. About 50 persons

alleged to be Communists were taken into custody in Surat and Baroda Districts. Ten Communists were rounded up in the C.P. and Berar. Four persons were arrested in Madras and seven employees of the South Indian Railway who were alleged to be Communist sympathisers were taken into custody. Twelve persons were detained in Benares, eight in Nasik, ten in Bhusawal and eleven in Godhra. Arrests in Patna, Aligarh and Jubbulpore totalled about 30. In Hyderabad the Military Government launched a state-wide drive against the Communists and as one report stated "hundreds of persons were expected to be taken into custody." An order was issued banning the display of red flags, the assembly of five or more persons, or the carrying of arms or sticks.

The Party stuck to its original decision to organize the strike on the railways. In a statement on the arrest of 'railwaymen and others' the Party said that it pledged full support to the 'mighty working class action the railwaymen were fighting' and declared that the railwaymen would go ahead with their preparations for the 'just strike struggle to start on March 9 (1949)'. The statement gave the figures of those arrested, which included both railwaymen and postal employees, as 600 in all.

In a later statement the Central Office of the Communist Party of India denied charges of sabotage made by Pandit Nehru in the Dominion Parliament and asked him to prove the charges in public. The statement described the arrest of communist trade union workers on the railways as an 'onslaught aimed at the complete suppression of the already meagre trade union rights of the Indian working class'. The statement finally demanded the trial of the workers who were arrested.

Two days later an authoritative spokesman in Delhi explained that the country-wide round-up of Communists was a precautionary measure designed to prevent a political strike and willful disruption of communications. The spokesman believed that there had been contact between Communists in India and those in Burma along the Indo-Burma border and that Indian Communists' plan to create chaotic conditions in India was part of a larger plan covering a wide region.

The Government of India, it was stated, had sufficient evidence some time ago which would have warranted their advising the Provincial Governments to take action against the potential trouble-makers.

They, however, then refrained from doing so as talks with the All-India Railwaymen's Federation, to which some Communist-dominated unions were affiliated, were in progress. When the Federation's attitude in regard to the contemplated strike became clear, Government, considered that the time had come to advise the Provincial Governments to take steps against the Communists.

The Government of India, it was stated, had received intelligence reports for some time past that Communist elements, especially those in some of the important railway unions, had planned to create a situation where sabotage and violence could flourish and thus present a serious threat to the constituted authority. It was also reported that Communist intentions became clearer from their activities in Calcutta where a so-called "student demonstration," bombs and grenades were used. A large number of these missiles were later seized during searches.

To sum up the position today many Communist workers are in custody, many have gone underground, and most Communist papers are under a ban. And while the Party is completely illegal in West Bengal and Hyderabad, elsewhere it leads a kind of semi-legal existence.

A conference of Provincial Prime Ministers which met in Delhi came to the conclusion that the policy of the Government had kept the growth of the Communist movement in check. A point which was discussed at the conference was the very 'noticeable foreign influence behind the movement'.

THE WOMEN'S MOVEMENT

THE last 20 years have seen many changes in the position of Indian women in social, cultural and political spheres. They have come a long way since the early years of the Home Rule Agitation (1914-1917), when first they awakened to a consciousness of their rights. From that day onward there has been no looking back and the movement, gaining momentum with the years, has achieved remarkable results. The measure of success attending the endeavours of women in this country during the last two decades can best be gauged from a study of the rights, social and legal, no less than political, that they have acquired since the movement was launched.

Today the Indian woman is not only represented in almost every field of national activity but is also making her mark in international affairs. At home, a woman - Rajkumari Amrit Kaur - holds the Health portfolio in the Central Cabinet. Abroad, another woman Mrs. Vijayalakshmi Pandit is India's ambassador to the United States of America. A woman has been a provincial governor and minister, there are women members in the Constituent Assembly and provincial legislatures; women have figured on delegations to U.N. and have represented India on the U.N.E.S.C.O. and the various subordinate organisations of the United Nations. There are women doctors, lawyers, engineers, architects, artists, journalists, business executives and nurses.

Altogether Indian women at the present time wield a great amount of social and political influence.

WOMEN'S SUFFRAGE

It would not be wrong to say that Indian women have accomplished much more in much less time than the women of the West, and seemingly with much less effort and opposition; the last because of the sympathetic attitude of political leaders and older statesmen as far back as 1917. It was in that year that the first claim for suffrage for Indian women was made in an address presented to Mr. Montague at the historic All-India Women's Deputation, which waited upon him in Madras on December 18, 1917. The section referring to enfranchisement merits full quotation:—

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (1. 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the above-mentioned Memorandum that a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which, since its inception, women have voted and been delegates and speakers, and which, this year finds its climax in the election of a woman as its President. Thus the vote of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this

proved a more difficult matter. It was a disappointment first, that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford was published, no mention of women was made though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which pointed to the need for, and the country's support of, the inclusion of women in the new franchise.

FRANCHISE GRANTED

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Miss Herabai Tata were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election to Legislative Councils.

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women were enfranchised. Other provinces followed suit, and at the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right. And the women justified the confidence placed in them by sponsoring and successfully carrying through many measures of uplift and reform in regard to the status and influence of women.

Though the Municipal franchise was granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make any large impact on women's consciousness, and indeed no protest was made when it was suddenly withdrawn from Madras women some years later.

A unique step has been taken in Bombay city with the adoption of adult franchise. All women, above the age of 21, are qualified to vote for the Bombay Corporation although the percentage of those who voted in recent elections did not exceed 15. In other Municipalities in that Presidency too, women exercise their vote intelligently. Since 1922 scores of women have become Municipal Councillors and members of Local Boards. Their appointment has chiefly been by nomination but there have been notable instances of seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seats in the Bombay Corporation, or the one in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have been secured by this large band of women councillors, and every year sees a greater number of women serving on these Local Councils and Boards.

Some of the provisions as regards franchise are as follows. Women have been enfranchised who have the property qualification in their own

right, or are wives or widows of men so qualified, or are wives of men with a service qualification, or are pensioned widows or mothers of members of the military or police forces, or who possess a literacy qualification. Women not holding the requisite qualification in their own right are required to apply to be enrolled, stating their derived qualification, but this procedure has been waived in some provinces. Through these means it is estimated more than six million women (against 315,000 under the Act of 1919) have been given the right to vote, compared to 20 million men.

It is noteworthy, too, that men and women can vote both in general constituencies and in special constituencies. Women can vote in and contest elections to the Upper House in provinces where bicameral legislatures have been set up.

Both evidence and result of the awakening among Indian women are to be found in nearly half a dozen legislative measures sponsored by women legislators, notably in the Bombay Assembly, calculated to confer greater rights and freedom on women.

The right of divorce which was unknown to Hindu Law has been secured under certain conditions. In Bombay, antipolygamy and divorce laws have been placed on the Statute Book.

ALL-INDIA WOMEN'S CONFERENCE

It was the Home Rule agitation in the years 1914-17 which first made women conscious of their own rights. The interment of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for giving public expression to their feelings came when the Secretary of State for India arrived in India in 1917 to investigate and study Indian affairs at first-hand.

Indian women have in the past ventilated their grievances and demands through their many organisations. Even today these are the official organs of the voice of India's women. The All India Women's Conference is still the principal body claiming a membership of about 27,000 with 40 branches and 164 constituent branches.

The All-India Women's Conference came into existence, as a result of the initiative taken by Mrs. Margaret Cousins, towards the end of 1926, the first session of the conference being held at Poona in the first week of January, 1927. In the beginning it was inclined to concentrate its attention on the basic question of women's education. The resolutions passed at the first conference were almost wholly devoted to the different aspects of women's education, the only exception being a resolution condemning child marriage and supporting Sir H. S. Gour's Age of Consent Bill. Even this subject was touched upon only because it was felt that early marriages were a very serious impediment in the progress of girls' education.

Such a narrow programme could not, however, be expected to satisfy the leaders of the women's movement for a long time and it was not surprising that at the third session the scope of the conference was definitely widened to include social reform. Education of women, raising the age of marriage, removal of untouchability and caste restrictions, rural uplift, and reform of the laws of inheritance as affecting women are some of the more important of the subjects in which the conference has interested itself.

A satisfactory feature of the women's movement in India has been the spirit of unity and co-operation behind it. A mere glance at the list of presidents of the All-India Women's Conference—which includes the Maharani of Baroda, the Begum of Bhopal, Mrs. Sarojini Naidu, Lady R. Nikanth, Lady Abdul Qadir, Mrs. Faridunji, the Maharani of Travancore, Mrs. Cousins, Rajkumari Amrit Kaur, Mrs. Rameshwari Nehru, Shrimati

Vijayalakshmi Pandit, Shrimati Kamaladevi, Lady Rama Rau and Shrimati Anasuyabai Kale,—should suffice to show that the Conference has never been affected by differences of caste, community, race or class.

This organisation, it may be noted, has latterly shown a tendency to move beyond the requirements of sectional plea and strayed into wider political activity. It is not, however, difficult to explain this development. The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive political movement conducted by Mahatma Gandhi and the Congress since 1920.

1948 SESSION

Speaking at the twentieth session of the All-India Women's Conference, Lady Rama Rau, referred, with legitimate pride, to the recognition of the work of the women's organisations in India not only by the people in this country but by the leading organisations of the world. She also referred to the recognition, the Conference had received from the United Nations Organisation and stated: "This is the first time that a national organisation like ours has been so honoured."

Delegates from several parts of the world, including the United Kingdom, France, Sweden, U.S.A., China and Indonesia were present. They all conveyed the greetings of their countries to the Conference.

Presiding over the Conference, Mrs. Anasuyabai Kale stressed the need for a Ministry of Social Affairs at the Centre and in the Provinces. "The importance of social problems has been overlooked in our fight for political freedom," she observed. "It is essential now," she pointed out, "that we should co-ordinate the two if we wish to achieve our goal of social justice and equality. No country can make headway even politically unless and until social disabilities are removed. For this purpose, I humbly suggest the establishment of a Ministry of Social Affairs both at the Centre and in the Provinces. It will be the function of this Ministry to frame a new Manusmriti to govern social relations of all the subjects of the State to remove social injustice and to regulate the population according to the needs of the country. We must remember that we have to do all this immediately as there is a danger of a third world war."

By a resolution, the Conference appealed to the Government of India to revise the Hindu Code and to this end, it directed the Standing Committee of the Conference to appoint a deputation to wait on the Prime Minister, Pandit Jawaharlal Nehru. The Conference also appealed to all the States to adopt the draft revision of the Hindu Code as embodied in the recommendations of the Rau Committee.

Other resolutions adopted by the Conference include: the need for implementing on a nation-wide scale schemes for the immediate introduction of compulsory and free basic education; the adoption of films as a medium of instruction; the compulsory study of ethics, civics and physical training in all schools and the need of imparting sex education to boys and girls in high schools.

1949 SESSION

"We must think in terms of the millions of those ignorant, dumb women who live not in cities but in far off corners of India, who dress not as we dress and talk not the language we talk," said Mrs. Urmilla Mehta, President of the A.I.W.C. for the year 1949 in her address to the 21st Session of the Conference at Gwalior in January 1949.

Mrs. Mehta in her speech covered all aspects of Indian national life—political, economic, moral, social and cultural—and asked women to help the builders of India in their great task. She added that she had no doubt that women were just as capable of shouldering the burden of administration as men.

Stating that the women's movement had grown out of an urge which was mainly political and that many of the women who had actively

participated in the national movement were today the leading lights of the Conference, Mrs. Mehta appealed to the women of India for a new purpose and a new objective, and to create new values.

She added: "We must speedily raise the educational and cultural level of India's women, not necessarily by destroying the harmony of their present life, but by gradually modernising it with a view to fitting it into the changing environments. Yet in our enthusiasm to uphold and jealously guard the rights of women, let us not lose sight of the fact that rights bring in their wake duties and obligations. Our duty and obligation to society and to the nation at large are to raise the downtrodden women of India and to make them feel that they too have a part to play in national life."

"The poverty and squalor that permeate our country are now our headache. There is so much to be done in every sphere of national life, yet so little is actually being done. What our country needs today is a new social conscience and in awakening this the women of India can play no insignificant part. They should undertake the organisation of centres for training future mothers in the right way of bringing up their children so that they may become the pride of India tomorrow. It should also be the duty of the Women's Conference to take a hand in educating the masses by organising a network of literacy classes for women all over the country."

Mrs. Mehta prefaced her remarks by a reference to the tragedy that had followed in the wake of partition and to the glorious work which women had done in succouring the victims of this tragedy. She deprecated the formation of linguistic provinces. Referring to labour unrest and the rising spiral of prices, she expressed the hope that leaders of both labour and industry would come together in this hour of national crisis.

Mrs. Mehta adverted to the problem of population and suggested intensive propaganda to bring home to the people that a limited family was not only an advantage from the economic and hygienic point of view, but also from the standpoint of the strength of the nation. She also advocated the necessity of social organisations taking up the training of the people in the principles of sanitation, health and hygiene. In conclusion, Mrs. Mehta stated that social education and improvement in the general standard and values of life must go hand in hand with the enforcement of law against social evils.

The Prime Minister Pandit Jawaharlal Nehru, in a message wishing success to the Conference said, "I have long held that a country's progress can be measured by the status and progress of the women of the country."

RESOLUTIONS

The Conference passed a number of resolutions covering problems of health, social service, legal disabilities of women, inflation and the necessity for world peace and freedom. The resolution dealing with safeguarding the health of women in India stated that, provision should be made for medical advice and help to married women in matters of ante-natal and post-natal care. While appreciating the growing interests in women's education, the Conference deplored

the prevailing tendency to have a separate curriculum for girls, excluding such important subjects as mathematics from the syllabus. Realising the important role that women play in giving effect to all plans of national reconstruction, the conference insisted that up to the end of the secondary stage boys and girls should have the same curriculum, so that a medium of intellectual training would be available even for those who did not wish to pursue an independent career in one of the professions. The conference demanded that social service be included in the curriculum for all schools and that field work be encouraged as an integral part of this training.

Another resolution reiterated the women's demand for a separate Ministry for Social Affairs at the Centre as well as in the Provinces. It also appealed to all women's organisations to give their active co-operation to Government in carrying out its various schemes for the alleviation of social and economic distress, particularly among women, caused by the partition of India.

An important resolution adopted by the Conference read: "In view of the fact that the new Constitution removes all disqualifications on grounds of sex, it is necessary that existing discrepancies in the law should be removed by necessary legislation. This Conference, therefore, demands that the Bill to Codify Hindu Law which has already been discussed for years be passed into law without any more delay."

The Conference affirmed its belief in the achievement of lasting world peace through the establishment of social justice and freedom for all nations. Mankind, the resolution on the subject stated, faced the threat of another war because of the domination of the world by large powers. The existing system of exploitation of industrially undeveloped countries, it stated, perpetuated their long bondage and hampered the economic and social progress of the world. In spite of the struggle for freedom carried on by the peoples of Asia, the conference noted with deep regret, many of the countries were still in a semi-colonial condition. Even in a free India small foreign settlements continued to exist. The conference strongly condemned the Dutch aggression in Indonesia and extended its heartfelt sympathies to the Indonesian people.

KASTURBA FUND

The work in connection with the emancipation of Indian womanhood and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944-45, thanks to the Kasturba Memorial Fund created for the commemoration of Mrs. Gandhi who died under detention in February 1944. At Mahatma Gandhi's request the trustees of the fund used the money for the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages. Attempts have been made to provide opportunities for Indian women to secure education, acquire knowledge of basic sanitary and hygienic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up to date maternity hospitals and clinics. In order to fulfil this ambitious project a large number of women were trained in special camps so that after adequate equipment they could scatter themselves throughout the length and breadth of the land to carry the message of women's uplift to every corner of rural India. At these training camps instruction was given in first-aid and home nursing, child welfare, village nursing, health visits, rural sanitation, balanced diet and cheap remedies. The object of these training camps was the raising of an army of experts called "Gram Sevikas" (servants of the village).

ORGANISATIONS IN BOMBAY

In Bombay city there are at the moment over 80 organisations working for the betterment of women and children and the women of this city have been foremost in every movement social, political and cultural.

Bombay's oldest organisation is the Bombay Presidency Women's Council started in 1919 under the presidency of Lady Willington. It is among the pioneer organisations in India possibly the very first, and has grown and expanded greatly since its inception. Its original aims and objects to centralise all social and philanthropic work throughout the province have not been forgotten and today the Council has 31 local bodies affiliated to it and branches at Ahmedabad, Poona, Sholapur and Bakaam.

Croche work in mills was the first problem which was tackled followed by infant and maternity welfare. The Council played a leading

part in the revision of factory laws, maternity benefit, housing conditions of workers living in chawls, regulation of wage payments, better conditions for *bidi* workers. The Council also submitted a memorandum to the Royal Commission appointed to inquire into the conditions of working women.

Through its Parliamentary Sub-Committee, the Council does propaganda for social legislation and in the past two years has been very active in the discussions on The Hindu Code Bill, the Bill to Regulate and Validate Marriages between various castes and sub-castes, the Bill to further amend the Child Restraint Act, 1929, the Bill to Restrain the Custom of Offering and Taking of Dowry in Marriages, Bills to amend the Indian Penal Code and the Criminal Procedure Code, the Bill to abolish the matriculation examination, and the Bill to Prohibit Excommunication in the Province of Bombay.

It was the B. P. W. C. which initiated the agitation for controlling beggary 21 years ago, and propaganda from then to this day has resulted in the legislation which came into force in March 1946.

One of the most important activities of the Council is the Rescue Home for Indian Women at Umerkhandi where hundreds of girls have found shelter. Provision is made in the Home for medical treatment, and facilities for education and vocational training are afforded. Government have recognised the importance of this work and have provided accommodation for the institution; a nominal grant for its upkeep is also being given.

The Council's Labour Sub-Committee has been doing a considerable amount of social work in a labour camp in the north of Bombay. The Council runs a dispensary and conducts sewing and literacy classes for the women in the camp. The workers of the camp have been persuaded to form a co-operative society through the Committee's efforts.

Another important activity of the Council has been the running of a holiday library for children for the last four years. This effort has been very successful, the average daily attendance at the library being 600. The Council has approached the Government of Bombay with a request to put the holiday library on a permanent basis.

The Literacy Sub-Committee of the Council has for several years been conducting literacy classes, while the Health Sub-Committee has been helping the Municipality in maintaining sanitation in markets and other public places.

The Bombay Presidency Women's Council is affiliated to the National Council of Women in India which in turn is affiliated to the International Council of Women.

Another very old organisation in Bombay is the National Indian Association which devotes its energies to promoting higher education among women. Other old organisations doing good work include the Seva Sadan, the Bhagini Samaj, the Gujarati Stree Mandal and the Bhatia Stree Mandal.

HINDU LAW REFORM

As the result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc. In 1937 the India Legislature enacted the Hindu Women's Rights to Property Act. Four years later, the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage. When the measures came up for consideration by the two Houses

of the Central Legislature, a joint committee of the two Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

The draft code is divided into six parts dealing with intestate and testamentary successions and matters arising therefrom, including maintenance; marriage and divorce; minority and guardianship; and adoption. In an explanatory statement the Committee say that it is generally felt that the evils of piecemeal legislation on the subject should be avoided and that an entire code acceptable to the general Hindu public should be formulated.

Divorce.—According to the proposed changes daughters are allowed a share—hitherto denied them—in property left by their fathers. Both wives and daughters are given absolute control of their inheritance. Marriages are divided into two classes, sacramental marriage and civil marriage. Either can be performed only when there is no other spouse living, thereby enforcing monogamy. Divorce is a new feature sought to be introduced by the draft code, although the grounds on which dissolution of marriage can be sought are limited; but equal rights in this behalf are given to husband and wife.

Although at the outset, there was much opposition to some of the recommendations of the Rau Committee, the country has now recognised the need for advance as can be seen by the provision contained in the constitution of the Democratic Republic of India.

ROTARY

THE first Rotary Club in India was started in 1919 at Calcutta. It took eight years to have the second club—Lahore—and in the next two years there was a total of seven clubs. Since then, by the end of 1941 there were 43 clubs in India, Burma and Ceylon. Then came the war and with the Japanese occupation of Burma five clubs were lost and three other clubs' charters were withdrawn, so that there were only 35 Rotary clubs.

The Rotary Governors and Club officers took a keen interest in the spreading of Rotary and today there are 83 clubs all functioning in India, Pakistan, Burma and Ceylon. There was only one district for the whole area of India, Burma and Ceylon until 1938, when the area was divided into two districts and in 1942 into four districts. With the increase in the number of clubs it became necessary in 1946 to set up 7 districts, with 7 Governors to administer them.

52ND DISTRICT.

GOVERNOR:

Pt. Raj Nath Kunzru, Chilli Int, Agra.

AGRA: 5028; Session 1949-50. *President:* Kamta Prasad, M.A., LL.B., Bugh Muzaffarkhan, Agra; *Secretary:* N. M. Framjee, C/o The Central Bank of India, Ltd., Agra. 8 p.m. 1st and 3rd Wednesdays, Imperia Hotel, Drummond Road, Agra.

BENARES: 6011; June 7, 1945. *President:* Raja Priyannanda Prasad Singh, B.A., LL.B.; Bhatal Imli, Benares; *Secretary:* Dr. A. K. Banerjee, B.Sc., M.B., D.O.M.S. (London), 127, Houzkatra, Benares. 2nd and 4th Thursdays, for Tea or Dinner at the Harish Chandra College, Maidaagin, Benares.

CANNPORE: 5645; July 3, 1943. *President:* Rtn. Dr. S. S. Salanis, I.A.S. (Retd.); *Secretary:* Rtn. S. N. Dar, B.Sc. (Hon.), LL.B., C/o Post Box No. 87, Kanpur, 1st and 3rd Thursdays at M/s Berkeley House, Kanpur. November to March, 7-45 p.m. and April to October, 8-15 p.m.

DEHRA DUN: 5258; June 24, 1940. *President:* H. J. Sanon, 22, Rajpore Road, Dehra Dun; *Secretary:* J. P. Guzder, Astley Building, Dehra Dun. 7 p.m. every Wednesday at Members' Residences or Dehra Dun Club.

FAIZABAD: 5941; Estd. 1944. *President:* S. N. Kaul, Advocate, "Dikhusa", Faizabad; *Secretary:* M. C. Day, Agent, Imperial Bank of India, Faizabad. 1st and 3rd Mondays, 8 p.m., Freemasons' Hall, Lodge Road, Faizabad.

GORAKHPUR: 6395; October 17, 1946. *President:* Sardar Sahab Sir Surendra Singh Majithia, Gorakhpur; *Secretary:* Dr. C. J. Chacko, M.A., Ph.D., F.R. Hist. S. (Lond.), St. Andrew's College, Gorakhpur. 2nd and 4th Thursdays, 8 p.m., Gorakhpur Club.

LUCKNOW: 4568; February 1938. *President:* Dr. S. Bose, 1, Cantonment Road, Kaiserbagh Circus; *Hon. Secretary:* Major E. H. Cantenwala, 85, Hazratganj, Lucknow. 1st and 3rd Fridays, informal gathering at 8 p.m., Dinner 8-30 p.m., Carlton Hotel.

MUSSEOORE: 6566; March 1947. *President:* Rev. W. J. Biggs, A. M. School, Mussoorie; *Secretary:* R. P. Khannah, The London Book House, Mussoorie.

56TH DISTRICT.

GOVERNOR:

Gnanasakaram Wignaraja, Hongkong & Shanghai Banking Corp., Colombo, Ceylon.

COCHIN: 4377; June 25, 1937. *President:* Dr. S. Rao, Navarata Pharmaceutical Laboratories, Mattancherry, Cochin; *Secretary:* Dr. M. B. Ichaporia, Tata Oil Mills Co., Ltd., Tatapura, Ernakulam. 1 p.m. Alternate Saturdays, Malabar Hotel, Wellington Island.

COIMBATORE: 5724; February 17, 1944. *President:* K. Nanjundiah, B.A., B.Com., B.L.; *Secretary:* M. A. Billimoria, C/o Central Bank of India, Ltd., Colmbatore. 1st and 3rd Thursdays, Tea 6 p.m.

COLOMBO: 2103; July 1929. *President:* Rtn. E. C. T. Holsinger, Government Training College, Maharagama, Ceylon; *Secretary:* Rtn. Dr. A. P. Guruswamy, B.A., Ph.D., Asstt. Commissioner, National Savings Movement of Ceylon, Colombo. 1 p.m., every Thursday at G. O. H.

GALLE: 5382; April 25, 1941. *President:* C. G. A. Perera, Bar-at-Law, "Closenberg", Galle, Ceylon; *Secretary:* William Pelris, 200/2, Wackwella Road, Galle, Ceylon 1st and 3rd Mondays, 5-30 p.m. Tea, New Oriental Hotel.

KANDY: 5419; September 24, 1941. *President:* C. N. E. J. de Mel Peradeniya, Ceylon; *Secretary:* T. A. Dunuwill, Advocate, Kandy, Ceylon. 5-15 p.m., 2nd and 4th Mondays, Queen's Hotel.

MADURA: 4908; December 27, 1938. *President:* E. L. Nohling, American College, Madura; *Secretary:* A. K. Annaswami Iyer, B.A. & M.L., 27, Sokhikulam, Tallakulam Post, Madura. Tuesdays—Lunch, Last Tuesday—Dinner, Cosmopolitan Club, Tallakulam, Madura.

NEGOMBO: 4645; November 25, 1938. *President:* J. F. L. Dreberg, Katana, Ceylon; *Secretary:* S. R. de Silva, Katana Mills, Katana, Ceylon. Dinner Meeting 8-30 p.m., 1st Monday, and Lunch Meeting 1 p.m., 3rd Sunday, New Rest House, Negombo.

NILGIRIS: 5441; November 25, 1941. *President:* Sir C. P. Ramaswamy Iyer, Dellsie, Ootacamund. *Secretary:* Maj. K. C. Sukumaran, Madras. Regt. Centre Wellington. 12-30 p.m. 1st and 3rd Sundays, every Sunday, Ootacamund and Coonoor.

PANADURA: 5769; May 2, 1944. *President:* P. A. Raymond Pereira, 121, High St., Panadura, Ceylon. *Secretary:* C. A. Jansez, St. John's College, Panadura, Ceylon. Meetings, 2nd and 4th Wednesdays at 6-30 p.m., St. John's School Hall.

TINNEVELLY: 5770; May 2, 1944. *President:* A. K. Bijili, M.A., LL.B., Advocate, "Bythul Aman", Tinnevely; *Secretary:* A. V. Subramania Aiyar, Journalist, Tinnevely. Every Monday 7 p.m., at the District Club, Palamcottah.

TUTICORIN: 6364; May 24, 1940. *President:* S. N. Chinnakkannu Pillai, West Great Cotton Road, Tuticorin; *Secretary:* M. V. S. Sundaravell, Beach Road South, Tuticorin. Club meeting at 7 p.m., every Wednesday of every month.

88TH DISTRICT.

GOVERNOR:

Manohar N. Seth, Scindia House, New Delhi.

AMRITSAR: 2854; July, 1949. *President:* Lal Chand Mehra, Tea Merchant, "Ratanlal", The Mall, Amritsar; *Secretary:* Dr. Badhr Chand Bhandari, Hall Gate, Amritsar. Meetings Every Tuesday, First Tuesday 8-15 p.m., Imperial Hotel, Amritsar.

DELHI: 4922; 1939. *President:* S. Vaidyanath Aiyar, Kashmir Gate, Delhi; *Secretary:* G. T. J. Thaddeus, Post Box No. 127, New Delhi. *Weekly Meetings:*—8-15 p.m., 1st and 3rd Thursdays; *Lunch Meetings:*—1-15 p.m., 2nd and 4th Thursdays, Imperial Hotel, New Delhi.

PATIALA: 5786; May 1944. *Secretary:* Sardar Md. Basheer Ahmed, Income-Tax Office, Patiala. 1st and 3rd Wednesdays, 8-30 p.m. at Yadavendra Stadium.

89TH DISTRICT.

GOVERNOR:

Dr. Ardeshr P. Mehta, Roshan Court, Jaganath Road, Rajkot (Kathliwar).

AHMEDABAD: 4008; March 8, 1936. *President:* N. N. Sodhan, Sarangpur Cotton Mills Ltd., Kankaria Road, Ahmedabad; *Secretary:* K. M. Modora, British India Gen. Ins. Co. Ltd., Mirzapur Road, Ahmedabad. 7-30 p.m., 1st and 3rd Fridays, Grant Hotel, Diner at 8 p.m.

AJMER: 6010; June 18, 1945. *President:* Dr. S. P. Ahuja, Imperial Road, Ajmer; *Secretary:* C. M. Agarwal, Public Relations Officer, Employment Exchange, Ajmer. 1st and 3rd Fridays, 8 p.m., General Assurance Society Building.

BARODA: 4030; October 20, 1936. *President:* A. K. Savant, Baroda; *Hon. Secretary:* Chinnulal G. Vakharia, B.A., LL.B., Ram Nivas, Sayaji Ganj, Baroda. 6-30 p.m. 2nd and 4th Fridays, Baroda Guest House.

BHAVNAGAR: 5908; February 14, 1945. *President:* Bhogilal Maganlal Shah, Mahalakshmi Mills Ltd., Bhavnagar, Kathliwar; *Secretary:* B. P. Mehta, Power House, Bhavnagar, Saurashtra. 2nd and 4th Thursdays, 8-30 p.m. Seth Dinaramdas Harzovandas, J. P.'s Bungalow, Takhteshwar Plot.

BHOPAL: 5422; November 25, 1941. *President:* Dr. Raja Sir O. N. Bisaria, B.A., Kt., Sultanla Road, Bhopal, C.I.; *Secretary:* Syed Mehdi Ali Bahadur, Habeeb Manzil, Bhopal. 8-30 p.m. 2nd Tuesday, 6-30 p.m. 4th Tuesday, India Coffee House.

BHUJ (Kutch): 5615; May 10, 1943. *President:* H. M. Antani, B.E., A.M.I.E., etc., State Engineer, P.W.D.; *Secretary:* S. N. Mehta, B.A., Station Superintendent, Air Services of India Ltd., Bhuj. 6-30 p.m. 2nd and 4th Saturdays, Mitra Nivas Gardens, Bhuj.

GODHRA: 6737; 17th October 1947. *President:* G. N. Vakil, C/o Imperial Bank of India, Godhra; *Secretary:* H. M. Shah, C/o Messrs. P. H. Modi, Station Road, Godhra. 2nd and 4th Fridays, 7-30 p.m., at the Imperial Bank Building.

GWALIOR: 6680; June 30, 1947. *President:* Justice G. K. Shinde, Morar; *Secretary:* C. B. Sonalkar, C/o The United Commercial Bank Ltd., Gwalior.

INDORE: 6372; September 6, 1946. *President:* B. M. Bhandari, Managing Director, Nandlal Bhandari Mills Ltd., Indore; *Secretary:* P. M. Patel, Evergreen Pictures, South Tukoganj, Indore; *Hon. Secretary:* C. Francis Vaz, Prop., Vincent & Co., Indore. 7 p.m. Every Thursday, Freemasons' Hall.

NADIAD: 6561; July 1949. *President:* K. C. Patel, Patel and Partners, Station Road, Nadiad; *Secretary:* Dr. I. D. Patel, Mission Road, Nadiad.

NAVARRI: 5538; September 15, 1942. *President:* Natwarlal Bhikhabhai Patel, Housing Society, Navsari; *Secretary:* K. B. Joshi, Bharati Niketan, Joshi Street, Navsari. 7 p.m. 1st and 3rd Wednesdays every month at the Boy Scouts Headquarters, Loonskul.

OKHA-DWARKA: 5341; February 22, 1941. *President:* R. N. Jal Chief Engineer, Cement Works, Dwarka; *Secretary:* Dr. Jayantilal Thakkar, Okha (Kathliwar). 6-30 p.m. 1st and 3rd Sundays.

PALANPUR: 6644; May 29th, 1947. *President:* Navabzada Sahab Iqbal Mahomed Khan Bahadur, Palanpur (North Gujarat); *Secretary:* V. D. Hathi, M.A., Kiristambh, Palanpur (North Gujarat). 1st and 3rd Sundays, 7 p.m., Club House.

PATDI-KHARAGHODA: Darbar Sahib Pratapsinghi Narshinji Desai, Ruler, Patdi State, (Dist. Ahmedabad); *Secretary:* M. S. Chudgar, Pioneer Magnesia Works, Kharaghoda (Dist. Ahmedabad). 2nd and 4th Sundays, 1 p.m., Patdi and Kharaghoda.

RAJKOT: 4894; August 10, 1938. *President:* B. H. Colah, Jagannath Road, Rajkot; *Secretary:* S. M. Masani, G/o Bank of India Ltd., Rajkot. 7 p.m. 2nd and 4th Wednesdays at Lodge, Kathiawar.

RATLAM: 5940; March 24, 1945. *President:* Maharaj Anandpal Singhji of Amleta, Amleta, Ratlam (Madhyaprabha); *Secretary:* H. M. Avasthi, The Ratlam Electric Supply & Weaving Mills Co., Ltd., Ratlam. Meetings every Saturday, 5-30 p.m., Shree Sajjan Club, Ratlam.

91ST DISTRICT. GOVERNOR:

Rtn. Ba. Win, Advocate, 44 Barr Street, Rangoon, Burma.

ANANOL: 4767; Dec. 1938. *President:* Dr. G. C. Sen, M.B., Ch.B. (Orth.), F.R.C.S., Chief Surgical Officer, Bengal Coal Co. Ltd., Sanctoria Hospital, P. O. Disbhergarh, Du Burdwan, Bengal. *Secretary:* Capt. R. N. Sen, Maharia Officer Raningunge Coalfields, 38, Apcar Gardens, Anasol. 2nd and 4th Mondays at 7-30 p.m., Club room at E.L.R. Recreation Grounds, Anasol.

CALCUTTA: 587; September 26, 1949. *President:* J. K. Biswas, 32, Lansdowne Terrace, Calcutta; *Secretary:* S. Deb, Bengal Porcelain Co., Ltd., 3, Motilal St., Calcutta. 1 p.m., every Tuesday, Great Eastern Hotel.

CUTTACK: 6136; December 4, 1945. *President:* Hon'ble Mr. Justice L. Panigrahi, Judge, High Court, Orissa; *Secretary:* A. P. Sinha, Addl. Under-Secretary, Home Department, Government of Orissa, Cuttack. 1st and 3rd Tuesdays, 8-30 p.m., University Committee Room.

DHANBAD: 6261; April 1949. *President:* B. P. Agarwalla, P.O. Jharia, E. I. Riv. *Secretary:* S. K. Ghosh, Mines Rescue Station, P.O. Jharia, E.I.R.I. 1st and 3rd Mondays, 6 p.m., Dhanbad Town Hall.

JAMSHEDPUR: 4118; November 23, 1936. *President:* B. D. Ichaporia, Dy. Town Administrator (General), Tata Iron & Steel Co. Ltd., Jamshedpur; *Secretary:* S. K. Datta, Sales & Planning Engr., Tata Iron & Steel Co. Ltd., Jamshedpur. 12 noon, Saturdays, Beldhi Club.

JUBBULPORE: 5064; 1930. *President:* Dr. S. C. Barot, Napier Town, Jubbulpore (C.P.); *Secretary:* S. Raghubir Singh Ahluwalia, 139, Napier Town, Jubbulpore (C.P.). Wednesdays, one dinner and one buffet meeting per month, 8 p.m., two cocktail meetings, 7 p.m., Jackson's Hotel.

PATNA: 5688; Nov. 8, 1943. *President:* N. D. Gandhi, Central Bank of India, Exhibition Road, Patna; *Secretary:* P. M. Balen, Press Trust of India, Fraser Road, Patna. Every Monday at Bankipore Club; 2nd and 4th dinner meeting at 8 p.m., rest cocktail meeting at 7 p.m.

92ND DISTRICT. GOVERNOR:

Sir Bahram N. Karanjia, K.L. 4, Carmichael Road, Bombay.

AHMEDNAGAR: 6698; August 18, 1947. *President:* R. C. Joshi, L.C.S., Ahmednagar; *Secretary:* Khan Sahib Sarosh K. Iram, Kings Road, Ahmednagar, Wednesdays, 6-30 p.m., Masonic Hall.

AKOLA: 6079; September 4, 1945. *President:* R. E. A. S. Athalye, B.A., M.B., Jatharpeth, Akola; *Secretary:* N. S. Agashe, Kille Range, Akola. All Saturdays, 6-30 p.m., Sitabai Arts College.

BELGAUM: 5410; July 19, 1941. *President:* Rao Sadash M. P. Wali, District Local Board Office, Belgaum; *Secretary:* Rao Sadash N. I. Chinnade, Belgaum. 1st Sunday, Tea Meeting at 5-30 p.m., and 3rd Saturday, Dinner Meeting at 8-30 p.m. at Green's Hotel.

BOMBAY: 3128; March 1929. *President:* C. S. Patel, M.L.A., Director-in Charge, Swadik Oil Mills, 12, Bell Lane, Bombay; *Secretary:* S. G. Narkari, Green's Hotel, Bombay. 1-45 p.m., every Thursday, Green's Hotel.

DHARWAR: 5282; September 16, 1940. *President:* C. S. Desai, Mg. Dir., Dharwar Electric Supply Co., Ltd., Dharwar; *Secretary:* Dr. P. S. Desai, Station Road, Dharwar. 7 p.m. 1st and 3rd Saturdays, Mission High School Hall.

GADAG-BITGERI: 6135; December 4, 1945. *President:* Rao Bahadur S. S. Velamali, Gadag; *Secretary:* S. R. Hirenath, Chief Officer, Municipal Office, Gadag. 2nd and 4th Sundays, 6 p.m., Cotton Merchants' Assocn. Office, Gadag.

NAGPUR: 5868; December 13, 1944. *President:* P. S. Rau, Commissioner, Nagpur Division, Civil Lines, Nagpur; *Secretary:* E. C. Eduljee, Kampeer Road, Nagpur. Every Thursday, 8 p.m., Mount Hotel.

PANDHARPUR: 4493; April 17, 1944. *President:* Dewan Bahadur G. B. Paricharak, Bijapur Lane, Pandharpur; *Secretary:* N. P. Surnis, House No. 3321, Surnis Wada, Bijapur Lane, Pandharpur. 2nd and 4th Sundays, 7 p.m., and club meetings are held at members' house premises by rotation.

POONA: 3994; January 15, 1936. *President:* E. D. Chinnor, Director, The Bombay Garage (Poona) Ltd., 11, Elphinstone Road, Poona 1; *Secretary:* B. N. Atal, C/o The Bank of India Ltd., 8A, Elphinstone Road, Poona 1. Every Monday at 6-45 p.m., Poona Club, Ltd.

SATARA: 5815; July 24, 1944. *President:* Sardar V. N. Mutalik, B.A., Shaniwar Peth, Satara; *Secretary:* K. V. Kulkarni, 40 Yadogopal Peth, Satara. 6-30 p.m., every Saturday, Grafton Bungalow, Satara Camp.

93RD DISTRICT.

BANGALORE: 3323 (B); May 24, 1934. *President:* D. N. Hosali, "Mysindia" Office, Bangalore 1; *Secretary:* N. R. Parthasarathi, C/o Messrs. Fraser & Ross, Asiatic Buildings, Kempe Gowda Road, Bangalore 2. Meetings held on Wednesdays, 7-30 p.m., West End Hotel.

COCANADA: 5801; July 3, 1944. *President:* Rao Bahadur S. Ramayya, Cocanada; *Secretary:* Durairaj Gopalrao, Ramarajpet, Cocanada. On every Thursday at 6 p.m., Cosmopolitan Club, Cocanada.

MADRAS: 2186; May 1929. *President:* A. Sinclair Ross, C/o Messrs. Wilson & Co., Madras; *Secretary:* C. W. Stephenson, C/o Spencer & Co., Ltd., Mount Road, Madras. 1-10 p.m., every Tuesday, Luncheon Meetings, Concomera Hotel.

MYSORE: 5806; July 5, 1944. *President:* S. Ramarao, States Engineering Co., Status Square, Mysore; *Secretary:* C. Ramaswami, MahalaXmi, Lachmipuram, Mysore. 2nd Fridays at Hotel Metropole, 6-30 p.m., Last Fridays at Hotel Krishnaraj Sagar, 8 p.m.

FREEMASONRY

IN 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfret, authorising him to "open a new Lodge in Bengal." Of his personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, a Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No. 72 at Bengal in the East Indies." The next Provincial Grand Masters were James Dawson and Zeph. Gee, who held office in 1740; after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Olive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767; but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762-64 to John Bluvitt, Commander of the "Admiral Watson," Indianman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of P. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol or Ancient Grand Lodge. In 1818 at the Union both the Ancient and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peacefully under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

Madras.—The earliest Lodge in Southern India (No. 222) was established in Madras in 1752. Three others were also established about 1766. In 1767 Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (for Ancients) invaded this District and in 1781 established a Provincial Grand Lodge and both these Provincial Grand Lodges continued working peaceably side by side until the Union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union, in 1818 all the bodies in Madras gave their

allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1774 at Trichinopoly of the eldest son of the Nawab of Arcot, Umdat-ul-Umra, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

Bombay.—Two Lodges were established in this Presidency during the 18th century, Nos. 234 at Bombay in 1788 and 569 in Surat in 1798, both of which were carried on the lists until the Union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Morla was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart Elphinstone express a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Deccan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which however, left no trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members, who obtained a warrant, on the recommendation of the Parent Lodge from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge, Coast of Coromandel, it was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No. 696 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 818 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded; but in 1836 Dr. James Burnes was appointed by the Grand Lodge of Scotland P. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836 in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand

Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels furniture, and belongings, and the charge was accepted by Scotland. This Lodge still exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge "St. George" No. 549 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burnes established a Lodge "Rising Star of Western India," at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul-Umra has borne fruit resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1861.

ADMINISTRATION

All three constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Scotland and the Grand Lodge of Ireland hold jurisdiction in India. The largest of these is that of England which has four districts under District Grand Masters, totalling over two hundred Lodges. The Grand Lodge of United Scottish Freemasonry of India and Pakistan which comes under Scotland has some seventy-five Lodges, but the Grand Lodge of Ireland, which is governed in India by a Grand Inspector only has eleven Lodges.

The districts under Grand Lodge of England are as follows:—

Bengal.—Founded 1728. 74 Lodges.

District Grand Master:—H. T. Wor. Bro. A. Barr Pollock, Deputy District Grand Master: Wor. Bro. Major-General H. Williams, C.B.E.

District Grand Secretary:—Wor. Bro. Guy D. Robinson, 19, Park Street, Calcutta.

District Grand Lodges meet quarterly, in January (Calcutta), April (Assam), July (Bihar or Upper Bengal) and October (United Provinces). Two Charitable Institutions are maintained. The Bengal Masonic Association for the education of children of indigent Freemasons and the District Fund of Benevolence for relief and maintenance of indigent Freemasons and their widows.

Bombay.—Founded 1763. 52 Lodges.

District Grand Master:—Rt. Wor. Bro. Sorab K. Davar, Deputy District Grand Master:—Wor. Bro. J. S. Tilley, C.B.E.

District Grand Secretary:—Wor. Bro. Khan Bahadur K. C. Banaji, Freemasons' Hall, Kavelin Street, Fort, Bombay.

District Grand Lodge meets in March (Installation) and September. It maintains two Charitable Institutions; the District Grand Lodge Fund of Benevolence, for the relief and maintenance of indigent Freemasons and their widows and the Bombay Masonic Association, for the maintenance and education of children of deceased Freemasons.

Punjab.—Founded 1868. 31 Lodges.

District Grand Master.—Rt. Wor. Bro. Lieut.-General Ross (Cairns McCay, C.B., C.R.E., D.S.O.). Deputy District Grand Master.—Wor. Bro. Alfred Gilbert.

District Grand Secretary.—Wor. Bro. H. J. Pearson, O.R.E., Freemasons' Hall, Lahore.

The District maintains The Punjab Masonic Institution for the Children and Widows of Freemasons for providing maintenance and education as required. There is a separate fund, the Dr. Owen Burnary Fund for the assistance of children of Freemasons, to enable them to fit themselves for employment after leaving school.

Madras.—Founded 1767. 36 Lodges.

District Grand Master.—Rt. Wor. Bro. T. V. Muthukrishna Iyer. Deputy District Grand Master.—Wor. Bro. K. P. Lakshmana Rao.

District Grand Secretary.—Wor. Bro. Rao Bahadur S. T. Srinivasa Gopala Chari, Freemasons' Hall, Egmore, Madras.

The Lodge meets on the penultimate Saturdays in February and August each year in Madras, though the August meeting is sometimes held outside Madras. The District Grand Lodge maintains two Charitable Institutions; The District Fund of Benevolence, for the maintenance and relief of indigent Freemasons and their widows and the Madras Masonic Association, for the education and maintenance of children of deceased Freemasons.

Grand Lodge of all Scottish Freemasonry in India. 75 Lodges.

Its jurisdiction is divided into Areas supervised by Grand Superintendents. The Grand Master is Sir Ivon Hope Taunton, K.C.I.E., his Deputy Grand Master being Rt. Wor. Bro. Dr. Sorab K. Engineer, O.B.E. The Grand Superintendents are: Northern Area, Rt. Wor. Bro.

Rai Bahadur B. P. Varma, Southern Area; Rt. Wor. Bro. A. Cook and Eastern Area; Rt. Wor. Bro. R. D. Lemon.

The Grand Secretary is Rt. Wor. Bro. Khan Bahadur J. C. Mstree, 17, Murzban Road, Bombay.

The Grand Lodge of United Scottish Freemasons in India and Pakistan maintains two charity funds, the Scottish Masonic Fund of Benevolence in India and Scottish Benevolence Association in India, the Secretary of each fund being the Grand Secretary.

Grand Lodge meets in Bombay, its installation being in November.

Grand Lodge of Ireland

The Irish constitution is governed in India by a Grand Inspector, who has two assistant Grand Inspectors, one for Bombay and the other for Bengal. It has eleven Lodges working three in Bombay, six in Calcutta, one in Lahore and one in Simla.

Royal Arch Masonry

In England the District Grand Master is nearly always created Grand Superintendent of the Royal Arch Chapter, his deputy generally being second principal, while the third principal is appointed every year. The districts adopt the same practice; Bengal having 31 Chapters, Madras 21, Bombay 26 and the Punjab 22.

Royal Arch Masonry in Scotland has a separate constitution from the craft. The Grand Chapter of United Scottish Royal Arch Freemasonry in India and Pakistan is at present ruled by MOST EX. Companion, Sir Shapoorji Billimoria, Kt., M.B.E., under whom there are 33 Chapters. The Grand Secretary of the Grand Lodge of United Scottish Freemasonry of India and Pakistan is also Grand Scribe 'E'.

There is only one Irish Chapter situated in Calcutta.

Mark Masonry

Mark Masonry is worked under the Grand Mark Lodge of England and Wales and is divided into several districts, but in most cases, the District Grand Master is also the District Grand Mark Master. There are nineteen Lodges under Bengal, 18 under Bombay, 16 under Madras and 12 under the Punjab. Attached to the Mark degree is that of Royal Ark Mariner, which, under the English constitution, is worked in a separate Lodge attached to a Mark Lodge. Its ruler is the District Grand Mark Master and only Mark Master Masons can take this degree.

Under Scotland, the Mark degree is usually worked in Royal Arch Chapters, but it is conferred on candidates in some Lodges under the Scottish constitution.

Under Ireland, the Mark Degree is incorporated in that of the Royal Arch.

Other Degrees

There are many other degrees worked in India, including the Ancient and Accepted Rite, but no degree higher than 18th is actually worked in India under England, but under Scotland the 30th is worked. There are fourteen 18th degree Chapters working in India.

The Knight Templar degree is worked in several places under both England and Scotland.

The Red Cross of Constantine has three conclaves working in India, at Bombay, Simla and Lahore.

The Order of the Secret Monitor has seven conclaves under Bombay, seven under Madras, three under Calcutta and one under Cawnpore.

BOY SCOUTS

THE Boy Scouts movement initiated in England by the late Lord Baden-Powell (the Chief Scout), spread widely in India and Pakistan. The Viceroy was Chief Scout and the heads of Provinces and States were Chief Scouts in their own areas. The aim of the Association was to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves. The Association was directly affiliated with the Boy Scouts International Bureau.

The Boy Scouts Association of India and the Hindustan Scouts will now merge to form a new association to be called Hind Scouts. The merger was decided on at a meeting of the Boy Scouts and Hindustan Scouts Councils in June 1948. The new amalgamated Interim Council will consist of 18 members, 9 from Boy Scouts and 9 from Hindustan Scouts. There will be no Chief Scout in the new organization. The Chief Commissioner will be the Hon'ble Mr. Justice Vivian Bose. Pandit Hridayanath Karmur will be the National Commissioner and Rao Bahadur G. T. J. Thaddeus and Mr. Shriram Bajpai, General Secretary and National Organizing Commissioner respectively.

Since the partition Pakistan has had a separate Scouts Association of its own. This is how the headquarters of the Boy Scouts Association of India is organized.

INDIAN HEADQUARTERS

Chief Scout for India.—Hon. Shri C. Rajagopalachari.

Chief Commissioner.—Hon'ble Chief Justice Mr. Vivian Bose, B.A., LL.B. (Cantab.), Bar-at-Law.

Honorary Treasurer.—F. B. Blomfield, F.R.I.B.A.

General Secretary and Camp Chief for India.—Hon. Lieut. Rao Bahadur G. T. J. Thaddeus, B.A., R.I.N.V.K.

Office Superintendent.—S. H. A. Jaffri, B.O.M.

HEADQUARTERS COUNCIL FOR INDIA.

President.—The Chief Scout for India.
Chairman.—The Chief Commissioner (ex-officio).

Secretary.—The General Secretary (ex-officio).

Members:—

Rao Sahib T. R. Kothandram Mudalliar, B.A., B.L. (Madras); Saroj Ghosh, M.B.E., B.A., B.L. (W. Bengal); Commander K. B. Godrej, B.E.M., R.I.N.V.K. (Bombay); A. S. Virley, M.B.E., B.A. (Bihar); Sardar Sahib Sardar Hardial Singh, B.A., F.E.S. (E. Punjab); The Hon'ble Mr. Justice M. Hidayatullah, O.B.E., Bar-at-Law (C. P. & Berar); Dhanmal Mathur, M.A. (Rajputana); Rai Sahib J. P. Mukherji, M.A. (United Provinces); Dr. K. N. Kiri, M.A., Ph.D. (Columbia) (Madras); Thomas John, M.A., L.T. (Travancore); P. Shiva Shankar, B.A., LL.B. (Mysore); P. Kuttikrishna Menon, B.A., L.T. (Cochin); Pt. Shyam Sundar Sharma, M.A., L.T. (Jaipur); Sardar Ranjit Singh Sodhi (Patiala); G. Venkatesan (Pudukottai); M. N. Zutshi, B.A. (Sirohi).

The Boy Scouts Association in India, General-Headquarters—Census 1946-47.

LITERARY

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA

The Association of British University Women in India was established in 1913. Its objects are:— (1) To facilitate intercommunication and co-operation between women of any nationality who are members of the universities of the United Kingdom and Northern Ireland, resident in India. (2) To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federation of University Women, and otherwise as may seem expedient. (3) To act as an organization which shall afford opportunity for the expression of united opinion and for concerted action by university women. Membership is open only to those women who hold degrees in any university in the United Kingdom and in Northern Ireland; but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women.

The Association of British University Women has had several branches. The address of the President, Bombay, is as follows:—

Mrs. A. J. Moore, 31, Padder Road, Bombay.

The Delhi and Punjab Branches came into existence in 1918. The Calcutta and Bombay Branches have been influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products. This branch, however, has not functioned for a number of years.

The Bombay Branch has done good work in connection with the formation of the Social Purty Committee and has, through a special sub-committee, organised public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of the Association was the establishment of Women's Employment Bureaus in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council.

As a means of promoting friendships between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

This Association is Federated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Federation.

FEDERATION OF UNIVERSITY WOMEN IN INDIA

The Federation of University Women in India unites various Associations of University Women throughout the country, its object being to promote friendship and understanding among University Women of all races resident in India and to further their common interests. It is affiliated to the International Federation of University Women which on June 30, 1948 had a membership of over 119,000 representing thirty

nations and which seeks by scholarships, exchange of teachers, group discussions and conferences to unite in common action and understanding the University women in the world.

The Federation in India is controlled by a Central Committee at present located in Bombay. It has branches in Bombay and Kodaikanal while women, eligible for membership, resident in places where no branch exists can be enrolled as "Scattered Members." Hon. Gen. Secy.: Mrs. A. J. Moore, 31, Padder Road, Bombay.

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA

The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental antiquities, to provide an up-to-date Oriental library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G. Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the Institute the unique collection of nearly 20,000 manuscripts formerly accommodated in the Deccan College, together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 12,000 a year for the publication of the B. S. S. and the Government Oriental Series. The Institute has also started a series called the *Bhandarkar Oriental Series* in which six works have been already published and some others have been undertaken. The Institute has undertaken to edit *Mahabharata* critically at the instigation of the Raja of Aundh who has promised a total grant of Rs. one lakh for that purpose. Dr. V. S. Sukthankar was the General Editor of the *Mahabharata* up to 21st January 1943 the date of his unfortunate demise. Dr. S. K. Belvalkar has now been appointed General Editor. Grants are being received from the Government of India (Rs. 6,000 a year), the University of Bombay (Rs. 3,000 a year) and the Government of Bombay (Rs. 6,000 a year). Madras, Hyderabad (Deccan), Baroda and Mysore as well as from several Southern Mahratta States. Recently the Government of H. H. the Maharaja Scindia of Gwalior sanctioned Rs. 25,000 for the *Mahabharata* work at the rate of Rs. 2,500 per year for 10 years. The Government of H. H. the Maharaja of Kashmir has sanctioned a grant of Rs. 2,000 a year for three years for this work. The Trustees of Raja's Ganga Trust have also sanctioned an annual grant of Rs. 1,500 for the same purpose for 3 years. The British Academy has also given a grant to the *Mahabharata* as a token of their appreciation of this work. On 25th March 1944, the Institute inaugurated its *Mahabharata Printing Department* with a view to expediting the printing of the *Mahabharata* Edition. The Institute issues a Journal called *Annals of the Bhandarkar Oriental Research Institute* published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H. E. Sir George Lloyd and the presidency of Sir R. G. Bhandarkar. Thanks to liberal donations from the Tatas and the Jain community, supplemented by Grants-in-Aid from the Government of Bombay, the Institute is housed in a fine building. Since August 1927 the Institute has been conducting regular M.A. classes in Sanskrit, Pali, Ardhamagadhi and Ancient Indian Culture. It has also been

coaching students for the Doctorate degrees of the University of Bombay. Recently the Sanskrit Department of this Institute has been affiliated to the University of Poona. Lectures by eminent scholars are also delivered occasionally. Besides these lectures a regular series of free Extension Lectures at certain intervals has been arranged for the benefit of the public. The Institute celebrated its Silver Jubilee on the 4th and 5th of January 1948, when delegates from learned bodies all over India and other eminent scholars attended. Membership dues Rs. 10 a year or Rs. 100 compounded for life. Members can, subject to certain conditions, borrow books from the library and get the "Annals" free and other publications (a list covering about 100 titles sent free upon request) at concession rates.

BHARATA ITIHASA SAMSHODHAKA MANDALA, POONA

Founded in 1910 by the late Mr. V. K. Rajwade and Sardar K. C. Mohendrale and registered under Act XXI of 1860 in 1910 with the object of collecting and conserving historical materials, erecting suitable buildings for preserving and exhibiting them, publishing such materials and other works of historical research and generally to encourage and foster critical study of and research in Indian history. Has a building of its own; has acquired new premises for additional buildings; possesses the best collection of Persian and Marathi historical papers owned by any private society. Has a rare collection of about a thousand Indian paintings now housed in a special wing, maintains a coin cabinet and an armoury of old weapons. Has a section for copper plates, sculpture and archaeology and has a library of general, historical and rare books. Holds fortnightly and annual meetings where notes and papers based on original documents are presented, discussed and afterwards published. The Poona City Research section of the Mandalas does research work in the city and publishes findings. Has published several volumes of original historical letters and other historical and literary books whose total number exceeds 90. Conducts a quarterly journal devoted to research. Has done some excavation at Karad and got findings of the Second Century A.D. Work done mostly in Marathi. Celebrated the Silver Jubilee by calling the first All-India Modern History Congress in 1935. Has planned Commemorative volumes in English giving an analytical account of researches in various fields. Depends mainly on public subscriptions. Has been receiving some grant-in-aid from the Government of Bombay and Central Government. Was supported by many Rajas, Jaha-girdars, Sardars and the public. The late Dr. J. E. Abbot of New Jersey, U.S.A., left by will a gift of 30,000 dollars to the Mandalas for buildings. Annual membership fees for various classes are Rs. 3, 6, 12, 25, 125, and 300 which can be compounded for life by paying ten times the annual subscription for a particular class in a single year. Effective members over 1,000. Annual income averages between 6 and 8 thousand rupees.

President: The Raja Sahab of Phaltan; **Vice-Presidents:** The Raja Sahab of Aundh; The Raja Sahab of Bhor and C. G. Agashe; **Chairman:** Prof. D. V. Potdar, B.A.; **Secretaries:** Dr. M. G. Dixit; C. G. Karve, B.A.; Prof. R. V. Oturkar, M.A.; **Treasurer:** D. K. Sathe, B.Sc., B.A. **Address:** 312-18, Sadashiv Poth, Poona City.

The total number of students in the institutions of the Society exceeds 9,000.

INDIAN ACCOUNTANCY BOARD

The Indian Accountancy Board is constituted under the Indian Companies Act VII of 1913 which was amended by the Indian Companies (Amendment) Act, 1930, in order to give effect to an All-India scheme of registration of public accountants and auditors and the creation of an Indian Accountancy Board to advise the Central Government on all matters relating to the accountancy profession in India.

Before 1930 local Governments were empowered to grant auditors' certificates entitling persons to act as auditors of companies other than private companies. Auditors' Certificates were of two kinds "practised" and "unpractised". The holders of the former were entitled to practise within the jurisdiction of the Province granting the certificate while those of the latter were entitled to practise throughout India.

There were several practical difficulties in administering a central subject by a provincial government and in 1932 the Central Government took charge of the accountancy profession—the youngest of the learned professions.

Every person desirous of practising as a public accountant in India, has to be enrolled on the Register of Accountants maintained by the Central Government and is styled "Registered Accountant." Necessary conditions for eligibility for enrolment on the Register of Accountants are laid down in the Auditors' Certificates Rules, 1932, which have been framed under section 144 of the Indian Companies Act. There is, in operation, a strict scheme of professional examinations, registration of apprentices for the practical training, recognition of coaching institutions for the theoretical aspect, registration for the practising public accountant and an elaborate code of professional ethics, all conducted and rigorously enforced by the Central Government on the advice of the Indian Accountancy Board.

From 1932 to 1939 the members of the Indian Accountancy Board were nominated by the Central Government out of the ranks of the leading public accountants throughout India. In 1939 the Central Government changed the rules and introduced a progressive element of elected members from the practising accountants. The ultimate goal is to form an autonomous body of accountants to take charge of the profession. Under the present rules, the Indian Accountancy Board consists of 21 members' the term of membership being 3 years. In exceptional conditions the Central Government is empowered either to reduce the term of office of the members or to extend it for a further specified period. The present term commenced from 1st July 1947.

On 4th September 1948 the Central Government introduced a Bill to provide for the regulation of the profession of accountants in India. The Bill seeks to incorporate by statute an autonomous body of accountants under the nomenclature of the Institute of Chartered Accountants of India which will perform all the functions so far carried out by the Central Government, whose control will then be limited to a few specified subjects.

Chairman: The Hon'ble Mr. K. C. Neogy, Minister for Commerce; *Secretary*: M. A. Mulky, M.A., LL.B., M.Sc. (Econ.) (London). *Address*: Under Secretary to the Government of India, Ministry of Commerce, New Delhi.

Treasurer: R. Srinivasan.

Address: University Library, Delhi 2, India.

INDIAN MUSIC ASSOCIATION, LUCKNOW

Founded by Raitzda Unkar Prasad in 1939, and is the only institution of its kind in India. Its object is to revive and reorganise the decaying art of the Indian music. Membership is open to both sexes and a nominal quarterly subscription is charged. The success of the Association has been proved by the recognition of the service of the members at various Music Conferences and Charity Shows.

INDIAN SOCIETY OF ORIENTAL ART, CALCUTTA

Patrons: His Excellency Chakravarti Rajagopalachari and His Excellency Dr. K. N. Katju. *President*: Dr. Abanindranath Tagore. *Secretary*: Dr. Niharraujan Ray. *Office*: 11, Wellington Square, Calcutta.

INDIAN STANDARDS INSTITUTION

'P' Block, Raisina Road, New Delhi.

Origin: With a view to co-ordinating standardization activities of various laboratories and institutions and to introduce industrial standards on a national basis the Government of India by their Resolution No. 1-St(4)/45 dated the 3rd September 1946, brought into existence the Indian Standards Institution.

Aims and Objects: The aims and objects of the Institution include the co-ordination of efforts of Producer and Consumer for the improvement of materials, products, appliances, processes and methods, introduction of code of practices, provisions or arrangements of facilities for examination and testing of commodities, processes and practices and planning and direction of related investigations and research.

Management : The affairs of the Institution are administered by the General Council, on which are represented Ministers of the Government of India, Governments of Provinces and States, professional societies of technologists and scientists, chambers of commerce and industry and other important interests.

General Council :—President : Dr. Shyama Prasad Mookerji, Minister for Industry and Supply, Government of India ; *Vice-Presidents :* Sir K. S. Krishnan ; Sir J. C. Ghosh ; Dr. Lal C. Verman, Director, Indian Standards Institution.

Preparation of Standards : The technical work of preparing standards, specifications, codes of practices, etc. will, for the present, be carried out under the authority of five division councils, namely, (a) Engineering, (b) Buildings, (c) Textiles, (d) Chemicals and (e) Agriculture and Food Products.

Finances : The income of the Institution is derived from (a) Government grants, (b) contributions from industry, the Provinces, the States and other interested public bodies, (c) subscription from members and (d) sale of Indian Standards, specifications, etc.

The Government of India has decided to make annual grants from year to year for a period of five years by which time they anticipate the Institution should be largely self-supporting.

Director : Dr. Lal C. Verman.

INDIAN INSTITUTE OF CULTURE

North Public Square Road, Basavangudi, Bangalore City.

The Indian Institute of Culture was founded in 1945 at Basavangudi, Bangalore, with three main objects : (1) To establish a Centre affording opportunities for cultural and intellectual development ; (2) To spread correct ideas on education, religion, politics and youth ; (3) To promote exchange of thought among the various Provinces of India and other countries of the world towards establishing true national and international concord and co-operation.

Honorary Secretary : Dr. L. S. Dorasami, M.Sc., Ph.D.

For the furtherance of these objects, the Indian Institute of Culture has had since August 1945 a non-communal hostel for boys, and since the opening of its free public library in July 1947, has had a regular weekly programme of lectures on a wide variety of cultural subjects, alternating with discussion group meetings, at each of which an outstanding recent book is orally reviewed and then discussed.

Like all the activities of the Institute, membership is open to all, irrespective of race, nationality, religion, colour, sex, class or caste ; subscribing to the ideal of Universal Human Brotherhood being the only criterion of eligibility.

Abstracts of its lectures and book reviews appear regularly in the weekly *Mysinda* of Bangalore and a number of these have been published in extenso in *The Aryan Path*, the Institute's monthly organ. The Institute has two series of publications, *Transactions* and *Reprints*, each available at Re. 1.

KALAKSHETRA—ADYAR, MADRAS

Literally "The Abode of the Arts" was founded at Adyar in 1936 by Shrinati Rukmini Devi, to emphasize the essential unity of all true Art.

Rukmini Devi, her staff and students in Kalakshetra are engaged in studying and popularising the principles and practice of various Hindu classical dances, Bharata Natya, Kathakali, etc. Special features are instrumental and vocal music, folk songs, dramatic arts, and painting. Recent expansion includes the inauguration of 4-year teachers course in Dance and Music. There is besides a crafts department including furniture and interior decoration and a weaving section.

Bookbinding and publications are also part of the Centre's activities. The Centre has a unique and rare collection of fifteen hundred Tamil palmleaf manuscripts on the *Ramaya Namayana*, many of these annotated by the late Mahamahopadhyaya Dr. U. V. Swaminatha Iyer.

The Arundale Montessori Training Centre under the direction of Dr. Maria Montessori and Shrinati Rukmini Devi was started on July 3rd 1947. It will train teachers from all over India in the Montessori System. The Kalakshetra, the Besant Theosophical School and the Montessori Centre will form a Cultural Centre to be endowed as a Centenary Memorial to Dr. Annie Besant.

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY

Office : College Road, Nuzumbakam, Madras.

The Society's Library contains nearly a lakh of books which are circulated to members.

President : C. S. Venkatachari ; **Hon. Secy. :** Mrs. M. Lyklardopulo ; **Librarian :** C. N. Rama Krishna Iyer, B.A.

THE NATIONAL LIBRARY, CALCUTTA

The National Library was founded in 1902 by Lord Curzon, the then Viceroy of India, by amalgamating the former Calcutta Public Library with the then Imperial Library which itself had been founded in 1801 by combining a number of Departmental Libraries of the Government of India Secretariat. One of them, the Library of the Home Department, contributed a very important and interesting collection of books, which formerly belonged to the East India College, Fort William, Calcutta, and to the East India Board, London. The Calcutta Public Library also contained a fairly large number of valuable and rare books and pamphlets. In 1904, Maulvi Sayyid Sadruddin Ahmad Al Musawi, Zamindar of Buhar (Burdwan District), endowed a collection of 1,500 printed Arabic, Persian and Urdu books, along with 950 Arabic and Persian manuscripts which collection is named "Buhar Library" after the name of the place to which the donor belonged.

The Ministry of Education of the Government of India, is responsible for the maintenance of the Library ; while its management is vested in a Council appointed by the Governor-General in Council. The Educational Adviser to the Government of India is the ex-officio Chairman and the Librarian, National Library, its ex-officio Secretary. The members represent the University of Calcutta (1), the Government of West Bengal (2) and other Provinces (4).

The aim of the National Library in the words of its great founder is that "It should be a Library of reference, a working place for students, and a repository of material for the future historians of India, in which, so far as possible, every work written about India at any time can be seen and read." The Library contains most of the important and rare works in English and Indian languages dealing with India. The Library is also in possession of a collection of important books of reference and of standard works on various subjects which is kept up-to-date by the addition of new books. The present strength of the stock of the Library is a little over 423,400 which makes it the biggest Library in India.

The Library is provided with Reading Rooms, public and private, where facilities are offered to students, research workers and general readers. There is a separate Reading Room for women. Books are also lent out to any one living in any part of the Dominion of India, against cash security. The membership of both the Reading Rooms and the Lending Section is free. General and special reference enquiries are also attended to.

The Library was housed in the Metcalfe Hall, Calcutta, from 1902 to 1923, when it was moved to the old Foreign and Military Secretariat

Building, 6, Esplanade East, Calcutta. As a war measure the Library was temporarily housed in 34, Chittaranjan Avenue, Calcutta from February 1942. The Library is, however, now on the move to its permanent abode, the Belvedere, Alipore, Calcutta, the old Viceroy's Lodge.

Librarian : R. S. Kesavan, *Special Officer :* Y. M. Mulya, M.A., D.L. (Lond.), F.R.A.

P. E. N. ALL-INDIA CENTRE

The All-India Centre of this International Society of eminent poets, playwrights, editors, essayists, novelists (P.E.N.) was founded in 1933 by Sophia Wadia under the presidency of Dr. Rabindranath Tagore. After his death in 1941, Shrinati Sarojini Naidu was elected President. The Vice-Presidents are Maulana Syed Subaiman Nadvi, Pandit Jawaharlal Nehru and Prof. S. Radhakrishnan. The aim of the P.E.N. everywhere is to promote friendships among writers and to uphold freedom of speech. In addition, the All-India Centre is working for national cultural unity by spreading appreciation of the many Indian literatures outside their own language areas and also abroad. This is done by means of public lectures, through its monthly journal *The Indian P.E.N.*, free to P. E. N. members and available to the general public in India for Rs. 5 per annum, and through its "P.E.N. Books" series on the different Indian literatures. The All-India Centre has about 400 members among the country's leading writers and editors, and has sponsored two All-India Writers' Conferences. Membership is open to any Indian of recognised position as a writer, subject to the approval of the Executive Committee. Entrance fee Rs. 5 ; annual fee Rs. 10 ; life membership fee Rs. 100.

Honorary Secretary : A. A. A. Fysoo, "Aryansangha," 22, Naryann Dalholkar Road, Malabar Hill, Bombay 6.

PHILATELIC SOCIETY OF INDIA

Formed 6th March 1897 : Annual subscription Rs. 8. *Hon. Secretary and Treasurer :* R. Franklin DeSouza, 30-C, Khotachiwadi, Bombay 4.

Founded 1886, to promote the prosecution of Anthropological research in India; to correspond with Anthropological Societies throughout the world; to hold meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society. Annual subscription Rs. 10. *President:* Sir Rustom Masani, Kt., M.A. *Hon. Secretary:* R. K. Prabhu, Asst. Secretary: K. E. Puncuar, B.A. *Office Address:* C/o K. B. Cama Oriental Institute Building, 186, Apollo Street, Bombay.

BENARES MATHEMATICAL SOCIETY OR BHARAT GANITA PARISHAD

Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It publishes a journal entitled *The Proceedings of the Benares Mathematical Society*, now called *Bharata Ganita Parishad Patrika*, in which original papers on Mathematics, Statistics, and history of Mathematics are published. It also maintains a library. There are over 120 members in India and abroad. Admission fee is Rs. 10. Annual subscription is Rs. 6 for resident members and Rs. 5 for non-resident members.

President: Dr. Gorakh Prasad.

Vice-Presidents: Prof. Ram Behari; Dr. N. G. Shabde; and Prof. V. V. Narlikar.

Secretary: Dr. Rama Dhar Misra, M.A.

Editor: Professor A. N. Singh.

Treasurer: Dr. R. S. Varma.

Librarian: Dr. B. Mohan.

Address: Lucknow University, Lucknow.

BOMBAY SANITARY ASSOCIATION

Office: Municipal Offices, Fort, Bombay.

Founded (a) to create an educated public opinion with regard to sanitary matters in general; (b) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and if possible, by holding classes and examinations; (c) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise; (d) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street was built by the Association at a cost of nearly Rs. 1,00,000. The foundation stone was laid by Lady Willingdon in March, 1914, and it was opened in March, 1915. It is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924, the Museum and office of the Assistant Health Officer, C and D Wards, and the Vaccination Station. *Hon.*

Secretary and Treasurer: Dr. B. C. Das Gupta, B.Sc., M.B., M.R.C.P., D.T.M. & H., D.P.H., Executive Health Officer, Bombay. *Joint Honorary Secretary:* Dr. C. Coutinho, B.Sc., L.M. & S., D.Hy. *Health Visitor:* S. K. Kulkarni.

BRITISH MEDICAL ASSOCIATION

(Bombay Branch)

Founded 1886, to promote Medical and the Allied Sciences and the maintenance of the honour and interests of the Medical Profession. *Secretary:* Dr. D. R. Bharucha, F.R.C.S. (Eng.), "Dreamland", 25, New Queens Road, Bombay 4.

INDIAN CHEMICAL SOCIETY

Was founded in 1924 with late Sir P. C. Ray as *President*, located in the University College of Science Buildings, 92, Upper Circular Road, Calcutta. *Dr. J. N. Ray, President:* Sir S. S. Bhattacharya, F.R.S., Dr. B. B. Dey, Prof. N. R. Dhar, Dr. Gilbert Fowler, Sir J. C. Ghosh, Prof. B. K. Singh, Dr. J. N. Mukherjee, Dr. B. C. Guha, Dr. P. C. Mitter, Dr. P. B. Sarkar and Dr. K. Venkataraman, *Vice-Presidents:* Prof. B. Sanjiva Rao and Dr. P. K. Bose, *Hon. Editors:* Dr. D. Chakravarti, *Hon. Secretary:* Dr. J. K. Chowdhury, *Hon. Treasurer:* G. Banerjee, *Asst. Editor, Bombay Branch:* Principal P. N. Joshi, *President:* S. M. Mehta and Dr. G. V. Jadhav, *Vice-Presidents:* J. Samson and A. N. Kothare, *Joint Hon. Secretaries:* Barave, *Hon. Treasurer, Madras Branch:* Sir J. C. Ghosh, *President:* Dr. K. L. Mongill, *Vice-President:* H. Subba Jois, *Hon. Secretary and Treasurer:*

The Society publishes a monthly Journal dealing with original researches in Chemistry in India and a quarterly Industrial Edition of the main Journal specially devoted to industrial topics. Annual subscription for the Industrial Edition is Rs. 6 for non-Fellows. Subscription of Fellows: Rs. 16, non-Fellows Rs. 20 and an additional Rs. 4 for the Industrial and News Editions. Fellowship is open to graduates of Chemistry and to those who are interested.

INDIAN INSTITUTE OF SCIENCE

MALLESWARAM, P. O., BANGALORE

The Institute owes its origin to the munificence of the late Mr. J. N. Tata, whose plan for establishing a Research Institute, was brought to fruition after his death by the generosity of his two sons, the late Sir Dorabji Tata and the late Sir Ratanji Tata, supported by the Government of India and the Government of H. H. the Maharaja of Mysore. The Institute began work in July 1911, and its laboratories provide facilities for post-graduate work in the following branches of Science, namely Physics, General Chemistry, Organic Chemistry, Chemical Engineering, Biochemistry, Pharmacology, Fermentation Technology, Food Technology, Electric Technology, Electric Communication Engineering, Aeronautical Engineering, Power Engineering, Internal Combustion Engineering and Metallurgy. There is a library of scientific books and journals comprising about 35,000 volumes. The Institute awards a limited number of research studentships, research scholarships and research stipends. The Associateship is awarded by the Governing Council on the recommendation of the Senate after five terms, devoted entirely to research carried on during the period. Diplomas are granted to students who satisfactorily complete approved courses of study in Electrical Technology, Electrical Communication Engineering, Chemical Engineering, Aeronautical Engineering and Metallurgy. A department of Power Engineering is being set up and a section of Economics and Social Sciences has been added. The scientific work of the Institute is recorded in the Quarterly Journal of the Indian Institute of Science. *Chairman of the Governing Council,* Sir Vithal N. Chandavarkar, Kt., M.A., *Bar-at-Law;* *Ag. Director,* E. V. Ganapati Iyer, B.Sc.; *Registrar:* A. G. Pal, M.A. (Cantab.).

INDIAN MATHEMATICAL SOCIETY

Founded in 1907 for the advancement of mathematical studies in India. It conducts two quarterly journals, *The Journal of the Indian Mathematical Society* and *The Mathematics Student*; the former publishes original papers on mathematical subjects and the latter is devoted to the needs of students and teachers of mathematics. The Society maintains a library of current mathematical periodicals in all languages and some new books on the subject. The library is located at the Fergusson College, Poona, where the journals and books are circulated to members by post. The journals of the Society are published in Madras. There are about 400 members from all parts of India. **President:** Dr. M. R. Siddiqui, Osmania University, Hyderabad. **Secretaries:** Dr. T. Vijayaraghavan, Professor of Maths., Andhra University and S. Mahadevan, M.A., L.T., Engineering College, Guindy, Madras. **Librarian:** D. D. Kossambi, Professor of Mathematics, Tata Institute of Fundamental Research, Bombay.

THE INDIAN RESEARCH FUND ASSOCIATION

Address: Asstt. Secretary, Ministry of Health, Government of India, New Delhi.

This Association was constituted in 1911 with a sum of Rs. 5,00,000 set aside as an endowment for the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the causation, mode of spread and prevention of communicable diseases. The Association is a pioneer in organised medical research on a large scale and its work has been widely appreciated in India and other countries. The Association receives annually a substantial grant-in-aid from the Government of India.

The control and management of the Association is vested in a Governing Body the President of which is the Hon'ble Health Minister of the Government of India. This body is assisted by a Scientific Advisory Board. On the Board are Directors of the leading Research Institutes and medical and scientific research workers of standing and experience. The Director-General of Health Services is the Chairman of the Board.

Membership of the Association is open to non-officials. Every donor of Rs. 5,000 is entitled to become a permanent life member, while every subscriber of Rs. 100 per annum can be a temporary member.

The original Governing Body was composed exclusively of officials until 1929 when the Raja of Parkinmedhi made a donation of Rs. 1,00,000 to the Association and was appointed a life member. In the same year the Govt. of India, with a view to liberalising the constitution of the Governing Body, decided to enlarge it by including three representatives of the Indian Legislature, two representatives of Medical Faculties of Universities incorporated by law in India and one eminent non-medical scientist to be nominated by the Governor-General. As a result of further representations from the Universities and the Legislature, this Body was again enlarged in 1933 by the addition of a third representative of the Medical Faculties of Indian Universities, whilst it was decided that the non-medical scientist should in future be elected by the Indian Science Congress Association with the dissolution of the Indian Legislature, three representatives of the Constituent Assembly of India have replaced the three representatives of the Indian Legislature.

A Recruitment and Appointments Board has been formed from amongst the members of the Governing Body of the Association of select and recommend officers for appointment in the Medical Research Department and the All-India Institute of Hygiene and Public Health, Calcutta.

In order to ensure the closest co-operation between workers and to prevent overlapping of efforts, an annual conference of medical research workers and administrative heads of

Medical and Public Health Departments used to be convened under the auspices of the Association up to 1938. In that year it was decided that the Conference should be held biennially in future. No conference has however been held till 1947 due to the abnormal travel and other conditions prevailing in the country. In that year it was decided that, in view of the fact that advisory committees had been constituted to advise the Scientific Advisory Board in regard to research on the various subjects, it was not necessary to revive the Medical Research Workers' Conference. In its place, annual meetings of the various advisory committees are held. The Board is assisted by advisory Committees consisting of workers on important items of research, e.g., cholera, malaria, plague, leprosy, filariasis, rabies, clinical research and industrial health, nutrition, maternity and child welfare and Pharmacology which examine the proposals for research work on their respective subjects and make recommendations to the Scientific Advisory Board. The Scientific Advisory Board annually publishes a technical report describing the research work done and the various enquiries carried out under the auspices of the Association during each calendar year. This report is obtainable from the office of the Secretary, Governing Body, Indian Research Fund Association, Secretariat, New Delhi on payment.

The results of researches carried out under the auspices of the Association are published in the "Indian Journal of Medical Research" and its "Memoirs" and the "Journal of the Malaria Institute of India." Since the inception of the Association a large number of enquiries have been carried out. Enquiries include investigations on cholera, bacteriophage, malaria, nutrition, leprosy, plague, varicella, tuberculosis, pharmacology, indigenous drugs, material mortality, helminthology, medical mycology, dracunculiasis and filariasis, protozoal parasites, cancer, epidemic dropsy, kala-azar, dried blood plasma, sandfly fever, typhus, bacterial dysentery, snake venoms, fluorosis, clinical problems, etc.

Besides financing investigations which are conducted by workers in its direct employment, the Association gives grants-in-aid to institutions and also to outside workers. The expenditure for the last few years has amounted to between seven and eight lakhs of rupees per annum. The Association maintained the Research Sections of the Malaria Institute at Delhi as well as its Southern India Branch at Coonoor until March, 1946 when they were taken over by the Government of India.

The Association maintains the Nutrition Laboratory at Coonoor, which carry out investigations which have a direct bearing on the problem of nutrition in India. The diet surveys undertaken by the laboratories have provided very valuable information as to food requirements. The publication of Health Bulletin No. 23 "The Nutritive value of Indian Foods and the planning of satisfactory diets" has made available to the public useful knowledge about Indian foodstuffs. Besides carrying out experiments in nutrition, annual classes are held at which candidates from all over India are trained in the problems of nutrition. The nutrition advisory committee of the Association has been recognised by the Government of India as the National Advisory Nutrition Committee for India.

The Association has set up nutrition research units at the Seth G. S. Medical College, Bombay, the University College of Science and Technology, Calcutta and the Indian Institute of Science, Bangalore, a clinical research and a Neuropathological Unit at the Tata Memorial Hospital, Bombay and an Industrial Health Research Unit at the All-India Institute of Hygiene and Public Health, Calcutta.

From the 1st April, 1932 to the 31st March 1946, the Association awarded biennially to young medical graduates five research fellowships of the value of Rs. 150 p.m. each tenable

for a period of two years. In April, 1946, the value of these fellowships was raised to Rs. 250 p.m. and it was decided that ten such fellowships were awarded annually with effect from the 1st April, 1947. The Association decided that from the 1st April, 1948, eleven research fellowships of the value of Rs. 250 p.m. each tenable for two years should be awarded. Of these eight are reserved for Medical Graduates and three for persons holding a Master's Degree in Science of a recognised University. In addition to the stipend of Rs. 250 p.m. the research fellows receive a contingent grant of Rs. 250 per annum to cover the cost of contingent expenditure in connection with their research which cannot be met by the Medical College or Research Institute at which they are working.

The Governing Body of the Indian Research Fund Association also administers the Parkinmedhi Trust Fund. This was formed by the grant of a lakh of rupees given by the Maharaja of Parkinmedhi in 1920. The income from this fund is used to pay for two scholarships of the value of Rs. 150 p.m. each tenable for three years for research on human, animal and plant nutrition. The Parkinmedhi scholars are attached to the I.R.F.A. Nutrition Research Laboratories at Coonoor.

THE INDIAN ROADS AND TRANSPORT DEVELOPMENT ASSOCIATION LIMITED

Registered Office—27, Bastion Road, Bombay.

The Association was formed in 1926 and registered in October 1927 having a Council with headquarters in Bombay and Branches at Calcutta, Bombay, Madras, Dibrugarh, Nagpur and New Delhi, each with a Local Committee.

The Annual Subscriptions for membership of the Association are: Associate Members Rs. 5; Ordinary Members Rs. 10; and Supporting Members Rs. 300.

The aims and objects of the Association are to promote the development of transport of any kind including Road, Motor and Air Transport throughout India by making representations to the Government of India, Governments of Provinces, District Boards and other Public Bodies concerned, regarding the construction, improvement and maintenance of roads, bridges and aerodromes, etc.; to make representations to all or any of the bodies regarding the adjustment of taxation, customs duties and excise affecting motor vehicles and other modes of transport and the employment of same in such a manner as to facilitate the development of transport throughout India; to educate the public by means of propaganda and to create authoritative public opinion with regard to the needs of, and advantages to be derived from, improved road and air communications and the use of these forms of transport.

All persons, associations, firms or companies interested in Transport Development are eligible for election as members.

The composition of the Council is as follows: **President:**—Muneejji N. Dalal, J.P., M.Inst. C.E., F.I.A.A., F.I.A.S. (London).

Vice-President:—E. A. Nadirshah, O.B.E., J.P., M.Inst. C.E., B.A., B.E., B.Sc.

Members:—S. Guvrek, E. P. Nicolaides, Habib Chinoy, V. F. Noel-Paton, E. R. Schaefer, S. R. Ekers, E. A. Oakley, J. Littlejohn, H. C. deMierre and Dr. F. P. Antla.

Branches are already in existence in Bombay, Calcutta, Madras, Assam, Nagpur and New Delhi and others will be formed as and when occasion demands.

Applications for membership should be made to the General Secretary of the Association, 27, Bastion Road, Bombay, or to the Secretaries of the Branches, Bombay, P.O. Box 853; Calcutta, P.O. Box 2285; Madras, P.O. Box 1270; Nagpur, E. Raghavendra Rao Road; New Delhi, P.O. Box 56, and Assam, P.O. Rehbari.

INDIAN SCIENCE CONGRESS ASSOCIATION

The Indian Science Congress Association was founded in 1914 largely through the efforts of Prof. P. S. MacMahon and Dr. J. L. Simonsen who were Honorary General Secretaries of the Congress till 1921. The general administrative work of the office of the Congress was under the management of the Royal Asiatic Society of Bengal till 1939. The Association at present has its offices at 1, Park Street, Calcutta 16.

The main objective of the Association is the advancement of science in India, and the annual sessions (Indian Science Congress) are organised for the purpose of (1) encouraging research and making the results generally known among science workers in India; (2) giving opportunities for personal intercourse and scientific companionship in order to overcome to some extent the isolation in this large country of workers in science; and (3) promoting public interest in science.

Membership of the Association is open to all interested in the activities of the Congress. The Association has an average total membership (Ordinary Members) of 1,500. The annual subscription is Rs. 12. There are also Sessional Members, and Associate and Student Members who are enrolled at concession rates. The members receive free of cost the proceedings of the annual sessions, which are issued in four parts. No educational qualification is generally insisted upon at the time of enrolment.

The Congress meets in January each year in one of the principal cities and the proceedings last for six days. The session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different branches of science being usually represented in turn. The work of the Session is divided into thirteen sections: (1) Mathematics, (2) Statistics, (3) Physics, (4) Chemistry, (5) Geology and Geography, (6) Botany, (7) Zoology and Entomology, (8) Anthropology and Archaeology, (9) Medical and Veterinary Sciences, (10) Agricultural Sciences, (11) Physiology, (12) Psychology and Educational Science, (13) Engineering and Metallurgy. The Sections meet separately, and each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers. Special discussions and symposia are held in the mornings or in the afternoons during the Session. Social functions and visits to places of scientific and industrial interest are arranged in the afternoons by the Local Reception Committee which is formed at the venue of the Congress to arrange for the work of the Session. Popular Lectures by eminent scientists and specialists are delivered in the evenings for the general public and form an important and attractive feature of the programme.

With effect from 1947, a programme for international Scientific co-operation has been initiated through invitations to eminent foreign scientists and representative scientific bodies. In January, 1947, as many as 30 foreign scientists representing Great Britain, Canada, Australia, America, France, China, etc., were present at the Annual Congress. A similar representative body of scientific delegates attended the 1948 and 1949 session of the Congress.

President:—Sir K. S. Krishnan, F.R.S. **President-elect:**—Prof. P. C. Mahalanobis, F.R.S.

General Secretaries:—Prof. P. C. Mahalanobis, F.R.S.; Dr. B. Mukerji, D.Sc., M.P., M.F.S., F.A. Ph.S., F.N.I.; Dr. B. Sanjiva Rao, M.A., Ph.D., D.Sc., F.N.I.

INSTITUTION OF ENGINEERS (INDIA)

Founded in 1920; granted a Royal Charter in 1935. **Objects:**—(briefly) to promote the general advancement of engineering and engineering science and their application in India and to facilitate the exchange of information and ideas on those subjects amongst its members. The membership consists of Honorary Members; Honorary Life Members; Members and Associate

Members (Corporate Members); Companions; Students; Subscribers and Associates. The Institution is an All-India body and comprises engineers of all branches, civil, mechanical, electrical, mining, structural, etc. Membership of the Institution demands the same high standard of professional status and qualifications as is required by the Civil, Mechanical and Electrical Institutions in England.

The Institution is administered by a Council consisting of about 50 Corporate Members representing all branches of engineering. It has twelve Local Centres with its own Administrative Committees, and the total membership is over 5,000. It publishes a quarterly technical Journal.

The Council of this Institution act as the Indian National Committee of the International Electro-Technical Commission. **President:**—A. N. Khosla. **General Secretary:**—R. D. Batnagar. **Head-quarters:**—8, Gokhale Road, Calcutta 20.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA

Formed in 1923, by the late Major-General Sir Bernard James, K.T., C.B., C.I.E., M.V.O., who was President from 1923 to 1925.

Objects:—To improve the breeds of horses, ponies and mules in India; to expand the breeding of horses, ponies and mules in India in order to make the country self-supporting in this respect; to protect and promote the interests of breeders and to give them every encouragement; to secure uniformity throughout India in all matters connected with Horse Shows; to prepare an Indian Stud Book; to endeavour by intercourse and discussion to attract public attention to a subject so important to the nation, and to spread knowledge of the principles upon which better horses may be bred; to hold shows of horses and to offer prizes and premiums at such Shows, or at Imperial and District Board and Local Horse Shows or at the Shows of any other Society; to advise and assist Horse Show Committees in regard to the organisation and management of Horse Shows, and in the appointment of Judges; to receive subscriptions and other payments for the general purposes of the Society.

Patron-in-Chief:—H. E. The Governor General of India Shri C. Rajagopalachari; **President:**—H. H. The Maharaja Gajewar of Baroda; **Vice-President:**—Mr. A. C. Ardeshtir; **Honorary Secretary:**—Raj Sahib S. Prasad, Bahadur, O.B.I.

Registered Office:—New Delhi. At present the office has been shifted from New Delhi and is situated C/o the Royal Western India Turf Club Ltd., 6, Burnett Road, Poona, Deccan.

SOCIAL, RELIGIOUS AND POLITICAL

BOMBAY MEDICAL UNION

Founded 1883 to promote friendly intercourse and exchange of views and experiences between its members and to maintain the interest and status of the medical profession in Bombay and the Presidency. Entrance Fee for Resident members Rs. 5, monthly subscription Rs. 3 or Rs. 30 paid in advance in a lump sum. Absent members Rs. 2 yearly and non-resident members yearly subscription Rs. 5. **President:**—Dr. V. L. Parmar; **Vice-Presidents:**—Major M. B. Thakore and Dr. M. G. Talwalkar; **Hon. Secretaries:**—Dr. N. J. Modi and Dr. R. A. Yaidya; **Hon. Treasurer:**—Dr. H. P. Dastur; **Hon. Librarians:**—Dr. D. S. Alreja and Dr. N. J. Doshi; **Office:**—Blavatsky Lodge Building, French Bridge, Chowpaty, Bombay.

THE BIBLE SOCIETY OF INDIA & CEYLON

Founded in Nov. 1944, carries on the work of the British and Foreign Bible Society, the National Bible Society of Scotland and the American Bible Society in India, Pakistan and Ceylon. Bible Society work started in India 138 years ago and has grown steadily ever since. Today the Bible or some portion of it is printed and published in about 130 different Indian languages and dialects and the

circulation reached 763,104 in 1948. The Bibles, New Testaments and Portions in the various vernaculars are sold at rates which the very poorest can pay and at a considerable loss to the Society, which is made up by Voluntary Subscriptions in India and elsewhere.

Portions of Scriptures in the important vernaculars have been prepared in Braille for the use of the blind. The Society's headquarters are in Nagpur, with Auxiliaries in Calcutta, Bombay, Madras, Allahabad, Bangalore, Lahore and Colombo.

Hon. General Secretary for India and Ceylon:—The Rev. G. Sinker, M.A., Nagpur, C.P.

CONSUMPTIVES' HOMES SOCIETY

Office:—Seva Sadan Buildings, Gamdevi, Bombay.

This Society was started by the late Byramji Malabari and Dayaram Gudimal on the 1st of June 1909. Malabari secured a large grant of land in a Himalayan pine forest in Dharapur (Simla Hills) from H. H. the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs. one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII sanatorium." It has its special waterworks known as the Lady Hardinge Waterworks, presented by the late Sir Chinnubhai Madhavji, Bart., of Ahmedabad. The Sanatorium has a Guest House: The Noshirwan Adul Guest House for visitors to Dharapur. It has accommodation for over 100 patients including the special Punjab Block built from a grant of the Punjab Government for European patients. Most of the blocks and cottages are built by Parsis. The N. M. Wadia Charities built 5 cottages and 3 blocks of 11 rooms and gave yearly donations. Sir Dorab Tata, Trustees are also Donors. The Sir Ratan Tata Charities donated large sums for the upkeep of the sanatorium from 1922, and in 1930 endowed the X-ray and Electric Light Departments at a cost of Rs. 20,000. A donation of Rs. 15,000 is promised for the Sir Ratan Tata Laboratory. The Sanatorium has its own dairy and is called the Raj Mahalji D. H. Patuck Dairy. The Sir Chinnubhai Madhavji Dispensary has an outpatient department. The Recreation Hall is called "The Sir Bhupinder Singh Recreation Hall" after the name of the late Maharaja of Patiala. Nearly Rs. 5,00,000 have been spent on laying out the sites, buildings, etc., and the upkeep annual expenditure is about Rs. 1,00,000. Dr. F. S. Master is the Medical Superintendent in Charge, assisted by the Asst. Medical Superintendent, Dr. D. S. Sethna, M.B., M.S., F.R.C.S., and two other Junior Medical Officers. Mr. Pilozzo F. Varapervala is its Hon. Treasurer and acting Hon. Secretary.

UNITED KINGDOM CITIZENS' ASSOCIATION

The United Kingdom Citizens' Association was established in 1883 under the title of "The European and Anglo-Indian Defence Association" and was re-established in 1912 under the title of "The European Defence Association", took the title of "The European Association" in 1913 and the present name in 1948; formerly to organise European influence in the political life of India. Policy now under revision. The Head Office (Central Administration) is in Sassoon House, 4, Lyons Range, Calcutta. 12 Branches all over India. **President:** J. H. Methold; **Vice-President:** A. R. Elliott Lockhart, C.I.E.; **Hon. General Treasurer:** J. D. K. Brown; **General Secretary:** Mrs. I. Bryden.

BRANCHES OF THE ASSOCIATION:

ASSAM:—Chairman: E. H. S. Lewis.
KARACHI:—Chairman: Colonel W. B. Hossack; **Hon. Secretary:** Miss O. Jaggi.

ASANSOL AND DISTRICT:—Chairman: A. E. Crawley; **Hon. Secretary:** R. F. Orme.

CALCUTTA:—Chairman: J. H. Methold; **Secretary:** Mrs. E. A. Young.

DARJEELING.—*Chairman:* C. W. H. Ansell, O.B.E.; *Hon. Secretary:* W. J. Kydd.

DOOARS.—*Chairman:* W. D. Simpson; *Hon. Secretary:* G. A. Verinder.

NORTH BIKAR.—*Chairman:* A. J. K. Richardson, O.B.E.; *Hon. Secretary:* H. McCloy.

MANBHUM.—*Chairman:* H. G. Bowen; *Hon. Secretary:* P. W. H. Woods.

BOMBAY.—*Chairman:* C. P. Bramble, C.I.E.; *Hon. Secretary:* G. B. Cockayne.

SOUTH INDIA.—*Chairman:* B. W. Batchelor, O.B.E.

PUNJAB.—*Chairman:* Sir William Roberts, C.I.E.; *Hon. Secretary:* A. G. C. Elliott.

UNITED PROVINCES.—*Chairman:* Sir Arthur Inskip, O.B.E., K.D.; *Hon. Secretary:* K. M. Wilcox.

INDIAN CHRISTIAN ASSOCIATION

Tiruchirappalli District.

President: Dr. E. P. Mathuram; *Vice-Presidents:* Rev. I. A. Appadurai, Theodore Samuel, M.A., L.T.; *Treasurer:* W. D. Joseph; *Publicity Officer:* M. P. H. Albert, M.A., L.T.; *Secretary:* R. J. Johnson, B.A., L.T., Jlp. In Geo.; *Office:*—23, Ottukkara St., Palakur, Tiruchirappalli, South India.

INDIA SUNDAY SCHOOL UNION

The India Sunday School Union, founded in Allahabad in 1876, is an interdenominational and ecumenical organisation having for its object the strengthening of religious and moral education in the Christian schools throughout India and Pakistan. It has 4 secretaries. Its General Council is composed of representatives from the National and Provincial Christian Councils, regional and denominational union of Sunday schools and which are Auxiliaries of the I.S.S.U. and from Churches and Missions and Christian Youth Organizations in the country.

The headquarters of the Union are at Coonoor on the Nilgiri Hills, where, besides the office and well-stocked book shop, there is the St. Andrew Teacher Training Institution. In this institution Summer Schools are held where a short but intensive course of study and training is offered to leaders in religious education from all parts of India.

Besides the activities at headquarters, the Union offers courses of lectures in any part of the country delivered by members of its staff. A Quarterly Journal is published in English, and Lesson Notes for teachers in English and most of the regional languages. Text-books on subjects connected with the work of Bible teaching are also published in various languages, and Scripture and Teachers Training examinations are held for Scholars and Teachers, respectively.

The officers of the Union are as follows:—

President: Prof. B. B. Malvea, Ph.D., Allahabad.

Vice-President: Bishop S. K. Mondol, Hyderabad, Deccan.

Treasurer: W. H. Warren, Madras.

General Secretary: V. M. Koshy, Coonoor.

The most recent statistics show that there are in India 21,704 Sunday Schools with 42,886 teachers, and 881,688 scholars.

INDIAN RED CROSS SOCIETY

Headquarters: 20 Talkatora Road, New Delhi.

President: His Excellency Shri Chakravarti Rajagopalachari, Governor-General of India.

Chairman, Managing Body: Sir Usha Nath Sen, O.B.E.

Vice-Chairman: The Hon'ble Rajkumari Amrit Kaur.

Secretary-General: Sardar Bahadur Balwant Singh Puri, C.I.E., O.B.E.

When the First World War broke out, what is generally termed Red Cross work was undertaken in the sub-continent and Mesopotamia by the St. John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St. John of Jerusalem and the British Red Cross Society.

The Committee closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation was received to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus securing for India a distinct position in a world-wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the funds of the Joint War Committee to the new Society, and authorised it not only to direct the utilisation for war purposes of the capital funds if need be at its disposal but also to utilise the interest for peace time Red Cross Work. As contemplated in the Act of Constitution of the Society, its activities are completely decentralised, and are carried on through 28 Provincial and State Branches under which there are over 350 District Branches.

The objects on which the funds of Society may be spent are:—

1. The care of the sick and wounded men of Indian Forces, whether still on the active list or demobilised.

2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.

3. Child welfare.

4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.

5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.

6. Home Service Ambulance Work.

7. Provision of comforts and assistance to members of Indian Forces whether on the active list or demobilised.

The Society has five grades of subscribing members, namely, *Honorary Vice-Presidents*, *Patrons*, *Vice-Patrons*, *Members* and *Associate Members*. Their respective subscriptions are Rs. 10,000, Rs. 5,000, Rs. 1,000, Rs. 12 annually or a consolidated payment of Rs. 160 and anything between Re. 1 and Rs. 12 annually or consolidated payment of Rs. 50. The number of adult members of all categories enrolled during 1948 was 11,770.

Constitution:—His Excellency the Governor-General of India is the President of the Society. The Managing Body ordinarily consists of a Chairman nominated by the President and 25 members of the Society, of whom 12 are the Vice-Presidents nominated by Provincial or State Branches, 8 selected by the Society at the Annual General Meeting from among the members of the Society, and 5 nominated by the President.

Junior Red Cross.—The Junior Red Cross movement is an important item of the Society's work. This movement which strives to instil Red Cross ideals in the minds of growing children, is rapidly making headway. It seeks to promote the health of the young, develop their sense of service and foster international friendliness. Its vitality and popularity in the country is evidenced by the fact that most of the Provincial and State Branches have organised Junior Red Cross groups among the juvenile population in

their respective areas. At the end of 1948 the total membership of the Junior Red Cross was 506,017 in 12,073 groups. The Director of the Junior Red Cross at the headquarters who is in charge of the movement, is guided by a Sub-Committee. Several new lines of activity in furtherance of the objectives of the movement have been initiated during recent years.

Bureau of Maternity and Child Welfare.—The development of child health services is one of the important peace-time activities. The various branches of the Indian Red Cross Society have initiated and maintained Maternity and Child schemes in the Provinces and States. Until last year, when a Maternity and Child Welfare Section was established in the Directorate General of Health Services, the Maternity and Child Welfare Bureau of the Indian Red Cross Society has functioned as the Central Office for information and technical advice for the Red Cross Branches and other voluntary and official organisations conducting Maternity and Child Welfare schemes.

In view of the importance of a qualified staff to conduct Maternity and Child Welfare schemes, the Indian Red Cross Society has all along encouraged training schemes for health personnel. The provincial schemes for training of Health Visitors, Midwives and dais have received assistance from the Maternity and Child Welfare Bureau.

The Director of the Bureau keeps in touch with other activities which help to promote maternity and child health services and as such also is the Secretary of the Maternity and Child Welfare Advisory Sub-Committee of the Indian Research Fund Association, the Delhi Maternity Services Co-ordinating Committee and the Association of Medical Women in India. She also represents the Indian Red Cross Society on the Inter-Services Benevolent Fund Committee dealing with Indian Forces' Families Maternity and Child Welfare Services and on the Girl Guides Association.

The Indian Red Cross Society supports schemes for the inauguration of Public Health Nursing in the country and offers scholarships to candidates for such training. The Society, in addition to the endowment fund for post-graduate scholarship under the Indian National Committee of the Florence Nightingale International Foundation, has recently created a few scholarships for post-graduate training of nurses to enable suitable candidates to have a year's training in Public Health Nursing abroad.

Health Education.—Popular health education is carried on steadily by the Society by varied methods. Health lectures in several Indian languages illustrated by films and slides are regularly organised under Red Cross auspices.

Hospitals.—The Society provides amenities for servicemen in all Military Hospitals; and numerous civil hospitals also receive regular assistance from Red Cross funds. The Society also maintains a Welfare Service manned by 50 trained workers who conduct occupational therapy amongst patients in military hospitals, and assist them in letter writing, games, recreation, etc. The cost of the services provided to Military hospitals through the Society's Hospital Services during 1948 amounted to about Rs. 10 lacs.

Nursing Service.—The number of trained nurses registered on the Red Cross roll maintained for civil emergency service is 53. These nurses live in different parts of the country and in order to ensure immediate availability in times of need, the headquarters maintains an accurate and up-to-date record of their addresses.

Forces' Medical After-Care.—With a view to grant relief for medical treatment and cognate purposes to sick ex-Indian Army personnel in India, who participated in the Second World War, the Indian Forces Medical After-Care Fund was instituted at the headquarters towards the end of 1941. Assistance of the Fund is invoked by an increasing number of ex-servicemen. The total number of applications dealt with until the

end of 1918 was 1,905. During last year about six hundred ex-servicemen suffering from tuberculosis, leprosy, mental and miscellaneous ailments were helped, a sum of Rs. 1,43,737 being given in grants, raising the total of disbursements from the fund during the last six years to Rs. 4,07,055.

Finances.—With the dissolution of the Joint Council of Indian Red Cross and St. John created at the close of the Second World War and the addition of the share of its balances, the investments of the Society at the end of 1918 stood at Rs. 2,04,19,100 and the floating and fixed deposits at Rs. 18,97,016. From the total income of Rs. 6,65,726 derived from investments of the Society, a sum of Rs. 1,98,000 is distributed under the Act to the Provincial Branches in the Indian Dominion and those in Pakistan in proportion to their contributions to the Central "Our Day" Fund raised in the First World War.

ISMAILIA ASSOCIATION

This Institution—a philanthropic and humanitarian body—was established by the members of the Ismaili Dharmic Library in 1911 under the name of the Recreation Club with the object, of uplifting and elevating the poor, without distinction of caste or creed. It also tries to improve the social, economic and spiritual condition of the depressed and poor classes of people and with this intent has founded primary schools, associations and such other departments in order to ameliorate their condition and to achieve these objects by constructive and constitutional means. It also maintains orphanages, lecture halls and social workers who constantly travel and impart general education. It has branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sind), Poona, Warranahal, Gondia, Dhoraji, Burma and East Africa. It publishes three Anglo-Vernacular papers, namely the "Ismaili" (a weekly Anglo-Gujarati), for the benefit of its members and the propagation of Islam. Its central office is situated in Bombay at Kanti Mohalla, Imamwada Road. **Board of Executive:** President: Gulamhussein S. Thakuribhai, P. Chief Secretary: Gulamali N. Hassan; Jt. General Secretaries: Abdullahussein C. Rehembulla, Yusufali E. Dossa; **Hon. Treasurers:** Mohamed A. Bhanji and Karamali V. Mahadani.

PASSENGERS AND TRAFFIC RELIEF ASSOCIATION

(Established in 1915).

Head Office: Albert Building, Hornby Road, Fort, Bombay.

Objects: (a) To ascertain and endeavour generally to obtain redress of grievances of passengers travelling either by Railways, Steamers, Trams or Motor Buses; (b) To deal with problems of transport in general; (c) To represent to Government, Local Bodies, and other authorities as also to Railway and Steamship Companies, and Tramway Company, carrying passengers and traffic to take all proper and necessary steps to obtain redress of such grievances; (d) To take all proper and necessary steps to obtain redress of aforesaid grievances and tackling of problems relating to transport in general and (e) To hold or join with other Associations, organisations or Institutions, having similar aims and objects in holding lectures, gatherings, public meetings, etc., and to carry on propaganda to further the objects of the Association and to educate the travelling public and the mercantile community with regard to their rights and remedies.

President: Baillie N. Contractor; **Vice-Presidents:** P. B. Gharti, V. H. Mehta; **Hon. Secretaries:** J. G. Mehta, D. C. Modi and A. B. Pandya.

POONA SEVA SADAN SOCIETY

Office: 789-790, Sadashiv Peth, Poona City.

This Institution was started in 1909 by the late Mrs. Ramabai Ranade, the late Mr. G. K. Devadhar and a few other ladies and gentlemen in Poona, and registered in 1917. Its main object is to make women self-reliant and to train

them for missionary work, including educational and medical work, on a non-sectarian basis, amongst their sisters and brethren in backward areas, especially the former. Nominal fees are charged for instruction in all classes. There are eight different departments subdivided into about 110 classes. The total number of women and girls on the rolls at the various Centres of the Society is about 3,125. There is in Poona a common hostel for women with 125 inmates including inmates from backward Classes. Two fully qualified nurses were so far sent by the Society for Post-graduate Course in Public Health Nursing at the Bedford College for Women, London, with the partial help of a scholarship from the League of Red Cross Societies, Paris. Besides, there are Maternity Hospitals, Nursing Homes and Infant Welfare Centres at Allbarg, Sholapur and Baramati under the management of the Society in connection with other organisations. The Institution is largely dependent upon public contributions and Government aids. The annual expenditure of the whole organisation now exceeds Rs. 3,00,000.

President: Shrimant Sow Laxmidevi Nalk Nimbalkar, Rani Sahib of Phaltan; **General Secy. & Lady Supdt.:** Miss Kashibai Athavie, B.Sc.; **Jt. General Secy.:** Mrs. Indumathilal Bhadake, B.A. (Hons.), B.T.; **Hon. Medical Adviser:** Dr. N. L. Kanade, B.A., M.D.B.S.; **Asst. Secy.:** G. G. Kulkarni, B.A., B.T.; **Member in charge of Propaganda Work and Collection of Funds:** N. S. Pathak, M.A., S.T.C.

SAFETY FIRST ASSOCIATION OF INDIA

(Incorporated in 1932).

Registered Office: Dinshaw Vacha Road, Church Gate Reclamation, Bombay.

The Association is registered under Section 26 of the Indian Companies Act. The liability of its members is limited by guarantee to a contribution of Rs. 5.

The aims include the promotion of safety teaching and safety measures for the prevention of accidents on roads, in factories, mines, workshops, schools and homes and the encouragement of co-operation between different sections of road-users and between employers and employees.

In this connection, sustained educational safety propaganda is conducted through the Press, Platform, the Radio, the Association's monthly magazine "Efficiency News" and "Radiant Youth" as well as through publications such as Industrial Efficiency Communiques, Games Lessons, Indian Highway Codes, leaflets and posters, exhibitions and film shows.

President:—Sir Rahimtoola Chinnoy, Kt.
Hon. General Secretary:—P. J. D'Souza.

SERVANTS OF INDIA SOCIETY, POONA 4

The Servants of India Society, founded by the late G. K. Gokhale in 1905, is a body of men who are pledged to devote their life to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means, the interests of the Indian people. Its present strength is 24 members. The Society has its headquarters in Poona with branches at Madras, Bombay, Allahabad and Nagpur, and other centres of work at Mayanur, Mangalore and Calicut in the Madras Presidency; Shendurjana in C.P.; Lucknow, Kotdwara and Moradabad in U.P.; Lahore in the Punjab, Cuttack and Raigada in Orissa.

The Society's work is primarily political but as it believes in all-round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non-official political organizations deputations to foreign countries and propaganda.

In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U.P. Seva Samiti, and the Bhil Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujarat. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities in Malabar district. During natural calamities such as floods, famine and epidemics, the Society has done relief work in every part of India. By its work in the Mopla rebellion, the Society has become a household name in Malabar. During recent years several members of the Society have paid special attention to rural reconstruction, including rural education.

The Society conducts two papers.—The *Dnyan Prakash*, the oldest Marathi daily, and the *Hitaavad*, an English daily issued from Nagpur. The Society has also published several pamphlets on public questions of the day.

Dr. H. N. Kunzru is the President, A. V. Thakkar, the Vice-President and D. V. Ambekar, the Secretary.

The Society is a non-communal, non-sectarian body which does not recognise any caste distinctions.

SEVA SADAN

The Seva Sadan Society was started on the 11th of July 1908, by the late B. M. Malabari and Dayaram Gidumal. It is the pioneer Indian ladies' society for training Indian ministrant sisters and through them, serving the poor, the sick and the distressed. To spread its Gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay, and maintains the following departments of work: (1) Homes for the Homeless; (2) Ashramat (Training Homes); (3) a Marathi Training College, with a primary School; (4) Home Education Classes; (5) Industrial Department including a workroom; Sewing, Cutting, Hosiery, Cooking and Pastry, and machine and hand Embroidery are among the chief industries taught. The total number of women in the different classes is over 700.

Hon. Secretary: Miss B. A. Engineer, M.A., LL.B., M.D.E., J.P.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA

Office and Homes at King's Circle, Matunga, Bombay.

The Objects of the Society are: To rescue children of all castes and creeds from the streets of Bombay, to prevent begging or other improper use of poor children by adults, to pass such children on to existing charitable institutions and to provide for those otherwise unprovided for, with the support and assistance of the police, to prevent children so far as possible from appearing in Police Courts, to prevent the public and private wrongs of children and the corruption of their morals, to take action for the enforcement of the laws for the children and if necessary to suggest new laws or amendments to the existing laws, to promote education, to provide and maintain an organization for those objects, to do all other lawful things, incidental or conducive to the attainments of the foregoing objects.

Several experiments are being carried out successfully in self-expression and self-government by children of the B. J. Home. Subscription for Annual Membership, Rs. 10; for Life Membership, Rs. 100.

THEOSOPHICAL SOCIETY

International Headquarters: Adyar, Madras. Founded at New York, 1875, transferred to Madras, 1882 and incorporated, 1905.

Objects: To form a nucleus of the Universal Brotherhood of humanity, without distinction of race, creed, sex, caste or colour; to encourage the study of comparative religion, philosophy, and science; to investigate unexplained laws of nature and the powers latent in man.

Founders: Colonel H. S. Olcott and Madam H. P. Blavatsky; **Past Presidents:** Col. H. S. Olcott, 1875 to 1907. Dr. Annie Besant, 1907 to 1933 and Dr. G. S. Arundale, 1933-1945; **Present President:** C. Jinnajadusa, M.A. (Cantab.); **Vice-President:** Sidney A. Cook; **Recording Secretary:** Miss Helen V. Zahara, A.F.I.A. (Aust.); **Treasurer:** C. D. T. Shores.

There are National Societies, or Sections in 47 countries. Each Section organizes its own activities. The Indian Section consists of 300 Lodges with headquarters at Benares City, U.P. **General Secretary:** Rohit Mehta.

Headquarters activities include the international organization and Theosophical publications.

The Society has its own printing house (Vasanta Press) and the Theosophical Publishing House where books and journals are produced and dispatched to many countries.

The *Arya Library* containing about 60,000 books and 15,000 MSS and transcripts is one of the finest Oriental Libraries in the world. Subsidiary activity: Dr. V. Swaminatha Iyer Tamil Library owned by Kalakshetra containing 1,831 Tamil MSS is the largest Tamil Manuscript Library in the world.

The Headquarters estate comprises nearly 300 acres, extending east along the Adyar river from the Adyar Bridge to the sea, with many picturesque buildings in beautiful gardens including temples of the great religions. The banyan tree is one of the finest in India.

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION—(Founded in 1919)

Office:—107, Esplanade Road, Fort, Bombay.

The Association was formed, in pursuance of clause (b) of Resolution XI of the First Session of the All-India Conference of the Moderate Party, with a view to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion of the Party on matters of public interest; and to inform and educate public opinion in this presidency in support of its views, policy and methods.

The objects of the Association are the attainment by constitutional means of full Dominion Status for India at the earliest possible date. For the promotion of these objects, the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfillment of these objects the Association shall carry on educative and propagandist work by means of leaflets, pamphlets and other publications, (a) representations to Government, (b) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (c) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures, Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

WOMEN'S INDIAN ASSOCIATION "MERU," TERNAMPET, MADRAS

This Association was started in Madras in July 1917, with aims of service.

Aims and Objects:—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of education through schemes of compulsory primary education, including the teaching of religion. To secure the abolition of child-marriage and other social evils. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative Councils and Assemblies. To establish

equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India. To band women into groups for the purpose of self-development and education and for the definite service of others.

The Association is actively engaged in the promotion of adult education, the training of women in industrial occupations and slum welfare work.

It interests women in maternity and child welfare work, in the uplift of the depressed classes and in other social and welfare activities for the general betterment of Indian society; has worked successfully for securing franchise for women in India (see pages 93 and 94 of the Simon Report, Vol. II), and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppression of Traffic in women and children and the abolition of the Devadasi system. The Association is affiliated to all the important progressive women's associations in India and throughout the world. It was the initiator of the All-India Women's Conference and the First All-Asian Women's Conference at Lahore. The Madras Seva Sadan, the Madras Children's Aid Society, The Arval Home for Orphan Children and the Montessori School owe their origin to the efforts of this Association. The Association opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act, enforced by Government. The Home was opened on 21st March 1934 by Lady Beatrice Stanley and is now under the Madras Vigilance Association.

It has four branches in the city, where cultural, recreational and educational activities for women are provided. Dr. S. Muthulakshmi Reddi is the president for 1949-50.

YOUNG MEN'S CHRISTIAN ASSOCIATION

This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a General Board which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now 65 Associations in large towns and cities and many village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters: Allahabad; Alleppey; Bangalore; Bombay; Calcutta; Calicut; Colimbatore; Colombo; Coonoor; Delhi; Galle; Hyderabad; Jubbulpore; Kandy; Karachi; Kunnankulam; Kottayam; Lahore; Madras; Madurai; Nagpur; Naini Tal; Ootacamund; Poona; Rangoon; Ernakulam; Risinapur; Salem; Secunderabad; Simla; Trivandrum; Wellington. The others use rented or rent-free buildings.

The work of the Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 92 specially trained full-time Secretaries. Fully cognisant of the generous help in men and money the Association has received in the past from overseas organisations, the Indian Y.M.C.A. today have their own men conducting their affairs; five secretaries from foreign Councils still contribute their share to the work of the Indian Movement but all the rest are recruited in India and financed in India.

The work of the Council (excluding that of the 65 local Y.M.C.A.'s) calls for a Budget of Rs. 1,05,389 in 1948. Of this sum Rs. 28,000 has to be raised from the public in India.

The Headquarters of the Council of Y.M.C.A.'s of India, Pakistan, Burma and Ceylon is 5, Russell Street, Calcutta. The officers are:—

Patron:—Rear-Admiral the Earl Mountbatten of Burma, K.G., P.C., G.M.S.I., G.M.I.E., G.C.V.O., K.C.B., D.S.O.

President of the Council:—H.E. Raja Sri Maharaj Singh, Kt., C.I.E., Bar-at-Law.

General Secretary of India, Pakistan, Burma and Ceylon: T. D. Santwan, 5 Russell Street, Calcutta, 10.

The Bombay Association now possesses four well-equipped buildings: Woodhouse Road, Lamington Road, Rebach Street and Reynolds Road. Patron of the Association, His Excellency the Governor of Bombay; **President:** K. G. Jacoby; **General Secretary:** J. S. B. Abraham. In connection with each branch there is a well-managed hostel providing accommodation for over 200 young men. These branches are managed by a Committee working under the Board of Directors. Each Branch organisation directs many and varied activities designed to meet the physical, spiritual, social, and mental needs of their members. A Welfare Service agency for labourers started in 1924 is now conducting four centres, serving mill workers, Municipal menial employees, Port Trust and Railway employees. A programme of education, lectures, physical culture, play and general uplift, profitably fills up the leisure time of the workers and their families. The Association is responsible for the direction of three public playgrounds in the city, which are financed by the Municipality.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF INDIA, PAKISTAN, BURMA AND CEYLON

This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual, intellectual, social and physical development. The Association exists for women and girls of all communities. There are the following branches: General 121; Fellowship Groups 31; School Girl and Junior Branches 32; Girl Guide Companies 11. The needs of girls are met by recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for social intercourse. Hostels, some of them holding as many as 175 girls, are established where there is a demand for them and the Association, at present owns 25, including 6 Holiday Homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices. In addition to Holiday Homes, Summer Conferences are held annually in Ootacamund in South India and at Mussoorie, Special Girls' Camps are arranged from time to time in many centres.

Traveller's aid work is done in the large ports, and a large number of transient guests and visitors are accommodated in the Homes in these centres. The Association also runs Employment Bureaux through the agency of which many girls find positions. The commercial schools train girls for office and business life. These larger Associations are manned by trained Secretaries, some of whom come from India, Great Britain, America, Australia, New Zealand and Canada, though the majority of staff numbers are found and trained in India. In many of the smaller branches where the work is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year.

The Association, which is affiliated to the World's Young Women's Christian Association is international and inter-denominational. Full membership is open to all who declare their faith in our Lord Jesus Christ and desire

to serve others in His spirit of love, and Associate membership is open to any girl or woman, regardless of what her religion may be, who wishes to join the world-wide fellowship of the Y. W. C. A. and declare her sympathy with its purpose, and to share in its activities.

President, Headquarters Committee.—Mrs. John Mathial. **Vice-Presidents.**—Mrs. Loos, Rani Maharaj Singh, Mrs. A. V. Azariah, Mrs. Ahmad Shah, Mrs. Ba Maung Chain and Mrs. A. L. Najmuddin.

General Secretary.—Miss Sosa Matthew.

Copies of the Annual Report and other printed matter can be obtained from the Headquarters Office which is at 37, Cantonment Road, Lucknow, U.P. The official organ of the Association is the leaflet "Everymember" which is issued each month and sent to members and friends of the Association.

COMMERCIAL AND INDUSTRIAL

BOMBAY PIECE-GOODS NATIVE MERCHANTS' ASSOCIATION

Office.—Mulji Jetha Cloth Market Hall, Bombay.

The objects of the Association are :—

(a) To promote, by creating friendly feelings and unity amongst the merchants, the business of the piece-goods trade in general at Bombay, and to protect the interests thereof; (b) To remove, as far as it will be within the powers of the Association to do so, all trade difficulties of the piece-goods business and to frame such line of conduct as will facilitate the trade; (c) To collect and assort statistics relating to piece-goods and to correspond with public bodies on matters affecting the trade, and which may be deemed advisable for the protection and advancement of the objects of the Association or any of them; and (d) to hear and decide disputes that may be referred to the Association for arbitration.

The following are the office-bearers for the current year :—

Chairman.—

Purshottam Mulji Kapadia, Advocate.

Deputy Chairman.—

Narottandas Keshavlal.

Hon. Jt. Secretaries.—

Padansey Damodar Govindji.

Himantil Trimbakhi Muni.

Navnithal Lalubhai Shah.

Hon. Treasurer.—

Jethubhai Kalanji.

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS 1, COUNCIL HOUSE STREET, CALCUTTA

The Department of Statistics was re-absorbed into the Department of Commercial Intelligence with effect from the 1st December, 1922. The joint department has its office at No. 1, Council House Street, Calcutta, and is administered by the Director-General of Commercial Intelligence and Statistics assisted by a Deputy Director-General and an Assistant Director. It embraces two distinct classes of work; (a) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms and (b) the compilation and publication of All-India statistics.

Among the important publications for which the Department is responsible are the following annual volumes :—Statement of the Foreign Seaborne Trade and Navigation of India, Statistical Abstract for Indian Coal Statistics, and Indian Customs Tariff. The department also publishes a weekly journal "The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests, (b) notices of tenders called for and contracts placed by Government departments and public

bodies, (c) crop reports and forecasts, (d) Government orders, communications and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, price and trade movements of the staple exports and imports, (g) trade enquiries for securing trade introductions, (h) fortnightly, quarterly and annual reports of the Trade Commissioners, Consuls and other Trade and Commercial representatives of the Govt. of India abroad and (i) graphical representation of price changes of important commodities.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta. This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence and Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the administrative control of the Director-General. It has now been expanded into a first-class technical library containing about 30,000 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and about 500 technical and commercial journals and market reports. Ordinarily books are consulted in the Library but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with the Directors of Industries and other Government Departments in India, with the Indian Trade Commissioners in India, Toronto (Canada), Sydney (Australia), Mombasa (East Africa), Colombo (Ceylon), Karachi (Pakistan), the Asst. Indian Trade Commissioner, Dacca (East Pakistan), the Commercial Adviser to the High Commissioner for India in the U. K., London, the Commercial Attache, Berlin, the Commercial Counsellor, Tokyo, the Commercial Secretaries at Rio de Janeiro (Brazil), Alexandria (Egypt), Tehran (Persia), Rangoon (Burma) and Kabul (Afghanistan), the Consuls-General in New York and Buenos Aires as well as with the Trade Commissioners of the U. K., Australia, New Zealand, Ceylon, the Commercial Secretaries for Canada and Trade Representatives and consular officers of various countries of the world.

EAST INDIA COTTON ASSOCIATION LIMITED

The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917, the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwarli Chamber of Commerce, The Bombay Cotton Merchants' and Mucceaduns' Association, Ltd., and The Japanese Cotton Shippers' Association. None of these bodies was representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in figures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June, 1918 as a temporary measure under the Chairmanship of G. Wiles, I.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May, 1922, when the Act under which the Board worked, was repealed, and its functions were carried on by the East India Cotton Association under Bombay Act No. XIV of 1922.

The Association continued to function under the above Act until 31st October, 1932. With effect from 1st November, 1932, the Association had been regulating transactions in cotton under Bombay Act No. IV of 1932. Since 1st April 1948 the Association is functioning under the Bombay Forward Contracts Control Act, 1947 under which it has been declared to be a recognised cotton Association.

The constitution of the Board of Directors is as under :—

Sir Purshottamdas Thakurdas, K.B.E., C.I.E. (President); Bhowanjil A. Khimji, M.L.A., M.C.A., J.P. (Vice-President); Ramdas K. Khande, J.P. (Vice-President); Ramdas Dossa, J.P. (Vice-President); Jhunjhunwala, Jagjivandas Dossabhai, Madanbhai Ramarathil Rula, B.A., Chimanlal B. Parikh, J.P., Hiralal A. Dave, J.P., Madanlal Nemaui; Rannath A. Podar, M.L.A., J.P., Nandlal Madhavdas Amersey; Radhakrishna S. Khaitan, J.P., Venilal Narottandas Patwa, J.P., Keshavlal Pranjivandas Mehta, Rao Bahadur F. B. Luxmeshwar, Kurkot, Raju J. B. Deshmukh, B.Sc. (Agri.), S. K. Wankhede, Bar-at-Law, K. S. Patil, B.A., LL.B., B. D. Deshmukh, B.A., LL.B., M.L.A., D. N. Mehta, O.B.E., J.P., Y. R. Joshi, B.A.G.

Officers.—C. M. Parikh, B.Com., J.P., Secretary; S. A. P. Aiyar, Assistant Secretary.

Some of the objects for which the Association is established are :—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to and prohibition of the use thereof and the nature and times of such use, whether in the case of the general body or particular classes or any individual or firm or company using the Exchange; to provide forms of contracts compulsory or permissible and regulate the making, carrying out and enforcement or cancellation of contracts; to adjust by arbitration or otherwise controversies between persons engaged in the cotton trade; to establish just and equitable principles in the trade and to maintain uniformity of control; to fix or adopt standards of classification of cotton; to acquire, preserve and disseminate useful information connected with the cotton interest throughout all markets; to decrease or insure the local risk attendant upon business; and generally to control, promote and regulate the cotton trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted; to establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate the admission to and prohibition of the use thereof and the nature and times of such use whether in the case of the general body or class of any particular individual or firm or company using the Clearing House; to regulate the handling and exportation of cotton from India and the importation of cotton into India in so far as it may be imported; to bring, prosecute, or defend or, aid in bringing, prosecuting, or defending, any suits, actions, proceedings, applications, or arbitrations on behalf of Members or special Associate Members or Associate Members or temporary Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association and to prescribe the principle of framing of contracts with a view to eliminating the temptation and possibility of speculative manipulation.

The Association has a fine Building, at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, a large Trading Hall on the lines of Liverpool and New York Exchanges, Survey Rooms, Appeal Rooms, etc.

The Association has another fine Building, "The Cotton Exchange" at the corner of Sheikh Memon Street and Kalbadevi Road, wherein trading in "forward" contracts is conducted. It comprises of a basement, a ground floor (Trading Hall) with two galleries and six other upper floors. There are 114 telephone cabins for members on the ground floor and the galleries. The top floor accommodates the

administrative offices of the Association and the Clearing House, and the remaining five floors contain 113 rooms for members' offices.

The Association has a membership of 1102.

The Bombay Cotton Annual containing matters relating to every branch of the trade is published annually in December and statistics are issued twice weekly.

Address :—Cotton Exchange, Marwari Bazar, Bombay 2.

Telephone :—Bombay No. 26176.

Telegraphic Address :—"Cotboard."

THE ALL INDIA FOOD PRESERVERS' ASSOCIATION

(Estd. 1942)

Office :—18-A, Aurangzeb Road, New Delhi.

President :—Dewan Chaman Lal, M.C.A.

Secretary :—Kailash Nath.

OBJECTS :—To promote, encourage, defend and support Indian Fruit Preservation Industry, to raise the standard of quality of the manufactured by sanitary and hygienic methods; to help members in any difficulty of common interest of the industry; to classify and circulate statistics and other information useful to the industry.

MEMBERSHIP is limited to those engaged in the business or indirectly interested in Food Preservation in India.

ZONAL OFFICES.—*Vice-Presidents* :—N. Y. Kashalkar, Mrs. Annie Besant Road, Worli, Bombay, 18; K. P. Bhargava, Belanganj, Agra; D. K. Dutt, 128, Middle Road, Entally, Calcutta; A. V. Reddi, Pathankot (Province, Madras); M. K. Mahajan, Kadiamk.

GRAIN & OIL-SEEDS MERCHANTS' ASSOCIATION

The object of this body is "to promote the interests of the merchants and to put the grain and oil-seeds trade on a sound footing." It is an influential body with a large membership. Office-bearers for the s.y. 2005 are :—

President :—Sheth Velji Lakhanshi Napoo, B.A., LL.B.

Vice-President :—Sheth Devji Rattansey.

Hon. Secretary :—Sheth Vallabhdas Peraj.

Secretary :—K. N. Joshi.

The address of the Association is Masjid Bunder Road, Mandvi, Bombay.

INDIAN CENTRAL COTTON COMMITTEE

The Office, Nicol Road, Buldhad Estate, Bombay. Secretary, Kalidas Sawhney, M.Sc., F.A.S., Asst. Secretary, C. J. Bocarro, M.A. Director, Technological Laboratory.—D. L. Sen, M.Sc. (Tech.) (Mech.), M.Sc. (Bom.), A.I.L.Sc., F.I.C.

The Indian Central Cotton Committee was constituted by the Government of India in March 1921, as a result of the recommendation of the Indian Cotton Committee of 1917-18. Originally the Committee was purely an advisory body but with its incorporation under the Indian Cotton Cess Act in 1923, it became an administrative body having at its disposal funds for the improvement and development of the growing, marketing and manufacture of cotton in India. The funds of the Committee are derived from the Cotton Cess of four annas per bale which was imposed under the Indian Cotton Cess Amendment Act of 1948. Having complete control over its funds the Committee has been able to build up a satisfactory reserve and is at present spending about Rs. 10 lakhs per annum on cotton improvement, mainly on agricultural and technological research and seed distribution and marketing schemes.

The activities of the Committee now extend to all branches of cotton improvement in India, and, as an authoritative body to advise the Central and Provincial Governments on important matters of cotton policy, it has attained an

outstanding position. The Committee provides funds for research into cotton problems of All-India importance and for the development, extension and marketing of improved varieties of cotton. The aim, however, has always been to supplement and not supplant the work of the Agricultural Departments in the cotton growing provinces and Indian States. Including as it does representatives of growers, agricultural officers, traders, spinners and manufacturers, it has been an invaluable forum for the discussion of many problems of general concern.

A list of the members constituting the Committee and the various interests they represent as on 1st April, 1947, is given below :

President, Sardar Datar Singh, Vice-Chairman, Indian Council of Agricultural Research.

Vice-President.—R. G. Saraiya, J.P.

R. L. Sethi, The Agricultural Commissioner with the Government of India, *ex-officio*.

The Director-General of Commercial Intelligence and Statistics, Calcutta, *ex-officio*.

Madras.—R. M. Sundaram, I.C.S., Director of Agriculture.

Bombay.—Dr. B. N. Uppal, Director of Agriculture.

United Provinces.—Dr. S. B. Singh, Director of Agriculture.

E. Punjab.—Sardar Lal Singh, Director of Agriculture.

Central Provinces & Berar.—P. D. Nair.

The East India Cotton Association, Peshawar and Thakurdas.

The Bombay Millowners' Association, Bagwan Das, M.L.A.

The Bombay Chamber of Commerce, L. F. H. Goodwin.

The Indian Merchants' Chamber, Chimanlal B. Parikh.

The Ahmedabad Millowners' Association, Nanddas Haridas.

The Tuticorin Chamber of Commerce, A. Mueller.

The Upper India Chamber of Commerce, Major S. R. Pocock, M.L.A.

The Empire Cotton Growing Corporation, C. P. Bramble.

Commercial representatives nominated by Central Government, *Central Provinces and Berar* :—Pukharaj Kochar; Kisandhi Goudka, Madras. G. V. Doraiswamy Naidu, E. Punjab.—Ram Narain Varmani, Bengal Representative.—Dr. N. Dutt.

Co-operative Banking Representative.—Vacant, Vice-Chairman V. Mehta.

Representatives of Cotton Growing Industry.—Madras.—D. Chinnaiyannan; M. Lakshminath Reddy. Bombay.—F. B. Lakshminarayan; K. R. Deshmukh. United Provinces.—Major Nawab Sir Mohd. Jamsheed Ali Khan, M.L.A.; Lala Basant Lal Agarwala; E. Punjab.—Sardar Gurbachan Singh, Central Provinces and Berar.—S. K. Wankhede and P. S. Patil.

Representatives of Indian States and States Unions. Baroda State. C. A. Maclean, Commissioner of Agriculture, Madhya Bharat.—K. J. Thadani, Director of Planning in Agriculture, Mysore. P. H. Rama Reddi, C.I.E., Director of Agricultural Research Institute and Principal, Agricultural College, Hebbal, Mysore. Patiala and East Punjab States Union.—Sardar Kartar Singh, Director of Agriculture.

Additional members nominated by the Central Government.—R. Balasubramania Ayyar, Cotton Specialist, Coimbatore; M. A. A. Ansari, Economic Botanist (oil-seeds) to Govt., U.P., Cawnpore; Shankar Lal, Representative of the Cotton Millowners of Delhi; T. Vijayaraghavacharya, Dr. V. K. R. V. Rao, Padampat Singhania; vacant, *vice* G. V. Deshmukh; Chinnail B. Mehta, Sardar Beant Singh; W. R. Natu, Director of Statistics, Govt. of India, Dept. of Food, New

Delhi; K. K. Chettur, Joint Secretary to the Govt. of India, Commerce Dept., New Delhi; D. N. Mehta, B.A. (Oxon.), F.R.S.A., Secy. to the Govt. of Bombay, Agr. and Rural Development Dept., Bombay; Biswanath Das, G. B. Patel, Cotton Botanist, Surat.

Amongst the research schemes of the Committee, plant breeding schemes for the improvement of quality naturally take pride of place. The schemes employed by the committee for its research work have varied little in character since 1923, though they have grown in number. It continues to maintain a Technological Laboratory at Bombay which includes a complete experimental spinning plant and a scientific laboratory for research on the cotton fibre and a Testing House which is recognised by the I.L.S.F.A. The Committee also provides a large proportion of the funds for the Indore Institute of Plant Industry.

For a considerable period the Committee restricted its grants to agricultural research, but in 1930 it was decided that the time had come to add its support to the efforts already being made to bridge the gap between the experiment station and the cultivator and to supplement the funds which the Agricultural Departments were devoting to the introduction of improvements into agricultural practice. Special attention from that time began to be devoted to seed distribution schemes.

The Committee has not stopped at the production of better cotton, but from its inception has devoted special attention to better marketing, to the prevention of adulteration and other abuses and to many other problems connected with the cotton trade of the country. Regulated Cotton Markets existed in Berar before the establishment of the Committee, and that system which had stood the test of time was commended with certain modifications for general adoption. Regulated Cotton Markets have now been established in Bombay, Central Provinces, Madras, Punjab, Hyderabad, Baroda and Indore. Similarly, on the recommendation of the Committee, the Cotton Transport Act was passed in 1923 by which Provincial Governments are empowered to exclude from any specified area cotton, *kapas* or seed from outside unless required for a special purpose and covered by a licence. Prior to the passing of this Act, inferior cottons used to be imported in large quantities into the staple cotton tracts for purposes of adulteration, to the detriment of the reputation of several valuable cottons. The Act is now in force in almost all the important staple cotton areas of Bombay, Madras and the Central Provinces as well as in Baroda, Rajpipla, Chhota Udaipur, Hyderabad and Indore, etc. In 1925, on the recommendation of the Committee, the Cotton Ginning and Pressing Factories Act was passed. This provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enables them to be traced to their origin. Recently the Act has been used for the prevention of watering and for the mixing of non-cotton articles with cotton. The Committee has also taken steps to bring to the notice of the trade, both in India and abroad, those improved varieties which have now reached a commercial scale.

It may be stated without hesitation that, as a result of the efforts of the Committee, the last twenty-five years have seen a marked change in the character of the Indian crop, particularly in the percentage of short and medium staple. Equally important is the result of agricultural research and its application to the yield of cotton per acre. The average yield per acre in the quinquennium 1939-44 for the whole country was 112 lbs. This is 18 per cent. higher than for the quinquennium 1927-32. The average yield per acre in 1924-45 was 121 lbs. The ascertained area under improved cotton during 1944-45 was about 52 per cent. of the total. The ultimate ideal is to encourage the establishment of single variety tracts wherever agricultural conditions and the limitations of irrigation supply and soil make this possible.

THE INDIAN JUTE MILLS ASSOCIATION

Office:—Royal Exchange, Post Box No. 280, Calcutta.

Now one of the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started in 1886. The first agreement for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1931.

Working Agreements have since formed the most important link between this Association of members, which today represent 97 per cent of the trade in India, the terms of each agreement now being for a 5-year period. In 1937 the need for a Research Department to deal with all the technical problems arising out of quality production and the demand for speedier facilities resulted in the Association opening a laboratory which now has developed into an intricate of notable dimensions with a capable staff of scientist and is known as the India Jute Mills Association Research Institute, with offices at No. 16, Old Court House Street, Calcutta.

THE INDIAN NEW PAPERS CO-OPERATIVE SOCIETY LIMITED

Office:—118, Malabar Street, Fort, Bombay.

The Society was started in 1947 with an authorised share capital of Rs. 2,00,000 made up of 2,000 shares of Rs. 100 each. By the end of the year ending June 1948, 1,32,585 shares have been issued and the number of shareholders is 1,100. Periodically increased they are.

Dailies: 20, Weeklies: 12, Bi-weeklies: 9, Monthly: 41.

Linguistically they can be classified as under:

Bengali: 1, English: 2, Gujarati: 57, Hindi: 22, Kannada: 3, Malayalam: 7, Marathi: 17, Oriya: 3, Sindhi: 1, Telugu: 3, Tamil: 2, Urdu: 14.

During the year under review, the Society purchased 230 tons of newspaper for distribution among its members and arranged for cutting the reprints into sheets for the benefit of members, using sheets still continue. The Society declared dividend at the rate of 5 per cent for the year 1947-48.

Board of Directors (1947-48):

Sri Amritlal D. Sheth, *President & Chairman of the Board of Directors*, Sri Indravadan Thakore, *General Secretary*, Ahmedabad; Sri D. P. Sarda (Nava Zamana, Bombay); Sri E. S. Patwardhan (Gauri Bharti, Nagpur); Sri Haradhan M. Joshi (Lokshahi, Poona); Sri Bindu Mohan Pandit (Ayurved Patrika, Nasik); Sri U. H. Khan (Amal Weekly, Bombay); Sri Keshavlal M. Shah (Lokshahi, Bombay); Sri Ratilal M. Sheth (Lohamanyu, Bombay) *Honorary Secretary*.

PAKISTAN MERCHANTS' ASSOCIATION
(Late Karachi Indian Merchants' Association).

Established in 1902 and registered in 1925, 100 members on the roll as on 31st December 1948.

Objects: To protect and promote Indian trade and industry in and around Karachi and secure unanimity among the local settler members' disputes and secure equitable dealings in trade, negotiate and promote or oppose legislative and other measures affecting trade interests, maintain departments devoted to particular trades or industries, regulate trade exchanges, examine agenda of the International Labour Organisation and recommend for nomination of Employers' delegates to International Labour Conference. Represented on various public bodies, e.g., Sind Legislative Assembly, Karachi Port Trust, Karachi Municipal Corporation, N. W. R. Local Advisory Committee, Indian Central Cotton Committee, Sind Cotton Committee, Provincial Marketing Board, Traffic Committee for the City of Karachi, etc. Has a Clearing House to settle differences periodically between members *inter se*. Affiliated to Federation of Indian Chambers of Commerce and Industry, Indian National

Committee and International Chamber of Commerce and Indian Chamber of Commerce in Great Britain. *President:*—Sukhdev Udhavdas, *Chairman of the Produce Exchange Department:*—Seth Mayaram Chellaram, *Vice-Chairman of the P. E. Department:*—Hassanand T. Jadhvani, *Offg. Secretary:*—K. G. Punwani, B.A.

Office:—Nicol Road, Karachi 2.

MARWARI ASSOCIATION

160A, Chittaranjan Avenue, Calcutta.

The Association was established in the year 1898.

Its chief objects are: To promote and advance the moral, intellectual, commercial, economic, political and social interests of the Marwari community and to protect its rights and status.

To arbitrate in the settlement of disputes arising out of commercial transactions between parties either one or both of which are members of the Marwari community provided the parties are willing to abide by the judgment and decision of the Association; to adjust controversies between members of the Association; to communicate with Chambers of Commerce and other mercantile and public bodies within or outside India and to concert and promote measures for the protection of trade, commerce and industries in which Indians, in particular Marwaris, are engaged; to fund and support establishments and institutions for disseminating commercial, technical and general education in different branches of Art and Science in the Marwari community; to take all necessary steps for promoting, supporting or opposing legislation or other action affecting the interest of the Commercial communities in general and of the Marwari community in particular either by Government or any department thereof or by any local body or bodies; to take such action as may be necessary for securing the redress of grievances of any branch of trade, commerce and industry in which the Marwari community is interested as also such other action as may be conducive to the development and growth of such trade, commerce and industry.

The constituents of the Association are the leading industrialists, exporters and importers of the province of Bengal.

The Association issues certificates of origin to exporters of mercantile goods.

The Association is a member of the Federation of Indian Chambers of Commerce and Industry.

The following are the Office-bearers:

President:—Chandulal Khandelwal

Vice-President:—Dharamdas Agrawal and Hari Krishna Jhunjharia.

Hon. Secretary:—Bachhi Prasad Pokhar.

Joint Secretary:—Mohan Lal Chokhany.

Auditor:—Messrs. Bhatia & Co.

Personal Asst. to the Hon. Secretary and Officer-in-Charge:—T. K. Sen, M.A., M.B.A.S.

The following are representatives on public bodies:

Bengal Legislative Assembly:—Anand Lal Foddar.

Board of Industries, Bengal:—Hari Krishna Jhunjharia.

Non-Official Jail Visitor, Alipore Jail:—Anand Lal Foddar.

F. I. Rly. Waqon Supply Advisory Committee:—Mahabir Prasad Kaspera, B.Com., B.L., M.B.A.S.

MILLOWNERS' ASSOCIATION, BOMBAY

Established in the year 1875, the Millowners' Association, Bombay, is one of the oldest and most important organisations of industrial employers in the country. Membership of the Association is mainly confined to cotton spinning and weaving concerns drawn from every part of India including the Indian States. The great work done by the Association ever since its inception has been generally recognised, and the

important role which it fills in the economic life of the country is perhaps nowhere better illustrated than in the representation accorded to it in the Central and Provincial Legislatures, in local authorities such as the Bombay Municipal Corporation, and on public bodies such as the Bombay Port Trust. The Association is also represented on all important all-India bodies constituted by the Central Government connected in one way or another with the interests of the textile industry.

By special arrangement with the Department of Commercial Intelligence and Statistics, the Association compiles every month special statistics relating to the import, re-export and export trade in cotton yarn and piece-goods and related silk goods of British India and the Province of Bombay. The annual Cotton Mill Statement published by the Association is well-known as a comprehensive and authoritative directory of cotton mills in India.

By a system of market correspondents stationed in important piece-goods consuming markets in India, the Association keeps its members regularly informed of the trend of prices and tendencies in the principal trading centres in the country. The Association also publishes every fortnight detailed lists of the average re-sell quotations for the principal lines of cotton yarn and piece-goods produced by Bombay mills and the whole-sale bazaar prices of the chief lines of goods imported into the principal port in India.

As large employers of labour, the Association has always adopted a forward policy in regard to labour problems, and a very large number of recommendations have been made to number mills during the last few years for the amelioration of the conditions of labour employed by constituent members. That some of these recommendations have subsequently been adopted by other large employers of labour and the country is at once a tribute to the excellent spade-work done by the Association in the field of social and labour work.

The Association has on its rolls 150 members, including 6 woollen mills, 2 silk mills, 1 cotton ginning and pressing factory and 3 dye and bleach houses.

Managing Committee of the Association for the year 1949:—Sir Vitthal Chandavarkar, Kt., *Chairman*, Neville N. Wadia, *Deputy Chairman*; L. A. Badhley, C.I.E.; Dharamsey Munraj Khatau; A. Pether; Krishnaraj M. D. Thackersey; J. C. Burnis; Natchandra Madhral; G. D. Sonani; J. C. Lamsbary; L. T. H. Goodwin, C.I.E.; H. G. H. Everett; Rammath A. Podar; Bhagvandas C. Mehta, M.L.A.; Radhakrishna Ramnarain; M. L. Taparash; S. P. Jain; E. D. Sheppard; Rai Bahadur K. D. Bala; Ramchandra Kojany; N. S. V. Ayyar, *Secretary*, and R. G. Gokhale, *Labour Officer*.

The Office of the Association is located at 2nd Floor, Elphinstone Building, Churchgate Street, Fort, Bombay, and the Telephone Nos. are 31041 and 31042. Tel. Address: Millmountain.

The following are the Association's representatives on public bodies:—

All-India Board of Textile Studies: Dharamsey Munraj Khatau; *Bombay Legislative Assembly:* Bhagvandas C. Mehta, M.L.A.; *Bombay Municipal Corporation:* Rammath A. Podar; *Bombay Port Trust:* Krishnaraj M. D. Thackersey; *Bombay Smoke Nuisances Commission:* H. A. Wood and G. S. Karjur; *College of Engineering Advisory Committee:* Sir Vitthal Chandavarkar, Kt.; *Development of Bombay Advisory Committee:* Sir Vitthal Chandavarkar, Kt.; *Empire Cotton Growing Corporation Administrative Council:* H. H. Saxey; *Indian Central Cotton Committee:* Bhagvandas C. Mehta, M.L.A.; *Local Advisory Committee, B.B. & C.I. Railway:* Sir Vitthal Chandavarkar, Kt.; *Local Advisory Committee, G.I.P. Rly.:* Krishnaraj M. D. Thackersey; *Royal Institute of Science Advisory Committee:* Sir Vitthal Chandavarkar, Kt.; *Sydenham College of Commerce and Economics Advisory Board:*

B. S. Dabke: Technological Research Sub-Committee of the Indian Central Cotton Committee. Neville N. Wadia and B. D. Kulkarni; *Textile Trade Marks Advisory Committee*: Dharamsey Mulraj Khatau, A. Pether and Neville N. Wadia; *Victoria Jubilee Technical Institute, Bombay*: Sir Vithal Chandavarkar, Kt.

MILLOWNERS' MUTUAL INSURANCE ASSOCIATION, LTD.

The Millowners' Mutual Insurance Association, Ltd., was registered on 30th June, 1924 as a Company limited by guarantee. The registered office of the Association is located in Elphinstone Building, Churchgate Street, Fort, Bombay.

The objects:—(a) The mutual insurance of members of the Company against liability to pay compensation or damages to workmen employed by them or their dependents for injuries or accidents, fatal or otherwise, arising out of and in the course of their employment; (b) the insurance of members of the Company against loss or damage by or incidental to fire, lightning, etc., and (c) to reimburse or in any way provide for or against the liability of the Company upon any assurance granted or entered into by the Company and generally to effect and obtain re-insurances, counter-insurances and counter-guarantees, etc., etc.

All members of the Millowners' Association are eligible for admission to the Mutual Company. Non-members are also eligible for membership of the Mutual, provided their application is approved of by the Committee of the Millowners' Association.

The affairs of the Mutual Insurance Association are under the control of the Board of Directors.

The present Directors are:—

A. Pether (*Chairman*).

Sir Joseph Kay, Kt.; D. M. Khatau; Krishnaraj M. D. Tackersey; J. C. James; Radhakrishnan S. Khatau; Neville N. Wadia and T. V. Badelchy.

A. C. M. Curjeljee, M.A., LL.B., *Secretary* of the Association.

PRESS ASSOCIATION, NEW DELHI SIMLA

Address: 2, Keshavnagar Lane, New Delhi.

Established in 1928 to secure and safeguard the rights and the privilege of the press in the discharge of their duties in relation to the Central Government and the Central Legislature and to promote whatever may lead to the elevation of the status of the journalistic profession and the maintenance of the independence of the Press. *President*: Sir Lala Nath Sen, "Associated Press of India"; *Vice-President*: Durga Das, "The Hindustan Times"; *Secretary*: P. D. Sharma, "The Tribune"; *Jt. Secretary*: Mohd. Jafri, "Ajmer"; *Treasurer*: S. A. Sastri, "Indian News Chronicle"; *Ordinary Members*: K. Rangaswami, "The Hindu"; Sri Krishna, "The Pioneer"; G. V. Kripasindhu, "Indian News Chronicle"; Miss Margaret Parson, "New York Herald-Tribune"; C. Sarkar, "United Press of India"; M. Roy, "Anurita Bazar Patrika".

PRESS-OWNERS' ASSOCIATION, BOMBAY

Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press-owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

Secretary:—Mandil C. Modi

Office:—196 B, Gaiwa fi, Girgaum, Bombay 4.

YARN MERCHANTS' ASSOCIATION, LTD.

Registered Office:—111, Chawala Bldg., Tambakanta, Bombay 3.

The Association previously known as the Bombay Yarn and Silk Merchants' Association was formed in 1935 and was subsequently registered under the Indian Companies Act on the 4th June 1944 and styled as the Yarn Merchants' Association, Ltd.

Objects:—To promote and protect the interest of manufacturers, distributors and merchants carrying on business in yarn in Bombay and elsewhere in India, to regulate their methods of business to establish just and equitable principles in the trade and maintain uniformity in the rules, regulations and usages of the trade, to provide forms of contracts, fix market rates for fixed delivery contracts, arbitrate between members, to acquire, preserve and disseminate useful information connected with the trade, fix or adopt standards of classification of yarn, and in general to control, promote and regulate the yarn trade in general.

This is a unique Association in India having its members all over the country. At present there are 178 members and 516 registered brokers.

The Association was appointed in 1942 as the nominee of the Government of Bombay for the distribution of yarn in Bombay Province.

President: Sethi M. B. Barucha; *Vice-President*: Sethi Puranlal N. Shah; *Treasurer*: Nanakchand Devidas Khatau; *Secretary*: P. M. Borahia, LL.B., LL.M.

ALL-INDIA ORGANISATION OF INDUSTRIAL EMPLOYERS

The Employers' Delegation to the various sections of the International Labour Conference led the necessity of a central organisation in India representing employers of industrial labour in the country with a view to studying various questions coming before these International Conferences from the Indian employers' point of view. Walchand Hirchand, who was the President of the Federation of Indian Chambers of Commerce and Industry, with the consent of the Committee, took the initiative of launching a central organisation, in December, 1932, to represent Indian employers. Any organisation representing an industry, the constituents of which are employers of industrial labour, is entitled to become a member of the All-India Organisation of Industrial Employers (briefly called A.I.E.E.). Besides this membership, any industrial concern is also entitled to become a member of the Organisation.

The annual subscription for industrial associations is Rs. 300 and for individual industrial concerns Rs. 50.

The Organisation has on its roll 26 industrial associations representing Ahmedabad and Bengal millowners, Northern India employers, salt industry, national shipping, sugar industry, Baroda State Mills and Industries, glass, coal mining, tea, Delhi Factory Owners and Jute industry. Besides, there are about 150 big industrial concerns as members of the Organisation.

Office-Bearers for 1948-49.

President:—Seth Shanti Prasad Jain, Calcutta.

Offg. Secretary: G. L. Bansal.

Office:—25, Ferozshah Road, New Delhi.

EMPLOYERS' FEDERATION OF INDIA

The Employers' Federation of India was registered early in 1928 with the following among its main objects:—To promote and protect the interests of employers engaged in the trade, commerce, industries and handicrafts of India; to promote or oppose legislative or other measures affecting their interests; to collate and circulate statistics and other information of interest to employers; to nominate delegates and advisers to the International Labour Conferences and to formulate opinions on the subjects coming for discussion before such bodies; and to promote or oppose their recommendations; to secure concerted action on all subjects involving the interests of its members; to consider and support well-considered schemes for the welfare and uplift of Labour and establish harmonious relations between Capital and Labour; and to carry on propaganda for the purpose of educating public opinion with regard to the character, scope, importance and needs of industrial enterprise as represented by the Federation.

Most of the leading employers' organisations in India are members of the Federation.

President:—Sir Ardesir Dalal; **Deputy Presidents**:—A. P. Benthall, Sir Robert Menzies and C. S. Ratnasabapathy Mudalliar.

The office of the Federation is at present located at Elphinstone Bldg., Churchgate Street, Bombay.

NATIONAL EMPLOYMENT SERVICE

As a means of ensuring the maximum utilisation of available manpower and supplying employers with the right types of workers, the Government of India is running an Employment Organisation. The Organisation consists of a network of Employment Exchanges in the Indian Dominion and a large number of technical, vocational and apprenticeship training centres.

The Employment Exchanges were set up in pursuance of various recommendations of the International Labour Organization and in implementation of the I.L.O. Unemployment Convention of 1919. The scope of these Exchanges, which was at first limited to ex-services personnel, now covers all classes of employment-seekers.

The objects of the organization are:—(1) to place applicants in suitable employment; (2) to increase the mobility of labour both territorial and occupational; (3) to substitute a free, impartial and scientific system of recruitment for the one through jobbers which was condemned by the Whitley Commission on labour about two decades ago; (4) to assist in organizing training and retraining courses; (5) to provide the necessary machinery and suitable data for the adoption of special security measures by the State; and ultimately (6) to promote full employment for the manpower available in the country.

The organization is under the administrative charge of the Directorate-General of Resettlement and Employment, which exercises powers of control and supervision over the ten Regional or Provincial Offices.

Each Employment Exchange includes a branch dealing specially with problems of employment a distance to women and another with those of candidates possessing high-grade qualifications of a professional, scientific or administrative nature. The needs of people living in areas far remote from the Exchanges are met by mobile units which are attached to many of the Exchanges. These units visit villages and towns and perform Employment Exchange duties on the spot.

After the partition of India, when the mass migration of displaced persons from Western Pakistan demanded the provision of an agency for the resettlement of these people, the Employment Organization extended its scope to displaced persons.

At the end of May 1949, the Employment Exchanges had registered 2,575,320 persons of whom 1,21,912 were displaced persons, and placed in employment 654,287 of whom 107,873 were displaced persons.

In Madras, the C.P. and East Punjab the work of Employment Exchanges is supplemented by District Employment Offices, proposals to open similar offices in other provinces were under consideration at the end of April, 1949.

As an integral part of the Employment Organization, the Directorate-General of Resettlement and Employment is running technical and vocational training centres where training is imparted in more than one hundred technical and vocational trades. In addition, those who have had some training already are given apprenticeship training at various firms and factories which are participating in the scheme. At the end of May 1949, there were 78 Technical Training Centres, 97 Vocational Training Centres and 336 Apprenticeship Training Centres, with 18,852 persons, including 9,749 displaced persons,

under training at these Centres. These centres have been catering so far only for ex-Servicemen and displaced persons. Proposals were under consideration at the end of April to extend the benefits of the training schemes to all classes of people. A beginning in this direction has been made in the C.P. and Bombay, where, at the end of May 1949, 127 aviators, 113 instructor-trainers, at Koni, Bikaner, and 222 Primary school teachers, at Amulhi, Bombay, were under training.

A feature of the training imparted at the vocational and technical training centres is that the trainees are given practical training in the production of articles. A permanent exhibition of articles made by trainees has been organised at the Directorate-General of Resettlement and Employment in New Delhi.

With a view to ensuring a steady supply of trained instructors for running technical and vocational training centres, both Government and private, a Central Institute for Training Instructors has been set up at Koni near Bikaner in the C.P. & Berar. By the end of May, it had turned out 117 instructor-trainers.

Director-General & Ex-Officio Joint Secretary, Dr. N. Das, Ph.D., I.C.S., Deputy Secretary E. C. Damodaran, Director of Training, S. N. Roy, Director of Publicity, A. S. Varma, Director of Employment, P. Bhargava, In. S. T. Agrawal, Joint Regional Director, Madras, Syed Abdul Qadir, Bombay, M. G. Monani, I.C.S., C.P. & Berar, A. B. Vanyava, Bihar, Mahabir Prasad, West Bengal, N. M. Mazumdar, United Provinces, Radha Kant, East Punjab, Major K. S. Malik, Delhi, Ajmer & Merwara, Col. H. L. Varma, Orissa, D. K. Mardara, Assam, Capt. Habibur Rahman.

Address: Directorate-General of Resettlement and Employment, Gurdwara Road, New Delhi.

PUNJAB FEDERATION OF INDUSTRIES, AMRITSAR

The Punjab Federation of Industries was established in 1937, with the object of creating a solid body of industrialists of the Punjab and Northern India to promote and protect their interests through organised effort. It is now the only body of its kind in the Punjab as a purely industrial association which can speak with authority on all matters relating to industrial development. The Federation has now among its members the largest industrial units in the province and no industry of any importance is left unrepresented in the Federation.

President: S. B. S. Sanyal Singh Chowla (Managing Director, Punjab Distilling Industries, Ltd., Khana).

Vice-President: Som Raj Kapur (Managing Director, Messrs. Shanbhut Nath & Sons Ltd.).

Secretary: Dr. Jagdish Chaudh.

Members of the Managing Committee: Seth Satya Paul Virmani (The Jawala Flour Mills, Amritsar); S. Jindler Singh Chawla (Punjab Distilling Industries, Ltd., Khana); L. Kishore Lal Kukar (Mahabir Hosiery and Textile Mills, Amritsar); L. Kishor Nath Grover (Model Woollen and Silk Mills, Verka); L. Panna Lal Talwar (Northern India Steel Works, Ltd., Verka); Const. Constantinides (Oriental Carpet Manufacturers (India), Ltd., Amritsar).

Co-opted Members: R. S. L. Chhabildas (Metropole Works, Ltd., Verka); S. Gurdial Singh (Hindustan Embroidery Mills, Chhacharta).

Hon. Members: Director of Industries, Simla; Chief Hydro-Electric Engineer, Simla.

Chief Administrative Officer:—E. P. R. Delhi.

WESTERN INDIA AUTOMOBILE ASSOCIATION

Office:—Lalji Naranji Memorial Building, Churchgate Reclamation, Bombay.

The objects of the Association include: the encouragement and development of motoring; the improvement of road communication;

the provision for its members of a centre of information and advice on matters pertaining to motoring; the provision for its members of protection and defence of their rights as motorists; free legal advice and defence facilities for touring abroad and the use of international Touring Documents; Tel. Address:—“Vindatas,” Phone No. 11071 (Three Lines), Branch Offices: POONA: Coronation Building, 7, Moledina Road; AHMEDABAD:—Lal Darwaja.

Patron: H. E. Raja Sir Maharaj Singh, Governor of Bombay.

President: P. R. Bhatt, J.P.; **Vice-Presidents:** K. G. Dayal and L. A. Naqashah, O.P.F., J.P., B.A., B.L., B.Sc. (Eng.), M.Inst. C.I., M.I.E. (India), C.I.S.E. (London).

Secretary:—Jehangir J. K. Patell, B.A., R.A., B.A., J.A., Asst. Secretary:—K. G. Subramanian, B.A.

Other Motoring Associations in India and Ceylon are: The Automobile Association of Bengal, 40, Chowringhee Road, Calcutta; The Automobile Association of Ceylon, P. O. Box 378, Colombo; The Automobile Association of West Pakistan, Charing Cross, The Mall, Lahore; The Automobile Association of Southern India, 200, Mount Road, Madras and the United Provinces Automobile Association, 32-A, Canning Road, Allahabad.

MEDICAL AND NURSING

NATIONAL ASSOCIATION FOR SUPPLYING MEDICAL AID BY WOMEN TO THE WOMEN OF INDIA

The National Association for Supplying Medical Aid by Women to the Women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals; to train women doctors, nurses and midwives in India; and to bring them out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition, branches were formed in each Province, each branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in-aid to several Provincial branches; it gives scholarships to a number of women students at the medical colleges of Bombay, Calcutta, Madras and Delhi. It has in the past brought from England a certain number of European medical women. It has assisted by grants-in-aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 12 Provincial branches and a number of Local Committees.

The Government of India subsidise the Countess of Dufferin's Fund to the extent of Rs. 8,500 per annum for each officer to maintain a Women's Medical Service for India; this service in the past consisted of 15 officers, with a training service of 25 doctors and one officer. In the present service, Medical women, either British or Indian, holding registrable post graduate qualifications, are eligible for the senior service.

In view of the provincialisation of health services under the Government of India Act 1935, the Countess of Dufferin's Fund Council decided in 1948, that the Women's Medical Service be disbanded and that steps be taken to absorb the personnel of the Women's Medical Service into the Central and Provincial Health Services, under conditions of service not less favourable than they enjoyed under the Women's Medical Service. As the Women's Medical Service officers staffed the Dufferin Hospitals in the Provinces, the Council recommended to the Local Hospital Committees and the Provincial Governments to provincialise the Dufferin Hospitals. The Women's Medical Service is in the process of winding up which is likely to be completed by the end of 1949. It is also expected that the provincialisation of hospitals will also progress simultaneously.

The balance of the endowment fund will be divided between Pakistan and India on the proportions agreed to by the Joint Committee of representatives of the two dominions. It is proposed that in India the balance of the fund will be utilised for promotion of medical and nursing education among women.

The National Association has appointed the Countess of Dufferin's Fund Council to formulate policies for the promotion of Medical Aid, and its day to day affairs are managed by an Executive Committee of which Dr. Jivraj Mehta is the Chairman and Dr. S. Pandit, Secretary, Red Cross Buildings, 20, Talkatora Road, New Delhi.

ESTABLISHMENT OF THE BOMBAY NURSES, MIDWIVES AND HEALTH VISITORS' COUNCIL

The need of legislation for the registration of Nurses, Midwives and Health Visitors had existed in the Province since a long time and with a view to protecting the public from the activities of persons who misrepresent themselves to be fully qualified Nurses, Midwives or Health Visitors, Government, in April 1935, passed the Bombay Nurses, Midwives and Health Visitors' Registration Act. In the absence of State Registration the nurses trained in this Province were subject to certain disabilities and were refused registration in other Provinces and in other countries, where state registration prevailed. The Act obtains for them the necessary status and secures their registration in other provinces in India or in other parts of His Majesty's Dominions which are willing to reciprocate with the Bombay Nurses, Midwives and Health Visitors' Council which was established in August 1935.

From the date of the establishment of the Council, the Bombay Presidency Nursing Association became defunct. The training and registration of nurses, midwives and health visitors in this Province is now controlled by the Council. Nurses who are trained and registered in this Province can now get registration with the General Nursing Council of England and Wales and the General Nursing Council of Scotland and can practice as qualified nurses in these Countries.

ST. JOHN AMBULANCE ASSOCIATION (INDIA)

AND ST. JOHN AMBULANCE BRIGADE (INDIA)

The St. John Ambulance Association was founded in 1877, by the Order of the Hospital of St. John of Jerusalem in England, and has for its objects:

- The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured;
- The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room;
- The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories and other centres of industry and traffic;
- The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps;
- And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality or denomination.

An Indian Council of the Association was constituted on a regular basis in 1910. It has since issued over 687,000 certificates of proficiency in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene and Mothercraft and over 41,000 tokens such as Vouchers, Medallions, Labels and Pendants for special proficiency in those subjects. In addition over 131,000 certificates have been issued in the elementary course for school students known as Mackenzie School Course in First Aid, Hygiene and Sanitation.

The object of the Association is not to rival but to aid the medical man, and the subject-matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits.

During the year 1948, 27,831 persons attended courses of instruction in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene, and Mothercraft. Of these 19,326 qualified for the Association's certificates; i.e., 17,431 in First Aid, 1,289 in Home Nursing, 257 in Hygiene and Sanitation and 349 in Domestic Hygiene and Mothercraft.

The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs. 1,000, Rs. 500, Rs. 100, Rs. 5 and Rs. 2.

The income of the Indian Council at headquarters consists primarily of interest on securities, a fixed annual grant from Government, fees for certificates and membership subscriptions.

His Excellency Shri C. Rajagopalachari is the President. The general business of the Association is conducted by an Executive Committee of which The Hon'ble Rajkumari Amrit Kaur is the Chairman and Sardar Bahadur Balwant Singh Puri, C.I.E., C.B.L., the Secretary-General (at present on temporary deputation as a member, Federal Public Service Commission, B. M. Tolly, R.C.M., (London), Bar-at-Law is the offg. Secretary-General.

The St. John Ambulance Brigade is a uniformed, disciplined body of men and women, all of whom are holders of First Aid, and, in the case of women also Home Nursing certificates. They meet together regularly for practice, are inspected and re-examined annually and undertake to turn out for public duty whenever required.

The Brigade in India is commanded by The Hon'ble Rajkumari Amrit Kaur as Chief Commissioner for India. Under her are 15 Districts covering almost all the provinces in India and some of the States, with headquarters at Calcutta, Bombay, Madras, Bangalore, Lucknow, Nagpur, Patna, Delhi, Shillong, Indore, Cuttack, Secunderabad and Simla and there are five also on the Eastern Punjab, East Indian, G.I.P., B.E. & C.I. and O.T. Railways.

In charge of each District there is an Assistant Commissioner or a Commissioner according to the membership strength of the District, and as the work of the Brigade lies so much in the medical and surgical sphere, the Officers-in-Charge of the Districts are generally the administrative heads of the Civil Medical Departments of the respective provinces. It is their business to organise and maintain the training and efficiency of Ambulance and Nursing Division and to see that they are available for public service on occasions when they are required.

The Auxiliary Nursing Service, India, was constituted in 1911 to provide a reserve of nurses sufficiently trained to be immediately useful when called up for duty during the second World War.

Both the St. John Ambulance Association and Brigade work under the aegis of the Order of St. John of Jerusalem and as their work is complementary to that of the Indian Red Cross Society, close co-operation exists between the Order and the Society.

Office:—Red Cross Buildings, 20, Talkatora Road, New Delhi.

THE TRAINED NURSES' ASSOCIATION OF INDIA AND THE ASSOCIATION OF NURSING SUPERINTENDENTS OF INDIA

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India. It is affiliated with the International Council of Nurses and the National Council of Women in India, and the Nurses' Auxiliary of the Christian Medical Association is an affiliated Association. Its objects are:—

- (a) to uphold in every way the dignity and honour of nursing profession,
- (b) to promote a sense of esprit de corps among all nurses,
- (c) to enable members to take counsel together on matters affecting their profession,
- (d) to elevate nursing education and to raise the standard of training,
- (e) to strive to bring about a more uniform system of education, examination, certification and registration.

The Association has accomplished a great deal in raising the standard of nursing throughout India, in improving nursing legislation and in providing post-graduate courses for nurse administrators, sister tutors and health visitors and in promoting the Founding a College of Nursing, Delhi, which gives a 4 year B.Sc. Honours course in Nursing (leading to a degree from Delhi University).

It strives in every way to promote efficient and adequate nursing for the sick and to improve conditions, not only for nurses but primarily for patients. The Association is self-supporting and is maintained by the nurses themselves.

The branches of the Association are the Health Visitors' League, the Midwives' Union and the Student Nurses' Association. The number of qualified members are 2,256 and student members 2,228 totalling 4,484. The official organ of the Association is "The Nursing Journal of India."

Patron: H. E. Chakravarty Rajagopalachari

Vice-Patrons: Lady Nye, Delhi; H. E. Lally Trivedi, East Punjab; Miss MacQueen, West Punjab, Pakistan; H. E. Lady Hydari, Assam; Her Highness The Maharani Sahiba of Travancore; H. H. The Maharani of Bikanernagar, Madras; Her Highness The Princess of Barar; H. E. Rani Maharaj Singh, Bombay; H. E. Dr. K. N. Katin, W. Bengal; H. E. Sri M. S. Aney, Bihar; H. E. Mangaldas Pakwasa, C. P. & Berar; The Hon'ble Rajkumari Amrit Kaur, Delhi; and H. L. Anaf Ah. Orissa.

Hon. Legal Adviser: F. A. Meltia, Govt. of India, Legislative Department, New Delhi, Simla.

President: Miss T. K. Adrianova, 1, Underhill Lane.

Vice-Presidents: Miss France; Miss M. Craig; Mrs. E. A. Watts; Mrs. Anthony; Miss E. Paul and Mother M. Kineshige

Officers: General Secretary: Miss A. Roy, T.N.A.I. Office, Underhill Lane, Delhi; Secretary, T.N.A.I. Association: Miss E. Dorabji, 1, Underhill Lane; Hon. Treasurer: Miss L. Lakshmi Devi, College of Nursing, 12, Jawahar Singh Road, New Delhi; Editor: Miss A. Roy, T.N.A.I. Office, 1, Underhill Lane, Delhi.

Hon. Secretaries: Health Visitors' League: Miss M. Korah, College of Nursing, 12, Jawahar Singh Road, New Delhi; Midwives' Union: Miss A. Cherian, N. W. M. Hospital, Parel, Bombay 12.

Representatives of the Nursing Services and Affiliated Associations: The Military Nursing Services (India): Chief Principal Matron, G.H.Q. Medical Directorate, New Delhi; Government Nursing Services, Bengal: Miss M. Naomni, Office of the Surgeon-General with the Government of Beng.; Writers' Buildings, Calcutta; Miss L. Williams, Office of the Inspector-General Civil Hospitals, E. P., Lucknow; Miss M. Doctor, Office of the Surgeon-General with the Government of Bombay, Bombay; Mrs. W. James, Office of the I.C.C.H., Karachi 1, Sindh, Pakistan; Miss Bullock, Office of the I.C.C.H., Shillong, Assam; The Nurses' Auxiliary of the Christian Medical Association: Miss A. M. Clark, Nelson Square, Nagpur.

Membership: Membership is open to qualified Nurses, Health Visitors and Midwives who have completed their training in hospitals or Health Schools recognised by the Association. All officers are fully trained nurses.

Subscriptions:—Entrance fee Rs. 3; Annual subscription which includes monthly copies of the Nursing Journal of India Rs. 8 and Nurses whose monthly salaries are under Rs. 50 are entitled to pay Rs. 4 p.a. Health Visitors and Midwives earning less than Rs. 75 p.m. without the usual emoluments given to nurses are also entitled to the Reduced Subscription rate of Rs. 4 p.a.

CHURCH ORGANIZATION

THE ROMAN CATHOLIC CHURCH

The Catholic community is composed of the following elements:—

- (1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicars Apostolic. They are at present ruled by an Archbishop and three suffragan Bishops of their own Syriac rite.
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.
- (3) European immigrants at all times, including British troops.
- (4) Modern converts from Hinduism and Animism in recent mission centres.
- (5) Recent converts from the Jacobite community in Malabar, of which 3 Bishops, 71 priests and some 28,000 laity have been received into the Catholic Church.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the propaganda clergy. This conflict was set at rest by the Concordat of 1885 (amended by the Agreement of 1928, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:—

Under the Sacred Congregation of Extraordinary Ecclesiastical Affairs:—

The archbishopric of Goa and Damão (having some extension into British territory) with suffragan bishoprics at Cochín and Mylapore (both in British territory).

Under the Sacred Congregation of Oriental Churches:—

The archbishopric of Ernakulam, with suffragan bishoprics of Changanacherry, Kottayam and Trichur.

The archbishopric of Trivandrum, with suffragan bishopric of Trivellore.

Under the Sacred Congregation of Propaganda Fide:—

The archbishopric of Agra, with suffragan bishoprics of Allahabad, Ajmer and Lucknow and the Prefectures Apostolic of Indore and Jhansi.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore, Calicut, Trichinopoly, Tuticorin, Madras and the Diocese of Karachi and the Mission of Ahmednagar.

The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderabad, Vizagapatnam, Nagpur, Berhampur, Cuttack and Guntur, the Prefecture Apostolic of Jubbalpore, and the Diocese of Bellary.

The archbishopric of Pondicherry (French), with suffragan bishoprics of Mysore, Coimbatore, Kumbakonam, Salem, Madurai and Bangalore.

The archbishopric of Delhi and Simla, with suffragan bishoprics of Lahore, Multan and Rawalpindi.

The archbishopric of Verapoly, with suffragan bishoprics of Quilon, Kottar, Trivandrum and Vijayapuram.

The archbishopric of Colombo (Ceylon), with suffragan bishoprics at Kandy, Galle, Jaffna, Trincomalee and Chilaw.

Three Vicariates Apostolic and three Prefectures Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregations or mission seminaries, and in the great majority are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number over 2,000 besides which there is a body of secular clergy mostly Indian, etc., numbering about 2,800, and over 11,000 nuns. The first work of the clergy is parochial ministrations to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people; their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Xavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore, Loyola College, Madras, teaching university courses; besides a large number of high schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education in 1936 exceeded half a million. As to missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota-Nagpur, Krishnagar, Guzerat, the Ahmednagar district and the Telugu coast may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of the *Society for the Propagation of the Faith* and of the *Holy Childhood* helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is represented by an Apostolic Internuncio for India residing at Delhi. He continues to be the Delegate Apostolic to places other than the Indian Union, e.g. for Pakistan, Ceylon, Burma etc. At present this post is occupied by the Most Rev. Archbishop Klerkels, D.D., appointed in 1931.

CHURCH OF SOUTH INDIA

(The Diocesan Office, Cathedral P. O., Madras 6.)

After negotiations which began with a meeting at Tranquebar in 1919 and continued until 1947, the Church of South India was inaugurated at a great service held in St. George's Cathedral, Madras on September 27, 1947. Distinguished representatives from Churches and Organisations from many parts of the world were present. By this Union Christians in South India who previously belonged to the Church of India, Burma and Ceylon (Anglican), the South India United Church (Congregationalist) and

Presbyterian) and the Methodist Church became one Church of South India. The Missionary Societies and Boards which work through this Church draw support in personnel and money from Great Britain, Ireland, United States of America, Australia, New Zealand, Switzerland and Germany. The Church is divided into 14 Dioceses, 13 in India and one in the North of Ceylon, has 11 Diocesan Bishops and one retired Bishop. It includes about 10 lakhs of Christian and has over 700 ordained Ministers. In addition to carrying on evangelistic, pastoral, educational and medical work within South India it is also supporting its own Missionary Work in Papua and among the Gonds. The Church of South India is a member of the World Council of Churches, and one of its fundamental purposes is that the union here achieved between Churches of different traditions should provide stimulus both to wider union among Christians in South India and to union in other countries between those Churches that are there still separated but here united. The government of the Church is designed to preserve all that is of lasting value in the Congregationalist, Presbyterian and Episcopal traditions. Each Diocese has a Diocesan Council composed of clerical and lay representatives, and decisions affecting the whole Church rest with the Synod, a body of some 200 ordained and unordained representatives, drawn from the 14 dioceses. The Officers of the Synod, elected at each ordinary meeting, which normally occurs at intervals of two years are:

The Moderator: Rev. A. M. Hollis.

Deputy Moderator: Rev. C. K. Jacob.

Secretary: G. V. Job.

Treasurer: Rev. J. S. M. Hooper.

The names of the Diocesan and Bishops are as follows:—

The Right Rev. Baniyan Joseph (Anantapur and Kurnool); Rev. C. K. Jacob (Central Travancore); Rev. H. Samita (Cuddapah); Rev. A. B. Elliot (Dornakal); Rev. S. Kulandran (Jaffna); Rev. A. Muthuvan (Kottam); Rev. A. M. Hollis (Madras); Rev. J. E. L. Newsham (Malabar and Ramnad); Rev. C. Whitaker (Medak); Rev. P. Guruswami (Chidambaram); Rev. T. G. Stuart Smith (North Kerala); Rev. A. H. Legg (South Travancore); Rev. G. T. Selwyn (Tinnevely); Rev. E. B. Thorp (Trichinopoly).

ANGLICAN

Down to March 1st, 1930, the Church of England in India (and Ceylon), though possessing its own Bishops and Metropolitan, was in the eyes of the law an integral part of the Church of England, and subject to the general supervision of the Archbishop of Canterbury. By the Indian Church Act and the Indian Church Measure passed by Parliament in 1927 this legal connection was severed, and on March 1st, 1930, for the fixing of which date provision was made by the Indian Church Measure, the Church of England in India and in Ceylon, in future to be known as the Church of India, Burma and Ceylon, and, for short, the Church of India, (or of Burma or of Ceylon, in those countries) became wholly responsible for the management of its own affairs, although, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity."

Anglican work in India dates from the first establishment of the East India Company in the 17th Century on the shores of India at Surat, Madras, and Bombay, where the servants of the Company were ministered to by a continuous succession of chaplains. The first chaplain was the Revd. Peter Rogers, Surat, 1612. The first church built was St. George's, Madras, in 1680, followed by Bombay Church, now St. Thomas' Cathedral, in 1716. In South India the work

of Danish and German Lutheran missionaries was assisted by the English S.P.C.K. (Society for the Promotion of Christian Knowledge), but missionary work was not attempted by the Church itself till the beginning of the 19th Century.

Like all other branches of the Anglican Communion the Church of India is episcopal. The first bishopric was not, however, founded until 1814 when the See of Calcutta was set up, the first bishop being Thomas Fauslaw Middleton. His jurisdiction at first included not only British India but the British settlements in Australia, the Straits, the Cape and St. Helena's. At the same time India was divided into three Archdioceses, and two of these, Madras in 1835 and Bombay in 1857, were later erected into bishoprics. The three dioceses thus formed have been repeatedly subdivided, until there were sixteen, the dates of their creation being as follows: Calcutta 1814; Madras 1835; Bombay 1837; Colombo 1845; Lahore 1877; Rangoon 1877; Travancore 1879; Chota Nagpur 1880; Lucknow 1893; Tinnevely 1896; Nagpur 1903; Dornakal 1912; Assam 1915; Naski 1923; Bhabhar 1915; Delhi 1917. There are assistant bishops in the dioceses of Lahore, Calcutta and Colombo. Since September 1917, and the inauguration of the Church of South India, the dioceses of Madras, Tinnevely, Travancore, and Dornakal have ceased to be part of the Church of India.

Rules for the government of the Church are contained in its "Constitution, Canons and Rules" adopted by its General Council in session at Calcutta in 1920. All clerics before receiving a license from their bishop make, in addition to an oath of canonical obedience to their bishop, a declaration accepting the Constitution, Canons and Rules, as well as a declaration concerning the faith and formularies of the Church. Lay members of the General and Diocesan Councils also make declarations of assent and acceptance. The government of the Church is through these councils, the General Council being for the whole ecclesiastical province of India, Burma, and Ceylon. Its membership consists of the bishops of the province, and houses of clergy and laity elected by the diocesan councils. The Diocesan Councils consist of the Bishop of the Diocese and all its clergy, together with lay representatives elected by the parishes. To exercise a vote in the election of lay representatives parishioners must be adult communicant members of the Church. It is open to a diocese to add to these qualifications that of having contributed some specified amount to the expenses of the Church. In addition to these councils every parish has a church committee or council with a recognized constitution and these are in many areas organised into district Church councils, particularly where Indian parishes are numerous. Again in addition to these councils the bishops of the province meet in Synod, with clerical and four lay assessors if a matter of faith or order is being dealt with, and the bishop of a diocese can at any time hold a Synod of his clergy. Determinations on matters of faith and order are made only by the House of Bishops of the General Council and cannot be made subjects of disciplinary action unless adopted in the form of a canon by the whole Council.

The additional title of Metropolitan was given to the Bishop of Calcutta when the Sees of Madras and Bombay were formed. It is an ancient title similar to archbishop and indicates that its holder has jurisdiction over the other bishops of the province. Before consecration a diocesan bishop takes an oath of canonical obedience to the Metropolitan. Under the Constitution of the Church bishops are elected by the diocese, subject to confirmation by the bishops of the province. In the Constitution, Canons and Rules, the Constitution consists of Declarations laying down the position of the Church of India as a part of the One, Holy, Catholic and Apostolic Church; the Canons lay down principles of government and organisation, the Rules arrange in detail for the carrying out of the Canons, and are more easily altered

or added to than the Canons. The salaries and allowances of the Bishops of Calcutta, Madras and Bombay were from the foundation of those Sees paid out of the Revenues of Government, as also in part those of the Bishops of Lahore, Rangoon, Lucknow and Nagpur. Down to 1930 these bishops were appointed by the British Crown. Since 1920 vacancies have been filled by election, and Bishops elected to the Sees of Calcutta, Madras and Bombay, instead of being paid wholly by Government were till 1947 so paid only in part. For the other seven bishoprics, and for any others, set up, Government was in no way responsible.

The Ecclesiastical establishment of the Government of India was an inheritance from the East India Company. That Company from the first provided chaplains for its servants. The chaplains of the establishment were till 1947 maintained for ministration to the Government's British born servants, civil and military. They were chosen by the Indian Chaplains Board sitting in London, were appointed by the Secretary of State, were posted to Dioceses by the Governor-General in consultation with the Metropolitan, and within their Dioceses were posted to stations by the Provincial Governor on the recommendation of the diocesan bishop. Their pay and allowances were wholly met by Government. In spiritual matters they were subject to the supervision and jurisdiction of their bishop, and while Government servants, civil & military were their primary charge, they were the parish priests of the chaplaincies to which they were appointed and were responsible for the care of all members of the church in their parish except in so far as Indian Members of the Church were cared for by missionaries of Indian clergy. Besides providing chaplains the Government of India, again following the practice of the East India Company, provided or assisted in the provision of churches and their maintenance, and also of cemeteries. Where numbers did not warrant the provision of an establishment or chaplain Government assisted in the provision of clergy by grants-in-aid, and when from time to time the number of establishment chaplains was reduced special grants-in-aid were granted. The establishment ended in 1917, and the block grant for aided chaplaincies ended on March 31st, 1949. A lump sum grant was paid for the financial year 1918-1919. Then all grants from Government ceased.

The great influx of British troops caused by the war had necessitated the provision of additional religious ministrations. This need was met by the organisation in 1942 of an Indian Army Chaplains Service. It provided ministrations for Indian Christian as well as British Christian troops.

[Note: The Ecclesiastical establishment included besides Anglican chaplains, Church of Scotland, Free Church, and Roman Catholic chaplains, for ministrations to members of those communities; and churches and grants-in-aid were provided or given on the same principles as for Anglicans.]

Members of the Church of England or any of the branches of the Anglican Communion are, while resident in India, full members of the Church of India. There are no racial distinctions whatever in the Church. Indian clergy frequently preach or celebrate for European congregations, and in a few instances are in permanent charge of European parishes. The Indian laity though usually preferring services in their own languages are everywhere free to attend English churches, and to be enrolled, if they wish, as parishioners.

The education of European children, and more particularly the children of the British and Anglo-Indian community, has from early days been a concern of the Church. In addition to day-schools it has established over 70 boarding schools for boys and girls, many of them in hill stations. The provincial Governments assist these schools with grants-in-aid both for building and current expenditure, just as they do to all other schools, according to the rules of the education codes. The schools are inspected by

Government Inspectors. Indian boys and girls are admitted to these schools, but the number that may be taken is limited to a percentage fixed by the local Government. An appeal issued by the Archbishop of Canterbury in 1938 for the endowment of these schools had produced by June, 1939, just under £30,700. The fund is known as The Anglo-Indian Schools Fund and is still open for the receipt of donations. Indianisation of Government services, especially of the railways, customs and post and telegraph departments has severely hit the British and Anglo-Indian community, and the ability of parents to pay fees is steadily decreasing. Hence the urgent need for increased endowments. The existing endowments of all the schools yield an income of less than £1 per child per annum.

[Note: The Church of India is not the only community responsible for European education in India. The Roman Catholics, the Church of Scotland and the various free churches provide schools for their children, and receive similar assistance from Government.]

CHURCH OF NORTHERN INDIA

In north India there has been in existence for some years the Church of Northern India, consisting of Presbyterian, and Congregationalists. Since 1929 a further movement for a wider union in north India has been considered at a series of Round Table Conferences to which the Church of India has sent representatives. There is also a scheme of Union for Ceylon.

THE CHURCH OF SCOTLAND

The Chaplaincy work of the Church of Scotland dates from 1811, when the Rev. Dr. Bryce landed in Calcutta and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated: Calcutta 1914, Bombay 1919, Madras 1921. Up until August 15, 1917, the Indian Ecclesiastical Establishment (Church of Scotland) had from 12 to 15 Chaplains on its staff. Some of these were attached to the Scottish Regiments in India, while others administered to the civil population of the towns where they were stationed and to those living in the smaller outstations in their respective areas. In addition to the regular establishment, there were a number of ministers throughout India who were maintained by the various communities to whom they ministered and by the additional Clergy Societies in India. Missionaries of the Church also maintained, and still do, regular services in English at a number of centres. In consequence of Constitutional and other changes in India, the Ecclesiastical Establishment was abolished after Aug. 15, 1917, and the churches which had ministers of their own became entirely responsible themselves for the maintenance of religious ordinances. The whole of the work of the Church of Scotland amongst Scots and other Europeans in India is now under The Colonial Continental Committee of the Church, and is maintained entirely from Church funds.

The main centres are now Calcutta, Bombay, Madras and Karachi, where there are strong and flourishing congregations.

The Mission Work of the Church of Scotland officially dates from 1829, but Scottish Church Missionaries were in India before then. John Wilson, who left Scotland in 1828 for Western India and was the founder of Wilson College in Bombay, was with other Scots working under the auspices of the Scottish Missionary Society, until in 1835 the General Assembly took the missionaries under its charge. Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta in 1829, and was the first to open schools where English was made the medium of instruction. Mrs. Wilson was the first in Bombay to open a Boarding School for girls a revolutionary step in 1831. Also in Calcutta, Bombay, and in Madras from 1837, the early Scottish Missionaries made a deep mark in the educational life of the time.

This educational contribution has been maintained up to the present (1949) and shows no signs of diminishing. The Church today has many schools in all parts of its field, and it has five well-known Christian Colleges at work: The Scottish Church College, Calcutta; The Madras Christian College; Wilson College, Bombay; Hiskop College, Nampur; and Murray College, Sialkot. The Madras Christian College has been rebuilt on a magnificent site at Tambaram, and it became known to many all over the world when in 1925 it became the meeting place of the World Missionary Conference. In a number of these educational institutions, the work is now shared with other societies and missions. On the women's side, the Women's Foreign Mission does invaluable service in school, medical and Zenana work, having in India 41 European Missionaries, 163 teachers, over 50 schools, 4 hospitals and 6 dispensaries. On the men's side there are 15 Mission Hospitals at different centres.

As a result of the Evangelistic work carried on for over 100 years, an Indian Church has been established. In the Punjab, Evangelistic work is carried on from 8 centres, and the Baptist Christian Community now numbers over 30,000. Work commenced in Darjeeling in 1870, is now carried on throughout the whole eastern Himalayan District, and there is a Christian Community there of over 15,000. In the 8 mission districts of Calcutta, the Eastern Himalayas, Malabar, Santalia, Rajputana, Nampur, Western India and the Punjab there were at the end of 1928 over 70,000 Baptised Indian Christians.

The Church has also played a large part in educational work for the Anglo-Indian Community. In Bombay, the Scottish Congregation there has 6 statutory representatives on the Governing Body of the Anglo-Scottish Education Society, while the Scottish Community in Bombay is responsible for the Bombay Scottish Orphanage Society's School at Malim, over which the Scots Kirk, Bombay, exercises pastoral supervision. The well-known St. Andrew's Colonial homes at Kalimpong, in Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are hence locally managed by Missionaries of that Church. The homes exist for the benefit of the orphaned European and Anglo-Indian Community and are doing magnificent work. There are now over 20 cottages and about 700 children in residence.

MISSIONS

In Malabar, on the south-west coast of India, there have been Christians certainly from the 6th century, probably from the 4th century and possibly from the 1st century A.D. They are called "Syrian" Christians owing to their connection with the Church in Syria. They do not appear to have attempted to spread the Christian faith in India. The Portuguese may therefore be regarded as the first missionaries in India, and from their arrival at Goa the Franciscans and Dominicans who accompanied their fleets in large numbers threw themselves with great activity into the work of evangelism. The formation of the Society of Jesus led to one of its first members, the famous St. Francis Xavier, being sent to Goa, where he arrived in 1541. Under his leadership the preaching of Christianity was carried on with great earnestness. The missionary work of the Roman Catholic Church thus began has been continued, and at the present day the number of Indian members of that Church is given as 2,113,659 (Census 1931), to which may be added 654,939 Syrian Christians attached to the Roman Church. The number of independent Syrian Christians (Census 1931) is given as 525,607.

Protestant missions did not begin till the 18th century, and as missionaries were not allowed to establish themselves in the Company's territories, they worked from Danish territory, and in Indian States. These missionaries were Lutherans, but as stated above, were in the latter part of the 18th century assisted with funds from England. Famous men among them were Ziegenbalg, Kiernander, Schultze and

Christian Friedrick Schwarz. By the end of the 18th Century it is believed that there were in South India about 30,000 Lutheran converts. In 1800 the famous Baptist trio, Carey, Marshman and Ward established themselves at Serampore in Bengal (Carey had come to India in 1793). Men of humble origin and education, one was a cobbler, one a ragged-school teacher, and one a printer, they displayed great ability and enterprise, and threw themselves not only into evangelism but into the scientific study of India, its languages and culture, and its flora and fauna. Books and translations poured from their printing press. Carey was made professor of Sanskrit in Lord Wellesley's College for the training of civil and military officers.

The 19th Century saw a great increase in missionary effort of every sort. This was due to the opening of the Company's territories to missionaries by the Government of India Act of 1813, and it was only after that date that Anglican (Church of England) missionary Societies took up work in India, namely the Church Missionary Society and the Society for the Propagation of the Gospel, by sending as missionaries ordained clergy of the Church of England, those hitherto subsidised or sent by the S.P.C.K. being Lutherans. The first missionaries to arrive after the passing of the Act were American Congregationalists. The London Missionary Society were also early in the field and Presbyterians from America and Scotland soon followed. In the course of the century India became covered by a network of missions, engaged not only in evangelism, but in educational work in schools and colleges, in medical work and in industries. Among famous names of missionary educationalists are those of Dr. Duff of Calcutta, Dr. Wilson in Bombay, and Dr. Miller of Madras. In the education of women missions may fairly claim to have taken the lead. The total number of missionary societies from Europe and America working in India is now over 150. For consultation and common action there is a National Christian Council with headquarters at Nampur, first organised in 1914, and in connection with this there are 10 Provincial Christian Councils. Membership of these councils is by election or appointment by local churches and mission councils.

ANGLICAN MISSIONS

In addition to the two principal missionary societies of the Church of England, the S.P.G. Society for the Propagation of the Gospel in Foreign Parts and the C.M.S. (Church Missionary Society) already mentioned, there are also certain smaller, but important missions, namely the Oxford Mission to Calcutta working in Calcutta among students and also at Barisal; the Cowley-Wantage-All Saints Mission, working in Poona and Bombay; the Dublin Mission at Hazaribagh, the Cambridge Mission at Delhi, the Cawnpore Brotherhood; the Scottish Episcopal Church Mission at Chanda, C.P.; the Bible Churchmen's Missionary Society (12 ordained missionaries in the Lucknow and Nampur and Raigond dioceses); the Christa Seva Sangha, Poona, 1927, which divided in 1934 into the Christa Seva Sangha, and the Christa Prema Seva Sangha; the Canadian Church Mission (4 ordained missionaries in the Lahore Diocese); the Church of England Zenana Missionary Society, in several dioceses; the Sisters of St. Margaret (East Grinstead) in the Colombo diocese; Sisters of St. Denys (Warminster) in the Chota Nagpur Diocese; Sisters of the Holy Family, Naini Tal; the Winchester Brotherhood, Mandalay, and the Sisters of the Church, Maymyo. The first two of these, and several of the others in the list, consist of communities of priests or sisters under religious vows. Members of the brotherhoods mentioned are in most cases not under life vows. The work and influence of these communities is a most important element in the life of the Church of India.

The Church of India has taken its full share in educational, medical and industrial work in India. Among colleges founded and managed by its missionaries St. Stephen's, Delhi, St.

John's, Agra, St. Columba's, Hazaribagh, Christ Church, Cawnpore, and Trinity College, Cawnpore, are well-known. A college at Trichinopoly has been amalgamated with the inter-denominational Madras Christian College. For the training of Indian and Anglo-Indian ordination candidates Bishops' College, Calcutta, serves the whole of India. In the various language areas are other colleges for the training of ordinands and lay church-workers through the medium of the local language. Among hospitals made famous by the work of the doctors in charge are those at Quetta (Sir Henry Holland), Bannu (the late Dr. Pennell) and St. Stephen's, Delhi (for women). The C.M.S. High School at Srinagar is distinguished among the many High Schools of the Church for the methods adopted to develop manliness and *esprit de corps* in the boys. Cawnpore in the north and Nazareth in the extreme south are well-known centres of industrial work and training. The Diocesan Press at Madras was built up into a very large and efficient institution by a retired C. M. S. Missionary. At Itanili, in the Bombay Diocese, S. P. G. Missionaries have, since 1919, done extremely good work in charge of an Industrial Settlement (for the reformation and training of members of criminal tribes) committed to their care by Government.

BAPTIST SOCIETIES

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN.—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar, Orissa, the United Provinces, the Punjab and Ceylon. The Baptist Zenana Mission and the Bible Translation Society have been united with this Society. The staff of the united Mission in India, Pakistan and Ceylon numbers 190 Missionaries and 1,086 Indian and Sinhalese workers. Connected with the Society are 572 Indian and Sinhalese Churches, 321 Primary Day Schools, 35 Middle and High Schools, and 3 Theological Training Colleges. The Church membership at the close of 1947 stood at 32,843 and the Christian community at 2,967. Amongst the non-Christians great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Daroca, Cuttack, Patna and Delhi where there are hostels for the prosecution of this form of work.

Educational Work ranges from Primary School to Colleges. Serampore College with its Royal Charter granted by His Danish Majesty in 1827, and confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, was placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary educational operations, in Arts and Theology. It was affiliated in 1857 to the newly formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an inter-denominational basis for the granting of Theological Degrees to qualified students of all Churches.

In Arts and Science the College prepares for the Calcutta Examinations.

There is a vernacular Institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 7 Hospitals. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretary of the Mission is the Rev. D. Scott Wells, 44, Lower Circular Road, Calcutta, 10.

The Headquarters of the Mission are at 93-95 Gloucester Place, London, W. 1. The total expenditure of the Society for 1947 amounted to £37,185 of which £27,298 was expended in India, Pakistan and Ceylon.

THE CANADIAN BAPTIST MISSION.—Was commenced in 1873, and is located in the Telugu and Oriya Country to the north of Madras, in the Kistna, Godavari, Vizagapatnam and Ganjam Districts. There are 20 stations and 535 out-stations with a staff of 85 missionaries including 6 qualified physicians, and 1,250 Indian workers, with Gospel preaching in 1,659 villages. Organised Churches number 138, communicants 34,000 and adherents 40,000 for the past year. 32 Churches are entirely self-supporting. In the Educational department are 415 village day schools, with 19,000 children, 12 boarding schools, 2 High schools, 2 Normal Training schools, a Bible Training School for Women, a Theological Seminary providing in all for 5,850 pupils. There are 6 Hospitals, two leper-asylums and an Orphanage. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. Indian Secretary: The Rev. R. M. Bennett, B.A., B.L., Vayyuru, Krishna District.

THE AMERICAN BAPTIST ASSAM MISSION.—Was opened in 1836, and has 11 main stations staffed by about 48 missionaries. There are about 850 native workers, 1,600 organized churches, about 95,000 baptized members, 400 schools of all grades including 2 High, 1 Normal Training, 2 Bible and 9 station schools. There are 3 hospitals and 4 dispensaries which treated about 4,200 in patients and about 28,860 out-patients during the year. Mission work is carried in 16 languages.

Treasurer and Cor. Sec. Miss Marion Burnham, Gauhati.

AMERICAN BAPTIST, BENGAL-ORISSA MISSION AND INDUSTRIAL MISSION. Commenced in 1836. Area of occupation: Midnapore district of Bengal, Balasore district of Orissa and Jamshedpur Town of Bihar. Work chiefly for Oriya and Santal peoples. Address: Jamshedpur.

Secretary: Rev. C. C. Roadarmel, Beldih Triangle, Jamshedpur, Bihar.

THE AUSTRALIAN BAPTIST FOREIGN MISSION.—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal and Assam. The staff numbers 20 Australian workers. There are 5,980 communicants and a Christian community of 10,790.

Secretary, Field Council: The Rev. N. P. Andersen, Mission House, Birisiri, P. O. Hatshilganj, Dist. Mymensingh, E. Bengal, Pakistan.

THE STRICT BAPTIST MISSION.—Has 19 European Missionaries, and 210 Indian workers in Madras, Chingleput, Salem, Ramnad and Tinnevely Districts. Communicants number 1,802; organised churches 65, Day and Sunday schools 76 with 3,009 pupils.

Secretary: Rev. D. A. Thrower, Kilpauk, Madras. *Treasurer:* Rev. G. F. Champion, Kovilpatti, S.I. Ry.

PRESBYTERIAN SOCIETIES

THE IRISH PRESBYTERIAN CHURCH MISSION.—Operates in Gujarat and Kathiawar with a staff of 45 Missionaries, of whom 19 are clerical, 13 Educationalists, 6 are Doctors and 3 Nurses. The Indian staff numbers 500, of whom 19 are Pastors, 108 Evangelists, 2 Colporteurs, 40 Bible-women, and 331 are Teachers. There are 23 Organised Churches, a communicant roll of 8,666, and a Christian Community of 9,967. In Medical work there are 5 Hospitals including one at Dohad and several Dispensaries, with 4,199 in-patients, 25,353 new cases, and a total attendance of 198,541. The Mission conducts 3 High Schools, 1 Anglo-Vernacular School, 1 Preparatory School at Parantij and 100 Vernacular schools affording tuition for 8,000

pupils; also 1 creche, 4 Orphanages, an Industrial School at Borsad, a Teachers' Training College for Women at Borsad co-operates in a United Divinity College at Baroda, and has a Mission Press at Surat. The Mission has made a speciality of Farm Colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 4 Missionaries is a part of the activities of the above, working in the Panch Mahals and Rewa Kantha districts, with Farm Colonies attached.

Secretary: J. C. Watson, B. Ag., Mission House, Borsad, Kaira Dist.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—The Sialkot Mission of the Church was established at Sialkot in the Punjab in 1855. It is now carrying on work in three civil districts in India and ten in Pakistan. Its missionaries number 98. Its educational work comprises one Theological Seminary, one Bible Women's Training School, one College, four High Schools, one Industrial school, 7 Middle schools and 70 Primary schools. The enrolment in all schools in 1948 was 10,775. Medical work is carried on through five Hospitals and 7 Dispensaries. The communicant membership of the Church established is 30,359 and the total Christian community 117,690.

General Secretary: Rev. Paul A. Miller, American Mission, Gujarawanala.

THE AMERICAN PRESBYTERIAN MISSION operates in three main sections, known as the Punjab (1834), North India (1836) and Western India (1876) Missions. According to statistics for the year ending March 31, 1948, the American staff, including women and special term Missionaries numbers 108, and the Indian staff about 1,000. There are 32 main stations and 192 out-stations. Organised churches number 125 of which 38 are entirely self-supporting. There are 23,797 communicants and a total baptized community of about 75,000.

In regard to educational work two men's colleges and an interest in Baring College, Batala and in the Isabella Thoburn and Kingdard Colleges for Women, students about 2,700, one Theological College, students 21 and an interest in Poona Theological College; Bareilly Theological Seminary and one Theological College at Jubulpore; two Training Schools for Village Workers; thirteen High Schools; one Industrial School; three Agricultural Demonstration Farms; four Teachers' Training Departments; the Miraj Medical School and an interest in the Ludhiana Medical College for Women; 107 Elementary Schools; 139 Schools of all grades;—pupils about 12,000.

Medical Work:—Nine Hospitals; twenty-one Dispensaries and four Specialty Hospitals.

Evangelistic Work:—258 Sunday Schools, with an average attendance of 6,414 pupils. Contributions for church and evangelistic work on the part of the Indian church, have decreased slightly, and amount to about Rs. 45,000.

The Hospital at Miraj, founded by the late Sir William J. Wauless and under the care of Dr. H. Evans, is well-known throughout the whole of South-West India, and the Forman Christian College of Lahore, under the principalship of the Rev. C. H. Rice, Ph.D., D.D., is equally well-known and valued in the Punjab. The Ewing Christian College, B.B. Malva, Ph.D. (Principal) and Allahabad Agricultural Institute (Dr. A. T. Mosher, Principal) have grown rapidly in strength and influence.

Secretary of Council of A. P. Missions in India and Pakistan:—The Rev. H. J. Strickler, M.A., D.D., "Lowiston," Dehra Dun, U.P.

Secretary, North India Mission.—The Rev. C. H. Hazlett, D.D., A. P. Mission, Mainpuri, U.P.

Secretary, W. Punjab: The Rev. W. A. Zoenver, 3, Empress Road, Lahore.

Secretary, E. Punjab:—The Rev. H. E. Shaw, A. P. Mission, Ludhiana.

Secretary, Western India Mission.—Mr. J. C. Kneale, A. P. Mission, Nipani, Belgam Dist., Bombay Province.

THE NEW ZEALAND PRESBYTERIAN MISSION.—Commenced as recently as 1910 at Jazuchri, Ambala Dist., Punjab. It also works in Kharar. *Secretary:* Miss V. Sutherland, Kharar, Dist. Ambala.

THE UNITED CHURCH OF CANADA MISSION.—Commenced in 1877, has 13 main stations in Madhya Bharat and Southern Rajasthan in what were formerly the States of Gwalior, Ratlam, Bhar, Stefanum and Bainswara. The Mission staff numbers 60; 18 Canadians and 42 Indians, and there are in addition about 200 Indian workers. The Evangelistic work of the Mission has been handed over to the Malwa Church Council of the United Church of Northern India, which administers the work through an Executive Board composed of both Indian and missionary members. There were formerly two church Councils Malwa and Ratlam. These have now been amalgamated in an enlarged Malwa Church Council. There are 50 organised churches, and 4 unorganised ones, Communicants 4,011; Baptised non-communicants 20,073; Unbaptised adherents 13,075; Total Christian Community 27,159.

Educational work comprises Elementary and Middle Schools for boys and girls; a High School for girls, an Arts College for students of both sexes (the Indore Christian College) and a Vocational High School for boys where training is provided in printing, tailoring, carpentry and welding.

The medical work is extensive. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals, and also a number of dispensaries in central and out-stations.

General Secretary of the Mission: The Rev. A. A. Scott, M.A., D.D., Indore, C.I. *Academic Secretary:* Miss C. V. Baxter, Kharar, C.I. (Via Mohipour Road Station).

Secretary of Malwa Church Council.—Rev. K. B. V. Yohan Masih, B.A., Indore.

THE CANADIAN PRESBYTERIAN MISSION.—Operates in two sections, the Northern Section with headquarters at Jhansi in the U.P., and the Central India Section, known as the Bill Field.

In Central India the Mission comprises within its area the States of Alirajpur, Barwani, Jabot and Kathiawar also parts of the States of Jabalpur, Chhota Udaipur (in the Bombay Presidency) and Dhar, Indore and Gwalior bordering on the Jabot-Barwani Road. The five central stations are Amkhat, Mendha and Alirajpur located in Alirajpur State, Jabot in the State of Jabot and Barwani in Barwani State. The staff consists of 16 missionaries and 50 Indian workers. There are several elementary schools in the area and a central Anglo-Vernacular School at Amkhat. In which upwards of 300 children are being educated. At Amkhat also there is a Children's Nursery Home. At Jabot there is a General 60 bed Hospital with a Canadian Medical man, Dr. W. R. Quinn in charge.

There are in the district 7 organized and 2 unorganized congregations with a Communicant membership of 430 and a baptized community of slightly over 1,500.

Secretary:—Miss Ellen Douglas, Amkhat, Via Dohad, C.I.

The Jhansi Section formerly known as the Gwalior Mission was founded by the late Dr. J. Wilkie in 1905. There is now a staff of 9 missionaries and Indian workers who are engaged in Jhansi city, Eswarah, Baragan, Babina and the surrounding villages.

Activities include one Anglo-vernacular middle school for girls and hostels for Christian pupils. The Mission conducts a Bible School and a small dispensary. There is an agricultural settlement at Esarwah.

There are two organized churches having a communicant membership of 150.

Secretary: Mrs. C. P. Young, C. P. Mission, Jhansi, U.P.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1810 occupies stations in Assam in the Khasi and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khasi language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Total in the Church 162,124. Well equipped Hospitals at Shillong (Khasi Hills), Jowai (Jaintia Hills) and Durlang (Lushai Hills) provide Medical, Surgical and Nursing aid to large numbers annually.

Primary, Middle and High School education is carried on widely in Assam. A Theological College and a Department for Teachers' training are maintained at Cherrapunji, Khasi Hills.

Secretary: Rev. G. Angell Jones, P.O. Jowai Shillong, Assam.

CONGREGATIONAL SOCIETIES

THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS: In 1948 it included 25 missionaries and 227 Indian workers operating in 9 stations and 116 outstations. There were 51 churches with 6,453 communicants. Besides conducting a college with 106 students and 5 secondary and training school with 1,005 pupils the Mission has a large share in various union educational enterprises. There are 29 primary schools and 4 kindergartens with a total of 2,755 pupils. Its 2 hospitals and dispensaries treated a total of 52,253 patients. The Mission has a total of 6 major social service centres with 11 full time and 14 part time workers. During 1948 these centres had a total active attendance of 422,815. **Secretary:** Rev. Miss E. L. Wood, I.A. Staveley Road, Poona I.

AMERICAN METHODIST MISSION, CHURCH OF SOUTH INDIA, Madras, Rannal Diocese. Bishop Rt. Rev. J. L. L. Newb, Madras. **Mission Representative:** Rev. L. L. White, Aruppukottai, Rannal Di. **Manager, High and Training Schools:** D. P. Michael, Pasmalai. **Manager, Trade School:** Rev. E. G. Nichols, Pasmalai. **Principal, Theological Seminary:** Rev. A. Samuel, Pasmalai. **Medical Officer, Pierce Hospital, Hospital for Women and Children:** Dr. E. S. Chelappan, Madras. **Manager, Pierce High School:** Miss D. Abraham, Tallakulam. **Manager, Capron Hall Training School:** Miss K. Paragottai, Madras. **Manager, Rachanyapuram:** Miss M. D. Brown, Tallakulam. **Principal, American College:** S. J. Savirioyan, Tallakulam. **Secretary, Mission:** Rev. E. G. Nichols, Pasmalai.

THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA. The mission staff in Khandesh and Nasik is represented by 63 missionaries and 90 Indian workers. There are 1,162 Church members and 2,010 pupils in Sunday Schools, 41 elementary schools provide for 1,516 pupils. There is one mission hospital located at Chinchpada, West Khandesh. This hospital and several dispensaries have treated and cared for over 90,000 yearly.

Western India Headquarters: Amalner, East Khandesh.

Chancery: Rev. O. E. Meberg, Amalner, East Khandesh.

Secretary: Miss O. E. Norren, Parola, East Khandesh.

THE LONDON MISSIONARY SOCIETY.—Commenced work in India in 1788 and occupies 3 centres in S. India, 12 in S. India and 7 in Travancore State. The Mission engages in every form of Missionary activity.

UNION INSTITUTIONS.—With which the London Missionary Society is connected, and is a contributing body. Number of Institutions, 13; Schools, 6; Scholars, 2,681; Colleges, 8; Students, 1,284.

The main centres of the Mission in S. India are: Calcutta and Murshidabad District, 1. Bengal. The S. India District and Travancore are divided into Kanarese, Telugu, Tamil and Malayalam fields with 22 stations and 1,035 out-stations.

At Nagercoil (Travancore) is the Scott Christian College and High School with 974 students, a Church and congregation said to be the largest in India and a Printing Press, the centre of the S. Travancore Tract Society.

India—Field Representative: L. M. S.; Rev. H. C. Leffer, B.D., Ph.D., 18, Lavell Road, Bangalore.

Church, 218,793; Congregations, 2,115; Indian ordained pastors, 107; 754 Evangelical Workers; 2,341 School Teachers. Total expenditures on all phases of work for 1946, Rs. 25,85,634.

President of the C. L. C. Mission: Rev. R. M. Dunkelberger, D.D., Tenali, Guntur Dist.

President of the A. E. L. Church: Rev. E. Prakasam, I.A., D.D., Guntur.

Financial and Legal Agent: Rev. E. G. Wood, D.D., Guntur.

THE EVANGELICAL NATIONAL MISSIONARY SOCIETY OF STOCKHOLM, SWEDEN.—A Church of Sweden Society, founded in 1856, occupies the Districts of Sauror, Betul and Chhindwara in the Central Provinces.

There are about 2,133 Church members constituted into an indigenous Church called the Evangelical Lutheran Church of the Central Provinces. The European and Indian staff numbers 29 and 150 respectively. There is a Training school for Indian workers and 25 Primary Hindi Middle and Indian English Middle schools with 2,207 children in attendance; one High School; 25 Sunday schools with 631 Christian and 954 non-Christian attending; 2 Hospitals, with 47 beds and 2,000 patients and 426 operations during 1948; 10 Dispensaries with 78,209 patients during 1948; 4 Workshops; one Women's Industrial School; one Widows' Home with 112 women; 2 orphanages, 2 Boys' Boarding School and 1 Girls' Boarding School with 190 boys and 23 girls and 3 farms where modern village uplift is attempted.

Secretary:—Rev. J. Olsson, Chhindwara, C.P.

THE BASEL EVANGELICAL MISSION—(Incorporated in Switzerland), with its headquarters in Mangalore, South Kanara, was founded in 1834 and is at present carrying on the work in South Kanara, South Chattratti, Malabar and Coorg. It has at the beginning of 1949, 28 chief stations and 84 out-stations with a total missionary staff of 22 European and about 800 Indian workers. The membership of the churches is 30,000. Educational work embraces 100 schools, among which are a Theological Seminary, a second grade college and 3 high schools. The total number of scholars is 25,000. Medical work is done at Bettenc-Gadag, Southern Malabar District, where a hospital for men and women and at Chittur, South Kanara, where a hospital for women and children is maintained.

The Mission maintains a Home Industrial Department for women's work. There is also connected with the Mission a large Publishing Department with a Book Shop and a Printing Press, with about 100 workers, at Mangalore, S. Kanara, which is doing work in English and in a number of Indian languages.

President and Secretary:—Rev. P. E. Burkhardt, Ph.D., Mangalore, South Kanara.

THE FEDERATION OF EVANGELICAL LUTHERAN CHURCHES IN INDIA was established in 1926 as an outward expression of the spiritual unity of the Lutheran Churches in India. It consists of 10 constituent churches and 3 co-operating Missions in India with a total membership of over 550,000. The work of the Federation is carried on by the Triennial Conference of the Federation, by its Executive Council, by a number of standing and special Committees and by its office-bearers. It was registered under the Societies Registration Act of Act XXI of 1860 in Oct. 1912. Including the members of one Lutheran Mission in South India, considering affiliation. The Lutheran baptised membership in India is 5,09,000.

The names of Officers for 1949-50 are as follows:

President:—Rev. E. Prakasam, B.D., D.D., Guntur, Bangalore, Guntur.

Vice-President:—Dr. J. Roy Strock, G.E.L.C. Compound, Ranchi, Bihar.

Treasurer:—Dr. G. Joseph Gnanaditam, Eye Hospital, Trichinopoly.

Secretary:—Rev. H. W. Mayer, Renikunta, Chittoor Dist., M.S.M. Rly.

The Federation has set up a Committee on Subsidized Churches, and from contributions received chiefly from the American Committee of the Lutheran World Federation are supported in part or in whole, three Churches connected with the Federation in India. The American Subsidy for 1949 is Rs. 250,121. The income from Indian sources for 1949 is estimated at Rs. 2,458.

At the Triennial Conference held at Ranchi, Bihar, in December, 1947, it was decided to take immediate steps to form an Evangelical Lutheran Church in India. The draft constitution for such a Church has been prepared and revised. Some of the Churches have acted favourably on the proposed constitution. In others, action is still pending.

THE CHURCH OF SWEDEN MISSION was founded in 1874, but already earlier, Swedish missionaries were working in the Leipzig Evangelical Lutheran Mission (L.E.L.M.). From 1915, the C.S.M. was responsible for the whole L.E.L.M. field, to which German missionaries were allowed to return only in 1927. From 1940, the German field is again managed by the C.S.M. through a special committee. The C.S.M. itself operates in the Trichinopoly, Coimbatore, Madras and Rannal Districts. It maintains a general and eye hospital at Tirupattur, an eye hospital at Coimbatore, High Schools for boys at Madras and Pudukkottai, High Schools for girls at Tanjore and Usilampatti, High Elementary and Secondary Training Schools at Tanjore, the Theological College "Gurukul" at Madras, and various Primary Schools. Together with the L.E.L.M. it works for the Tamil Evangelical Lutheran Church. European staff: 59; School Teaching staff, 191; Schools 26; Pupils: boys 3,741 and girls 1,256.

President:—Rev. C. G. Diehl, M.A., B.D., Arasarlai, Madras, S. India.

LEIPZIG EVANGELICAL LUTHERAN MISSION.—The Lutheran Mission work in India was commenced in 1706 by German Missionaries under the Danish Tranquebar Mission. It was taken up by the L.E.L.M. (founded in 1836) in 1841. The L.E.L.M. re-entered into the work after the great war in 1927. It is located in the Madras, Chingleput, South Arcot and Tanjore Districts. The Mission co-operates with the Church of Sweden Mission and the Tamil Evangelical Lutheran Church. The L.E.L.M. maintains two High Schools for boys at Madras and

Shiyali (Tanjore Dt.), one High School for girls at Madras, a number of Elementary Schools for boys and girls in different places, and various other institutions.

Owing to the war, the whole Mission work has been temporarily placed under the Mission Council of the Church of Sweden Mission. The work is administered by a Special Committee, "The Northern Field Committee".

Chairman: Rev. S. Esthorn, B.A., D.D., Principal Gurukul, Kilpauk, Madras.

TAMIL EVANGELICAL LUTHERAN CHURCH.— Organised Churches (Pastorates) 46; Ordained Indian Ministers 46; other Indian workers 131; Baptised membership 45,431; Schools 203; Teaching staff 864; Pupils: Boys 15,392; Girls 7,927.

President:—Rev. J. Sandegren, M.A., D.D., C.N.O., Bishop of Tranquebar, "Tranquebar House", Trichinopoly.

MISSOURI EVANGELICAL LUTHERAN INDIA MISSION (M.E.L.I.M.). Located in Madras Presidency, Mysore, Travancore and Ceylon (1895).

There are 37 American Missionaries, of which 6 are on furlough; 2 (1 male and 1 female) are teachers in charge of school and home for children of missionaries (Kodaikanal), 1 Zenana worker, 1 nurse.

There are 3 High Schools, 2 Teachers' Training Institutions, 1 Catechist Training Institution, and 1 Hospital with 40 beds.

Statistics, Nov. 1, 1918: Christian 18,351; Indian Pastors 35; Evangelists 15; catechists 141; M.E.L.I.M. Teachers 232; Non-Catholic Teachers 51; Indian Doctors 2; Indian Nurses 12; Bible Women 19; Boarding Houses 10.

General Secretary: The Rev. R. M. Zorn, M.S.T., Nagercoil, Travancore.

THE DANISH MISSIONARY SOCIETY Established 1864 in South Arcot, working there and in North Arcot, on the Shervaroi Hills, in Madras has a total staff of 420 Indians and 39 European Workers, Communicants 5,070, Christian Community 9,580, one High School, one Secondary School, 3 Boarding Schools, one Hostel, 69 Elementary Schools, and 2 Hospitals; total scholars 8,242.

President:—The Rev. C. Bindley, Umduropet S. Arcot Dist.

Treasurer:—Miss S. Dalsgaard, 38, Broadway, G. T., Madras.

INTER-DENOMINATIONAL MISSIONS

THE CENTRAL ASIAN MISSION Founded 1902. Head Office 47, Victoria Street, London. S.W. 1; Field Secretary, Bandipur, Kashmir. Stations at Bandipur, Shigar, Khapalu, Kargil and Zangskar. Protestant, Evangelical, inter-denominational. 16 European workers.

THE FRIENDS' SERVICE COUNCIL.—The Friends' Service Council works in five stations of the Hoshangabad District besides two organized congregations in Central India.

The Church, which is composed of 5 Monthly Meetings united in the Mid-India Yearly Meeting, is largely organized on the lines of the Society of Friends in England. There are 275 full members and 1,640 adherents.

There are 6 missionaries.

The principal activities are a general hospital with dispensary and nurses' training department, a Primary School and a High School at Itarsi; a boarding school for girls

with Primary and Indian English Middle Departments at Sohazpur; a Home for older girls in Sohazpur where toys are made for sale; a Boys' Hostel at Itarsi for boys attending Middle school there. The Council's work also covers two villages in the Sonli Taluk of the Hoshangabad district in one of which, Makoriya, there is a Mission Farm stretching 200 acres for demonstration methods of intensive farming and anti-erosion work, and a Primary School.

A Settlement is maintained at Rasulia near Hoshangabad a Centre of a Rural Development Co-operative Society which is handling a large proportion of the goods sold in the Hoshangabad Taluk under the Govt. Rural Rationing Scheme; besides work of an educational and Social nature is carried on; Wardens, D. G. and E. M. Groom.

There is also a Weavers' Co-operative Society at Khara, Itarsi, where cloth is made on hand looms.

A "Quaker Centre" at 24, Rajpur Road, Delhi, acts as a Christian Cultural Centre for the promotion of adult education and Inter-Communal harmony and as a meeting place for people interested in the international service of the Society of Friends.

Wardens: Leslie and Kathleen Cross.

Mission Secretary: Heinz Tucher, Makoriya, near Itarsi, C.P.; **Church Secretary:** Harry Michael, Itarsi, C.P.

THE AMERICAN FRIENDS' MISSION.—With Missionaries working in Rundelkhand, Hospital for Women and Children at Chhatarpur, Orphanage, and school work at Nowpung, Churches and Evangelistic work throughout the district.

Superintendent: Rev. Everett L. Cattel, Chhatarpur, C.I.

THE OLD CHURCH HEBREW MISSION was established in 1858, in Calcutta, and is the only Anglican Hebrew Christian Agency in India. **Hon. Secretary:** The Rev. J. L. Ranson, 11, Mission Row, Calcutta 1.

LADIES' SOCIETIES

ZENANA BIBLE AND MEDICAL MISSION.—This is an interdenominational society, with headquarters, 33, Surrey Street, London, working among women and girls in 5 stations in the Bombay Presidency, 6 in United Provinces and 4 in the Punjab. There are about 45 European Missionary ladies on the staff with Assistant Missionaries, Indian teachers, nurses and Bible women. There are three hospitals supported by the Society.—Nasik, Lucknow and Patna. There are High Schools in Bombay, Lahore and Panchgani and a number of City schools of which those at Benares are the largest. At Lahore there is a University Department. The Evangelistic side of the work is largely done by house to house visiting.

Hon. Treasurer: Major Mainwaring Burton.

President:—The Lady Kinnaird.

Secretary: A. J. Dain.

Address:—C. M. S. Office, Girgaum, Bombay.

THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN was founded in Bombay in 1896. Its work is religious, social and educational. The Settlement supplies a hostel for University students of all nationalities. The Settlement takes part in many of the organized activities for women's work in the city.

Warden:—O. M. Kane, B.Sc. (London), University Settlement, Reynolds Road, Byculla, Bombay S.

Staff:—E. Watts, B.A. (Wales).

THE RAMABAI MUKTI MISSION (affiliated with the Christian and Missionary Alliance Mission in 1925), the well-known work of the late Pandita Ramabai shelters about 700 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic

work is carried on in the surrounding villages of Kedgaon, Poona District.

Secretary and Treasurer:—Miss J. I. Craddock.

MISCELLANEOUS

THE CHRISTIAN AND MISSIONARY ALLIANCE.—Date: from the year 1892 under the name of the International Missionary Alliance, but a number of its missionaries were at work in the province of Berar much earlier. Work is carried on in the provinces of Berar, Khandesh and Gujarat. There is a staff of 50 missionaries; of 125 Indian workers. The number of mission stations is 16, with additional out-stations. There is a Christian community of 6,000. There are 4 boarding schools, two for boys and two for girls, 3 training schools for Indian workers. There are 36 organized congregations, including one English at Bhushawal.

Tye, Satara District: Phaltan, Satara District: Pandharpur, Sholapur District: Akhuz, Sholapur District: Dapoli, Khed, Ranagiri District: Madha, Sialpali, Angangam, Yavale and Nandeshwar, Sholapur District.

The Staff consists of 35 Europeans and 70 Indian workers, including hospital staff, with a community of about 600 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education and a baby boy's orphanage and Boys' and Girls' Boarding Schools. Medical work is conducted at most stations with a hospital at Pandharpur. There is also a Bible School, Mission Headquarters, 12, Irwin Rd., Poona 2.

Chairman: Major R. P. D. Snow.

Secretary: Miss W. D. Howe.

THE AMERICAN CHURCHES OF GOD MISSION.—Has 4 missionaries at Kogeri live at Khanjampur, in Jaypurhat, Bogra District, East Bengal and at Ultharia, Howrah District, West Bengal.

President: Rev. W. J. Frederick, B.A., Chulharia, Howrah Dist., Bogra, West Bengal.

Secretary:—Miss Eunice Catlin, Mission House—Khanjampur, Jaypurhat, Bogra District, E. Bengal, Pakistan.

ANGLO-AN EVANGELICAL MISSIONARY SOCIETY.—Constituted and Established by the Government of India Act XXI of 1860. The Society works in the villages of India and amongst the Indian Labour employed on the British Estates in Ceylon and Malaya. Work commenced in Malaya in 1935 and that of Ceylon in 1928. **British Headquarters:** 41, Pargny Road, Acton, London, W. 3. **Headquarters for all the Americas:**

3, Hillsboro Avenue, Ontario, Canada. Registered Office: Archbishop of the Indies, Episcopal Residence, Andur, N. A., India.

THE CHURCH OF THE NAZARENE MISSION.—Has its headquarters for India at Buldana, Berar, where it has a junior Bible School. In Chikhli 14 miles from Buldana, there is Co-educational Boarding School with secondary Department and an enrollment of 325. At Basim, Berar 70 miles from Chikhli there is a Day School a Senior Bible School and the Reynolds Memorial Hospital a hospital for women and children. There are also other Day Schools in the District. At present there are 19 missionaries in India. There is an organized Indian District Assembly with about 32 churches. The Indian Staff of preachers and teachers number 75.

Mission Churches.—Rev. Leslie C. Fritzman, Buldana, Berar, C.P.

THE INDIAN MISSIONARY SOCIETY, TINSUKIA, (DOORAKAL AND THE HILL TRIBE MISSION).—Opened in 1903, operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travancore Hills. It is the missionary effort of the Christians living in India and overseas. There are now nearly 15,000 Telugu Christians in 180 villages and 250 Paliyar Christians in the hills. Annakkari in Travancore has become a well established colony of the hill tribes. The nomads have begun to do agricultural work. The Society publishes a monthly *Missionary Intelligence* containing information about the Society's work in both the field. Headquarters: Palamcottah.

Secretary.—Rev. Joseph Abraham Palamcottah.

THE MISSION TO LEPERS.—Founded in 1871. An interdenominational and international Society for the establishment and maintenance of Homes and Institutions for those suffering from leprosy and for their healthy children working in 20 countries but largely in India, Burma, China and countries in Africa. Its work in India is carried on through co-operation with about 30 Missionary Societies. In India and Burma alone the Mission now has 31 Homes of its own with upwards of 7,000 inmates and is aiding or has some connection with work for leprosy patients at 21 other places in India. Altogether in India and Burma over 10,000 cases of leprosy are being helped.

The Mission also provides for the segregation from their parents of the healthy children of those suffering from leprosy. More than 800 children are thus being saved from becoming infected.

Most of the Mission's income is derived from voluntary contributions. Some funds are raised in India and Burma but the bulk of the money expended by the Mission in India and Burma is received through Britain, although the provincial Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers of which the Hon. Treasurers are J. W. N. Babcock, c/o M/s. Macmillan & Co., 2, Finsbury Place, Calcutta and H. J. Miller, c/o M/s. Killick, Nixon & Co., Bombay.

The General Secretary of the Mission is A. Donald Miller, 7, Bloomsbury Square, London, W.C.1. The Secretary for India is William Bailey, M.A., Fyzabad, U.P.

THE REGIONS BEYOND MISSIONARY UNION.—An interdenominational Mission commenced at Motihari, Bihar, in 1900. Works in the Champaran, Satna and Darbhanga Districts. It has 26 European missionaries working in 6 stations and 2 outstations, and runs a hospital and a combined Girls' Orphanage and Women's Home.

Field Superintendent.—Mr. E. W. Oliver, Mission House, Motihari, Champaran Dist., Bihar.

Secretary.—Rev. S. W. Law, Motihari, Champaran District, Bihar.

THE NATIONAL MISSIONARY SOCIETY OF INDIA.—Established 1905, started, financed and managed by Indian Christians; has a staff of 36

missionaries and 166 helpers and voluntary workers; operates in Montgomery District (W. Punjab); Ferozabad (U.P.); Halaughat, Mymensingh (East Bengal); Murwah (C.P.); N. Kanara, Mirajgaon and Poona (W. India); Farak Taluk (Nizam's Domain); Tirunattur Taluk (N. Arcot) and Kottayam in Travancore and Cochin. Direct evangelistic work from 14 main Centres with about 300 workers including volunteers and missionaries in 10 language areas; interdenominational; 37 Higher Elementary, Primary Nursery and night schools, 1 High School, 1 Printing Press, 1 dispensary, 1 Hospital and 2 Child Welfare Centres. Annual expenditure Rs. 1,17,082 including self-supporting institutions. The *National Missionary Intelligence* a monthly Journal in English sold at Re. 1 per year, post free. *Deepika* (a monthly journal in Tamil at 8 annas per year. Post free).

Address.—N. M. S. House, Royapettah, Madras.

President.—The Rt. Rev. S. K. Mondol. *General Secretary.*—S. J. Duraisamy, Madras.

THE SEVENTH-DAY ADVENTIST MISSION.—The Seventh-day Adventist commenced mission work in India in 1893, and now employ a staff of 882 workers, European and National including 205 ordained and licensed ministers. Evangelistic and educational work is conducted in 39 vernaculars, beside work for English-speaking peoples in the larger cities. For administrative purposes, there are five branch organisations located as follows:—

Seventh-day Adventist Mission—Western India. (Pastor F. E. Spiess, Superintendent.) *Office Address:* 16, Club Road, Byculla, Bombay 8.

Seventh-day Adventist Mission—Burma. (Pastor M. O. Manley, Superintendent.) *Office Address:* 68, U Wisara Road, Rangoon, Burma.

Seventh-day Adventist Mission—North-east India. (Pastor O. A. Skau, Superintendent.) *Office Address:* 36, Park St., Calcutta.

Seventh-day Adventist Mission—North-west India. (Pastor R. L. Kimble, Superintendent.) *Office Address:* 76, Queensway, New Delhi, 1.

Seventh-day Adventist Mission—South India. (Pastor O. O. Mattison, Superintendent.) *Office Address:* 9, Cunningham Road, Bangalore.

Seventh-day Adventist Mission—West Pakistan. (Pastor D. S. Johnson, Superintendent.) *Office Address:* Chuharkana Mandi, Sheikhupura District, West Pakistan.

Seventh-day Adventist Mission—Ceylon. (Pastor E. A. Crane, Superintendent.) *Office Address:* 168, Dehiwala Road, Nugegoda, Ceylon.

The general headquarters for India, Burma and Ceylon is located at Salisbury Park, Poona. A. L. Ham, President; A. F. Tarr, Secretary and Treasurer. (*Office Address:* Post Box 15, Poona). On the same estate is an up-to-date publishing house devoted to the printing of health, temperance, evangelist and associated literature. (*Address:* Oriental Watchman Publishing House, Post Box 35, Poona).

A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in different parts of the country; and at Vincent Hill School, Mussoorie, European education is provided, a regular high school course, with more advanced work for commercial and other special students, being available. In all the denominational boarding schools increasing emphasis is being laid on vocational work, the students being required to share in the domestic work of the institution, and in many cases, to engage in some trade or other work.

11 physicians, and a number of qualified nurses are employed, regular medical work being conducted at 29 stations.

The baptized membership (adult) is 9,719 organized into 211 churches; and in addition a

substantial community of enquirers is receiving systematic instruction. 447 Sabbath Schools are conducted with an enrolled membership of about 18,671. Also over 50,000 are enrolled in the Bible correspondence schools.

The Bombay Address is No. 15, Club Road, Byculla.

THE AMERICAN MENNONITE MISSION.—Established 1899, works in C. Provinces. Mission staff numbers 27, Indian workers 93, Church members 1,415, children (unbaptized) 1,019. Training Institutions: Academy including High School; Anglo-Hindi Middle Schools 2; Elementary Schools 8; Hostels 6; Hospitals 2; Dispensaries 5; Lepor Home 1; Lepor clinics 4; Homes for untainted children 2; Widows' Home 1 and Farm Village project.

President of the Mission.—Rev. W. W. Hostetter.

Secretary.—Rev. G. H. Beare, Balodgahan, Via Dhamtari, C.P.

CENTRAL INDIA BAPTIST MISSION.—Taken over in 1944 by the Conservative Baptist Foreign Mission Society of the United States of America, from the Old Kurki Mission. Working in C.P. and Berar; has a mission staff of 26 workers, Indian workers 13; Churches 3; Christian Community 600.

Chairman.—Frederic G. Kurtz, Ellichpur, Berar, C.P.

THE CEYLON AND INDIA GENERAL MISSION.—Established 1892, occupies stations in Mysore State, in the Coimbatore and Anantapur Districts, also in the United Provinces. Mission staff 47; Indian workers 75; Churches 49; Communicants 1,654; Christian community 4,397; Orphanages 3; Schools 6; Pupils 591. *Headquarters.*—"Mizpah," Richards Town, Bangalore.

THE BOYS' CHRISTIAN HOME MISSION.—The Boys' Christian Home Mission, better known as the B. C. H. Mission, was founded by Albert Norton in 1899, when a severe famine swept the land. The Headquarters of the Mission is Dhond, Poona District.

The main function of the Mission is the care of orphans and at present it is looking after 190 orphans or needy children.

It also runs a day school which has an attendance of 318 children. A little agricultural work is also being carried on. The Mission has a work centre at Oral, U.P., where a school for girls is conducted, with an attendance of about 160.

There are 6 missionaries in the Mission at present and nearly 50 Indian workers. The Mission is evangelized and does evangelistic work in many villages around the main stations. Its object is to help the Indian people in any way it can, especially poor Indian Christians.

Director.—Rev. John E. Norton.

The Santal Mission of the Northern Churches (formerly known as the Indian Home Mission to the Santals).—Founded in 1867, works in the Santal Parganas, Birbhum, Murshidabad, Malda, Rajshahi, Durgapur and Goalpara. Work is principally among the Santals but also among Bengalis and the Mech people (Boro). Mission staff numbers 78 of whom 4 medical missionaries, Indian pastors 62, other Indian workers 580, Christian community in organised congregations 27,000, 6 boarding schools with 1,000 pupils, 150 elementary schools with 4,100 pupils, industrial school with 60 pupils, 1 printing press, 1 orphanage with 30 orphans, 3 hospitals, 4 dispensaries, 2 leper colonies with 510 lepers, and 1 ten garden. *Secretary.*—Rev. B. A. Holland, Dumka, Santal Parganas.

The Free Methodist Mission of North America.—Established at Yeotmal, 1892, operates in Yeotmal District in Berar with a staff of 11 Missionaries and 56 Indian workers. Organised churches 11, 1 Anglo-Vernacular Middle School, 1 Biblical Seminary, and 3 Primary Schools.

Secretary.—Mrs. Muriel A. Davis, Yeotmal, Berar.

THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command. The headquarters for Pakistan are at Lahore.

Northern Territory, with Headquarters at Delhi.

Western Territory, with Headquarters at Bombay.

Madras and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in Travancore State.

Ceylon Territory, with Headquarters at Colombo.

Eastern Territory, with Headquarters at Calcutta.

Burma Command, with Headquarters at Rangoon.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory.—The area in this Territory is the Salvation Army work in the East Punjab, Delhi and United Provinces. The Territory is controlled from Delhi.

Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the East Punjab and the U.P.

A number of Settlements for the reformation of "Criminal Tribes" are under the control of the Salvation Army in the United Provinces (where this important reformatory work was commenced).

Medical work is carried on in two Hospitals, one of which is in the East Punjab and the other in the United Provinces; and also in several dispensaries.

Other institutions include day and boarding schools.

| Officers and Employees | 497 |
| Social Institutions | 6 |

Territorial Headquarters:—83 St. Block 50, Rohbak Road, Karol Bagh, Delhi.

Territorial Commander: Lt.-Colonel Ivor Palmer.

Madras and Telugu Territory embraces Madras City, the Central and Northern districts of the Presidency, also Hyderabad and the Central Provinces. 430 fully commissioned officers and 105 workers are fully occupied in evangelical, educational and village uplift work carried on in just on 400 villages, two central boarding schools, a Training Institute for men and women selected for officership; a criminal tribes settlement of 2,500 men, women and children—many

work at Chirala, the others on the land. A Leper Colony, General Hospital for women and children, though men are also treated, a Social Services Department where waste-paper sorting, etc. is carried on, and a Women's Industrial Home in Madras complete the list of institutions where a selfless humanitarian work is going forward.

Territorial Headquarters.—The Salvation Army, 2 Ritherdon Road, P.O. Box 453, Vepery, Madras.

Territorial Commander:—Colonel S. Mammel.

Chief Secretary: Lt.-Colonel N. Zachariah.

Southern India Territory.—The Territorial Headquarters is Trivandrum, Travancore State.

The work of The Army had its beginning among the Tamil speaking people of the southern part of the State nearly fifty years ago. The work developed and extended northward through the whole State of Travancore into Cochin, and during the past twenty-five years eastward into the British administered districts of the southern part of the Madras Presidency.

More than 500 corps and over 1,233 officers labour amongst the village populations. The Army has a membership in South India of some 89,027. Hundreds of Salvation Army Halls have been erected in which gather Sunday after Sunday congregations of Christian men and women, converts from among those who have been the most depressed people in the country, now of the third, second and first generations.

This territory is divided for administrative purposes into 15 divisions and Districts 6 among the Tamil-speaking people and 9 amongst those who speak Malayalam.

Medical work, also the work of our Leper Hospitals take care of a vast amount of human suffering. The Catherine Booth Hospital at Nagercoil, which has grown out of a very small beginning, is now a fully equipped, modern institution of many departments, dealing with all manner of medical and surgical cases. The Hospital is equipped with X-Ray, radium, iron lung and splendid nursing facilities. Branches from this institution carry the service of the Hospital to some of the most remote regions.

157,831 patients were treated during the past year in the Catherine Booth Hospital and its several Branches and 1,919 major operations and 3,524 minor operations were performed. Two Leper colonies are run one on behalf of the Cochin Government and the other the Evangelical Booth Leper Hospital in North Travancore, have combined 553 patients. These two institutions carry on the work ranking with the highest traditions of Christian service.

Workers in the Territory consist of 1,233 Officers, 391 employees. There are 500 Officers, Corps and 131 Societies, 55 primary day schools, 5 Boarding Schools, 1 Middle School, 1 High School, 1 Training Garrison, 762 Outposts, 1 Women's Industry and 2 Men's Industries.

Territorial Headquarters.—S. A. Kowdhar, Trivandrum, Travancore State.

Territorial Commander:—Colonel Edwin H. Sheard.

Chief Secretary:—Lieut.-Colonel S. Packianathan.

CHRISTIAN COUNCIL OF INDIA AND PAKISTAN

This Council (formerly known as the National Missionary Council, later as the National Christian Council) was organised in 1914 as the result of the first World Missionary Conference held in Edinburgh in 1910. Similar Councils have come into existence in China, Japan, Korea, the Near East, Siam, Philippine Islands, Netherland Indies, Congo and other Mission fields. The Missionary Societies of the 'sending countries' are also linked together by similar national organizations. All these National Christian Councils and Conferences of Missionary Societies lead up in the International Missionary Council which has its offices in London (Edinburgh House, 2 Eaton Gate, London, S.W. 1) and in New York (156, Fifth Avenue, New York City).

Basis.—The Council is established on the basis that the only bodies entitled to determine the policy of the Churches and Missions are the Churches and Missions themselves. Questions of doctrine and ecclesiastical policy lie outside the province of the Council.

Objects.—1. To stimulate thinking and investigation on missionary questions, to enlist in the solution of these questions the best knowledge and experience to be found in India and other countries; and to make the results available for all Churches and Missions in India.

2. To help to co-ordinate the activities of the Provincial Councils and to assist them to co-operate with each other where such co-operation is desirable.

3. Through common consultation to help to form Christian public opinion and bring it to bear on the moral and social problems of the day.

4. To be in communication with the International Missionary Council regarding such matters as call for consideration or action from the point of view of the Indian mission field as a whole.

5. To make provision for the convening of a National Christian Conference when such is in the opinion of the Council desirable.

President: E. L. Rabbia Ram, c/o The Y.M.C.A., The Mall, Lahore (W. Punjab). **Vice-Presidents**: The Rt. Rev. S. K. Mondol, Methodist Church, Hyderabad, Deccan; The Rev. D. Scott-Wells, Baptist Missionary Society, 41, Lower Circular Road, Calcutta.

Treasurer: G. Ross Thomas, Inter-Mission Business Office, P. Box 92, Bombay.

Secretaries: R. B. Manikam, M.A., B.D., Ph.D. (**Executive Secretary**); E. C. Bhatly, M.A.; Mrs. L. W. Bryce, M.A., Ph.D.; J. W. Sadiq, M.A., B.D., Rev. R. W. Scott.

Office.—The Christian Council Lodge, near C.P. Club, Narpur, C. P.

SPORTS

THE big event of the 1948-49 cold weather was the visit to India of the West Indies cricketers. They proved very popular, and played a type of cricket which pleased the spectators. They won the rubber by virtue of their victory in the Test at Madras, the others being drawn. Then great little batsman, Everton Weekes, set up a Test match record of scoring five successive Test centuries, four of them on Indian wickets and the cricketers of the country, through a fund raised by the *Sunday News of India*, presented him with a silver plaque and a purse, in commemoration of his feat.

As in the past Indian cricket revealed many weaknesses, but all the matches were played in the real spirit of the game and India undoubtedly benefited by the visit of these breezy likeable cricketers.

For one reason or another several annual sporting events were not played.

Cricket. The Board of Control for Cricket in India is the ruling organisation of the game. There are seventeen Provincial Associations in the country in affiliation with it and these compete annually for the Cricket Championship of India, the trophy for which is a magnificent gold Cup of unique design, called the Ranji Trophy, which keeps green the memory of that illustrious Indian cricketer, Prince Ranjitsingh.

Football. The game in India is controlled by the All-India Football Federation which has subordinate provincial associations in affiliation with it. The game has gained tremendous popularity in recent years and there grows attendant important matches. The official championship tournament of the country is conducted on provincial lines between teams representing the subordinate associations, the other principal competitions being the Indian F.A. Shield in Calcutta and the Jockers Cup Tournament in Bombay.

Hockey. Hockey is controlled by the All India Hockey Federation and enjoys considerable popularity. In view of India's repeated victories in the Olympics, it is claimed that the standard of play in this country is the best in the world. The parent body controls through subordinate provincial associations. The Provincial Championship Trophy is a quaintly carved Moari Shield, which was presented by the Moaris to the Indian team which toured New Zealand. The principal club tournaments are the Aza Khan Cup in Bombay, the Beighton Cup in Calcutta and the Yadavendra Shield in New Delhi.

Turf. Racing in India is organised on a large scale and the many courses are controlled by the Royal Western Indian Turf Club and the Royal Calcutta Turf Club between them. The standard of racing is very high and the race courses, particularly those in Bombay and Calcutta, compare favourably with the best in the world. Recent trend has been the encouragement of the indigenous breed which has made remarkable improvement in recent years. The principal races are the Indian Derby and the Eclipse Stake of India in Bombay and the King's and Governor-General's Cups in Calcutta.

Tennis. Tennis is controlled by the All-India Lawn Tennis Association through its provincial associations. A definite attempt is being made to raise the general standard by the employment of expert coaches, the ultimate aim being the creation of a strong Davis Cup team. Most tournaments in India are played on hard courts of beaten earth, though there are some good grass courts in Calcutta.

Athletics. Athletics in the country is in a state of transition. Formerly, the All-India Olympic Association, with subordinate

associations in most of the provinces, controlled all the branches of it, but the present trend is for decentralization. The biggest handicap is the lack of suitable tracks and training grounds there being only two cinder tracks, one at Bangalore and the other at Patiala.

Golf. Golf has a big following and almost every town of any size has its own course. The Royal Calcutta Golf Club's golf course is the best in the country, though the one recently laid out by the Bombay Presidency Golf Club at Chembur, a suburb of Bombay holds out good promise. Annual competitions are held by leading clubs all over the country.

Other Games. Most of the other games have their controlling organizations. Amateur boxing is strong in Bombay, Bengal, Lahore and Karachi. Table-Tennis and Billiards have got on well and badminton is making appreciable progress. Aquatics which is being placed on organised basis shows signs of development.

BOMBAY RACES

1000 GUINEAS, DECEMBER 26, 1948.

(1 Mile).

Messrs. Esouffally and Merchant's "Fitna" 8-7 (Evans) 1

India: (1st Innings) 454 (H. R. Adhikari 114 not out).

India: (2nd Innings) 220 for 6.

Second Test Match at Bombay 9 to 13 December, 1949. Ended in a draw.

West Indies: (1st Innings) 629 for 6 declared (A. F. Rae 104, E. Weekes 194).

India: (1st Innings) 273 (D. G. Phadkar 74, Ferguson 4 for 57).

India: (2nd Innings) 333 for 3 wickets (R. S. Modi 112, V. S. Hazare 134 not out).

Third Test Match at Calcutta December 31, January 1, 2, 3 and 4. Ended in a draw.

West Indies: (1st Innings) 366 (E. Weekes 162, S. Bannerji 4 for 120).

India: (1st Innings) 272 (R. S. Modi 80).

West Indies: (2nd Innings) 336 for 9 wickets, declared. (E. Weekes 101, C. L. Walcott 108, Mankadi 3 for 68).

India: (2nd Innings) 325 for 3 wickets. (Mushtaq Ali 106, R. S. Modi 87).

Fourth Test Match at Madras January 27, 28, 29, 30 and 31.

West Indies beat India by an innings and 193 runs.

West Indies: (1st Innings) 582 (A. F. Rae 109, J. B. Stollmeyer 160, E. Weekes, 90, D. G. Phadkar 7 for 150).

India: (1st Innings) 245 (J. Trim 4 for 48).

India: (2nd Innings) 144 (P. Jones 4 for 30).

Fifth Test Match at Bombay February 4, 5, 6, 7 and 8, ended in a draw.

West Indies: (1st Innings) 286 (J. B. Stollmeyer 85, D. G. Phadkar 4 for 74).

India: (1st Innings) 193.

West Indies: (2nd Innings) 267 (A. F. Rae 97, S. Bannerji 4 for 54).

India: (2nd Innings) 355 for 8 wickets. (V. S. Hazare 122, R. S. Modi 86, P. E. Jones 5 for 85).

RANJI TROPHY

Final between Bombay and Baroda, from 15 March to 24. Bombay won by 468 runs. Scores: Bombay 620 and 361. Baroda 268 and 245.

TENNIS

All-India Tennis Championships, played at Calcutta, December '48.

Results of the final:—

Men's Singles:—Dilip Bose beat Sumant Misra 3-6, 6-3, 8-6.

Women's Singles:—Mrs. K. Singh beat Miss P. Khanna 3-6, 9-7, 6-3.

Men's Doubles:—Dilip Bose and Narindra Nath beat Sumant Misra and N. Rama Rao 7-5, 6-2, 7-5.

Mixed Doubles:—Sumant Misra and Mrs. Mody beat Dilip Bose and Mrs. K. Singh 7-5, 6-4.

All-India Hard-Court Championships, played at Bombay, January, 1949.

Results of the finals:—

Men's Singles:—G. Vasant beat P. L. Narayanrao 6-3, 6-2, 6-2.

Women's Singles:—Mrs. K. Singh beat Mrs. L. Dayal 6-3, 3-6, 6-0.

Men's Doubles:—P. L. Narayanrao and D. Madhavrao beat J. M. Mehta and J. M. Kantawalla 7-5, 6-3, 6-2.

Women's Doubles:—Miss L. Woodbridge and Miss L. Merchant beat Mrs. K. Singh and Mrs. S. R. Mody 7-5, 6-3.

Mixed Doubles:—F. Bekkevold and Miss J. Ungram beat Vishnu Mohan and Mrs. S. Pollard 6-2, 6-2.

TABLE TENNIS

All-India 'Championships,' played at Calcutta December '48 to January '49. Results of the finals:—

Men's Singles:—U. M. Chandarana beat V. Sivaraman 21-19, 19-10, 21-15.

Women's Singles:—Mrs. G. Nasikwala vs. Miss E. Bocarro 21-10, 21-10 (match drawn).

Men's Doubles:—U. M. Chandarana and D. H. Kapadia beat C. Ramaswamy and M. V. Vittal 19-21, 8-21, 21-8, 21-14, 21-16.

Women's Doubles:—Mrs. G. Nasikwala and Miss E. Bocarro beat Mrs. C. K. K. Pillai and Miss T. S. Bhama 21-15, 21-18.

Mixed Doubles:—U. M. Chandarana and Miss E. Bocarro beat D. H. Kapadia and Mrs. G. Nasikwala 25-23, 21-19, 21-13.

BADMINTON

Western India Badminton Championships at Bombay, September 1948.

Men's Singles:—Davinder Mohan beat George Lewis 18-15, 18-4.

Women's Singles:—Miss M. R. Chinoy beat Mrs. N. Lewis 11-3, 11-4.

Men's Doubles:—D. G. Mugwe and R. V. Ullal beat H. Ferreira and D. D. Shroff 15-8, 15-10.

Women's Doubles:—Miss M. R. Chinoy and Mrs. N. Lewis beat Miss B. Farias and Mrs. P. Athaide 15-4, 15-6.

Mixed Doubles:—A. G. Kalyanpur and Miss S. Phansalkar beat G. P. Shirke and Miss S. Nigudkar 15-6, 15-6.

BILLIARDS

All-India Amateur Championship at Calcutta, February/March 1949.

T. A. Selvaraj beat Wilson Jones 2752-2202.

SWIMMING

Western India Championships, at C.C.I. Pool, November 1948.

MEN'S EVENTS

100 Yards Free Style: 1. Mansoor 1, K. Thunawalla 2, M. Talbot 3. Time: 59.00 seconds.

400 Yards Free Style: 1. Mansoor 1, M. Talbot 2, S. Vajifdar 3. Time: 5 minutes, 43.3 seconds.

200 Yards Breast Stroke: 1. Naigamwala 1, A. Bharucha 2, H. Baruwalla 3. Time: 2 minutes, 15.1/5 seconds.

Plain Diving: R. Ajgaonker 1, R. Nanavati 2, 1. Mansoor 3. (75.5 points).

WOMEN'S EVENTS

100 Yards Free Style: Miss Rita Velthorst 1, Miss Dolly Nazir 2. Time: 1 minute, 10.4 seconds.

100 Yards Breast Stroke: Miss Dolly Nazir 1, Miss P. Shroff 2. Time: 1 minute, 24.6 seconds.

HOCKEY

Aga Khan Cup, at Bombay, April 1949. East Punjab Police beat Bangalore Aircraft Factory by 2 goals to nil.

Inter-Provincial Championships at New Delhi, March 1949. East Punjab beat West Bengal by 2 goals to nil.

Inter-Provincial Championship (Women's), at New Delhi, March 1949. Bombay beat Calcutta by 2 goals to nil.

Beighton Cup, at Calcutta, April/May 1949. Tata Sports Club (Bombay) beat Punjab Sports (Calcutta), by 2 goals to nil.

FOOTBALL

I. F. A. Shield at Calcutta, August 1948. Mohun Bagan beat Bhawanipore by 2 goals to 1.

Rover's Cup at Bombay, October 1948. Bangalore Muslims beat Mohun Bagan by 1 goal to nil.

WESTERN INDIA TWENTIETH ANNUAL CHAMPIONSHIPS

Held during March 1948.

Fly-weight:—L. Coutinho, winner; B. D'Sa, runner-up.

Bantam-weight:—C. J. Satur, winner; F. Roquizzinho, runner-up.

Feather-weight:—P. Prince, winner; S. Pany, runner-up.

Light-weight:—G. Raymond, winner; D. Irani, runner-up.

Welter-weight:—V. Pereira, winner; M. Carvalho, runner-up.

Middle weight:—Capt. T. Divecha, winner; M. N. Pagdiwalla, runner-up.

CLIMBING IN THE HIMALAYAS

OWING to their immensity and the time and cost involved in undertaking expeditions into the Himalayas a great deal of mountaineering and exploration remains to be done in the world's high-st mountain range. There are over fifty summits of 25,000 ft. and of these only two, *Kamet* (25,447 ft.) and *Nanda Devi* (25,000 ft.) have been scaled, whilst there are innumerable lower summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible. The highest peak is Mount Everest, which by latest measurements is 29,141 ft. Next come Kanchenjunga and K2, both about 28,150 ft., though which is the higher of the two is not certain.

Pioneer Climbers.—Mountaineering in the Himalayas began some eighty years ago when surveyors crossed high passes and scaled peaks in the course of their work. Among these pioneers must be mentioned the Schlagintweit brothers, who in 1855 reached a height of 22,329 ft. on the Eastern Ibi Gamin, one of the subsidiary peaks of *Kamet*, whilst I. S. Pocock of the Survey of India set up a plane table at 22,040 ft. in the same district. Another notable early explorer was the famous botanist Sir Joseph Hooker who, in 1849, explored the Sikkim valleys of Kanchenjunga and made attempts to climb Kanchenjunga, 22,700 ft. and Pauhunri, 23,180 ft. Some remarkable explorations were also carried out by the Pandits of the Survey of India. Among these men was Babu Sarat Chandra Das who traversed the Jonsong La, 20,200 ft.

Later in the nineteenth century came Lord Conway who, in 1892, made explorations in the Karakoram Himalayas, particularly in the region of the Baltoro Glacier, the greatest of Himalayan glaciers, and climbed a peak of 25,000 ft. Sir Francis Younghusband also made explorations in the Karakoram and accomplished the first crossing of the Karakoram Pass. The Duke of the Abruzzi also made a number of expeditions into this range and reached a height of 25,000 ft. on the Bride Peak. Mountaineering developed rapidly in the "nineties," and a bold attempt was made by A. F. Mummery, Professor N. Collie and Brigadier-General The Hon. C. G. Bruce to climb Nanga Parbat. In a final attempt on the mountain, Mummery and his two Gurkhas were lost. In 1899 D. W. Freshfield made the first circuit of Kanchenjunga and explored the Nepal side of the mountain.

A New Phase.—Meanwhile, thanks to Brigadier-General Bruce, Gurkhas, and later Sherpas and Bhodias were trained for mountaineering and, with the advent of first-class portage, Himalayan mountaineering entered on a new phase. Dr and Mrs. Bullock Workman made a number of expeditions into the Karakoram and W. W. Graham made a number of remarkable ascents, with Swiss guides, including an ascent of Kabru, 24,000 ft., which has been the subject of much controversy. Kabru was later attempted by two Norwegians, Messrs. Rubenstein and Monrad Aas, who got within a few feet of that top.

The present century opened with a number of remarkable ascents by Dr. A. M. Kellas, who died during the 1921 Everest expedition. He climbed several great peaks including Kanchenjunga, Pauhunri and Chomomo and made expeditions to the Central Himalayas where, with Colonel H. T. Morshead he reached in 1920 an altitude of 23,600 ft. on *Kamet*.

In 1907 Brigadier-General Bruce, Dr. T. G. Longstaff and A. L. Mumm explored the Garhwal, Himalayas and reconnoitred *Kamet*. After this Longstaff, with the Swiss guides Alexis and Henri Brocherel, ascended Triaul, 23,406 ft., which, until the Jonsong Peak, 24,344 ft., was climbed in 1930 remained the highest summit reached. In 1911 and 1912 attempts were made to climb *Kamet* by C. F. Meade and his

Swiss guides and a height of 23,500 ft. was gained. Captain Morris Slingby also attempted *Kamet* at this time.

Attempts on Kanchenjunga.—The first attempt on Kanchenjunga was made in 1905 but ended in disaster, Lieut. Paché and three porters being killed by an avalanche. The second attempt in 1929 was made by a solitary American, E. F. Farmer, who lost his life. In the same year a determined attempt was made by a party of Bavarian Mountaineers led by Paul Bauer. A height of over 24,000 ft. was reached on the north-east spur before bad weather forced the party to retreat.

In 1930 a fourth attempt was made by an International expedition led by Professor G. Dyhrenfurth. The party attempted the mountain from the Nepal side, but were repulsed by an ice avalanche which killed one of the porters. Subsequently, they ascended a number of peaks including the Ramthang Peak, 23,200 ft. and the Jonsong Peak 24,344 ft.

The fifth attempt in 1931 was made by Bauer and his party, but failed at a slightly greater elevation than was attained in 1929. One of the party H. Schaller and a porter were killed by a fall during the expedition.

In the summer of 1931 a party of young British climbers led by Mr. F. S. Smythe succeeded in reaching the summit of *Mount Kamet* (25,447 ft.), the first peak over 25,000 ft. to be climbed.

MOUNT EVEREST

There have been seven expeditions to Mount Everest of which those in 1921 and 1935 were reconnaissance and those in 1922, 1924, 1933, 1936 and 1938 attempts to reach the summit.

The preliminary expedition for the reconnaissance of the approaches to Mt. Everest carried out its work in the most complete manner under the leadership of Lt.-Col. C. K. Howard-Bury. The approaches to Mt. Everest on all its northern faces were thoroughly examined, and relations were established with the local authorities. On the information and experience of the reconnaissance expedition the second expedition to Everest was organised and set off the following year under the leadership of Brig.-Gen. The Hon. C. G. Bruce. Capt. G. I. Finch and Capt. J. G. Bruce succeeded with the help of oxygen in reaching the height of 27,300 ft. During this expedition seven men were killed when an avalanche swept them over an ice cliff some 60 feet high.

The 1924 expedition was again commanded by Brig.-Gen. Bruce. But owing to his ill health Lt.-Colonel E. F. Norton took on the command. Lt.-Col. E. F. Norton and Dr. T. H. Somervell reached a height of 28,100 feet. Then a final attempt was made by G. L. Mallory and A. C. Irvine. They were assisted by a supporting party consisting of N. E. Odel and J. de V. Hazard. On June 8th they left the 25,000 feet camp with three porters who carried loads for them up to 26,800 ft. On June 8th they left camp for their attempt and were never seen again. On June 10th for the third time Odel climbed up to the 26,800 feet camp but could find no sign of Mallory and Irvine, and communicating with Norton evacuated the mountain.

The expedition of 1933 followed a successful effort by Lt.-Col. J. L. R. Weir, Political Officer in Sikkim, to obtain the permission of the Tibetan Government for a further attempt to climb the mountain. An *Everest Committee* was formed under the presidency of the Royal Geographical Society and the Alpine Club, and Mr. Hugh Rutledge, formerly of the I.C.S., accepted an invitation to take charge of the expedition. Included in its members were Mr. F. S. Smythe, leader of the successful *Kamet* Expedition of 1931, and Capt. E. St. J. Birnie, E. E. Shipton and Dr. C. R. Greene who climbed with Mr. Smythe in 1931. The expedition

reached Calcutta in February and forthwith proceeded to its main task.

The 1933 expedition established its base in the Rongbuk Valley on April 17th and on April 21st. Camp I was established. Thenceforward the expedition was dogged by exceptionally bad pre-monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col, 23,000 ft. prolonged and arduous work. Camp IV, 22,800 ft. was not established until the middle of May after a 40 feet ice wall on the North Col. slopes had been climbed. The expedition was equipped with wireless which enabled weather reports to be received from the meteorological authorities at Allpore. One installation was at Darjeeling, one at the base camp and a third at Camp III, 21,000 ft. Camp III was linked to the North Col. by field telephone so that messages could be received up to 23,000 ft. from the plains of India in a short space of time.

Owing to a series of blizzards and high winds Camp V was not established until May 22nd. But it was pitched at 25,500 ft., several hundred feet higher than previously. The party was then off for three days by a furious blizzard and eventually had to retreat to Camp IV. The Camp was re-established on May 28th and on May 29th. Wynn Harris, L. Wager and J. L. Longland continued the ascent and finally pitched Camp VI at 27,400 ft., 600 ft. higher than in 1924, after a magnificent effort on the part of the porters. Longland then brought the porters down but had a terrible time in a blizzard and only by exercising great mountaineering skill steering them down to Camp V. The following morning Wynn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north-east ridge finally followed the same route as Norton in 1924. They were stopped by dangerous conditions at 28,100 ft. and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V after which they descended to Camp V. The following morning Shipton and Smythe were unable to leave Camp VI owing to a high wind but on June 1st they made their attempt on the summit.

An hour and a half after leaving the Camp Shipton had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wynn Harris and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frost-bites, strained hearts, and high altitude deterioration the party had to retire to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

An extraordinary attempt to climb Everest was made in 1934 by Maurice Wilson, a young airman. Having penetrated Tibet in disguise he marched to Everest and with a few porters went on in reaching 21,000 feet. He then succeeded alone and nothing more was heard of him, until his body was discovered near the site of Camp III, 21,000 feet, by Mr. E. E. Shipton's party in 1935.

1936 Expedition.—Early in 1935 the Tibetan Government granted permission for a further attempt to take place from June 1935 to June 1936 inclusive.

As there was no time to organise an attempt on the summit it was decided to send out a small party under the leadership of Mr. E. E. Shipton. This had as its objects: Collection of data as to monsoon snow and weather conditions; examination of alternative routes from the west, the trying out of new men for the summit attempt; physiological observations; a stereophotogrammetric survey; examination of ice formations on the North Col.

This expedition proved that Everest cannot be ascended during the monsoon and that the only hope of an ascent is during the period immediately before the monsoon.

Conditions during the monsoon are extremely dangerous and the party had a narrow escape from an enormous avalanche that fell from the slopes of the North Col.

During the course of this reconnaissance two dozen peaks over 20,000 feet high were ascended.

The 1936 expedition was led by Mr. Hugh Rutledge and included three of the 1933 climbers Messrs. Shipton, Smythe and Wyn Harris, and one of the 1933 Signals Officers Lieut. Smith Windham. It encountered exceptionally bad weather and unusual conditions. Before the monsoon, snowstorms rendered the mountain unclimbable and the usual pre-monsoon north-west wind was lacking to clear the snow away. However, Camp IV on the North Col. was established to schedule and the party were in position to attack the summit when the weather broke and two feet of snow forced them to retreat down the dangerous slopes of the North Col. To cap their discomfiture the monsoon arrived on the exceptionally early date of May 24th. Two attempts were made to re-open the route to the North Col. but on both occasions the party were in great danger and the attempt had to be abandoned when Shipton and Wyn Harris were carried down by an avalanche and nearly lost their lives. Subsequently reconnaissance parties ascended the main Rongbuk glacier and examined the west side of the North Col. which, in spite of Mallory's unfavourable verdict, was found to be not only practicable but less dangerous in monsoon conditions than the east side.

The 1938 expedition consisted of seven climbers, H. W. Tilman, E. E. Shipton, F. S. Smythe, N. F. Odell, Dr. C. B. M. Warren, P. Lloyd and Capt. P. R. Oliver and was led by Tilman. It was considerably smaller than previous expeditions owing to economic reasons and because experience has shown that the small light expedition has as good and perhaps better chance of achieving its object than a large cumbersome expedition rendered comparatively immobile by its transport and tied down to a fixed plan. Though the expedition failed to reach the summit of Mount Everest it fully justified these beliefs and cost only £2,500 as against the £10,000 or more of previous Everest expeditions.

The expedition reached Rongbuk on April 6th and established Camp 3 on April 26th. Wind and cold made further advance impossible and the party descended to the Kharta valley for a rest and to recuperate from influenza, chills and sore throats. They returned in the middle of May during the commencement of the monsoon which broke on the unprecedented date of May 5th, one month to six weeks earlier than usual. The route up the North Col. was forced in dangerous snow conditions and the party had a narrow escape from an avalanche. Camp 4 was established on May 24th but snowstorms drove the party down. It was then decided to regain the North Col. from the west via the Main Rongbuk Glacier and Camp 4 was re-established after a difficult ice climb on June 5th. On June 8th Camp 6 was established by Shipton and Smythe with seven porters and the following day an attempt was made to reach the summit. Conditions, however, proved impossible owing to deep monsoon snow, and the party was forced to retreat after reaching a height of 27,300 ft. A further attempt by Tilman and Lloyd on June 11th met with no more success and the expedition had to be abandoned.

Aerial Expedition.—An interesting side to the exploration of Everest was an aerial expedition undertaken in 1933 for the purpose of photographing the mountain from the air. This venture was financed by Lady Houston. Major L. V. S. Blacker, formerly of the Guides, was its leader and in charge of its survey work, Lord Clydesdale chief pilot, Fit. Lt. A. McIntyre second pilot and Major F. F. Etherton, its London manager. Two specially equipped aeroplanes, adaptations of the well-known Wapiti,

were provided. A special point in their equipment was the provision of compressed oxygen for supply through gas masks to the aviators at high altitudes. The expedition was so as to circle Mt. Everest, but both machines successfully flew over the peak and several good photographs were taken of it. By permission of the Nepal Government a line of flight from Purnea, the base of the expedition, across Nepal territory to Mt. Everest, was taken and along this good survey photographs as the somewhat poor visibility at the time of the flight, in April permitted.

An interesting mountain flight of which details were published in 1933 was one from Risalpur to Gilgit and back, undertaken by the R.A.F. at Risalpur in the course of its routine duties in October, 1932. The expedition was commanded by F. Lt. Isaac and was made by five of the machines ordinarily in use by the Force. The distance from Risalpur by way of the Indus Valley and past Nanga Parbat to Gilgit is 286 miles. It was covered in 2 hrs. 20 mins. on the outward flight and in 2 hrs. 5 mins. on the return journey. From Gilgit the machines further proceeded upon flights over the Hunza, Nagar and Rakpot areas. Brilliant photographs of Nanga Parbat and Rakaposhi, as well as of other places of importance or interest, were taken. Such flights are now frequently made by the R.A.F.

NANGA PARBAT

The year 1932 saw a well organised expedition to Mount Nanga Parbat. It was conducted by Dr. Merkl, of Munich, and included Lt. R. N. Frier, of the Gilgit Scouts, who acted as transport officer, an American Mr. Rand Herron and Miss E. Knowlton, of Boston, U.S.A. Several determined attempts to reach the summit of the mountain in August were brought to an end by the break-up of the weather before they attained success.

The Disaster of 1934.—In 1934 Herr Merkl returned to the attack with an even stronger party, which included a number of well-known German and Austrian mountaineers and Captains Frier and Sangster of the Indian Army as transport officers. Fatality early overtook the expedition, Herr Broedel dying of pneumonia. Owing to various delays, Camp IV was not established until the end of June. The party then proceeded to rush to the peak leaving only skeleton camps behind. Finally, after a height of 25,600 feet had been reached, and Camp VIII established at 24,800 feet, a terrible blizzard broke. The party retreated, but owing to the storm and ill-equipped camps retreat became a rout during which no fewer than nine lives were lost, Herren Merkl, Welzenbach and Wieland and six barrelling porters—men who had accompanied the 1933 Everest Expedition. Of the Europeans only the two Austrians Herren Schmeier and Aschenbrenner escaped whilst of the surviving porters, all of whom were frost-bitten, one or two spent a week without food or shelter.

In May 1937, another attempt was made to climb Nanga Parbat by a German expedition, headed by Dr. Wien. News reached Simla on June 20 that disaster had overtaken the expedition and subsequently it was learned that the entire party of climbers with the exception of one survivor, Dr. Luft, had perished. Eight of the nine members of the expedition were killed along with nine Sherpa porters. Mountaineering experts are of the opinion that the season was not very propitious for the ascent of the peak, which is considered to be more accessible in the autumn.

A further German attempt to climb Nanga Parbat was made in 1938 under the leadership of Dr. Paul Bauer. During the second half of July the party succeeding in reaching a height of over 23,000 ft. but were forced to retreat by bad weather. During the climb the bodies of Herr Willy Merkl and the porter Gay Lay, who perished in 1934 were discovered.

In 1939 another German expedition led by Herr Peter Aufhäuser explored the Diamir bank of Nanga Parbat.

Another expedition to the Karakoram took place in 1934 under the leadership of Dr. G. Dyhrenfurth. All four peaks of "Queen Mary" were climbed. The highest of these has been triangulated as 24,350 feet, but the party, state it to be more than 1,000 feet higher.

In 1934 E. E. Shipton and H. W. Tilman, by a magnificent piece of exploration and mountaineering, succeeded in penetrating the hitherto impracticable Rishi Ganga to the glacier basin of Nanda Devi, thereby solving a problem that had exercised the minds of Himalayan mountaineers for many years and completing the work of pioneers such as Dr. T. G. Longstaff and Hugh Kuttledge. Shipton and Tilman also crossed from Badrinath to Gangotri via the Satopanth Pass and explored the head of the Gangotri glacier. Prolonging by the discovery of the route to the Nanda Devi basin an Anglo-American party, the leader of which was H. W. Tilman, successfully scaled Nanda Devi via its south-west ridge. H. W. Tilman and N. F. Odell being the climbers to reach the summit. This expedition was remarkable in that owing to the sickness of the porters the climbers had to carry their own camps up the mountain. This is the finest and most difficult peak yet climbed in the Himalayas.

In 1939 the first Polish expedition to visit the Himalayas succeeded in making the ascent of the East Peak of Nanda Devi. Unfortunately an accident led to the death of M. M. A. Karpinski and S. Bernadzikiewicz on Trisul above the Milam Glacier.

Lt.-Col. C. F. Stoehr, R.E., and Lt. D. M. Burn, R.E., lost their lives on 12th August 1932, while climbing on Panjtarn, near Paligam in Kashmir.

In 1935 an attempt to scale Peak 325,400 feet, in the western Karakoram, was made by Lieut. J. Waller, Lieut. J. Hunt, Dr. J. S. Carslaw and W. R. Brotherhood, R.A.F. A series of blizzards were experienced but the party reached a height estimated as 24,500 feet. There is no great difficulty between this point and the summit.

In the Autumn of 1935 the summit of Kabru was reached by Mr. C. R. Cooke who was accompanied to the foot of the final rocks by G. Schoberth who was forced to give up owing to a high altitude cough and the risk of frost-bite. This ascent was made on November 18th, an unusually late date and is of great interest as proving that high Himalayan peaks can be climbed in early winter at least.

The 1936 French expedition to the Karakoram, like the Everest expedition, encountered very bad weather and accomplished little.

After Nanda Devi the most remarkable ascent of 1936 was that of Shiloche, a peak once designated as the "embodiment of inaccessibility", in the Kanchenjunga range. This was made by a small German party under the leadership of Herr Paul Bauer. Shiloche is one of the most beautiful peaks in the Himalayas.

In 1939, a party of Munich mountaineers, consisting of Herren Grob, Paldar and Schmaeder, made the first ascent of the Tent Peak in the Kanchenjunga range and attempted the Twins Peak but were defeated by bad weather.

Other ascents in Sikkim were made by Marco Pallis's party who attempted Simvu unsuccessfully and by C. R. Cooke and F. Spencer Chapman who ascended several peaks of over 20,000 feet including the Fluted Peak.

During the summer of 1937 a number of peaks were climbed, the most notable being Chomolhari 23,997 ft. by F. Spencer Chapman with one porter, and the Mana Peak 23,860 ft. by Captain P. B. Oliver and F. S. Smythe; the latter completing the ascent alone as Capt. Oliver was insufficiently acclimatised. Three other peaks of 21,400 ft.,

21,500 ft. and 22,481 ft. were also climbed by Oliver and Smythe and attempts made on Nilkanta and Dunagiri which were frustrated by bad weather. They also explored a remarkable plateau above the Banke Glacier, discovered in May 1937 by Lieut. R. A. Gardiner of the Survey of India. In addition, Smythe with three Tibetan porters climbed seven peaks of the Zaskar Range among them the very difficult peak of Nilgiri Parbat, 21,264 ft. During this expedition Smythe came upon some remarkable tracks in the snow which the Tibetans believed were made by a Mirka or Abominable Snow Man. These tracks were afterwards identified as bear tracks by the natural history authorities in London. It is believed that there is now enough evidence to explain this strange legend of the Himalayas.

Garhwal was visited in 1939 by a Swiss expedition led by M. Andre Koch and two fine peaks were scaled, Dunagiri and the Wedge Peak.

In 1938 C. S. Houston led an expedition to the Karakoram during the course of which a bold and determined attempt was made to climb K2, 28,150 ft. After failure to obtain a footing on the N. W. ridge, the party, which included several veteran Sherpa porters, ascended the N. E. ridge to a height of 26,000 ft.

A further attempt on K2 was made by an American party in 1939 but ended in disaster, Dudley Wolfe, and three Sherpa porters losing their lives in stormy weather high up the mountain.

Another expedition to the Karakoram was that undertaken by Capt. J. B. Harrison, Lieut. J. O. M. Roberts, R. A. Hodgkin, Dr. T. Graham Brown and Lieut. J. Waller together with Dr. G. A. J. Teasdale and Dr. Elizabeth Teasdale. The principal objective was Masher-brum, 25,600 ft. After establishing camp 7 at 24,000 ft. Harrison and Hodgkin reached a height of about 25,000 ft. before being forced to retreat by bad weather. In descending to Camp 6 they were overtaken by a blizzard and forced to spend a night in the open as a result of which they were seriously frost-bitten. The devotion of the Sherpa porters prevented a more serious disaster.

Further exploration of the Badrinath, Kedarnath ranges at the sources of the Ganges as well as various ascents was made by a German expedition under the leadership of Dr. R. Schwarzgruber in the autumn of 1938. A little less than 10 years later (August, 1947) a Swiss party claimed that it had ascended Kedarnath.

The Survey of India are now very active and much work has been accomplished during the re-survey of Garhwal and Kumaon under the direction of Major Gordon Osmonston, whilst several thousand square miles of country have been mapped by Shipton and Tilman during their expeditions to the Shaksam in 1937 and by Shipton during his expedition to the Karakoram in 1939.

The Himalayan Club was founded in 1928, at New Delhi with the object of encouraging and assisting Himalayan travel and exploration, and extending knowledge of the Himalayas through science, art, literature and sport. The initiation of this Club was due to the late Sir Geoffrey Corbett, one-time Secretary, Commerce Department of the Government of India, and to Major Kenneth Mason, M.C., R.E., Assistant Surveyor-General.

1949 EXPEDITIONS

A party of four Swiss made an expedition into the Himalayas in 1949. The party consisted of Dr. Edward Wyss-Dunant, a biologist who was to make scientific observations; Adolf Ruby and Jacob Bargetzi, two Alpine guides; and Anna Liese Lohner famous woman Alpineist who lead the party. They were later joined by Rene Dittert, veteran mountaineer and

author. The expedition was organized by the Zurich headquarters of the Swiss Foundation for Alpine Research and was to spend six months in the unexplored wastes to the north of Kanchenjunga.

Major H. W. Tilman led a three-month expedition to the Nepal Himalayas. He was accompanied by Mr. Peter Lloyd, a well-known Everest climber. The object of the expedition was partly mountaineering and partly scientific. The scientific section which was financed by a member of British scientific societies consisted of a geologist Mr. C. S. Scott, and a botanist Mr. O. Polunin. The object of the expedition was to explore the Langtang Himal range, of which the highest peak is Langtang Lirung, 23,771 feet high.

A Sikkim Himalayan expedition sponsored by the Hikers' Club of Bombay made a trip of the 18,000 foot high Sebulu Pass in Sikkim in May 1948. The party was under the leadership of Mr. R. P. Ghandhy.

The party covered a distance of 160 miles in three weeks and had some interesting mountaineering experiences. This was the second venture of the Hikers' Club, undertaken not so much to discover mysteries of the Himalayan heights, as to give training in mountaineering to adventurous youth.

The first trip also led by Mr. Ghandhy, was undertaken in 1946. Its objective being the Hindari Glaciers and Trallis Pass.

The Sikkim expedition consisted of nine members. Besides the leader, they were: Dr. G. F. Lakshani of the Ministry of Education, Government of India; Dr. B. S. Melikatti, the medical officer of the party; J. M. Batliboi and Mr. B. A. Engineer, two businessmen of Bombay; Mr. J. J. Dubash, a textile engineer; Prof. D. B. Wagh; and two students Mr. K. P. Ghandhy and Mr. H. P. Ghandhy.

The Bombay members, met their companions at Calcutta on May 3 and from there the party travelled by train as far as the Teesta Bridge terminus. A 60-mile bus drive from there brought them to Gangtok, the capital of Sikkim. During the two days' stay at Gangtok the party gathered coolies, mules, tent equipment and provisions and started their trek on May 7.

During the first four days, heavy rainfall hampered their progress, and on the fourth day three members who felt diffident and unequal to the task, decided to return. One of them, Mr. Engineer, was almost incapacitated by leech bites. The rest of the party pushed up to the next dak bungalow, following the trade route to Tibet. Wash-outs and landslides were some of the obstacles encountered, while the dense jungle through which they had to pass compelled them to move with caution. These conditions persisted until they reached Thangu, the last dak bungalow at a height of 12,000 feet.

From this point the party left the beaten track and followed the course of the river Lasha chu, on the banks of which no human habitations were in evidence. The 16 mile track to the source of the river was followed by wholly barren, steep country where snow fell in drizzles. When the source of Lasha chu was reached, the party was at a height of 15,000 feet.

The object of climbing to the source of Lasha chu was to cross the range that lies between the Lachen and Lachung valleys, without following the main trade route. Moving eastwards from Thangu, the party next reached Zachu, where a halt was called at the Himalayan Club hut. Here were green pastures where nomadic Tibetan shepherds graze their yaks between the months of May and October.

From here onward the members of the party began to feel the effects of the high altitude and had to encounter real mountaineering conditions. Clambering up snow-bound boulders, stopping at every 100 yards for breath, cutting their way through waist deep snow, the party slowly moved forward.

Ropes were tied round each climber with a span of 20 feet so that if any member happened to sink too deep in the snow, he could be pulled out. Every 20 yards the leading man would have to fall back his place being taken by another of the party. This was necessary as the leading man's role of stamping a track through the powdery snow was very fatiguing. Progress was very slow but a fairly good height was climbed. Finally, on May 17 the party reached Sebulu, about 18,000 feet above sea level.

After spending a day there the hikers started climbing down the opposite range. The descent was comparatively easy, the only danger being the snow-bound boulders and the crevices in between them. Slowly the party moved to the eastern side of Sikkim and reached the dak bungalow at Yumthang. By this time the rhododendrons were in full bloom and the party passed through country with picturesque scenery and what appeared to be beautifully laid out rock gardens and avenues. Soon they were back in Gangtok.

Recounting his experiences of the trip, Mr. Ghandhy said that, taking the rough with the smooth, the expedition was highly educative and provided good training in mountaineering.

The thirty coolies engaged by the party to carry their kit were an expensive proposition. The expedition was fortunate in having some veteran mountaineers as porters. One of them was Ang Tsering, the sole survivor of the high altitude team sent up by the German Nanga Parbat Expedition. Angdan, another porter, had climbed a height of 27,000 feet on the Everest.

PLANS FOR 1950

It is reported that a Norwegian expedition will attempt to climb Nanga Parbat in the summer of 1950. The challengers are undergoing a 19 month course of training in western Norwegian mountains.

A new expedition to the Everest is also being planned for 1949 or 1950 by an Australian ex-officer of the Royal Air Force, called A. F. Bandit who hopes to lead the expedition. He explained his plans in a broadcast over the BBC in December 1946. He said that he was more confident of success this time because he would have advantage of all the methods and equipments that have been perfected during the War. The commandos, the air rescue parties that had to get to inaccessible places in the mountains, the parachutists and other special Air Force units had made tremendous progress. Then as regards the question of supplies it would be possible to have these dropped by air, which would vastly simplify and economize on transport. Oxygen in the past had consisted of old-fashioned heavy equipment; they could now use modern equipment. This was much lighter and would supply them with oxygen for six or seven hours and would weigh about 15 lbs. against 35 of that used in the 1938 expedition.

There would also be at their disposal self-heating food. This would consist of cans of food with a heating unit incorporated in each individual can. Clothing also had reached a great height of perfection.

All the plans, captain Bandit explained would be made in England; all equipment and supplies would be collected; then it would all be flown in transport planes to Calcutta. It is possible that the journey from the foot of the Himalayas to the base camp at Rongbuk 16,000 feet would be done by air which would mean that food and equipment could be dropped by air.

The base camp would be something like the base of a pyramid. And from that base as they go higher and higher through the advanced camps towards the peak, supplies and men would become smaller and smaller and more highly specialised. This would go on until at last the most successful climber carrying the minimum of equipment necessary to survive would get to the top.

A TOURIST'S GUIDE

MOUNT Abu (hill station): Pop. 4,316, is in Rajasthan, about 4,500 feet above sea-level. There are two seasons in the year, the first lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit:* 1. The Dilwara Jain temples, 2. Achalgarh temples, 3. Ruins of an ancient town called Chandra-vad, 4. Nakhlai Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Hermit's Peak, the highest in the Aravali Hills, 7. Sun-set point, 8. Palanpur point, 9. Devangan temples, and 10. the Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The chief means of conveyance are rickshaws, touring cars and buses. There is a *Dak Bungalow* containing furnished rooms, permission to use which has to be obtained from the Assistant Engineer, P.W.D., Mount Abu. *Clubs:* 1. Rajputana Club, open only to Princes, Chiefs, Government and State Officials, 2. Rajputana Secretariat Club, open to visitors, *Hotels:* Rajputana Hotel. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the B.B. & C.I. Ry. from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station.

Agra: Pop. 284,149, a town in U.P., stands on the banks of the River Jumna. It was the capital of the Moghul Empire during the reigns of Babar and Akbar. *Places worth a visit:* 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Jama Masjid, 4. Moti Masjid, 5. the tomb of Itimad-ud-Daula, 6. the Dewani-Ana, 7. Akbar's tomb at Sikandra, about five miles from Agra, 8. Kalash Temple at Sikandra, 9. Ram Bagh, 10. Government Gardens. *Clubs:* 1. Agra Club, 2. Indian Club. *Hotels:* 1. Cecil Hotel, 2. Imperial Hotel, 3. Empress Hotel, 4. Lauric's Hotel, 5. Agra Hotel. Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the G.I.P. or the B.B. & C.I. or the E.I.R.

Ajmer: capital of Ajmer-Merwara, Hindu and Muslim religious centre, contains B.B. & C.I. railway workshop. Pop. 147,258. *Places worth a visit:* 1. the Durga of Kwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Nagar Lake (built by Shah Jahan), 4. Daulat Bagh, 5. Badh Shahi Building, 6. Taragarh Fortress (built by Akbar), 7. Mayo College, 8. Pushkar (pilgrimage centre, has temple and lake, is about seven miles away). The chief means of conveyance are buses, tongas and pal gharris. *Clubs:* 1. Ajmer Club, 2. Bisset Institute, 3. European Club, 4. Indian Club, 5. Kalabagh Young Men's Association, 6. Railway Institute. *Hotels:* 1. Ajmer Hotel, 2. Empire Hotel, 3. Benares Hindu and 4. Imperial Hotel. Ajmer lies on the metre-gauge section of the B.B. & C.I. line between Delhi and Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the G.I.P. Railway line between Delhi and Bombay.

Ajanta Caves: are 55 miles north of Aurangabad in the State of Hyderabad. The caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archaeology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Hyderabad and Mamnad by the State railway buses which regularly ply between Aurangabad Station and the Ajanta caves.

Amritsar: town in East Punjab, sacred to the Sikhs. Pop. 391,010. Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit:* 1. the Golden Temple standing in the pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are buses and hackney carriages. Fares are fixed. *Clubs:* 1. Amritsar Club, 2. Lumsden Club, 3. Railway Club, 4. Bar Club, 5. Punjab Club, and 6. Service Club. *Hotels:* 1. Amritsar Hotel, 2. Cambridge Hotel, 3. Prince Hotel, 4. Imperial Hotel. Amritsar stands on the main railway line between Delhi and Lahore and Karachi and Pathankot. It is about 33 miles east of Lahore on the East Punjab Railway.

Bangalore: largest city in Mysore and a health resort is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit:* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tippu's Palace, 7. Venkateswaramangalam Temple. The chief means of conveyance are rickshaws, jetties, buses and taxis. *Clubs:* 1. Century Club, 2. Bangalore Race Club.

Hotels: Bombay Ananda Bhavan, Restaurant, Boarding & Lodging, Old Poor House Road and Grant Road, Civil Station, Bangalore 1. Indian Style; Phones: 160, 160A, 368. Telegrams: "Ananda." Central Hotel. In centre of Civil Station. Estd. 1924. Western Style. Telegram: "Central"; Phone: 127, Bangalore. Modern Indian Lodge; Udipi Hotel; West End Hotel.

Baroda: capital town of the former Baroda State, now part of Bombay Province, is about 250 miles to the north of Bombay, modern, pop. 153,301. *Places worth a visit:* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. *Clubs:* Sayaji Vihar Club. *Hotels:* 1. Guest House Hotel, 2. Krishna Nivas Hotel. Baroda lies on the main lines of the B.B. & C.I. Railway between Bombay and Delhi and Bombay and Ahmedabad.

Benares: town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the sub-continent. Pop. 263,100. *Places worth a visit:* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jaisingh's observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandeswar Kothi, 7. Ramnagar Fort, 8. Maidanji Garden, 9. Victoria Gardens, 10. Benares Hindu University, and 11. Sarnath, which is about six miles from Benares. The chief means of conveyance are taxis and tongas. *Clubs:* 1. Benares Club, 2. Kasi Club, 3. Theosophical Society, and 4. Prabhu Narain Club. *Hotels:* 1. Clark's Hotel, 2. Grand Hotel. There are also about 30 *dharmasalas* for Hindu pilgrims. Benares is on the E.I. Railway's branch line from Moghul Sarai to Saharanpur. It is also connected with Allahabad by railway on the B. & N.W.

Bhuvaneshwar: place in Orissa, notable as containing the only relics of the Age of the Gupta. *Places worth a visit:* 1. Lingaraj Temple (visitors are not allowed inside the compound but have to see it from a platform), 2. Mukteswar Temple, 3. Parasurameswar Temple. There is a *Dak Bungalow* where visitors can stay with the District Board's permission. Bhuvaneshwar is on the main B.N.R. line between Waltair and Howrah, about 20 miles from Cuttack.

Bijapur: town in the Bombay Presidency, capital of the old Muslim kingdom of Bijapur

is full of the remains of palaces, mosques, tombs of the rule of the Adil Shahi kings. *Places worth a visit:* 1. Jamī Masjid (the greatest mosque in South India), 2. Goli Gumbas (the tomb of Muhammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Asrar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Alai-Ji-Maidan, (Great Gun), 10. Landi-Kasab (cave), 11. Haidar Burj (tower), 12. Ibrahim Roka (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, Jod Gumbaz (double tombs), 17. Jara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, lorries, tongas and bullock carts. *Clubs:* 1. Darbar Club, 2. European Gymkhana Club, 3. Tennis Club, 4. Union Club. *Hotels:* Arogya Nivas. Bijapur is a railway station on the Gadag-Sholapur section of the M. & S. M. Railway. There are a *dharmasala* and a *dak bungalow* about one and a half miles from the station.

Bombay: second city and port in India generally called the gateway to India, is big, western, modern. Pop. 3 million. May and October are the hottest months, but from November to March it is very cool. *Places worth a visit:* 1. the Gateway of India, 2. Apollo Temple, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the G.I.P. Railway, 8. the General Post Office, 9. Crawford Market, 10. Brabourne Stadium, 11. Chowpatty sands, 12. Malabar Hill and Hanging Gardens, 13. Central Station, terminus of the B. B. & C. I. Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. *Places worth a visit:* Bombay which is worth a visit are 1. Juhu (seaside resort), 2. Versova (seaside resort), 3. Vihar Lake (from which the city gets its water-supply), 4. Kennerly Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pali (hot springs and small game shooting), 12. Elephanta Caves (originally Buddhist rock-cut, contain carved Hindu deities). The chief means of conveyance in Bombay are trams, buses, electric railways, taxis and tongas. *Clubs:* 1. Bombay Club, 2. Bombay Commercial Gymkhana, 3. Bombay Flying Club, 4. Bombay Gymkhana, 5. Bombay Presidency Golf Club, 6. Catholic Gymkhana, 7. Cricket Club of India, 8. Islam Gymkhana, 9. Orient Club, 10. P. J. Hindu Gymkhana, 11. Princess Mary Victoria Gymkhana, 12. Ripon Club, 13. Rotary Club, 14. Royal Bombay Yacht Club, 15. Royal Western India Turf Club, 16. Western India Automobile Association, 17. Willington Sports Club, 18. Y.M.C.A., and 19. Y.W.C.A.

Hotels: Grand Hotel (Bombay) Ltd., Ballard Estate, Bombay. Phone Nos. 23567 and 27333. Telegram: "Grandotel".

Majestic Hotel, Opp. Prince of Wales Museum, Bombay. Western Style. Phone: 35021 (8 extensions). Grams: "Celestial".

Ritz Hotel, Churchgate Reclamation, Fort, Bombay. International Style. Phone: 22091 (6 lines). Grams: "Ritzhotel".

Taj Mahal Hotel, Apollo Bunder, Bombay. 300 rooms, International Style. Phone: 35001 (15 lines). Grams: "Palace", Bombay.

Bombay is one of the termini of the G.I.P. and the B. B. & C. I. Railways.

Brindavan: holy place of Hindus, about five miles north of Muttra in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. *Places worth a visit:* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Maudir

Kangra Valley : famous for its magnificent landscapes and historic temples, lies in East Punjab. Semi-urban concentrations are Kangra, Dalhousie and Dharamsala. Places worth a visit in Dharamsala are : 1. Bhagsunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars.

and buses. **Clubs:** Raja Raghu Singh Club (Dharamsala). **Hotels:** 1. Arranmoor (Dalhouse), 2. Grand View (Dalhouse), 3. Stiffle's (Dalhouse), 4. Switzer's (Dharamsala). There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Jogindranagar in the Mandi State. Dharamsala can also be reached from Pathankot by car.

Kashmir: unsurpassed for the beauty of its mountain, lakes and valleys is a State called the State of Kashmir and Jammu, situated in the north of India. The State is also famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. The normal recreations include trips on lakes in house boats and mountain climbing. Other attractions in the State are big and small game, golf, fishing and swimming. Gulmarg in Kashmir is a place where wealthy people congregate for winter sports. The capital is Srinagar. Besides Srinagar and Gulmarg and other places which are worth a visit are Pahalgam, the summer capital, about 60 miles from Srinagar, and Amarnath, a place of pilgrimage about 30 miles from Pahalgam. The way into Kashmir is from Rawalpindi or Sialkot both of which are on the North-Western Railway. From Rawalpindi one goes by motor by car or bus to Srinagar, the journey taking about forty-eight hours. The other way to Srinagar is from Jammu which is a terminus on the North-Western Railway. From Jammu one goes by road to Srinagar. All along the way there are dak bungalows and excellent catering arrangements. Medical relief is available, so are postal and telegraph facilities. **Srinagar:** the winter capital is situated on the river Jhelum. It is a little over 5,000 feet above sea-level. The chief means of conveyance are boats, tongas, cabs or buses. **Places worth a visit:** 1. The Moghul Gardens, like a. Shalimar, b. Chashama, c. Aachabal, and d. Nisbat. 2. The lakes like a. Dal Lake, b. Wular Lake, c. Anchar Lake, d. Manasbal Lake and so on. 3. Places of historical and religious interest like a. Martand temple, b. Pandratan temple, c. Bhaumazai caves, d. Avantipur and e. Pari Mahal. **Clubs:** 1. Anarsingh Club, 2. Srinagar Club. **Hotels:** 1. Indian Muslim Hotel, 2. Mount View Hotel, 3. National Hotel, 4. Nelson's Hotel, 5. Park Hotel, 6. Royal Hotel. **Gulmarg:** an ideal hill station about twenty-five miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter play-ground affording scope for skating, skiing, tobogganing and golf. Round about are ideal places for walks, rides and excursions.

Kodikanal: famous hill station on the Paim Hills in South India. It is about 7,000 feet above sea-level and is neither too hot nor too cold. The average annual rainfall is 65 inches, the major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodikanal is the delight of the gardener and plants are in bloom all the year round. **Places worth a visit:** 1. the lake skirted by a three-mile road, 2. the water falls like a. Fairy Falls, b. Silver Cascades, c. Bear Shola Falls, d. Glen Falls, e. Pamber Falls, 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vembadi Shela Peak, e. Dolphin's Nose. Then 4. the Solar Observatory. **Clubs:** 1. Golf Club, 2. Kodikanal Boat Club, 3. Kodikanal Club.

Hotel: Carlton Hotel—Kodai Hills, Kodikanal (via Madras). Eastern and Western style. **Season:** All twelve months of the year. **Telegram:** "Carlton." Phone No. 52.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodikanal is reached from Kodalkanal railway junction on the South Indian Railway via Trichinopoly. Kodikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motoring road.

Kanarak or Konark: place in Orissa, famous as the site of the Temple of the Sun God otherwise called Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. A great part of the temple is destroyed but the porch stands with the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of Puri Temple is generally supposed to have come from Kanarak. Kanarak is about 20 miles from Puri with which it is connected by road which is about 50 miles long.

Kotagiri: hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is regular bus service. Between Kotagiri and Ootacamund the road goes over Doddabetta the highest peak in the Nilgiri Hills.

Kulu Valley: well-known for the variety of its scenery and places of historical interest is situated in East Punjab, north of Simla and east of the Kangra Valley of which it forms a subdivision. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the railheads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhauladhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Ant after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Baghi Nathji at Sultanpur and Jamlu of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultanpur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raison, 8 miles from Sultanpur and 4,600 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels. 3. Katrain, is in the widest part of the Valley, 12 miles from Sultanpur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a hotel. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultanpur and is situated amid typical alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snow-fall the rest of the valley is open throughout the year. There is regular bus service from Pathankot and Nagrota to Kulu. Amritsar is the main railway junction for Kulu. From Amritsar a line runs to Pathankot and thence to Nagrota which is the railhead.

Lucknow: the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass

ware, wood and ivory carvings and gold and silver embroidery on cloth. Legend connects the founding of the city with Laxmana, the brother of Rama, the mythical hero of the Hindus, and is sometimes called Laxmanpur. Pop. 387,177. The chief means of conveyance are tongas, ekkas, phantons and taxis. **Places worth a visit:** 1. Great Imambara, 2. Small Imambara, 3. tomb of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattri Manali, 6. Dilkhusha Palace, 7. Moti Mahal, 8. Machi Bhawan Palace, 9. Juma Masjid, 10. Chhatragh, 11. Alam Bagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the E.I.R.

Madras: the third largest city in the sub-continent and the capital of the Madras Presidency. It is the place where the English first settled to trade. Pop. 777,481 (1911 census). The chief means of conveyance are rickshaws, tukas, horse carriages, taxis, buses and trams. **Places worth a visit:** 1. Fort St. George (contains the oldest Protestant church in the sub-continent where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 3. Marina and the Aquarium. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points. The Aquarium is one of the best of its kind in the world, 6. The Museum, 7. Connemara Library, 8. the Zoo, 9. the Observatory, 10. Moor's Market, 11. Parthasarathy Temple, 12. Mylapore Tank and Kapaleswar Temple, 13. St. George's Cathedral, 14. St. Thomas Mount, 15. Race Course, 16. Buckingham and Carnatic Mill, 17. Madras Pencil Factory and 18. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 65 miles from Madras and can be reached by rail and road, 2. The seven Pagodas of Mahabalipuram, which can be reached by road from Chingleput Railway Junction. **Clubs:** 1. Adyar Club, 2. Ladies Recreation Club, 3. Madras Boat Club, 4. Madras Gynkhanas Club, 5. Madras Cricket Club, 6. Madras Cosmopolitan Club, 7. Madras United Club, 8. Madras Yacht Club, 9. South Indian Athletic Association, 10. Y.M.C.A. **Hotels:** 1. Ambala Cafe, 2. Hotel Boretti, 3. Connemara Hotel, 4. Modern Cafe, 5. Modern Hindia Hotel, 6. Spencer's Hotel, 7. Chesney Hall, 8. Clarence.

Madura: the second biggest city in the Madras Presidency is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The silk-weaving industry of Madura is also noteworthy. **Places worth a visit:** 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are a. Nandi Hall, b. temple of the Saints, c. the Jewel House, d. the Stable Houses. Then there is 2. Tirumal Nayak's Palace.

Mahabaleshwar: a hill station in the Bombay Presidency, the season being April and May. It is 4,500 feet above sea-level and is noted for its dry and bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and a drive in a car. Among the sports which are available are tennis, golf and polo. **Places worth a visit:** 1. the two Government Houses old and new, 2. Rose Garden and 3. the two temples Krishna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point and so on. Then there are the waterfalls like Chinaman Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Yenna Lake. The places of historical interest

are all connected with the name of the Mahratha leader Shivaji such as Kamalgarh Fort, Makrandgarh Fort, Pandaygarh Fort, Pratapgarh Fort and Raigarh Fort. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahabaleshwar. *Clubs*: 1. European Gymkhana, 2. Hindu Gymkhana, 3. Parsi Gymkhana.

Hotels: Fountain Hotel, Mahabaleshwar. Western style. Phone No. 78; Telegrams: "Fountain Hotel," Mahabaleshwar;

Central Hotel; Dave Hindu Hotel; Bina Hotel; Frederick Hotel; Race View Hotel; Rajmahal Hotel and Ripon Connaught Hotel.

Mahabaleshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahabaleshwar is only about half-an-hour's journey.

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghata. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention:

1. Garbat Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, murchals and horses are the chief means of conveyance. *Clubs*: 1. Cosmopolitan Gymkhana, 2. European Gymkhana, 3. Parsi Gymkhana.

Hotels: Rugby Hotel, opp. Rugby Park, Matheran. Western style; Phone No. 37; Cecil Hotel; Lord Hotel; Points Hotel; Regal Hotel; Gili Vihar.

Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

Mussoorie: hill station in U.P. lies to the north of Dehra Dun. It is 7,000 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. The means of conveyance are rickshaws, ponies, dandies, buses and cars. *Places worth a visit*: 1. The Falls like a. Bhatta Falls, b. Kemptee Falls, c. Heerasy Falls, d. Mossy Falls, 2. Wimpy's Tank, 3. Band-stand. *Clubs*: 1. Himalayan Club, 2. Mussoorie Club. *Hotels*: 1. Charlotte Hotel, 2. Kashmir Hotel, 3. Roseleigh Hotel, 4. Savoy Hotel. Mussoorie is reached from Dehra Dun by car and is about two hours' journey.

Mysore (State): commemorates the destruction of Mahabaleshwar, the monster by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and bisons are also numerous. *Places worth a visit in Mysore State*: 1. The Chenna Kesava Temple at Belur, 25 miles from Hassan, 2. Srivasanandam Falls on the Cavery River, 3. Hoysaleswara Temple at Halebidu, 4. Gersoppa Falls also called the Jog Falls on the Saraswati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power.

6. Nandidurg, a hill station near Bangalore, and the summer residence of Tippu Sultan, 7. Seringapatam of historical and religious interest as the capital of Tippu and as the city of many temples, 8. Shravanabelgola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

Mysore (City): the capital of the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarah. *Places worth a visit*: 1. the various palaces like the Maharaja's Palace, Jagannathan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are jukkas, coaches, and taxis. *Clubs*: 1. Cosmopolitan Club, 2. Mysore Club. *Hotels*: 1. Anand Bhavan, 2. Krishna Bhavan, 3. Modern Cafe, 4. Modern Hindu Hotel. Mysore is one of the termini of the Mysore Railway.

Naini Tal: hill station and summer capital of the U.P. Government, is about 6,400 feet above sea-level. Among the principal recreation are hiking, boating and yachting on the lake on which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit*: 1. Cheeva Peak, 2. Land's End, 3. Lariya Kanti Peak. *Clubs*: 1. Naini Tal Club, 2. Y.M.C.A. *Hotels*: 1. Empire Hotel, 2. European Hotel, 3. Grand Hotel, 4. Manor Hotel, 5. Naini Tal Hotel. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Muttra. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

Ootacamund: hill station and summer capital of the Madras Presidency stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called "the Queen of the hill stations." One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57.53; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise, plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit*: 1. Botanical Gardens, 2. Race Course, 3. the Palaces, 4. Assembly Room, 5. Doddia Betta, the highest peak in the Nilgiris, and 6. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are jukkas, rickshaws and taxis. *Clubs*: 1. Hunt Club, 2. Ootacamund Club, 3. Ootacamund Gymkhana Club. *Hotels*: 1. Modern Hindu Hotel, 2. Cecil Hotel, 3. Savoy Hotel. Ootacamund is the terminus of the Nilgiri Metre-Gauge Railway.

Pachmarhi: hill station and summer capital of the Central Provinces lies on the Mahadeo hills of the Satpura Range and is about 4,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forests. *Places worth a visit*: 1. Bee Dam, 2. Mahadeo Hills Cave, 3. Dhupgarh, 4. Dorothy Deep Falls, 5. Durbess Falls, 6. Lansdowne Hill, 7. Nilphur springs. *Hotels*: 1. Pachmarhi Hotel, 2. Royal Hotel. Pachmarhi is reached from Pipariya station on the main G.I.P. Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

Puri: famous for the Jagannath Temple, is a coastal town in the Province of Orissa and is the Province's summer capital. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide

importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. One interesting feature of the place is that in the matter of taking the prasad no caste distinctions are recognised, a practice unknown elsewhere in the country. A reason given is the influence of Buddhism. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths).

Rameshwaram: an island to the south-east connected with the mainland by railway across the Palk Straits. It contains the Ramatheswary Temple believed to be the richest in India. Legend says that the temple was built by Sri Rama himself before voyaging across Ceylon to do battle with the kidnapper of his wife. Rameshwaram is thus one of the most famous centres of pilgrimage in the whole country. According to history the temple which took 350 years to complete was built in the 15th century with the help of a Ceylon prince. The temple is typical of Dravidian sculpture and architecture. Off Rameshwaram where the Arabian Sea meets the Indian Ocean is a sacred bathing ghat. *Other places worth a visit*: 1. the tombs of Cain and Abel near the railway station, 2. Noah's Ark on the Dhanuskodi Beach, a funny-shaped stone structure, 3. the other temples of Rameshwaram all of which are noted for their style. Rameshwaram is reached from Pamban Junction on the Madras Dhanuskodi Railway.

Sanchi: small village in Bhopal State, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with red stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. Sanchi is on the main G.I.P. line between Bombay and Delhi. There is a state-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Kathiawar, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (tirtha) of Shwetambara Jains. There are a great number of temples in groups on touks or summits. The most important one is the touk of Adishwara Bhagavan. The ancient image, consecrated by the prophet's son, Babulal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained Nirvana or abhaya. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Simla: the summer capital of the Government of India and the Government of East Punjab, it is situated on a spur of the Himalayas at a height of 7,100 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit*: 1. Viceregal Lodge, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra, 7 miles away. There is a very good road into the interior and hikers to Narkunda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses. *Clubs*: 1. Anandale Gymkhana, 2. Catholic Club, 3. Y. M. C. A.

Hotels: Cecil Hotel; Telegrams: "Cecil"; Corstorphane's Hotel; Telegrams: "Corstorphane's";

Clarkes Hotel. Telegrams: "Clarkes"; Grand Hotel; Hindu Hotel and Taj Hotel. Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel

by road, the journey taking 3½ hours. For cheaper travel there are buses now which regularly run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage.

Srirangam : an island on the Cauvery, two miles north of Trichinopoly, contains the largest temple in India. The temple is consecrated to Ranganatha. Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoysala and Vijayanagar are all found on it. The north gopuram is 152 feet high.

Trichinopoly : the third largest city in the Madras Presidency is situated on the Cauvery. It is a very ancient city and was the strategic capital of the Chola and Naik kings. Trichinopoly is also known as the Kashi of the South. It is now a great educational centre. *Places worth a visit* : 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or the water-phallus. *Clubs* : Trichinopoly Club. *Hotels* : Roberts Hotel.

Tanjore : in the delta of the Cauvery river in the Madras Presidency is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit* : 1. the temple of Brihadishvara built by Raja-Raja the great, 2. Naik's Court, 3. Mahratha Court (the two together are often called the Palace in Tanjore), 4. the Bull Nandi. The chief means of conveyance are jukas and taxis. *Clubs* : 1. Cosmopolitan Club, 2. Union Club. *Hotels* : Ananda Lodge. There are also good dak bungalows. Tanjore is reached from Madras by the South Indian Railway.

Travancore : the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domain. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of coconut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest

of virgin jungle, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo, except during the monsoon.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin, the Lands End of India, is the southern most point of Travancore where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

THE FRONTIERS

THE frontiers of India consist of Tibet, Nepal, Bhutan, and, of course, Pakistan, while Assam in India and Eastern Pakistan have a common frontier with Burma.

TIBET

Now we can go on to deal with the three frontier regions—Tibet in the north and Nepal and Bhutan in the north-east.

Tibet has long held the imagination of the Indian sub-continent. To India she owes the main elements of her religion, Buddhism (first introduced in the seventh century A.D.), and also of her literature—a Tibetan alphabet based on the Dev Nagri Sanskrit character was first compiled at the time of the introduction of Buddhism, and many translations from Pali and Sanskrit manuscripts were made. But Tibet's chief interest to India in the modern world lies in the fact that she is co-terminous with India and Nepal for some 2,000 miles, and that "along this enormous distance her physical nature constitutes a barrier equal or superior to anything that the World can show elsewhere". At present India's North-East Frontier presents no problem similar to that of Pakistan's North-West. In order that this may continue, it is an Indian interest that Tibet should remain a strong mistress in her own house.

In earlier days, Tibet was a successful military power capable of threatening Indian and Chinese neighbours alike: an inscription of the eighth century A. D. at Lhasa indicates that China paid tribute at that time to Tibet. The introduction of Buddhism apparently softened earlier aggressive militarism. The conversion of Kublai Khan, the first Mongolian Emperor, to Lamaism led to strong cultural connections between the Mongolian Emperors of China and Tibet. It was a Mongolian Prince who, in the sixteenth century A. D., established the present line of Dalai Lamas. Early in the 18th century, taking advantage of internal dissensions in Tibet between Mongols and Tibetans, the newly established Manchu dynasty adopted an aggressive policy. From that time until the Chinese revolution (1911) the Manchu dynasty maintained officers at Lhasa, although their authority decreased in time to a merely nominal suzerainty until finally in 1911 the Chinese forces were evicted and permitted safe conduct through India.

RELATIONS WITH INDIA

In the latter part of the 18th century Warren Hastings succeeded in establishing friendly contacts with the Tashi Lama at Shigatse. But this led to nothing of a permanent nature owing to unfortunate suspicion that the British had encouraged the Nepalese invasion of Tibet in 1792. From then on Tibet remained a closed country except to the courageous Funduts of the survey of India and a few others such as Manning, until the Younghusband expedition of 1904. In 1873 the Chinese agreed to protect any British Mission which might enter Tibet; but the mere fact that the British accepted Chinese sponsorship in such a matter appears to have aroused Tibetan resentment and necessitated the abandonment of the proposed Mission.

This indication of weakness led to a Tibetan invasion of Sikkim. The Chinese were incapable of exercising any remedial influence and after one year's delay the Tibetans were expelled by force. A treaty and trade regulations were concluded with the Chinese in 1890 to regulate the frontier, but it soon became evident that the Tibetans had no intention of acknowledging such an agreement, and that the Chinese were unable to secure its respect. After some years of frustration Lord Curzon sought to remedy matters by means of direct approach to the Dalai Lama, but all his letters were rejected and returned unopened.

At the same time the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian named Dorjief, who had established a remarkable ascendancy in the councils of the Dalai Lama. After a few years' residence at Lhasa, Dorjief went to Russia on a confidential mission in 1899. At the end of 1900 he returned to Russia at the head of a Tibetan Mission of which the head was officially described in Russia as "the senior Tsanite Khomba attached to the Dalai Lama of Tibet". This Mission arrived at Odessa in October 1900 and was received in audience by the Tsar at Livadia. Dorjief returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan Mission where, as bearers of an autograph letter from the Dalai Lama, they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjief had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protection of Russia. This rumour was afterwards officially contradicted by the Russian Government.

EXPEDITION OF 1904

In view of these conditions the Government of India proposed in 1903 to despatch a mission, with an armed escort to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed in conjunction with the Chinese Government, to a joint meeting at Khamah Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative. But after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached.

There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890; to open trade marts at Gyantse, Gartok and Yatung; to pay an indemnity of £500,000 (seventy-five lakhs of rupees); the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary. Later the amount of indemnity was reduced from seventy-five to twenty-five lakhs of rupees, to be paid in 3 years; the period of occupation of the Chumbi Valley was likewise reduced.

In June, 1906, the British concluded a convention with China which purported to regulate the position in Tibet. Thereunder Great Britain agreed neither to annex Tibetan territory nor to interfere with the internal administration of the country, and China undertook not to permit any other foreign state to do so. The Chinese Government paid the indemnity in 3 years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts (Yatung, Gyantse, and Gartok) and the establishment of a Trade Agency at Gyantse.

Chinese Action—The approach of the Younghusband Mission to Lhasa led to the flight of the Dalai Lama to Uru, the sacred Buddhist city in Mongolia, leaving the internal government of Tibet in confusion. The 1906 convention explicitly re-affirmed a Chinese suzerainty over Tibet which had in fact become

sketchy; and the Chinese, thus strengthened, proceeded to convert Tibet from a loose form of vassalage into a province of China. In 1908 Chao Erh-feng, acting Viceroy in the neighbouring Province of Szechuan, was appointed Resident in Tibet: his ruthlessness and severity backed by the wild atrocities of the Chinese soldiers exasperated the populace.

The fugitive Dalai Lama had returned by the end of 1909 expecting to resume his temporal and spiritual sovereignty. But it was evident that the Chinese intended to deprive him of all temporal power; and the report that a strong Chinese force was moving on to Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate, sought refuge in India. He was pursued to the frontier by Chinese troops and took up his abode in Darjeeling, whilst Chinese forces overran Tibet.

TRIPARTITE CONVENTION

The British Government acting on the representations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances to the peace of a country which was a neighbour, on intimate terms with other neighbouring States on our frontier, especially with Nepal, and urged that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him.

Here the matter might have rested but for the revolution in China. That revolution broke out in Szechuan, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and, in the House of Lords, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic that Tibet came within the sphere of Chinese internal administration and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government.

In June 1913 the Chinese Government agreed to a tripartite conference between representatives of Tibet, China and Great Britain. The conference met at Simla in 1914, under the presidency of Sir Henry McMahon, and intimated a convention. *Inter alia* this convention recognised the autonomy of Tibet proper ('Outer Tibet'), and created a zone ('Inner Tibet') under Chinese authority subject to certain already existing Tibetan rights. The Chinese Government were unable to accept the boundaries between Inner and Outer Tibet laid down in the Convention, and so refrained from ratifying it, though they accepted the terms of the Convention in all other respects; but the two remaining parties accepted it as binding between themselves.

PRACTICAL EQUILIBRIUM

In 1918 Chinese aggression led to strong and successful Tibetan retaliation. At a time of Chinese weakness Great Britain did its utmost to urge moderation on Tibet, and deputed

Sir E. Telchman to the scene of hostilities. He succeeded in effecting a truce in September 1918; unfortunately it was not possible to convert this truce into anything of the nature of a permanent settlement owing to the growing predominance at that time of the Chinese militarist element under Japanese influence.

In the period of uncertainty following the truce of September 1918, the Dalai Lama sent a pressing invitation to Sir Charles Bell, who had just resigned the post of Political Officer in Sikkim, to visit Lhasa with a view to assisting in a settlement between Tibet and China. While a refugee in India from Chinese aggression, the Dalai Lama had established warm friendship with Sir Charles Bell. After some hesitation, the Government of India permitted Sir Charles Bell to accept this invitation. He reached Lhasa in November 1920 and stayed there a year.

The British Government and the Government of India did not succeed in effecting a permanent settlement between China and Tibet—the chaotic condition of the former country at that time and the precarious condition of the Government in addition to the preoccupations of the Washington Conference impeded their efforts; these efforts did, however, succeed in bringing about a state of practical equilibrium between the two protagonists. But Bell's Lhasa visit will be mainly memorable for the permanent contribution he made to the good relations between Tibet and her southern neighbour; this visit also furnished the foundation for Bell's three valuable studies, "Tibet, Past and Present", "The People of Tibet", and "The Religion of Tibet".

In 1922 in response to the repeated request of the Tibetan Government the Government of India arranged for the construction of telegraphic communication with Lhasa.

During the years following the Washington Conference, Chinese disunity made any permanent settlement between Tibet and China impossible, in spite of the wishes of the Tibetan Government for such settlement.

During the years 1931 to 1933, local disputes and the aggressiveness of local Chinese war-lords led to a period of confused fighting. In the southern sector civil war in Szechuan led to an armistice in November 1932; by February 1933, on the northern sector (owing, it appears, to shortage of military supplies) the Sinkiang war-lord was ready for a truce.

In 1933 the great 13th Dalai Lama died. Since then a Regent has presided over the destinies of Tibet. A new Dalai Lama—now aged 12—was discovered and installed with traditional ceremonial in September 1939. The Tibetan Government admitted to Lhasa a Chinese Mission of condolence on the death of the 13th Dalai Lama and a complimentary Mission on the occasion of the Installation of the 14th Dalai Lama.

PRESENT RELATIONS

The Second World War had no direct effect on Tibet. Tibet's main export, wool, increased in value. The Tibetan Government agreed to the transport through Tibet of supplies of a non-military nature required for China, and this traffic brought and still brings large profits to those engaged in it.

Relations between the Government of Tibet and Nepal are regulated by a treaty signed in 1866 since which date Nepal has maintained a representative at Lhasa, at present Major Kalsher Bahadur.

The Republic of China has had a representative at Lhasa (at present C. H. Chien), since 1939.

Indian relations with Tibet were conducted through the agency of the Political Officer in Sikkim, with the assistance of Trade Agents at Gyantse, Yatung and Gangtok till 1936 when direct contacts were established. Since

Sir Charles Bell's visit in 1920-21, the Political Officer in Sikkim has visited Lhasa on several occasions at the invitation of the Tibetan Government, viz., 1924 (Colonel F. M. Bailey); 1930 and 1932 (Colonel J. L. R. Weir); 1933 and 1935 (F. M. Williamson); 1936, 1940 (Installation of the 14th Dalai Lama) and 1944 (Sir Basil Gould); 1945 and 1946 (A. J. Hopkinson).

In 1936 Sir Basil Gould left behind one of his colleagues. Since that date a representative of the Government of India has maintained direct contact with the Government of Tibet at Lhasa.

In 1946 the Tibetan Government deputed a Good-will Mission from Lhasa bearing victory congratulations. The Mission, numbering 8 officials, first proceeded to New Delhi where they formally presented letters and gifts from the Tibetan Government to His Majesty the King Emperor, His Excellency the Viceroy and the President of the United States. They were formally received by His Excellency the Viceroy and the American Commissioner in India, the Hon'ble George Merrell, and attended victory celebrations. Thereafter they did a short tour to places of interest in the Indian sub-continent. On the completion of this tour they proceeded to China by air where they made similar formal presentations to His Excellency Chiang-Kai-Shek and were formally received by him.

For the year ending 30th June, 1945 Tibetan imports *via* Sikkim were valued at approximately Rs. 8 lakhs and exports at approximately Rs. 35 lakhs. The main item under the former head was cotton piecegoods and Indian tea. The main export item was wool.

Political Officer in Sikkim: H. Dayal, I.C.S.

THE NORTH-EASTERN FRONTIER

The position on the northern frontier has been contiguous as if the Indian frontier were contiguous with that of Tibet. This is not so. The territories on this frontier are actually the independent Kingdom of Nepal, the Sikkim State and Bhutan. From Chitral to Gilgit, now the northernmost posts of the Indian Government to Assam, with the exception of the small wedge between Kashmir and Nepal, where the Indian district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles, there is a narrow strip of territory between India and the true frontier.

The first of these frontier States is Kashmir which is almost the only important State which has acceded to India with frontier responsibilities. And these responsibilities the State worthily discharged through the agency of its efficient State troops composed mainly of Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladak.

Then comes the long narrow strip of land called Nepal. This Gurkha Kingdom stands in special relation with the Indian Government. It is the main Indian outpost against Tibet or against foreign aggression through Tibet.

Beyond Nepal are Bhutan and Sikkim (q.v.) whose rulers are Monolian by extraction and Buddhist by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and by taking a guarantee in return that Bhutan would be guided by them in its foreign relations. Afterwards China was officially notified that the rights and interests of Sikkim and Bhutan would be protected.

Assam and Burma.—There now remain the Assam border tribes—the Moubas, Lamai (Mijis), Nisu (Daifas), Abors and others—living between the administered border of Assam and the

external frontier of India, in the region defined by agreement with Tibet in 1914 by Sir Henry McMahon and known as the McMahon line. Excepting the Abors, none of these tribes has given serious trouble in recent years; but in 1911 the murder of Mr. Williamson and Dr. Gregerson by the Minyong Abors made necessary an expedition to the Dihang valley of the Abor country on the N.-E. Frontier. A force of 2,500 and about 400 military police was employed for six months in subduing the tribe. After two or three small actions the "murders" were given up. At the same time friendly missions were sent to the Mishmi and Nisu countries. The border region is some of the most difficult country in the world and the maintenance of close contact with the tribes has always been far from easy.

In the hills between Assam and Burma various Naga tribes predominate from Manipur northwards, and tribes of the Chin-Lushai stock from Manipur southwards. Administration has not yet been extended to all the Naga tribes and cases of head-hunting still occur in the more remote areas.

In 1947, the Government of India approved a Five Year Development Plan for the tribal areas of the N.-E. Frontier, a plan which contemplates the building of roads, schools and hospitals. Work on the plan commenced in the winter of 1947.

NEPAL

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,500,000, chiefly Hindu. The greater part of the country is mountainous, the lower slopes alone being cultivated. Above these is a rugged border wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29,002 feet) and others of slightly less altitude.

The country before the Gurkha occupation, was split up into several small kingdoms under N-war kings. The Gurkhas under Prithi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhaktagon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family, Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, a right which is still enjoyed by the descendants of the Rana family. This right was conceded in a signed document called *Panyatra*. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with western conditions and outlook.

The rule of one of the Prime Ministers Maharaja Chander Shamsher Jang Bahadur Rana deserves special mention. It was he who placed Nepal on the path of progress. During his long rule of 32 years he introduced reforms in all departments of administration. He abolished slavery in spite of violent opposition. He prohibited Sati. He was responsible for the spread of education; he opened a college for higher education at Kathmandu and strove hard to bring light and knowledge to the people of Nepal. He reformed the method of dispensing justice and also the judiciary. In short Nepal owes much to this courageous and wise administrator.

After his death he was followed by his brothers Maharajas Bhim Shamsher Jang Bahadur Rana and Juddha Shamsher Jang Bahadur Rana successively as Prime Ministers. Both of them carried on steadily the work of reform inaugurated by Maharaja Chander Shamsher.

Administration.—The Government of the country has generally been in the hands of the Prime Minister of the day. Since the time of Jung Bahadur this system of Government has

been clearly laid down and defined. The sovereign or Maharajadhiraja, as he is called, is but a dignified figure-head, whose position can best be likened to that of the Emperor of Japan during the Shogunate. The real ruler of the country is the Prime Minister who, while ruling the country, coupled with his official rank the title of Maharaja. Next to him comes the Commander-in-Chief who ordinarily succeeds to the office of Prime Minister.

The present king of Nepal is His Majesty Maharajadhiraj Tribhuvana Bir Bikram Jung Bahadur Shah Bahadur Sham Shere Jung Deva, and the Prime Minister Mohan Shamsheer Jang Bahadur Rana.

Economy.—Rice, wheat and maize form the chief crops in the low-lands and in some parts of the hills too. Mineral wealth is supposed to exist but has not as yet been either prospected or developed.

There is a bank and a jute and cotton mill. The starting of sugar and woollen industry is under consideration. Communication in the hills is necessarily primitive owing to the difficult nature of the country but improvements are being made from time to time. Since 1920 the vehicular traffic from Amlekhganj to Bhimphedi, the base of a steep ridge in the main route to the capital of the country from India, goes over a well maintained permanent road linking up with the 18 mile-long ropeway which was opened in 1927. A motor trolley service which was installed in 1934 joins up the ropeway terminus with the customs house for transport of goods traffic. The telephone from Kathmandu to Birganj, which has been extended to Rasaul, now forms part of the 300 miles main line extending from Kathmandu to Biratnagar and Dima Kunta in the easternmost part of the Nepal terai.

The revenue of the country is about two crores of rupees per annum.

The standing army is estimated at 45,000.

The state is of considerable archaeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by inscriptions on pillars.

The relations of Nepal with the Government of India are regulated by the treaty of 1816, which brought to an end the Nepal War, and by subsequent agreements. By virtue of the same treaty either Government maintained a representative at the Court of the other while Nepal's treaty relations with Tibet allow her to station a representative at Lhasa. Ever since the conclusion of the treaty of 1816, the friendly relations with the British and Indian Governments have been steadily maintained. During the first World War Nepal gave valuable assistance to the Allies in recognition of which she received an unconditional annual present of rupees ten lakhs to be paid in perpetuity from Indian revenues. To strengthen further the bonds of friendship that has subsisted so long between the two countries, a new treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

When the Second World War broke out, Nepal again came forward with an offer of help and in the early part of 1940 sent 8 Battalions of her regular army to the sub-continent for the defence of its frontiers against foreign

aggression. Three Battalions of these took an active part in checking the inroads of the Japanese and driving them back deep into Burma while the two Auxiliary Pioneer Battalions which were sent later played no less important a part in the construction of the Ledo road. In recognition of this help the annual grant referred to above was enhanced to twenty lacs of rupees and payment of the capitalised value of fifty per cent of it was also made.

After Transfer of Power.—With the transfer of power which took place in the sub-continent on the 15th August 1947, it was decided to exchange representatives at the highest level between the Governments of India and Nepal. Sardar Surjit Singh Majithia was appointed as Ambassador for India in Nepal and Commanding General Singha Shum Shere Jung Bahadur Rana as the Nepalese Ambassador to India.

INDIAN EMBASSY IN NEPAL

H. M.'s Ambassador for India, H. E. Wing Commander Sardar Surjit Singh Majithia.

First Secretary, Dr. S. Gupta.

Superintendent & Treasury Officer, Sri P. S. Krishnaswamy.

NEPALESE EMBASSY IN INDIA

Nepalese Ambassador in India, H. E. Commanding General Sir Shingha Shumshere Jung Bahadur Rana, K.B.E.

Counsellor, Lt.-Col. G. S. Thapa.

First Secretary, Mr. P. N. Pradhan.

Military Attache, Captain S. B. Basnyat.

The Nepalese Legation in London and the British Legation in Nepal have also been raised to Embassies. Commanding General Kaiser Shum Shere Jung Bahadur Rana is the first Nepalese Ambassador at the Court of St. James', and Lt.-Col. G. A. Falconer, H.M.'s Minister in Nepal is the first British Ambassador in Nepal.

BHUTAN

Bhutan (area 18,000 sq. miles) is an independent Himalayan State, under the protectorate, in respect of foreign relations, of the Government of India, possessing a fertile soil and temperate climate. The population, computed to number about 300,000, are sturdy folk of Tibetan affinities: in recent times there has been a considerable Nepalese immigration in the foot-hill region.

Though politically independent of Tibet Bhutan is susceptible to Tibetan influence; for the Bhutanese share the religion and culture of Tibet, and look to the Dalai Lama as their spiritual head. In former times, China exchanged presents with Bhutan, but did not establish effective suzerainty.

For some 250 miles Bhutan dominates a tract of land, singularly rich and fertile, situated partly in Bengal and partly in Assam, known as the 'Eighteen Duars' ('Duar' being a 'door' or 'pass'). This area and what is now the State of Cochin Behar formed the traditional happy hunting-ground of Bhutanese free-booters. Indeed it was the forcible abduction of the Cochin Behar Raja and his brother that led indirectly to the first intercourse between 'John Company' and Bhutan. This

Bhutanese aggression was followed by a small successful expedition under a Company Officer. This led the then Tashi Lama (who was also Regent of Tibet) to address a friendly letter to Warren Hastings, interceding on behalf of the erring Bhutanese. Warren Hastings immediately responded by deputing Bogle's 'Good-will Mission'. Bogle travelled *via* Bhutan, and *en route* established cordial relations there (1774). These continued till 1792. In that year Nepal invaded Tibet. The Chinese suspected that the Bengal authorities had engineered this invasion, and by their influence induced the Bhutanese to shut the door.

The suspicion and hostility thus engendered was accentuated, when the Company, extending its influence to Assam, on the expulsion of the Burmese (1825), became heir to the uneasy relations existing between the Assamese and Bhutan: conditions prevailed comparable with those in the Derajal on the Waziristan border at their worst. Between 1837 and 1864, thirty cases of plundering occurred, and at least 25 Indians were known to have been carried off into slavery. Meanwhile 50 outrages were committed in Cochin Behar territory (one involving over Rs. 20,000 worth property), and 69 residents of the State were kidnapped.

The upheaval of 1857 served to postpone settlement. An envoy (Mr. A. Eden) sent in 1863, charged with proposals of a conciliatory character, but instructed to demand the return of all captives and plundered property and security for the future peace of the frontier, was insulted in open Darbar and put under duress. The Bhutan War of 1864 led to the conclusion of the Treaty of Sinchula in January, 1866. Bhutan ceded in perpetuity the whole of the 18 Duars and in return received a subsidy of Rs. 50,000 a year.

From that date relations with Bhutan were excellent, and the bonds between Bhutan and India grew closer, until, in 1910, in return for an increase in the subsidy of Rs. 50,000 paid under the Sinchula Treaty to Rs. 1,00,000, that treaty was amended to include a provision that Bhutan's foreign relations should be controlled by the British (now Indian) Government at the same time undertaking to exercise no interference in the internal administration of Bhutan. Under another agreement the Bhutan Government undertook to remove all liquor shops from within a 10-mile zone of the Indian District borders in return for an annual compensation of Rs. 1,00,000.

In 1907 the leading chief of Bhutan, Tongaa Penlop Ugen Wangchuk was elected by the unanimous votes of Bhutan Chiefs and a number of monks as hereditary Maharaja of Bhutan. He was succeeded in 1926 by his eldest son, now his Highness Maharaja Sir Jigme Wangchuk, K.O.B.I., K.O.I.E.

Stand-Still Agreement.—On the transfer of power in India in August 1947, the Bhutan Government entered into a stand-still arrangement with the Government of India, pending the conclusion of negotiations.

Bhutan representatives attended the Delhi Inter-Asian Relations Conference in Spring 1947. The Political Officer in Sikkim visited Bhutan and met His Highness the Maharaja in September 1947.

INDIANS OVERSEAS

THE total Indian (includes Indian and Pakistani) population overseas, according to the latest available estimates, is as follows:—

| Name of country | Indian population | Date of estimates |
|---------------------------------------|-----------------------|-------------------|
| <i>Dominions.</i> | | |
| 1. Australia | 4,544 | 1933 |
| 2. Canada | 1,465 | 1941 |
| 3. New Zealand | 1,116 | 1945 |
| 4. South Africa—Cape | 16,901 (Asiatics) | 1946 |
| Transvaal | 37,505 (") | 1946 |
| Natal | 228,119 (") | 1946 |
| Orange Free State | 14 (") | 1946 |
| 5. Southern Rhodesia | 3,090 | 1947 |
| 6. Ceylon | 732,258 | 1946 |
| <i>Colonies and Protectorates.</i> | | |
| 7. British Malaya* | 604,508 | 1947 |
| 8. Hongkong | 2,500 | 1946 |
| 9. Mauritius | 271,636 | 1946 |
| 10. Seychelles | 285 | 1947 |
| 11. Gibraltar | 41 | 1946 |
| 12. Nigeria | 375 | 1947 |
| 13. Kenya | 90,900 | 1948 |
| 14. Uganda | 33,900 | 1948 |
| 15. Nyasaland | 3,100 (Asiatics) | 1943 |
| 16. Zanzibar | 16,000 | 1946 |
| 17. Tanganyika | 44,200 | 1948 |
| 18. Jamaica | 26,507 | 1948 |
| 19. Trinidad | 195,747 | 1946 |
| 20. British Guiana | 168,921 | 1946 |
| 21. Fiji Islands | 125,674 | 1947 |
| 22. Northern Rhodesia | 1,484 (Asiatics) | 1947 |
| 23. South African Protectorates | 409 (") | 1936 |
| 24. South West Africa | 14 (") | 1936 |
| 25. Maldives | 550 | 1933 |
| 26. British North Borneo | 1,298 | 1931 |
| 27. Aden | 9,456 | 1946 |
| 28. British Somaliland | 250 | 1946 |
| 29. Malta | 37 | 1948 |
| 30. Grenada | 5,000 | 1922 |
| 31. St. Lucia | 2,189 | 1921 |
| 32. British Honduras | 1,366 | 1946 |
| 33. Sierra Leone | 76 | 1948 |
| <i>Other parts.</i> | | |
| 34. Burma | 1,017,825 | 1931 |
| 35. United Kingdom | 5 to 6,000 | 1947 |
| Total for British Empire | 3,655,200 | |
| <i>Foreign Countries.</i> | | |
| 36. Dutch East Indies | 27,638 | 1930 |
| 37. Siam | 5,000 (approximately) | 1931 |
| 38. French Indo-China | 6,000 (") | 1931 |
| 39. Japan | 250 (") | 1946 |
| 40. Bahrain | 500 | 1933 |
| 41. Iraq | 2,596 | 1932 |
| 42. Muscat | 441 | 1933 |
| 43. Portuguese East Africa | 5,000 | 1931 |
| 44. Madagascar | 12,500 | 1946 |
| 45. Reunion | 1,533 | 1933 |
| 46. United States of America | 2,100 | 1948 |
| 47. Dutch Guiana | 40,777 | 1955 |
| 48. Brazil | 2,000 | 1931 |
| 49. European countries | 1,000 (approximately) | 1930 |
| 50. Panama | 85 (Hindus) | |
| Total for foreign countries | 107,720 | |
| Total for all countries | 3,762,980 | |

* Includes Straits Settlements, Federated and Unfederated Malay States.

ORIGIN

Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purpose of labour dates from the beginning of the 19th century.

From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioca and coconut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand,

carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta.

The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advance being taken of the simplicity and ignorance of emigrants by providing that a magistrate

should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

HISTORY

Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (80 men, the first and last direct emigrants to Australia). In 1938 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1840 gave rise to a system of emigration from French Indian ports to Reunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1855 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Reunion, Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam.

Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to ministerial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana.

A commission of enquiry was appointed, and their report led to important legislation in the Colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

LEGISLATION

In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Fletcher and Mr. Grierson) to ascertain in the N.W.F.P. and in Bengal respectively the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards

emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year.

This Act specified the countries to which emigration was lawful, but empowered the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measure had not been taken for the protection of emigrants, or that the agreements made with them in India were not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out.

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

ENQUIRIES

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the Colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion became strongly opposed to it.

The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time had come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Another development was the appointment of a Standing Emigration Committee, composed of 12 members of the Central Legislature, to advise the Government of India on all major emigration questions, and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed. The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March, 1923, are those which the committee approved, after meeting deputations sent by the two countries.

The Committee, though originally constituted to advise on emigration questions only, always advised the Government on all important matters concerning Indians Overseas. In

April, 1945, its name was changed to that of 'Standing Committee on Commonwealth Relations' and its membership was increased to 14. Its functions now are to advise the Commonwealth Relations Department on all matters with which it is concerned excepting the pilgrimage to Hajjaz.

Safeguards.—It was found that the lack of power to regulate the total flow of emigration or unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas, particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power to prohibit, when necessary, even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14, 1939.

The Indian Emigration Act, 1922, also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work. It was found that illicit emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated under the Act on the 14th Dec. 1939, providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the 'cost of recruitment.' These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1922, were remedied. Now the Protectors of Emigrants can exercise the powers of detention, search, etc., for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 25 and 30A of the Act.

PRESENT POSITION

Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Commonwealth generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several Colonies and Dominions as they were called considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

- (a) Control of emigration.
- (b) Rights of Indians to admission to other parts of the Commonwealth.
- (c) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

So far as unskilled labour is concerned, the Government of India have assumed absolute power of control in accordance with powers conferred on them by the Emigration Act of 1922. The functions of the Government of India were previously performed by the Provincial Governments by virtue of powers delegated to them under Section 124 (1) of the Government of India Act, 1935. With a view to dealing directly with all emigration problems in the post-war period on a uniform all-India basis, the Government of India resumed the administration of those functions with effect from 1st October, 1944, and appointed a Controller General of Emigration in the Commonwealth Relations Dept. for that purpose. (See earlier issues of the Year Book for details.)

A controller of Emigration, Madras has also been appointed to co-ordinate emigration control in the Madras Province. In February 1949, the Constituent Assembly of India

(Legislative) passed an Act extending the *proprio vigore* application of the Indian Emigration Act, 1922 to all Acceding States with a view to control and regulate emigration through ports in maritime States and to extend the protection of the Act to emigrants from such ports.

ADMISSION

On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917, and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visit, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purpose or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed in their wives and minor children on condition: (a) That not more than one wife and her children shall be admitted for each such Indian; and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

Prohibitions.—The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic.

Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds, or on account of his standard or habits of life, to be unsuitable to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right 250 dollars. Since 1930, Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted to and resident in Canada, who is in a position to receive and care for his dependents. Newfoundland and the Irish Free State impose no restrictions.

All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education.

Reciprocity.—India on its side assumed power to regulate the admission of immigrants from any other part of the Empire of foreign countries, by means of passports. By the Immigration into India Act, 1924 the Government of India was empowered to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian

domicile." That Act was repealed in 1943 by the Reciprocity Act, 1943, which enables the Government of India to impose such disabilities in respect of entry into, or travel, residence, etc., upon subjects of any British possession which subjects persons of Indian origin to like disabilities.

For the first time this Act was enforced in December 1944 against South Africans of non-Indian origin in the matter of immigration, residence and municipal franchise.

With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of Indians, which are not placed on other classes of Commonwealth subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya Colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the Colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities.—The policy of the Empire was summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

The representatives of South Africa regretted their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless felt bound to record their profound concern at the position of Indians in South Africa and hoped that by negotiations between India and South Africa a way could be found to reach a more satisfactory position.

A SUMMARY

The present position is as follows:—

Australia.—The majority of Indians in Australia are engaged in retail trade or agricultural operations. The Commonwealth franchise was granted to Indians domiciled in Australia in 1925. In the States of New South Wales, Victoria, South Australia, Queensland and Tasmania, Indians are not disqualified on racial grounds for the State franchise. The disability which existed in this respect in Queensland until December 1930 and in Western Australia until the end of 1934 was removed as a result of informal representation made by the representatives of India on various occasions, including the one made by the late Sir Muhammad Shafi at the 1930 Imperial Conference. The Constitution and Electoral Acts in Western Australia disqualify an aboriginal native of Australia, Asia or Africa from being registered as an elector for the Assembly; but he may be enrolled as a voter for the Legislative Council (which is the Upper House) in each province in which he holds freehold property of at least £50 capital value.

Indians born in what was formerly called British India were admitted to the benefits of the Invalid and Old Age Pensions Act of 1920. They were also made eligible for maternity allowances. Indians in Australia still suffer from certain minor disabilities (administrative and legal) relating to Crown lands, mining, certain occupations and employment. Under the Mining Act of 1904,

in Western Australia the grant of mining rights to Asiatics requires the approval of the Minister in charge of Mines. Under the South Australia Irrigation and Reclaimed Lands Act, 1914, Indians are not eligible to obtain leases of land. In Western Australia wherever licences are prescribed, for example, for cutting sandalwood, for employment under Government contractors and for employment in European factories, Indians find it difficult under the present administrative practice to get the authorities to exercise discretion in their favour. The Government of Western Australia have announced their decision to take steps to remove any disabilities which now attach to Indians in that State.

An exchange of High Commissioners took place between India and Australia in 1944.

Canada.—Indian residents of Canada are mostly farmers, gardeners, farm workers, managers of retail stores, hawkers, and unskilled labourers. While in the other eight provinces of Canada, Indian residents were not subject to any political or legal disabilities, Indians in British Columbia numbering about 1,300 were denied the municipal, provincial and federal franchise, as a result of which they could not serve as trustees in any municipal or rural school district, hold any municipal office or serve as jurors; they are barred from employment by contractors for the Public Works Department and for the sale of Government timber and also from holding a foreshore lease or Engineer's certificate under the Harbours Inspection Act. In 1947 an Act known as the British Columbia Provincial Election Amendment Act was passed in the British Columbia Legislature conferring provincial franchise on Indians in British Columbia. As a result of this Indians in that Province also became entitled to federal franchise. The Union of British Columbia Municipalities passed a resolution in 1947 recommending that municipal franchise be granted to Indians.

In October, 1945 a Canadian Citizenship Bill was moved in the Canadian House of Commons which provided for the status of 'Canadian Citizenship' which can be acquired by persons (i) who were/are born in Canada or on Canadian ship, (ii) whose parents at the time of their births were/are British subjects of Canadian domicile or are Canadian citizens, (iii) who have resided in Canada and make an application of their intention to become Canadian citizens. It also introduced an entirely new system for determining who are British subjects, thus involving fundamental change from the present system for determining the common status of British subjects throughout the Commonwealth. It was passed in 1946 and came into force with effect from 1-1-47. It would bestow 'Canadian Citizenship' on all Indians born in Canada and would also enable Indians born outside Canada to acquire citizenship rights under certain circumstances. The Govts. of India and Canada have decided to exchange High Commissioners; and towards the middle of 1947, Mr. J. D. Kearney and Mr. H. S. Malik were appointed as Canadian High Commissioner in India and Indian High Commissioner in Canada, respectively.

New Zealand.—Indians domiciled in New Zealand are generally not subject to any disability and enjoy equal citizenship rights including franchise with the other British subjects.

SOUTH AFRICA

The main grievances of Indians, which led to a passive resistance movement headed by Mahatma Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement. (See earlier editions of the Year Book for details).

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the Year Book.

Cape Town Agreement.—It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was, in these meetings, a full and frank exchange of views which resulted in a true appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good-will. The terms of the Cape Town Agreement were on the following lines:—

"Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life.

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so.

For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted migration to India or other countries where western standards are not required. Union domicile will be lost after 3 years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them.

The Government of India recognise their obligation to look after such emigrants on their arrival in India.

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 8 of Resolution XXI of the Imperial Conference of 1918.

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill.

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments."

The number of Indians who took advantage of the Assisted Emigration Scheme was below expectations. Early in 1932 representatives of both the Governments met in Cape Town to review the working of the Cape Town Agreement. Both Governments recognised that the Cape Town Agreement had been a powerful influence in fostering friendly relations between them and that they would continue to co-operate in the common object of harmonising their respective interests in regard to Indian residents in the Union and that the possibilities of the Union's scheme of assisted emigration to India were now practically exhausted owing to the economic and climatic conditions of India as well as to the fact that 80 per cent of the Indian population of the Union were now South African-born. Both Governments agreed that the Cape Town Agreement was to remain valid.

INDIAN REPRESENTATIVES

The Government of India selected the Rt. Hon'ble V. S. Srinivasa Sastry as their first Agent. He reached the Union on the 28th June, 1927. The designation of the Agent was changed to that of 'Agent-General' in 1935.

Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada, the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions. As a result of negotiations between the two Governments, the status of the Agent-General was raised to that of High Commissioner from 1st January 1941.

India's representatives in the Union from 1927-46 were—

| | |
|------------------------------------|-----------|
| Rt. Hon'ble V. S. Srinivasa Sastry | 1927-1929 |
| Sir K. V. Reddi | 1929-1932 |
| Kunwar Sir Maharaj Singh, I.C.S. | 1932-1935 |
| Sir Syed Raza Ali | 1935-1938 |
| Sir B. Ramu Rao, I.C.S. | 1938-1941 |
| Sir Shafa'at Ahmad Khan | 1941-1945 |
| Mr. R. M. Deshmukh | 1945-1946 |

During the period 1932-1939 various anti-Indian laws were enacted. European agitation during this period also led to the appointment in 1938 of two Commissioners Mr. Murry Land Commission and Mixed Marriages Commissions. (For details see earlier editions of the Year Book.) Following is the more recent history of the Indian problem in South Africa.

INTERIM ACT

In spite of repeated representations from the local Indian community and the Government of India, the Union Government passed the Asiatic (Transvaal Land and Trading) Act 1930 which came into force on June 16, 1939. The Act restricts three important rights of the Indian community in the Transvaal. (a) the right to occupy land not subject to Gold Law restrictions; (b) the right to trade anywhere in the Transvaal; and (c) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May, 1930. (2) The issue of trading licences except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30, 1939. (4) The Minister was empowered to issue permits of exemption. In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years, i.e., till May 1943.

The international situation in September, 1939, and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

LAWRENCE COMMITTEE

Towards the end of 1939, Mr. Lawrence, the Minister of the Interior, suggested that the Natal Indian Association and the Durban City Council should constitute a Joint Committee for the purpose of preventing further penetration by Asiatics into European areas. The Natal Indian Association expressed their opposition to any form of segregation but offered to co-operate with the Durban City Council in the manner suggested

in order to establish harmonious relations between the two communities. The object of the Committee was also to draw the attention of the City Council to the housing needs of the Indian community and the necessity for providing proper municipal amenities. The Committee was formed in March, 1940, but owing to the attitude of the European members, it could not function successfully and the Minister of the Interior was obliged to dissolve it in September, 1942.

BROOME COMMISSION

In January, 1940, the Minister of the Interior announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent, if any, of Asiatic penetration of predominantly European areas and the Commission was actually appointed in May with the Hon'ble Mr. Justice F. N. Broome as Chairman and the following terms of reference:—

"To enquire into and report whether, and if so, to what extent Indians have since 1st January, 1927, commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Provinces of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act, 1908, as amended, of the Transvaal), and the reasons for such occupation or acquisition."

A summary of the findings of the Commission was published on October 11th 1940. The two main findings were that in the Transvaal the extent of penetration since 1927 did not appear to be alarming or even surprising and in Natal the extent of penetration into European areas was little more than a trickle. As regards the cases of penetration as had been found, it was stated that the main reason for penetration by acquisition was attributable to the desire to obtain good investments (and this was also held to account for some of the acquisitions with occupation), while the most important reason for acquisition with occupation was given as the "lack of housing and civic amenities in predominantly Indian areas." The Commission also recorded that "it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome, but that *de facto* segregation may some day be achieved by voluntary mutual co-operation."

Towards the end of 1942, the Durban City Council represented to the Minister of the Interior that since October 1940 Indian penetration in predominantly European areas in Durban had been taking place on an accelerated scale. As a result of this representation, Mr. Justice F. N. Broome was once again appointed to enquire into and report whether, and if so to what extent, Indians (including Companies with predominantly Indian directorates) had, since 30th September, 1940, in the Municipal area of Durban, acquired sites in those areas which the previous Commission found to be predominantly European on 1st January, 1927. According to the findings of this Commission, the sites acquired by Indians in 1942 were 21 times greater than the highest previous yearly total and the amount paid for these sites during the 29 months covered by the Commission did not fall short of the total amount so paid during the 18 years which were covered by the previous Commission.

PEGGING ACT

As a result of this finding and in order to check further acquisition of property by Indians, the Union Government passed in the teeth of opposition by the Indian Community and Government of India, an Act called "the Trading and Occupation of Land (Transvaal and Natal) Restriction Act, 1945," generally called as the Pegging Act. This Act provides for the continuance in the Transvaal of the provisions of the Asiatic (Transvaal Land and Trading) Act 1939 for a further period of 8 years and extends similar provisions prohibiting transfer of property between Europeans and Indians in Natal for a period of 8 years, i.e., up to March 31, 1946.

Government of India formulated their plans to take retaliatory action against the Union. In the meanwhile, however, it became clear that the general elections in the Union had played a large part in the enactment of Pegging Legislation—Indian penetration having been used as a convenient election issue for securing votes of anti-Indian Europeans. The Government of India, therefore, waited for the excitement aroused by the elections to subside in the hope that the Union Government would make a conciliatory move after the atmosphere in the country had returned to normal. Indian public opinion, however, continued to be disturbed both in India and S. Africa and constantly urged upon the Government of India to adopt retaliatory measures.

PRETORIA AGREEMENT

On 18th April, 1944, as a result of an agreement, known as "Pretoria Agreement," between the Union Prime Minister and the Minister of the Interior on the one hand and a deputation from Natal including members of the Natal Indian Congress on the other, a decision was taken according to which the Pegging Act was to be replaced by an Ordinance to be passed by the Natal Provincial Council. It was agreed by both the parties that the main problem was the occupation of property for residential purposes in urban areas where the question arose of Indians living in close proximity to Europeans. The Ordinance was to provide for the creation of a licensing board with two Europeans and two Indian members and a third European with legal training as chairman. The Board was to control occupation of dwellings in Durban by licensing. The Pegging Act was to be withdrawn by proclamation after the Ordinance was passed.

The Agreement on the whole, met with satisfactory reception among the majority of Indians in South Africa. The Government of India also decided to give it a chance although they did not think it an ideal solution. A draft Ordinance embodying major points of the Agreement, which was approved by the Natal Indian Congress, was introduced in the Natal Provincial Council and it was referred to the Select Committee after first reading. On October 17th, 1944, the draft Residential Property Regulations Ordinance with the Report of the Select Committee was placed on the table of the Provincial Council.

The amended draft Ordinance departed from the Pretoria Agreement in many aspects; in particular it restricted the right of Indians to acquire property. F. M. Smuts himself admitted afterwards that this Ordinance was inconsistent with the Pretoria Agreement. That Ordinance, with two other Ordinances, viz. Natal Housing Ordinance and Provincial and Local Authorities Expropriation Ordinance, was passed on 3rd November 1944. Indians in South Africa were greatly agitated over this legislation. It also aroused great resentment among the public in India. It was apprehended that these Ordinances would enable the Provincial Administration to carry out racial zoning.

RECIPROCITY ACT

The Government of India represented to the Union Government that the new measure was unwarranted and urged for its withdrawal and implementation of the Pretoria Agreement. As the representations met with failure, the Government of India enforced the Reciprocity Act against South Africa, and persons of South African domicile were declared prohibited immigrants in India. They were debarred from acquiring or occupying any property without a permit and were also deprived of the local franchise.

HOUSING ACT

The Residential Property Regulations Ordinance and the other two ordinances were eventually declared *ultra vires* of the powers of the Provincial Council and therefore did not become operative. The Union Government however passed in June

1945 another Act known as Housing (Emergency Powers) Act, 1945. It enabled the Government to frame Regulations relating to acquisition and expropriation of property by the local authorities, the Natal Housing Board and the National Housing and Planning Commission of the Union Government. The power of expropriation was to remain in the hands of the Union Minister. It also empowered the Provincial Councils to institute Housing Boards through Provincial legislation. Accordingly the Natal Provincial Council passed an Ordinance entitled "Natal Housing Ordinance" which became law on the 6th December 1945.

The regulations under the Housing (Emergency Powers) Act, were also issued on the same day. The Prime Minister also issued a statement on the same date giving an assurance that the safeguards regarding Ministerial consent and approval would be used to ensure that the powers in question were exercised in a reasonable, equitable and impartial manner.

THIRD BROOME COMMISSION

In 1944 the Union Government appointed a Commission "To enquire into and report upon matters affecting the Indian community of the Province of Natal, with special reference to housing and health needs, civic amenities, civic status and provision of adequate residential, educational, religious and recreational facilities, and to make recommendations generally as to what steps are necessary further to implement the uplift clauses of the Cape Town Agreement of 1927, and as to all matters affecting the well-being and advancement of the permanent Indian population of Natal."

The Commission included two Indians and commenced work in May, 1944. The introduction of the Residential Property Regulation Ordinance and other Ordinances mentioned in the foregoing paras brought about a crisis. In December 1944, the two Indian members resigned the membership of the Commission saying that, as the Ordinances and the Reports of the Natal Post-War Reconstruction Commission had anticipated the work of the Commission and forestalled its recommendations, the usefulness of the Commission was stultified.

The Commission, however, continued its work. In the 2nd week of June 1945, the Interim Report of the Commission was published. The main and only important recommendation of the Commission was that the Union Government should invite the Government of India to send to the Union a delegation, composed substantially of Indians for the purpose of discussing with the Union Government, and with such representatives as the Union Government might appoint, and with such other persons as the delegation may invite, all matters affecting Indians in South Africa.

LAND TENURE ACT

One of the most important events in the history of Indians in South Africa was the passing of the Asiatic Land Tenure and Indian Representation Act. This event raised the Indian question in South Africa to international plane.

On January 21st 1946, the Prime Minister announced in the Union Parliament, his intention to introduce a Bill for the purpose of prohibiting the occupation and acquisition of property by Indians in Natal, except in certain exempted areas. This roused consternation among the Indian community in South Africa and the public in India. According to the statement made by the Government Spokesman in the Central Legislature on the 12th March, the Government of India urged upon the Union Government to convene, as recommended by the Third Broome Commission, a Round Table Conference of representatives of both the countries to discuss Indian question before passing this legislation. The Union Government rejected this request. The Bill was introduced in the Union House of Assembly on 16th March and passing through all stages became law on 3rd June 1946.

The Act which replaced the Pegging Act of 1943, consisted of two Chapters. The first Chapter dealing with land tenure placed restrictions on the acquisition and occupation of land by Asiatics in Natal, except in exempted areas which have been so proclaimed in the schedule to the Act. These areas might be increased or decreased on the advice of the Land Tenure Advisory Board (established under the Act) or after five years by a resolution of the Parliament. In non-exempted areas transfer of fixed property between non-Asiatics and Asiatics both for occupation and acquisition was subject to a permit granted by the Minister. In the Transvaal the Interim Act (1939) position was retained with the exception that trade licences were no longer to require the Minister's permit. Thus the Act extended the temporary provisions of the Pegging Act to the whole of Natal and also introduced a new principle of racial segregation.

The second Chapter gave a limited franchise to Indians. It enfranchised a male Indian who was

- (a) a Union national of or over 21 years of age,
- (b) had passed the sixth Standard or equivalent; and either
- (c) had an annual income of not less than £84 or
- (d) owned immovable property of the minimum value of £250.

Indians were to be represented by 2 Senators, 3 Members in the House of Assembly and 2 Members in the Natal Provincial Council. Indians in the Transvaal were not given any representation in the Transvaal Provincial Council. The members in the Senate and the Assembly must be of European descent and thus Indians were to be represented by Europeans in both Houses of the Union Parliament.

As described below the second Chapter of this Act was repudied by the Nationalist Government in October 1948.

On the Act becoming law the Government of India was strongly urged by the Indian public and the Indian community in South Africa to recall their High Commissioner and enforce trade sanctions against that country. The Government of India informed the Union Government that in view of the attitude of that Government the Government of India considered themselves free to take counter-measures. Accordingly they gave notice of the termination of Trade Agreement with the Union Government on the 25th March 1946 and banned all exports to and imports from South Africa with effect from the 17th July. The High Commissioner for India in the Union was recalled. In South Africa itself Indians have started a passive resistance movement which has taken the form of denying the Asiatic Land Tenure Act by occupying land in the non-exempted areas. About 200 persons including women, Africans and Europeans have courted imprisonment and the movement is continuing.

The Government of India was also urged by the Indian legislature to raise the Indian question in South Africa before the United Nations as the Union Government's treatment of Indians was a violation of the United Nations Charter. The Government of India lodged a complaint with the Secretary General, United Nations requesting that the General Assembly should take up this question under Articles 10 and 14 of the Charter.

QUESTION BEFORE U. N. O.

Later the Government of India submitted a factual memorandum to the United Nations, which described the various disabilities under which the Indians in South Africa suffer. The question was discussed at the 1946 (October-December) session of the General Assembly which referred it to the Joint Political and Legal Committees. The South Africa delegation, led by F. M. Smuts, contended that this question was essentially a domestic question of South

Africa and therefore under Article 2(7) of the Charter U.N.O. had no right to discuss the matter. They therefore wanted the whole question to be referred to the International Court of Justice for legal clarification on this point.

The Indian delegation led by Mrs. Vijay Lakshmi Pandit, emphasised that this was not a domestic question. During the course of discussions South Africa's racial policy came in for much criticism. Various resolutions were proposed but the Committee passed the joint French-Mexican resolution, to which India had agreed.

The resolution after stating that because of the treatment of Indians in South Africa friendly relations between the two countries had been impaired, expressed the opinion of the General Assembly that such treatment "should be in conformity with the international obligations under the agreements concluded between the two Governments and the relevant provisions of the Charter". It requested the two Governments to report at the next session of the General Assembly the measures adopted to that effect. This resolution was passed by the General Assembly by 2/3rd majority.

After his return to South Africa F. M. Smuts in his public speeches strongly criticised the resolution. He attributed the resolution to ignorance and a "solid wall of prejudice" against the colour policies of South Africa. According to him the General Assembly had taken the decision on this question under the influence of a "flood of emotion" and "mischievous propaganda". He accused the Assembly of having been unfair to the Union and of having denied it the most elementary and fundamental right of access of the International Court. He did not regard what had happened at the UNO as final and decisive.

One of the direct results of the UNO resolution was the intensification of anti-Asiatic feeling in South Africa. A movement was set afoot among Europeans to boycott Indian traders. The Indian community continued its passive resistance. The Union Government did not take any initiative to give effect to the resolution. Then Pandit Jawaharlal Nehru, the Prime Minister of India, in a personal letter to F. M. Smuts, expressed the Government of India's readiness to enter into any discussions the Government of South Africa might see fit to initiate for implementing the UNO resolution. This was the beginning of correspondence between the two Governments but it ended without any result. The Union Government desired the return of the High Commissioner to South Africa for consultation. The Government of India preferred a Round Table Conference, but were willing to send back the High Commissioner for discussion provided the Union Government accepted the UNO resolution as the basis of such discussion. The Union Government declined to do so. They asserted that they had no agreements with India to which the resolution had referred.

Both the Governments submitted their reports to the General Assembly which discussed the question again in September-December 1947 session. The question was referred to the Political Committee which passed the Indian resolution as amended by Mexico. The resolution after reaffirming the last year's resolution requested the two Governments to enter into discussions at a Round Table Conference on the basis of that resolution, inviting the Government of Pakistan to such a Conference. But the resolution failed to secure 2/3rd majority in the General Assembly and hence was not effective. In July 1948 the Government of India again requested the United Nations to consider the South African Indian question. After referring to the fast deteriorating condition of the Indians in South Africa in view of the 'apartheid' policy of the new Government, the Government of India stated that it did not believe that it could be the intention of the United Nations to acquiesce in the refusal of South Africa to act on the General Assembly resolution of 8th December 1946. Such

acquiescence would be a denial of human rights and fundamental freedoms, on purely racial grounds to an important section of the population of South Africa and would gravely undermine the effectiveness with which its members carry out the obligations which they have assumed under the Charter. The item was included in the Agenda for the Third Session of General Assembly held in Paris despite the opposition of Mr. Louw, the leader of the South African Delegation, who put forward the same arguments against its being included in the Agenda as F. M. Smuts had done in 1946. The question was expected to be discussed by the General Assembly in its adjourned session in April 1949, but was once again put off, owing to 'pressure of work'.

NATIONALIST GOVERNMENT

The General Election in South Africa, which took place in May 1948, was fought on the colour question. F. M. Smuts's party was defeated and the Nationalist Party led by Dr. D. F. Malan came into power. The Nationalist Party however was carried to victory on the crest of a wave of hatred against the non-European. The Election Manifesto of the Party expounded the 'apartheid' or racial segregation policy of the Party. The section dealing with Indians set out their policy towards Indians thus:—

"The Party holds the view that Indians are a foreign and outlandish element which is unsustainable. They can never become part of the country and must therefore be treated as an immigrant community. The Party accepts as a basis of its policy the repatriation of as many Indians as possible and proposes a proper investigation into the practicability of such a policy on a large scale in co-operation with India and other countries".

The manifesto then went on to deal with the revision of the Asiatic Land Tenure and Indian Representation Act on the assumption that there would be no Parliamentary representation for Indians. Indian and European areas would be completely separated so that Europeans would be banned from Indian areas and Indians in their turn would be kept apart from indigenous races. Compensation would be paid for expropriations to implement this policy; facilities for Indian trading outside Indian areas would be drastically curtailed and a Native areas gradually abolished; the inter-provincial movement would be effectively prevented. Further action would be taken to prevent Indian penetration into the Cape, and action would also be taken against Indians who incited non-European races against the Europeans.

During the last twelve months the Nationalist Government has adopted the following measures affecting Indians:—

- (i) The second Chapter of the Asiatic Land Tenure and Indian Representation Act giving "representation" to Indians was repealed in October 1948.
- (ii) Two departmental Committees have been appointed to consider suggestions for tightening up the provisions of Asiatic Land Tenure Act in Natal and the Transvaal.
- (iii) On 16th September 1948 the Minister of the Interior announced in the Union Parliament that a Commission would be appointed to examine the desirability of introducing legislation regarding property ownership and occupation of Asiatics in Cape Province. If Government decided after the report of the Commission to introduce legislation on the matter such legislation would be retrospective from that date.
- (iv) Segregation has been introduced in the Cape Suburban railways.
- (v) Family allowances admissible in South Africa on the basis of income and the

number of dependants have been stopped for Indians with effect from 31-12-48.

- (vi) In the speech from the Throne on the 21st January for national registration and the prevention of mixed marriages would be introduced in the current session of the Union Parliament. Under the former every inhabitant of the country of whatever race, colour or creed would be registered giving details of his or her race, colour and creed. Identity cards would be issued to the entire population.
- (vii) The bonus under the Assisted Emigration scheme has been doubled to induce Indians to accept repatriation to India.

DURBAN RIOTS

In the middle of January 1949 riots broke out in Durban in which African gangs made large scale attacks on Indian areas, resulting in a heavy loss of life and property. 110 persons, of Indians, 85 Africans and one European—were killed and 1,853—708 Indians, 1,085 Africans—were injured. Damage to Indian property was estimated to be one million pounds. The Union Government immediately appointed a Judicial Commission of Inquiry to investigate the causes and course of the riots. According to some witnesses the more important of the causes of the riots are exploitation of natives by Indian Shopkeepers, slum conditions in Durban, African growing sense of frustration under a repressive system, incitement by Europeans and the inflammatory racial propaganda against Indians let loose by the Nationalists during last year. The national organisations of Indians and Africans viz., South African Indian Congress and the African National Congress who had decided to give evidence jointly, boycotted the Enquiry Commission, as the latter did not allow cross examination of witnesses. The report of the Enquiry Commission took much the same line as is outlined above.

EAST AFRICA KENYA COLONY

The grievances of Indians domiciled in this Colony were fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points:—

- (a) **FRANCHISE.**—Indians had not the elective franchise. The Government of India, therefore, proposed that there should be a common electoral roll and a common franchise on a reasonable property basis plus an educational test without racial discrimination for all British subjects.
- (b) **SEGREGATION.**—Professor Simpson who was sent to East Africa to report on sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was intrinsically unjust, secondly, that it was commercially inconvenient, and thirdly, that Indians were in practice unfairly treated in the allocation of sites.
- (c) **THE HIGHLANDS.**—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area had by then been given out, and the Government of India claimed, that there was no land left to which Lord Elgin's decision applied. That decision was, however, extended so as to prohibit the transfer of land in the uplands to non-Europeans.
- (d) **IMMIGRATION.**—Suggestions were put forward for restricting Asiatic immigration into Kenya. The Government of India claimed that there was no case for restricting Indian immigration and that such restrictions were in principle indefensible.

THE SETTLEMENT

The decisions of the British Government were contained in a White Paper presented to Parliament in July, 1923. It was held that the guiding principle should be that "the

interests of the African native must be paramount," and in the light of this it was decided:—

(a) **FRANCHISE.**—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian was also appointed on the Governor's Executive Council.

(b) **SEGREGATION.**—The policy of segregation as between Europeans and Asiatics was abandoned.

(c) **THE HIGHLANDS.**—The old practice was maintained both as regards initial grants and transfers. A similar reservation in the lowlands was offered to Indians.

(d) **IMMIGRATION.**—Racial discrimination in immigration regulations was rejected. But in the economic interests of the Africans, further control over immigration was considered necessary. It was held that some arrangement was required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda were, in that connection, instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them "and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement those decisions, particularly in the matter of the Immigration regulations.

H. M. G.'s DECISIONS

Following upon the Kenya award, statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial Conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views; and that earnest attention would be given to any representation which their Committee desired to make. As stated in a subsequent para, a Colonies Committee was appointed in March 1924. As a result of the representation of the Colonies Committee the following decisions were announced by the Secretary of State for Colonies in the House of Commons on 7th August 1924.

"(1) **IMMIGRATION.**—No definite statistics were available to judge the extent of non-native immigration. Accordingly a step will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) **FRANCHISE.**—Communal system of franchise will continue.

(3) **HIGHLANDS.**—The present practice will continue.

(4) **LOWLANDS.**—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should

be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

EAST AFRICA COMMITTEE

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African Dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee.

The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

CLOSER UNION

In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies, and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

In March 1929, the Secretary of State for the Colonies sent Sir Samuel Wilson, Under-Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it might be possible to find a basis of general agreement.

Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

The report of Sir Samuel Wilson was published on the 6th October 1929. Another meeting of the Standing Emigration Committee was held soon after to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

THE REPORT

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of closer union, His Majesty's Government accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time had not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for closer union. Early that year an unofficial conference of Europeans, held at Arusha, was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the closer union of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Malcolm MacDonald's despatch, dated the 12th October, 1935, to the Governor of Kenya which was published in all the countries concerned.

Franchise. As regards franchise, His Majesty's Government stated in the White Paper of 1930 that "His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise civilisation or education of a character open to all races." In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para. 100 of their report that it was impracticable under the prevailing conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election. The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

Reservation for Muslims.—Mainly as a reflection of the political situation in India, a demand for separate electorates for Muslims and non-Muslims gained ground in Kenya about 1946. Various attempts at compromise failed. Thereupon the Government of Kenya sought to introduce separate electorates for Muslims and non-Muslims. As soon as this came to the notice of the Government of India, they made

vigorous representations to the U. K. Govt. Eventually it was decided by the Government of Kenya to retain the electorates as they were but to reserve two of the five Indian seats for Muslims in two double member constituencies, each voter having one vote only. The ordinance giving effect to this decision is restricted to the life of the present Legislative Council.

Highlands.—The Joint Select Committee of Parliament had recommended that "in view of the nervousness among the native population as regards the land question, a full and authoritative inquiry should be undertaken immediately into the needs of the native population, present and prospective, with respect to land within or without the reserve held either on tribal or on individual tenure." In April, 1932, a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following:

"To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923."

The Commission in their report, which was published in May, 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land Commission.

The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community.

In spite of protests from the Government of India and the local Indian community, the Order-in-Council was issued in February, 1939. Though the Order did not contain a definition of the "privileged position" which persons of European descent were to have within the territorial limits to be included in the Highlands, His Majesty's Government made it clear that there was no intention of changing the administrative practice which had been followed for many years with regard to alienation and transfer of land in the Highlands.

This decision caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accorded even to non-British subjects of European race.

Two Ordinances. In 1944 another important development took place. In the middle of the year the Kenya Legislature passed two Ordinances, namely (a) the Land Control Ordinance, 1944, and (b) the Crown Lands (Amendment) Ordinance 1944. The objects of the Land Control Ordinance were stated to be (i) putting land to the most beneficial use, (ii) empowering the Crown to acquire land for settlement purposes, and (iii) prevention of speculation in land to the prejudice of post-war settlement.

Under this Ordinance a Board called the Land Control Board has been established. The Board is to have, subject to any special or general direction of the Governor, absolute control over all transactions in land in the Highlands. It consists of three official members and 4 other persons appointed by a majority of the European elected members of the Legislative Council of Kenya. One of the objects of the second Ordinance is to make the provisions of the Crown Lands Ordinance 1915 more effective by giving a power of veto to the Governor, in exercise of which he can disallow inter-racial transfers of shares in a landowning company, as is being done in the case of inter-racial transfers of land.

Both the Ordinances have been strongly denounced by the Indian community and the Indian members of the Legislature, who have always been opposed to the practice of reservation of the Highlands to the Europeans. The Government of India also made suitable representations against this legislation.

Subsequent to the announcement made in the House of Commons in 1924, in connection with the "Lowlands", the question of deputing an officer to examine these areas was considered by the Government of India but they thought it inadvisable to proceed any further with the idea.

The Government of India, however, made suitable representation to the United Kingdom Government for facilities for settlement of Indians on land in Kenya, including Indian, from India. The U. K. Government did not agree to the settlement of Indians from India on land in Kenya on account of increase in population and great demand for land by Africans, assured India that they would do whatever was possible to meet the demand for land by the local Indians.

REORGANISATION

Another matter which led to much controversy in 1945 was the reorganisation of the administration of Kenya. The Government of Kenya proposed to expand the Executive Council of the Governor. Under the proposals the official members of the executive council were to be made the members of the Executive Council in charge of Departments and the non-officials were to be allowed to hold portfolios in respects of two of the Departments, viz., Agriculture and Natural Resources and Local Government portfolios.

The Indian community opposed these proposals on the ground that the appointment of non-officials who would invariably be Europeans as members in charge of Departments would be detrimental to Indians' interest. They suggested that if Government were keen on utilising the experience of non-officials it should be done by means of advisory bodies and that Indians should also be given a share in the Government. The proposals were debated in the Legislative Council of Kenya and were adopted in spite of the opposition of all non-European members. A non-official European has been given the charge of the new Department of Agriculture and Natural Resources.

INTER-TERRITORIAL ORGANISATION

Colonial Paper 181 published on December 12, 1946 contained the proposals of U.K. Government for an inter-territorial organisation in East Africa. Briefly these proposals were—

- to set up an East African High Commission consisting of the Governors of Kenya, Uganda and Tanganyika,
- to constitute a Central Legislature, and
- to create a federal executive organisation for the services which are to be operated in common between the territories.

The Legislative Assembly was empowered to legislate on defined subjects throughout Kenya, Uganda and Tanganyika and was to consist of 12 official and 24 unofficial members of whom 6 were to belong to each of the European, Indian and African communities. The equality of racial representation on the un-official side considerably attracted Indian and African opinion which expressed itself in favour of the acceptance of the proposals, but these were subjected to criticism by the European community. Following the visit of the then Under-Secretary of State for Colonies, Mr. Creech-Jones, to East Africa in 1946, revised proposals were published in Colonial Paper No. 210 of 1947. In the revised proposals the principle of equality of racial representation on the un-official side of the Central Legislature has been given up; and instead, equality of territorial representation has been proposed. The composition of the Assembly under the original and the revised proposals is given below :—

Original proposals

12 Official members

Un-Official members :

6 European members, two from each territory, elected by the un-official European members of the Territorial Legislative Councils.

6 Indian Members, two from each territory, elected by the un-official Indian members of the Territorial Legislative Council.

6 members to represent Africans nominated by the High Commission.

2 Arabs nominated by the High Commission.

4 other members nominated by the High Commission.

Revised proposals

7 official members appointed *ex officio* from the staff of the High Commission services.

5 members appointed from Kenya

5 members appointed from Uganda

5 members appointed from Tanganyika.

1 member of the Arab Community appointed by the High Commission.

The Indian community and the Africans expressed their opposition to the revised proposals. The U. K. however announced their decision to bring them into operation on 1st January 1948. The East African High Commission under this Scheme has been in existence since January 1, 1948 and common services as under (c) of the proposals mentioned above created with effect from January 1, 1949.

WAR-TIME RESTRICTIONS

In December, 1943, the Government of Tanganyika informed the Government of India that on account of extreme pressure on housing and other accommodation, it was proposed to restrict the entry into the territory of non-natives who were not essential for war work. Persons normally resident in the territory were, however, to be exempted from the restrictions provided they had not been away for more than two years.

The Government of India pointed out to the Tanganyika Government, among other things, that due to acute shortage of shipping it would not be possible for many Indians otherwise 'normal residents' of the territory to return within two years and asked for their exemption from the scope of the proposed restrictions. The Tanganyika Government while not agreeing to the exemption of such persons, assured the Government of India that the regulations would be enforced with due regard to the circumstances of each case. The Regulations were promulgated on the 14th February, 1944.

In the third week of February, 1944, the Governments of Kenya and Uganda also intimated to the Government of India that on account of acute shortage of housing and food they also proposed to enact legislation similar to that of Tanganyika and promulgated Defence Regulations imposing restrictions on immigration on the 1st March, 1944. The East African Governments assured the Government of India that the Regulations were not discriminatory and that they would be terminated after the war.

The restrictions, however, aroused great apprehensions among Indians in East Africa and India. Several representations were made to the Government of India and deputations waited on them. The matter was also raised in the Council of State and it was stressed by all that the restrictions were the outcome of strong anti-Indian agitation carried on by local Europeans and were only the thin end of the wedge, designed to exclude Indians from East Africa after the war. The pleas of housing and food shortage were described by the critics as groundless.

On representation by the Govt. of India the Colonial Government assured the Government of India that entry permits would be granted to all *bona fide* residents of the Colonies even though they might have been absent from the Colonies for more than two years.

With the cessation of hostilities in 1945, it was expected that the immigration restrictions which were introduced in the East African territories as a result of the War, would be removed. It was however made known that the war-time regulations would be withdrawn in the year 1946 and that in the meantime new proposals for post-war legislation on immigration were being examined and would be published early. In February 1946 the Emergency Powers (Defence) Act 1939 to 1945 of the British Parliament were abrogated and consequently the Defence Immigration regulations in East Africa lapsed. These were however revived as an interim measure till 31st December 1946 until the contemplated immigration legislation for the post-war period had been passed.

IMMIGRATION BILL

An Immigration Bill was published simultaneously by the Tanganyika, Kenya and Uganda Governments in the month of April 1946. The Bill has produced agitation among the Indian community in East Africa who apprehend that although it is non-racial in terms it will be discriminatory in effect against them. This Bill is proposed to be enacted as a permanent measure with a view to tightening up the immigration restrictions.

Section 5 of the Bill specifies who are "prohibited immigrants". Any person born in the colony is not a "prohibited immigrant". Classes of persons who are "prohibited immigrants" have been defined. Persons other than "prohibited immigrants can enter the colony if they have residential certificate issued under the ordinance". Class of person who can apply for residential certificate for entering or re-entering the colony have been enumerated. An immigrant intending to engage in agriculture and animal husbandry has to prove that he possesses a sum of at least £800. Anyone wishing to engage in mining has to possess sum not less than £1,000. A person wishing to engage in trade on his own account has to show that he holds £2,500. Most Indians wish to go to East Africa as traders and shopkeepers and thus the requirement of a large bank deposit of £2,500 will practically stop the Indian immigration.

As a result of the representation of the Indian community the second reading of the Bill was postponed till October 1946. In August 1946 the Government of India sent a delegation to East Africa under the leadership of Raja Sir Maharaj Singh to study the facts and circumstances relating to the Immigration Bill in East African Legislatures. The Delegation returned in the last week of September and submitted a report to the Government of India. The report expressed the view of the delegation that there was no material to indicate the absorptive capacity of the territories and suggested that before immigration is controlled a population census and an economic survey be held.

Revised Immigration has recently been introduced in the Kenya Legislative Council. The revised bill contains most of the objectionable features of earlier bills, but some suggestions made by the delegation have also been incorporated. Inter-territorial movement in East Africa, which was severely restricted in the original bill, has been liberalised in the revised bill in favour of permanent residents. The capital sums to be possessed by intending immigrants for trade have been reduced as follows :

| | From | To |
|-------------------------|---------|--------|
| for mining | £1,000 | £800 |
| for trade | £2,500 | £800 |
| for manufacture | £10,000 | £2,500 |

But some new restrictions have also been introduced. Under the revised bill mere intention to engage in trade, etc. and possession of the prescribed capital (as provided in the original bill) are not enough; but the prescribed authority should be satisfied that such engagement in trade, etc., of the person will not be to

the prejudice of the inhabitants generally of the territory. Further if any licence is required by such person in engaging in the trade, etc., he must be in possession of such licence or he must satisfy that he will be able to obtain one, before he enters the territory. The revised Immigration Bills were passed into law by the East African Legislatures despite the objections of the Government of India and the Indian community and became operative with effect from 1st August 1948. The administration of the new law is being carefully watched by the Government of India.

Government of India Agent.—Demand for an Agent of the Government of India in the East African territories has been voiced from time to time. At the request of the Government of India His Majesty's Government in U.K. agreed to the appointment of Indian Agents in East Africa, Mauritius, Fiji and British West Indies, and Agents designated as Commissioners for the Government of India were appointed in these colonies, in the middle of 1948.

Nyasaland, Rhodesias.—In May, 1938, a Royal Commission under the Chairmanship of Lord Bledisloe was appointed to enquire and report whether any and, if so, what form of closer co-operation or association between Southern Rhodesia, Northern Rhodesia and Nyasaland was desirable and feasible, with due regard to the interests of all the inhabitants irrespective of race. It was apprehended that if amalgamation took place, there would be danger of Indian residents in those territories numbering about 4,100 being subjected to restrictions similar to those obtaining in the Union of South Africa. The Commission reported to H.M.G. in March, 1939, recommending against the immediate federation of the two Rhodesias and Nyasaland but in favour of organised closer relations with a view to eventual unity. H.M.G. were understood to have revived the views of the Governments of Northern Rhodesia and Nyasaland and discussed them with the Prime Minister of Southern Rhodesia, but further discussions were suspended due to war.

In October 1944, His Majesty's Government announced the setting up of a Standing Central African Council for bringing about the closest possible co-ordination between the Governments of the two Rhodesias and Nyasaland. The Governor of Southern Rhodesia is Chairman. According to the representatives of the European elements in these territories, this Council has failed to achieve the desired results. Their demand for a federation of these territories is gathering momentum. In February 1949 they met in a Conference at the Victoria Falls and unanimously decided for a Federation of these territories. After a constitution has been drawn up by a Committee of technical experts and approved by the WHITE SETTLEMENTS in a common referendum, the proposals will be submitted to H.M.G. The H.M.G. have, however, a special responsibility to the African community and full account will have to be taken by them of African opinion before any constitutional changes affecting African interests can be enforced.

Proposals for Segregation.—In 1945 a Bill known as the 'Town and Country Planning Bill' was introduced in the Legislative Assembly of Southern Rhodesia. It contained a clause which provided for reservation of residential areas for occupation by non-Europeans. The Indians in the colony objected to this clause and ultimately it was deleted from the Bill. Towards the end of 1947 press reports indicated that certain municipalities in South Rhodesia were putting pressure on the Southern Rhodesian Government to introduce legislation for the segregation of Indians in the Colony. On 16th December 1947 at a special meeting the Bulawayo City Council passed a resolution calling on the Government of Southern Rhodesia to introduce legislation forbidding Europeans to sell, lease or hire property in a European area except to Europeans and providing that the local authorities may reserve specific areas for non-Europeans.

Already, notice of all new townships proposed to be established has to be given under the provisions of the 'Town & Country Planning Act, 1945', which contain a clause forbidding occupation and ownership of any stands therein by persons other than those of European descent. None who is not a European can live in these townships except in the course of the discharge of his duties as a domestic servant.

FII

Emigration to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members.

In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji." In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members, Messrs. Srinivasa Sastri and Hridaynath Kunzru, who had been nominated to join the Committee which was finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan did not reach Fiji until the end of January 1922.

LABOUR TROUBLES

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come.

During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men,

arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them.

Admirable work was done among these distressed persons by the Emigrants' Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

REPRESENTATION

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 5th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituents returned their representatives to the Council, but no candidate offered himself for election from the third constituency.

In 1935, the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were—

- (a) the Fijian representatives should be selected as heretofore, viz., by the Governor from a panel submitted by the Great Council of Native Chiefs;
- (b) some of the European and Indian members should be elected and the others nominated;
- (c) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 15 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated), 6 Fijian members (all to be selected as at present) and 3 Indian members (3 to be elected on a communal franchise and 2 to be nominated).

The Legislative Council as newly constituted met in September, 1937. Fresh elections to the reformed Legislative Council took place in 1940.

A Committee consisting of six non-official members of the Fiji Legislative Council (including two Indians) has been appointed to consider and report on the desirability of granting to the people of the Colony a greater measure of control in their own affairs and to recommend necessary amendments in the Constitution of Fiji. The Committee has not yet submitted its report.

LAND TENURE

The most important problem affecting the Indian community in Fiji is that of land tenure. Out of the total Indian population of 94,966 estimated in 1939, a very large majority consists of agriculturists, but alienation of native-owned land is prohibited. More than 80 per cent. of the land in the Colony is held by native owners as tribal land, and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company, Ltd. Indians hold land as lessees from the native owners for the cultivation of rice, sugarcane, etc., and from the Colonial Sugar Refining Co., for cultivation of sugarcane.

Practically the whole problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop, sugarcane, caused some alarm to Indians engaged in agriculture. A number of practical difficulties connected with the lease which in many cases related to the procedure for obtaining leases and the administration of the land law, were also brought to the notice of the Government of India.

In September, 1936, the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement, that to further this end a committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners; and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians.

Land Trust Bill.—As a result of the examination of the question, the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with all the native lands in the Colony, and then to appoint a commission to determine the lands to be set aside for the exclusive use of the Fijians. These proposals were referred to the Council of Chiefs in October, 1938, and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November, 1939 to give effect to the proposals referred to above. The Government of India made suitable representations on the Bill, and the Bill with certain amendments passed its third reading on the 22nd February, 1940, and was assented to by the Governor.

The Native Land Trust Ordinance, 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust. A Fijian Commission has been appointed to conduct enquiries into particulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians. It has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees. The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed.

Though there is no Indian representation on the Board, provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas. Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years.

Fiji Sugar Dispute, 1943. In view of the rising cost of living due to war, the sugarcane farmers in Fiji, who are mostly Indians, demanded, in June, 1943, a higher price for their cane. The Sugar Refining Company, which has the monopoly of sugar production in the Colony, refused any increase in the price of cane until and

unless the price of sugar was increased by the Ministry of Food, United Kingdom, to whom the Company was bound to sell all its produce. The farmers thereupon decided not to harvest their crops. They stuck to their decision in spite of appeals made by the Governor of the Colony. As the crushing season advanced, the feelings amongst the Indians ran high. Some of them even ploughed in their crops. All attempts on the part of Indian leaders to reach an amicable settlement having failed till the end of the crushing season, the major part of the cane crop in the Colony remained unharvested.

In March, 1944, the Secretary of State for the Colonies announced in the House of Commons his decision to send an independent expert to the Colony to report upon the matter and further informed the House that Dr. C. V. Shephard of Trinidad had agreed to conduct the enquiry. Though the report has since been published most of the recommendations made by Dr. Shephard in his report have not yet been implemented.

WELFARE LEGISLATION

Three important Ordinances bearing on the subject were passed in 1944. These are: (1) The Industrial Assurance Ordinance (No. 18 of 1944), (2) The Industrial Disputes (Conciliation and Arbitration) Ordinance (No. 19 of 1944), and (3) The Labour Welfare Ordinance (No. 20 of 1944). No. (1) provides for the formation, registration and regulation of Industrial Associations; No. (2) provides for the investigation and settlement of industrial disputes and No. (3) authorises the appointment of a Commissioner of Labour to safeguard and promote the general welfare of workmen in the Colony.

Education in general, and Indian education in particular, has made considerable progress in the last few years. In 1928 there were only one Government and 23 aided schools out of which one was Indian. The number of Indian schools now is 88 as against 250 European and Fijian Schools. Education in the Colony is under the control of a Board of Education consisting of 8 members of whom 2 are Indians.

Residential Tax.—According to the Fiji Residential Tax Ordinance, passed in July, 1923, all male persons between the ages of 18 and 60 other than the Fijians and Rotuman residents in the Colony were liable to pay a tax not exceeding £1 per annum per person. The tax was imposed with the object of raising additional revenue for effecting improvements in the Colony. The Ordinance evoked very strong opposition among the Fiji Indians, but in course of time they became reconciled to the tax.

During the last war a further tax of 10sh per head per annum was imposed. An assurance was, however, given by the Government of Fiji that this additional war tax would be lifted as soon as the war ended. The promise was kept but simultaneously with the lifting of the war tax, the Residential Tax was increased from £1 to £2 per head. Those who pay income-tax are exempted from the tax, with the result that almost the entire European population is exempt from the tax, as majority of them pay the income-tax. In actual practice therefore the incidence of the tax has mainly fallen on the Indians whose economic condition has not shown improvement proportionate to the increase in the tax now demanded. The Government of India made representations to H.M.G. in March 1948 urging the introduction of a more equitable system of taxation, and grant of relief to the persons affected by reduction in the rate of residential tax.

BRITISH GUIANA

The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and J. A. Luckhoo, a prominent Indian who was a member of the combined

court, visited India to put forward a scheme for the colonisation of British Guiana by means of the emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay; Dwana Bahadur J. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces.

The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters.

Rana Maharaj Singh, (now Governor of Bombay) was deputed for this purpose. He proceeded to that Colony in September, 1925. His report was received on February 1st, 1926, and published. As a result of the report a notification was issued by the Government of India in March, 1926, with the approval of the Standing Emigration Committee and the Indian Legislature, permitting reopening of emigration to British Guiana on certain terms. Certain recommendations of Rana Maharaj Singh relative to the improvement of the position of the existing Indian population in the Colony were also reported by the Government of India to the Colonial Government who accepted all of them in principle and stated that some of them were already being acted upon. The colonisation scheme did not, however, eventually materialise: the Roy-Wilson Commission of 1926 recommended that it should not be brought into operation in view of the high cost involved, and in June 1927 the Colonial Government, with the concurrence of the Government of India, decided to postpone the scheme indefinitely.

LABOUR LEGISLATION

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The bill, which was eventually introduced by the British Government (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1935, when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (a) the causes which led up to the disturbances and (b), *inter alia*, the condition of labour on sugar estates; and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission, which was published in December 1936, it would appear that the disturbances were

primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers whether resident or non-resident.

There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay, hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs, the Commission recommended:

- (i) the creation by Government of some authority with such powers as were considered necessary for the efficient safeguarding of the interests of both employed and employer; and
- (ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed.

In 1942, a Labour Ordinance (No. 2 of 1942) was passed. This Ordinance provided for the appointment of a Commissioner of Labour for the regulation of the relations between employers and employees and for the settlement of disputes between them. This brought the labour laws of British Guiana in line with modern conceptions of labour legislation. The Government of India were given an opportunity to comment on the Ordinance at the Bill stage and certain modifications suggested by them were incorporated in it.

ROYAL COMMISSION

The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June, 1938, in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following:—

"To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago, and Windward Islands and matters connected therewith and to make recommendations."

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission, the question of deputing someone from India safeguarding the interests of Indians engaged the attention of the Government of India.

As a result of representations made by them, they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. Mr. J. D. Tyson, C.B.E., I.C.S., who was secretary to the Rt. Hon'ble V. S. Srinivasa Sastri, when the latter went as the first Agent in the Union of South Africa, and subsequently represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatics Land Tenure Amendment Bill in 1930, was the officer chosen in this connection.

RECOMMENDATIONS

The Commission concluded taking evidence towards the end of March, 1939, and the report was made available to the press in October, 1939. Only a summary of the recommendations of the

Commission were available at the time; the report was published in June 1945. The Commission recommended that some officer or officers, preferably members of the labour department should specialise in East Indian questions and if suitable candidates were forthcoming should be East Indians.

The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should be as far as the law was concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which related to matters of education, housing and labour administration appeared satisfactory and were likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research.

Marriage Bills.—In June 1945, an ordinance to make provision for the solemnization and registration of Hindu marriages in Trinidad and Tobago was enacted. The Ordinance provides for the appointment of Hindu priests as Marriage Officers and the solemnization by them of Hindu marriages. It makes the marriage officers to get the marriages solemnized by them registered with the Registrar of Hindu Marriages appointed for the Colony. Any marriage officer who fails to get registered a marriage solemnized by him, is made liable on summary conviction to a fine, but the marriage itself is not rendered invalid. Parties to any marriage can also apply to a Judge for an order directing the Registrar to register the marriage.

In British Guiana a Hindu Marriage Bill, and a Muslim Marriage and Divorce Bill are receiving attention of the Government of the Colony. The Bills provide for the appointment of Marriage Officers and solemnization by them of Hindu and Muslim marriages. The duty for getting marriages registered here also is laid on the marriage officers and no marriage is rendered invalid by reason only of its nonregistration. Marriage solemnized by any person who has not been appointed as marriage officer or whose appointment as such has been cancelled, are deemed invalid and of no effect. The Muslim Marriage and Divorce Bill provides for Divorce Boards constituted of three marriage officers, each party selecting one and the two officers thus selected co-opting a third one, who would act as Chairman of the Board.

Labour Conditions.—During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour conditions in the West Indies. The Government of India took steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry; and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

In June 1948 Indian workers on sugar estates in British Guiana resorted to a strike owing to dissatisfaction with wages and conditions of work. The incident led to firing by the Police in which five Indians were killed. The U.K. Government have appointed a Royal Commission of Enquiry to investigate the whole problem of the sugar industry in British Guiana. The Commission have recently arrived in the Colony.

CONSTITUTIONAL CHANGES

Some of the recent developments, since the visit of the West India Royal Commission, in the Colonies of British Guiana, Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to deserve mention. In Jamaica where Indians are less organised and fewer in numbers than in the other two territories, there had been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr. Tyson in his evidence before the Royal Commission. This claim has since been conceded.

It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation, while retaining the method of nomination for representation of minority or backward interests. In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and they not being numerically strong enough in any electoral district to have their effect felt, the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view. In Trinidad and British Guiana local committees having Indian representatives were appointed to examine franchise questions.

The reports of the Franchise Commissions in both the Colonies were published in 1944. The British Guiana Commission recommended that for the purposes of franchise, the income and property qualifications should be approximately halved and there should be a literacy test in English. The Secretary of State for the Colonies accepted all the recommendations of the Commission except the language test which he decided should be in any language. The Indian members of the Commission has supported universal adult suffrage. The decision of the Secretary of State caused disappointment to the Indians, the majority of whom are illiterate labourers. The Secretary of State, however, made it plain that the aim of policy in British Guiana was the adoption of universal adult suffrage at an early date. In Trinidad universal adult suffrage as in the case of Jamaica, has been introduced.

In the beginning of 1949 the Secretary of State for Colonies made recommendations for the expansion of the Executive Council and the Legislative Council in Trinidad so as to increase the extent of elected representation. These are now being considered by the Government of India.

CEYLON

A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council in December, 1927, as the Indian Labour Ordinance No. 27 of 1927. The standard rate of wages agreed upon were introduced with effect from the 1st January, 1929. In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid and low country estates were reduced in 1932 and 1933.

Since September, 1935, there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September, 1937, with an increase of prosperity in these two industries, the demand from the planters for extra labour became insistent. The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise.

INDO-CEYLON RELATIONS

In 1936, as a result of a resolution passed in the State Council, the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non-Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of immigration into Ceylon of workers from other countries, including assisted estate labourers.

The report of the Commission was published in April, 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home; that the immigrant workers made possible an economic and general advance which could not have taken place without them; that Indians did not undercut wages; that the existing means of control of immigration were sufficient and that the restriction of Indian immigration for the protection of Ceylonese employment was not practicable.

Ban on Emigration.—Early in 1939, the Government of India came to know that the Ceylon Government had under consideration some scheme for the replacement of Indian daily paid employees in the Government Departments by Ceylonese. The Government of India at once communicated to the Ceylonese Government their strong objection to the proposed scheme and suggested that it should be held in abeyance pending discussions at the time of trade negotiations, which were to take place between the two countries very soon. The Ceylon Government did not agree to that and also to other requests from the Government of India and the latter were compelled to withdraw their offer to negotiate a trade agreement and also to impose a ban on the emigration to Ceylon of Indian unskilled labour from the 1st August, 1939.

The Ceylon Government, however, continued their policy of replacement of Indian daily paid employees and by the end of 1940 over 2,500 employees, including about 1,200 workers, retired from Ceylon Government service under the scheme.

NEGOTIATIONS

The vindication of the cause of Indian immigration into Ceylon by the Immigration Commission did not satisfy Sinhalese opinion. The Board of Ministers were intent on some measure to control Indian immigration and a memorandum containing a summary of certain far reaching proposals designed to restrict the entry of persons into Ceylon, whether for purposes of permanent residence or for taking up any occupation in Ceylon, was referred to the Government of India in August, 1940, in accordance with an assurance given to them in the matter. It was agreed to discuss these proposals during the informal conversations arranged to be held in November, 1940, in New Delhi to consider all questions outstanding between the Indian and Ceylon Governments.

The Conference was held at New Delhi from the 4th to the 12th November, 1940. The proposals of the Ceylon Delegation were conditioned by one main purpose, namely, a substantial reduction in the number of Indians resident in the Island, and sought to

limit full citizenship rights to Indians in Ceylon in the second or third generation while extending certain restricted rights to those Indians with only a Ceylon domicile of choice (which was to include among other conditions to be prescribed residence in Ceylon for a minimum period of five years). They further proposed that all other Indians in Ceylon and future immigrants should be debarred for ever from acquiring franchise or other rights of citizenship.

The Government of India, on the other hand, pressed for full citizenship rights for Indians who had put in five years' residence in the Island and produced evidence of a permanent interest in the Colony and for opportunity for all other Indians in Ceylon on a prescribed date to qualify for such rights in due course. As the Ceylon Delegation were not prepared to modify their attitude, the talks ended in a breakdown of the negotiations.

On 4th March, 1941, the Board of Ministers introduced two Bills in the State Council, one to provide for the registration of persons in Ceylon who did not possess a Ceylon domicile of origin, and the other to make provision for the regulation and control of the entry of non-Ceylonese into Ceylon. These bills were however held in abeyance by the Government of Ceylon pending an outcome of the India-Ceylon talks.

JOINT REPORT

In August, 1941, at the request of the Government of Ceylon, the Government of India agreed to a resumption of the informal conversations that had ended inconclusively at New Delhi in November, 1940. Delegations from the two Governments met at Colombo on the 5th September, 1941, and the conference ended on the 21st when agreed conclusions were reached on all the subjects discussed and a joint report was signed by the two Delegations.

The proposals in the joint report, however, came in for criticism from prominent Indians and Indian Associations in Ceylon, particularly in regard to the provisions about the establishment of domicile of choice, the reservation in the grant of franchise rights to the Indian population already in Ceylon, the absence of specific provision for the safeguarding of domicile rights of the children of holders of certificates of permanent settlement, the disabilities attaching to absence of more than a year, and the conditions on which future immigration might take place. Opinion in India was also strongly against the proposals in the joint report, and on 17th November, 1941, the Central Legislative Assembly rejected the joint report.

In view, however, of the developments in the Eastern political situation, it was agreed between the two Governments that further consideration of the Report should be suspended and that the *status quo ante* introduction of the Immigration Ordinance should be maintained. Considering the hardship caused to Indian labourers already in Ceylon on account of the ban, the Government of India relaxed the ban in respect of such labourers as were in Ceylon on 1st September, 1942. Soon after that, the Ceylon Government approached the Government of India for additional labour for rubber-tapping on same terms of employment as those offered to Indian labour already in Ceylon and on the condition of compulsory repatriation to India at the end of war or after other agreed period. The Government of India set their face strongly against any suggestion of compulsory repatriation and made counter-proposals in this regard. But the Government of Ceylon did not agree to them.

DISCRIMINATION

In 1945 the Government of India had some correspondence with the Government of Ceylon for the resumption of Indo-Ceylon negotiations and the latter Government expressed a desire that the negotiations should be resumed when the first Government was formed in Ceylon under

the new constitution. Accordingly, when the new Government was formed in Ceylon in September 1947, the Prime Minister of Ceylon came to Delhi in December 1947 for discussion with the Prime Minister of India on the Indo-Ceylon problem, and the two Prime Ministers agreed in principle on the question of citizenship rights of Indians in Ceylon subject to further discussion by the two Governments.

There are certain legislative measures enacted by the Ceylon Government which are in effect of a discriminatory nature and have therefore affected Indians in Ceylon, the most important of them being the Land Development Ordinance, the Omnibus Services Ordinance and the Fishing Ordinance under which Indians are prohibited from enjoying the rights and privileges conferred on the Ceylonese.

CONSTITUTIONAL REFORMS

There are certain executive discriminatory measures also which affect Indians for example, by a circular issued in 1940 the Ceylon Government have restricted appointments to public services to those 'Ceylonese' who are defined as a British subject born in Ceylon and one of whose parents was born in Ceylon.

The proposals for constitutional reforms in Ceylon were revived, as a result of persistent demands in that country, by a declaration by H.M.G. on the 26th May, 1945, authorising the Ministers to proceed with the drafting of proposals for a new Constitution, to be examined in detail by a Commission or Conference. The declaration put full responsible government under the Crown in all matters of internal civil administration as the goal of the contemplated constitutional advance. H.M.G. then announced in July 1944 that a Commission would be sent to Ceylon at the end of the year to examine the proposals made by the Ministers and it would enter into consultation with all minority parties concerned with the Constitution.

The Commissioner under the chairmanship of Lord Soulbury arrived in Ceylon on 22nd December, 1944, and invited proposals for the reform of the Ceylon constitution. The Indian community in Ceylon presented their case before the Commissioner which completed its sittings and returned to England in March 1945.

The report of the Commission on constitutional reforms for Ceylon was published on the 9th October 1945. They recommended the continuance of adult suffrage on the present basis with a legislature composed of the House of Representatives (consisting of 95 elected and 6 nominated members) and the Senate (consisting of 15 elected from the lower House and 15 nominated members) and a Cabinet on the British model with full responsibility in all matters in internal affairs. All Bills relating to defence, external affairs, and currency were to be reserved by the Governor-General for His Majesty's assent while any Bill relating to trade and communication was to be reserved if it prejudiced the interest of any part of the Commonwealth.

The safeguards for minorities were contained in the statutory prohibition of legislation, discriminatory against persons of one community or religion and the reservation by the Governor-General of any bill involving oppression or serious injustice to any racial or religious community. The second chamber by impeding precipitate legislation and the Public Service Commission by its freedom from the taint of partisanship would also constitute additional safeguards.

The main demands of Indians in Ceylon that were placed before the Commission were the grant of franchise to the Indian community in Ceylon on a footing of equality with the rest of the population and of citizenship rights to Indians resident in Ceylon for a prescribed period and making a declaration of permanent settlement in Ceylon. Their demands were

ignored by the Commission and they left the Indo-Ceylon question to be decided by negotiations between the two Governments.

INDEPENDENCE ACT

On 31st October 1945, H.M.G. published a White Paper which accepted almost all of the recommendations of the Commission, but deviated from them only in minor details. A resolution regarding the acceptance of the White Paper was debated upon in the Ceylon State Council on 8th November 1945.

The Ceylon (Constitution) Order in Council was issued on the lines of the White Paper and published on 16th May 1946. A Delimitation Commission was also appointed by the Governor in May 1946 to demarcate constituencies which would return Ceylon's first Members of Parliament under the new constitutions.

The General elections in Ceylon under the new Constitution took place in August-September 1947, and a new Government was formed in Ceylon in September, 1947.

The Ceylon Independence Act was afterwards passed by the British Parliament which conferred Dominion Status on Ceylon with effect from the 4th February 1948. Before this status was conferred on Ceylon, agreements were entered into between the Government of Ceylon and H.M.G. regarding external affairs, defence and public servants.

Exchange of Representatives.—In October, 1942, with the concurrence of the Government of India, the Government of Ceylon appointed their Special Representative in India to secure and maintain adequate food supplies for Ceylon from India and to improve relations between the two countries.

The Government of India also appointed, on a reciprocal basis, a Representative in Ceylon in August 1943 who has been since December 1947 redesignated as the High Commissioner for India in Ceylon.

Citizenship.—Under the provisions of the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act, passed by the Ceylon Legislature in 1948, the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions (a) an applicant must have a specified minimum period of uninterrupted residence in Ceylon, (b) he must have an adequate means of livelihood, and (c) he should be in a position to comply with the laws and customs of Ceylon. The procedure prescribed for the admission of Indian residents to the Ceylon citizenship is rather complicated, but the Ceylon Government have not accepted any suggestion to make the conditions less rigorous. This has created bitterness among the Indian community in Ceylon.

MALAY

The position of Indians in Malaya before the occupation by the Japanese has been fully dealt with in the 1942-43 issue of the Year Book. On the cessation of hostilities in August, 1945 the country was put under military administration till the establishment of civil Government on the 1st April, 1946.

The old office of the Agent of the Government of India in Malaya at Kuala Lumpur, which ceased to function on the Japanese occupation of the country, started functioning on the 1st September, 1945 under the charge of Mr. T. G. Nataraja Pillai, the Assistant Agent. In October, 1945 the Government of India appointed Mr. S. K. Chettur, I.C.S., as their Representative and Liaison Officer with Supreme Allied Commander, South East Asia. He opened his office in Singapore in January, 1946. His designation was changed to that of the Representative of the Government of India in Malaya with effect from 1st April 1946. Mr. John A. Thivy formerly President of the Malayan Indian Congress was appointed Representative in August 1947 in succession to Mr. Chettur.

Condition of Indians.—Soon after the establishment of the military administration reports received in India showed that large number of Indians had been arrested and were being prosecuted because of their connections with the Indian Independence League and the Indian National Army.

The reports also showed that the economic condition of Indians, particularly that of labouring class, was unsatisfactory. A large proportion of the Indian labourers who had been drafted by the Japanese for the construction of the Burma-Siam Railway were reported to have perished and the survivors were said to be in miserable plight. On account of the repatriation of the Japanese issued currency called 'banana' currency the sufferings of the labouring classes were aggravated. Acute shortage of cloth and medical aid was being felt.

The Government of India, therefore sent their Representative, Mr. Chettur to Malaya in November, 1945 to study the condition of Indians in that country. Soon after his return in December, 1945 a non-official delegation consisting of the Hon'ble Pandit H. N. Kunzru, Member of the Council of State and Mr. P. Kodanda Rao of the Servants of India Society was also sent by the Government of India. In December, 1945 the Working Committee of the Indian National Congress decided to send Pandit Jawaharlal Nehru to Malaya and he accordingly visited the country in March, 1946, and constituted a fund from 'purses' received by him during his visit and of some gold which had presumably been confiscated from the Japanese by British Military authorities. At his suggestion the Supreme Commander in Malaya at that time, Lord Mountbatten, agreed to hand over the gold to the Trust created for giving relief to Indians in Malaya. This Trust still functions.

RELIEF MEASURES

The number of Indians arrested on charge of collaboration with the Japanese was considerable. The policy of the Military Administration in Malaya caused great stir both in Malaya and India. The Government of India after considering the reports of their Representative and of the Kunzru delegation undertook the defence of the Indian arrestees by sending a panel of competent lawyers from India. The policy of the Military Administration towards collaborators underwent a change in March, 1946 and in pursuance of that all cases against Indians charged of mere collaboration were withdrawn.

The Government of India through their Representative in Malaya provided cash reliefs to deserving working class and middle-class Indian families in Malaya. They also placed funds at the disposal of their Representative for assisting destitute Indians in their repatriation to India. Certain relaxations on the export regulations were made to permit of old and new clothes for charitable purposes.

The Working Committee of the Indian National Congress in December, 1945 decided to send a Congress Medical Mission to Malaya. In March, 1946 the Government of India Medical Mission headed by Lt. Col. T. S. Shastri proceeded to Malaya and it was closely followed by the Congress Medical Mission under the leadership of Dr. M. R. Cholkar. The two Missions worked in close collaboration and did much good work. The Congress Medical Mission returned to India in August, 1946 and the Indian Government Mission in September, 1946.

Repatriation.—Soon after re-occupation there was a great demand for passages from Malaya to India. Passages were however very scarce, as there was no commercial shipping. Only a few berths became available on troopships from time to time. The Representative of the Government of India set up priorities committees at Singapore and Kuala Lumpur and

whatever passages became available were allotted by those committees. The passage position however did not show much improvement by September-October 1946. To cope with the great demand for passages the Government of India specially chartered S.S. 'Jaigopal' with a carrying capacity of 1,500 deck passengers for the Malaya-India run. It made 4 trips and considerably reduced the backlog awaiting repatriation. The shipping position improved in early 1947. The Representative of the Government of India provided free passages to a number of destitutes.

CONSTITUTIONAL PROPOSALS

In January 1946, His Majesty's Government announced the policy on the future constitution of Malayan Union and Singapore. According to this the 9 States of Malaya and the British Settlements of Penang and Malacca were to constitute a Malayan Union. The Malayan Union and Singapore were each to be under a Governor and there was to be a Governor-General for the Malayan Union and Singapore. A common citizenship in the Malayan Union was also envisaged.

In July 1946 a Working Committee consisting of the representative of the Government, of rulers of Malayan States and of the United Malayan National Organisation was appointed to make proposals in regard to the future constitution of Malaya. The Working Committee submitted their report towards the end of 1946 and it was published in January 1947.

As a result of these developments, Revised Constitutional Proposals were drafted and this was approved by His Majesty's Government in July 1947, and the Governments of the Federation of Malaya and the Colony of Singapore came into existence as two separate units with effect from the 1st February 1948 and the 1st April 1948 respectively.

The Federation of Malaya is under a High Commissioner assisted by a Federal Executive Council. There is a Legislative Council with 75 seats of which 50 are allotted to unofficial members. One Indian has been nominated to the Executive Council and 10 Indians nominated to the Legislative Council. The Colony of Singapore is under a Governor. Out of a total of 22 members in the Singapore Legislative Council 4 are Indians, three of them elected and one nominated.

Labour Situation.—Most of the rubber estates were in a very poor shape after the re-occupation of Malaya. The British Military Administration offered employment to the labourers on the rubber estates on fixed wage rate at 60 cents per man and 57 cents per woman. Later in the year the Planters Association of Malaya fixed the basic rate of wage at 70 cents per man and 55 cents for a woman and 40 cents for a child, plus a cost of living allowance of 10 cents for an adult and 20 cents for a child. On a Directive issued recently by the Malayan Planting Industries Employers Association the wage rates have been further stepped up to 90 cents for a working day of 8 hours, for all able-bodied male adult labourers. The temporary allowance has been fixed at 55 cents per day.

As most of the commodities which the labourer used were in short supply and the level of prices was 400 to 500 per cent above the pre-war level, there was general dissatisfaction amongst the labourers. Shortage of rice, the staple diet, was another factor in causing this dissatisfaction. The events came to head in Kedah in July 1946 where there was serious trouble in the two large American owned estates, the Buntar Estate and the Harau Estate. The number of people affected being 1,200 and 2,000 respectively. At about the same time a series of strikes also broke out on the Estates of Perak State involving some 3,000 Indian labourers in the Sungai Siput area. There was also a wave of sporadic

strikes in Selangor, Malacca and Johore States. Some of the strikes were amicably settled by the intervention of the Representative of the Government of India. Labour wages however remained at a low level but on account of a slump in the rubber market the labourers desisted from strikes and demonstrations to get their demands fulfilled.

MALAY UPHEAVAL

The situation suddenly worsened in June 1948. Strikes on estates and labour troubles became common. Some of these were based on genuine grievances of labour. Others were, however, incited by Communists solely to create difficulties for the local Governments. The Communists were the only party who had funds and machinery for organising labour. These they utilised to the full and the hopelessly held out of securing improvement in labour conditions attracted to their camp labourers who had little knowledge of communism as a political creed. The Communists had thus established a firm foothold in most of the labour or unionisation in Malaya. Strikes were soon followed by an open insurrection in the form of armed attack on European and Chinese estates and houses. The Malayan Government sought to meet the situation by the proclamation of Emergency Ordinance and Emergency Regulations. Other Ordinances designed to suppress the Communist movement were the Sedition Ordinance, the Restricted Residence Ordinance and the Printing Press Ordinance. All these gave wide powers to the Governments for dealing with the declared emergency.

The terrorists operating in Malaya are mostly Chinese, ex-guerrilla fighters of the Malayan Peoples anti-Japanese Army, and are said to number between 3,000 and 5,000. Their victims are mostly European estate managers, and Chinese, who are suspected of loyalty to the British. A few Indians have also suffered at the hands of the terrorists.

The Federal Government of Malaya have taken drastic steps to fight the menace by augmenting their police force, and drafting military forces from Hong Kong and the United Kingdom. Air craft have been used to destroy Government forces in localities and stranding terrorist strongholds in the jungles. Measures have also been taken to ban several Communist controlled Trade Unions, prominent among which are the Pan-Malayan Federation of Trade Unions, and the State Federation of Trade Unions, the latter comprised of individual unions functioning in the various States of the Federation. A number of Indian officials of these Trade Unions have also been arrested.

Laws, framed under the Emergency Regulations Ordinance, 1948, for the national registration of persons of all nationalities above the age of 12, through issue of identity cards, came into force on 23rd July, 1948. Finger prints and photographs of each person are taken, with a view to helping the police in segregating known and suspected terrorists.

Side by side with these strong measures to cope with the Communist terrorists, the grant of early self-government for the people of Malaya, comprising Malay, Chinese, Indians and other communities, owing undivided loyalty and unwavering allegiance to a single State and "taking their rightful place beside other self-governing peoples in the British Commonwealth", is contemplated.

BURMA

Burma was occupied by the Japanese in early 1942. For an account of matters affecting Indians there see the Year Book for 1942-43. The Allied forces made some advance in Burma in early 1945 and occupied Rangoon on 10th May, 1945. The Japanese surrendered in August, 1945, and soon after a military administration was established in the whole country under the Civil Affairs Service (Burma).

The Governor of Burma, who had remained in Simla during the war, returned to Burma on the 16th October, 1945 and established civil administration in the whole of Burma except the Tenshin Division from that date. The change-over

from military to civil administration was, however, gradual and by the 1st January, 1946, the civil administration was established in the whole of Burma.

Political Changes.—H.M.G. made an announcement on the future of Burma in May 1945. The Governor of Burma appointed his Executive Council consisting of 9 members on 4th November, 1945 and a Legislative Council of 31 members on 1st January, 1946. He also appointed the Hon'ble Mr. S. A. S. Tyagi, M.B.E., as his Advisor on India affairs. The main political parties in Burma did not participate in the formation of the Executive Council or the Legislative Council. H. E. Sir R. H. Dorman Smith, the Governor of Burma on account of ill-health and Major-General Sir H. E. Rance took charge on 31st August, resigned his post 1946. As a result of his negotiations with political parties in Burma a national Government under the leadership of U. Aung San was formed on 28th September, 1946.

In January 1947, a Burmese delegation headed by U. Aung San went to London to negotiate with H.M.G. the basis of transfer of power to Burma.

In accordance with the Attlee Aung San Agreement General Elections to a Constituent Assembly were held in April-May 1947. The A.F.P.F.L. Party secured an overwhelming majority of seats in the Constituent Assembly. The Assembly adopted the final constitution of Burma in September 1947. The Constitution envisaged a Union of British Burma and the various States and tribal areas. It further provided that the Union of Burma would be a Republic outside the British Commonwealth. The transfer of power from British hands to Burmese took place on the 4th January 1948 when Burma was formally declared an independent Republic.

Indian Embassy. The Office of the Representative of the Government of India with the Government of Burma which was functioning in Simla since October, 1941, moved to Burma in November 1945. Mr. Jananadas Mehta, the Representative of the Government of India resigned his post in June, 1946. Dr. M. A. Raul was appointed Representative in October 1946. His status was raised to that of High Commissioner in August 1947 after the independence of India. Later with effect from 4th January 1948 he was made Ambassador of India in Burma.

Burmese Embassy.—The Government of Burma appointed a Win as their first High Commissioner in India in August 1947. His status was raised to that of an Ambassador on 4th January 1948.

Immigration.—In 1944 the Government of India and Burma were understood to be considering the question of future Indian Immigration into Burma. The discussions remained at official level and no progress appears to have been made.

On account of shortage of shipping and abnormal conditions prevailing in Burma immediately after its re-occupation, free entry of Indians was not allowed for some time. Passages to Burma were later controlled by the Government of India and facilities to proceed to Burma were provided by them to evacuees and such of the non-evacuees who desired to proceed to Burma on compassionate grounds or on business, etc.

The Government of Burma promulgated the Immigration (Emergency Provision) Act, 1947 on the 13th June 1947. Under this Act, no person can enter Burma without an entry permit issued by the Controller of Immigration, etc. or a valid passport duly vised or endorsed by or on behalf of the Governor of Burma. It was stated that the measure had been necessitated by the large scale unauthorised entry of non-Burmans into Burma along the land frontiers adjacent to India, China and Siam. India lodged a protest against the promulgation of this Act, which they characterised as unnecessary and impertinent. The Government of Burma in reply stated that the legislation

was designed to meet the existing emergency and pending the conclusion of satisfactory agreement with the Government of India and so long as the present emergency existed they had no alternative but to continue to apply the Act to Indians seeking entry into Burma.

CITIZENSHIP

The Burma Union (Citizenship (Election) Act 1948, passed in April 1948, provides for the conferment of citizenship on a person who was born in any of the territories which at the time of his birth was included within His Britannic Majesty's Dominions and who has resided in any of the territories included within the Union of Burma for a period of not less than eight years immediately preceding the 4th January 1948, or immediately preceding the 1st January 1942, and who intends to reside permanently therein and submits his application in accordance with the procedure laid down. The Government of Burma have also enacted the Burma Foreigners Registration Act, whereby all persons who were not citizens of Burma on the 4th January 1948, are required to register as aliens. There are nearly 6 to 7 lakhs of Indians in Burma. It is understood that the majority will not elect for Burmese citizenship and will retain Indian nationality.

Soon after the inauguration of the Burmese Republic on 4th January, 1948, the Government of Burma commenced serving notices of discharge on Indian employees who were either not eligible to become Burmese citizens or unwilling to elect Burmese nationality. The Government of India have felt a special responsibility towards such employees of the Government of Burma as were in that Government's service while Burma was still a part of India and have sought (a) to secure adequate benefits for discharged personnel in the shape of leave, salary, pensions and (b) find alternative employment for them in India. The possibilities of (b) have been inevitably circumscribed by the obligations of relief towards refugees who have come to this country as a result of the partition of India.

LEGISLATION

With a view to expediting rehabilitation and reconstruction of the country, the Government of Burma controlled the import and export trade of the country. They have also controlled the internal distribution of some of the essential commodities. To step up the imports from India, a Burma Supply Mission was set up in November 1945 with its Headquarters at New Delhi. This office was merged into the office of the High Commissioner for Burma in India towards the end of 1947.

Emigration of unskilled Indian labour to Burma is prohibited under a ban imposed under the Indian Emigration Act, 1922, in July, 1941. In 1944, the Government of India, however, agreed to the recruitment of some labour by the military authorities. After the end of the war, though the ban was not lifted it was relaxed in favour of evacuees but later the exemption in favour of evacuees was withdrawn.

With the termination of war certain emergency legislation was enacted in Burma. This legislation affected large number of Indians who had assets and properties in Burma. Some of the important Acts were as follows :—

The Liabilities (War-time) Adjustment Act, 1945.—This Act aims at providing relief to the debtors who by reason of the circumstances created by the war, were unable to pay their debts. It confers on Courts in Burma certain powers in relation to remedies in respect of non-payment of money and non-performance of obligation, and also provides for the adjustment and settlement of the affairs of persons financially affected by reason of war circumstances.

The Custodian of Movable Property Act, 1945.—This is a piece of emergency legislation to provide for the speedy recovery and return to owners of movable property of which the owners had been deprived by circumstances arising out of the war and for the appointment of Custodians of such property.

The Lands Disputes (Summary Jurisdiction) Act, 1945.—The Act provides for a summary decision, by specially appointed "Commissioners" in disputes as to possession and boundaries of immovable properties without going into the question of ultimate right or title to the property. The Act aims at determining who was the last person in lawful possession of a particular immovable property during the short period between the dates when the British Administration began to disintegrate and finally ceased to function and leaves questions relating to periods prior to that, or later to the decisions of competent civil courts.

Immigration (Emergency Provision) Act, 1947.—See para. on Immigration above.

Courts (Emergency Provision) (Rangoon) Act, 1947. Under Section 7 of the Courts (Emergency Provisions) Act, 1913, the Civil Courts in Burma were deemed to be closed for the purposes of the Limitation Act with effect from 8th December 1941, until a date to be notified by the Governor of Burma. In 1946, 30th September was declared to be that date. Later however a notification fixing that date was cancelled. In early 1947 the Government of Burma enacted the Courts (Emergency Provision) (Rangoon) Act, 1947, in accordance with which Section 7 of the main Act was to be in force until the 31st March 1947. As a large number of Indians had evacuated to India during the war this piece of legislation was of particular interest to them.

The Accrual of Interest (Wartime Investment) Act 1947.—Under this Act debts, loans and mortgages made in Burma before 31st May 1942, do not bear any interest during the period of suspension of limitation. This measure was found necessary to prevent mounting of interest on debts, loans and mortgages for the period for which suits were not filed on account of suspension of limitation.

Foreign Exchange Regulation Act, 1947.—This Act places certain restrictions on the export of currency etc. from Burma. These are more or less similar to those imposed by the Government of India consequent upon the Financial Agreement concluded by them with I.M.G. The restrictions are designed to conserve foreign exchange.

The Agricultural Debts Moratorium Act, 1947.—This Act debars creditors who have any debts to realise from agriculturists who have decrees of civil courts against them, from taking any legal action in enforcing their claims. They were further required to register within 6 months from taking any legal action in enforcing their claims. They further required to register within 6 months from 7th May 1947, certain particulars in respect of their claims with the Deputy Commissioners of the Districts in which the debtors reside. The Act further provided that claims not registered with the local authorities within the specified period would not be entertained by the civil courts and thus be extinguished. The Government of India gave wide publicity to this provision of the Act for the benefit of evacuees from Burma.

LAND NATIONALISATION

Certain measures of agrarian reform introduced by the Government of Burma during December 1947 and in the beginning of 1948 indicated that they had decided upon a policy of complete nationalisation of agricultural lands in Burma. On 26th May 1948, Mr. Thakin Nu, the Prime Minister of Burma, announced a fifteen point programme to achieve 'leftist unity' which *inter alia*, included abolition of private ownership of agricultural lands and their resumption by Government for distribution amongst agriculturists. The representatives of Indian interests in Burma considered that they could not take objection to the policy of nationalisation as such, provided adequate compensation for lands is paid to the land owners. Early in September 1948, the Government of Burma published their Land Nationalisation Bill, which *inter alia* fixed the maximum compensation at twelve times the land revenue. Provision was also made

in the Bill for the appointment of a Land Commission to determine the basis of compensation. Representations were thereupon made to the Government of Burma, pointing out the inadequacy of the compensation proposed and suggesting that a multiple of 25 times the land revenue on a uniform basis should be adopted and adequate representation should be given to Indians on the Land Commission as well as on the Land Committees which will be responsible for the distribution of the resumed lands. The Bill was passed on 11th October 1948, without any substantial modifications. The Government of India then decided to send a delegation to Burma under the leadership of the President of the Indian National Congress to discuss matters arising out of the Act with the Government of Burma so as to arrive at a mutually satisfactory agreement. The delegation which was scheduled to leave for Burma on the 2nd February 1949, had to postpone their visit indefinitely at the last moment, at the request of the Government of Burma, owing to unsettled conditions in their country.

INTERNAL DISTURBANCES

Communal bitterness between the Karens and Burmese, which had existed even before the last War, was intensified during the post-war period as a result of the Karen demand for a separate State, with its boundary extended to areas where Karens are in a minority. A boundary Commission appointed by Thakin Nu, the Burmese Prime Minister, had been working for an amicable settlement since September 1948, but the extremist elements among the Karens openly revolted on 1st February 1949, when attempts were made to disarm the Karens, who had collected illicit arms in considerable quantity.

In the battle area of Insein there were about five to six thousand Indians. They did not appear to have been molested but when conditions deteriorated and part of Insein town was set ablaze either by the Karens or because of incendiary and trench mortar attacks by the Government forces on Karen positions, it became immediately necessary to evacuate the Indian population. A truce was arranged by the Indian Embassy officials and about 4,000 Indians were evacuated to Rangoon. The Government of Burma set up an official Committee to look after the refugees. The Indian Embassy, Rangoon, with the assistance of Burmese Government officials and other non-official organisation rendered all possible relief to them. The Government of India also placed funds at the disposal of the Indian Ambassador to enable him to render immediate relief. Steps were also taken to provide shipping accommodation for people who wanted to return to their homes in India.

ZANZIBAR

The small Protectorate of Zanzibar, consisting of the two islands of Zanzibar and Pemba, has an Indian community of nearly 15,000 out of a total population of 235,000. These Indians are mostly traders, and the trade in cloves of which Zanzibar furnishes more than 80 per cent of the world's supply, is largely in their hands. No problems of any magnitude faced this community until July, 1934, when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H.H. the Sultan. (For full details see *The Indian Year Book 1934-43*.)

MAURITIUS

In April, 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an officer for the purpose and to give him all facilities; and in December, 1924, Raja Maharaj Singh, left India to conduct the necessary inquiry.

Raja Maharaj Singh's report was published by the Government of India in August, 1925. The various recommendations made in the report were recommended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Raja Maharaj Singh in regard to the renewal of emigration to Mauritius, viz., that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Raja Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the island, the Colonial Government expressed their willingness to give effect to several of them.

Labour Trouble.—The condition of Indians in this Colony continues to remain satisfactory till 1937 when there were labour disturbances on certain sugar estates employing Indian labour. The Colonial Government appointed a Commission to enquire into and report on the disturbances. The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinance of 1922 which mainly dealt with indentured labour.

Both recommendations have been given effect to in this Colony. The Labour Ordinance of 1938 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers, a large number of whom are employed on sugar estates. The Industrial Associations Ordinance of 1938 provided for the regulation of conditions of employment, the establishment of machinery for the peaceful settlement of disputes and generally the formation of Industrial Association. This Ordinance, it will be observed, provides for collective bargaining by industrial labourers.

The Government of India had under consideration for some time the question of deputation an officer to visit the Colony and to report on the condition of Indians resident there, as no officer of the Government of India visited the Colony since Raja Maharaj Singh's deputation in 1925. The suggestion was accepted by I.M.'s Government and in May, 1940, Mr. S. Ridley, I.C.S., Secretary to the Agent General for India in the Union of South Africa, was deputed to visit Mauritius. He stayed in the Colony for about five weeks.

In his report, which was published at the end of 1943, he made a number of recommendations, the more important of which are (1) minimum wage for labourers in the sugar industry, (2) grant of war bonus, (3) Government control over housing of labourers of estates, (4) introduction of compulsory education in suitable stages, (5) extension of franchise by adding educational qualification as an alternative to property qualification, and (6) adequate representation of the Indian community in the Council of Government and the Executive Council, etc., etc.

Disturbances on Estates.—In 1943 disturbances occurred on 4 estates pending settlement of a demand for higher wages. The police were reported to have been assaulted and in the course of firing which followed, 5 persons were killed and 3 wounded. A Commission of enquiry was appointed to investigate the cause of the outbreak and the Conciliation and Wages Boards examined the question of adjustment of wages. The report of the Commission was published on the 28th November, 1944.

The Commission observed that the main underlying causes of the disturbances were unsatisfactory economic conditions and low wages. It made far-reaching recommendations for the improvement of labour conditions, general welfare and health services and the general administrative machinery. The Government of Mauritius have taken action on certain recommendations in regard to the improvement of labour conditions and have set up a Central Statistical Bureau.

DELHI PROVINCE

THE transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interest of the whole of India, to de-politicise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province. The seat of the pre-partition Bengal Government for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential. Its disadvantages had been recognised a long ago in 1868, when Sir Henry Maine advocated the change.

Various places had been discussed as possible capitals, but Delhi was by common consent the best of them. Its central position and situation as a railway junction, added to its historical associations, told in its favour; and, as Lord Curzon said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this assumption by the Paramount Power of the seat of venerable Empire should at once ensure the continuity and provide the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital was laid by the King Emperor on December 15, 1911, the famous site being on the eastern slopes of the hills to the south of Delhi on the fringe of the tract occupied by the Delhi of the P.T. The land chosen is free from liability to flood, has a natural drainage, and is not water-logged. It is not cluttered with monuments and tombs needing reverent treatment, and the site is near the present centre of the town of Delhi. A Committee consisting of Surgeon-General Sir C. P. Lal, Mr. H. T. Keeling, C.S.A., A.M.I.C.E., and Major J. C. Robertson, I.M.S. was appointed to consider the comparative healthiness of the site, and of an alternative one to the north of the existing city. Their report, dated 4th March 1913, stated that "the Committee, after giving full consideration to the various points discussed in the above note is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

Town Plan and Architecture. A Town-Planning Committee, appointed to advise Government, submitted its report in March, 1913, with a plan of the lay-out and work was begun in accordance with that Report. The central point of interest in the lay-out, which gives the motif of the whole, is Government House and two large blocks of Secretariats. This Government centre was given a position at Raisina Hill near the centre of the new city. Sir Edwin Lutyens was the architect for Government House and Sir Edward Baker for the Secretariats. The former building was estimated to cost approximately Rs. 140 lakhs and the latter groups were originally estimated at some Rs. 121 lakhs.

To the east of the forum, and below it, is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indraprastha. Across this main axis runs an avenue to the shopping centre. Other roads run in different directions from the entrance to the forum. The axis

running north-east towards the Juma Masjid forms the principal approach to the new Legislative Chambers. They are officially described as the Council House and the road is named Parliament Street. The railway station for the new city finds its place about half way between the old and new cities off the road through Paharganj, which lies to the west of Old Delhi in the direction of The Ridge.

The main roads or avenues range from 76 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

Enclave. In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. The enclave was entirely taken from the Delhi district of the Punjab and its total area is 578 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 398,269 and of the new area 14,552, or a total of 412,821. The population of the Municipal town of Delhi was 2,29,144.

The plans of the New Capital allowed for a population within it of 70,000. Sites were allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the Capital and several of these habitations were erected.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been the aim "to express within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features, without abandoning the architect's aim to avoid doing violence to the principles of structural fitness and artistic unity.

Cost of Scheme.—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors afterwards increased the amount, the chief of these being the immense rise in prices after the war, and the Legislative Assembly were informed by Government on 23rd March 1921, that the revised estimate then amounted to 1,307 lakhs of rupees. This amount included allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates.

The New Capital Enquiry Committee, in its report published in January, 1923, estimated the total expenditure at Rs. 1,292 lakhs including Rs. 12 lakhs for loss by Exchange. Actual expenditure up to approximately the end of 1929 was Rs. 14 crores.

The Project Estimate contained certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes would be in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay, whilst there were other items on which

some return on account of the sale of leases, general taxes and indirect receipts was secured.

The project, after being completed and closed, was re-opened in 1933-34. This became necessary owing to the need to increase residential accommodation for officers and staff and was facilitated by a period of cheap money. Government utilised the occasion for extending the residential accommodation for visiting members of the Indian Legislature. The expenditure on the construction of New Delhi is Rs. 23,91,15,501 upto the end of 1945-46. The population of the new City is 93,733 according to the 1941 Census. The population today is over a million and a half.

Progress of Work.—The construction of New Delhi was made at satisfactory speed, having regard to the curtailment of the Budget allotment in consequence of the First World War and the absence of officers and other establishments at the war. The Secretariats were so far advanced that they were transferred to them from Calcutta in October, 1924, the offices of the Accountant-General, Central Revenue, and the headquarters of the Royal Air Force in India were also housed in them in the winters of 1924-25 and 1925-26. The original programme of residential buildings for Government officers and staff of various grades were then nearly completed. The whole of the civil side of Government moved from Old Delhi into their quarters in the new Secretariats on coming down from Simla in November, 1926. The Viceroy took up his residence in the new Government House on December 23, 1929. The Viceroy until then had resided during the Delhi season at Viceroy's Lodge in Old Delhi. The Government of India in 1927 devoted special consideration to the question whether their ordinary annual 6 months residence in Delhi should be extended each year to 7 months and early in 1928 decided in consultation with the India Office to endeavour to stay in Delhi for half of each year, the new order being introduced for trial in 1928 by keeping the Secretariat in New Delhi till mid-April and bringing it down from Simla again in mid-October. The experiment was not very successful and was not repeated till 1932-33, when Retirement Committees had strongly recommended a longer stay in Delhi in order to extract rent for a longer period from the seasonal official occupants of its residential buildings, the rents in Delhi being higher than those for residences in Simla. An early descent from Simla was postponed in the autumn of 1934 on account of a report by the Public Health Commissioner on the general unhealthiness of the Winter Capital in October.

Anti-Malaria Measures. There was about ten years ago an increase in malaria bearing mosquitoes and consequential fever in New Delhi. This led to a special inquiry in 1926. The inquiry showed that both Old and New Delhi were ringed about with prolific mosquito breeding places, one of the worst being the area utilized for sewage outfall. The water borne sewage of both Old and New cities is dealt with in a farm which, when the new city was built, was placed immediately outside its southern boundary. The Government of India after the 1926 inquiry were forced to adopt a new scheme for the removal of the farm to a more distant site and chose one some four miles further away from the city. Anti-malaria operations on a large scale, scientifically directed, were simultaneously undertaken. The estimate of their cost being Rs. 14 lakhs. Improvements in the water-supply of the new Capital with a view to a larger population being retained in it during the summer was also effected.

When the residential buildings in New Delhi were, in the course of the original construction of the new city, about to be designed, the Government of India issued orders that they were to be "for cold weather occupation only." This rule was followed. The general principle embodied in the design of the houses was that of planning them to capture as much warmth from the sun as possible. Secretariat, residential bungalows and staff quarters are largely inappropriate for hot weather occupation.

Art Decorations.—The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in by the beginning of March 1928 small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and, if finally approved by the Committee, fixed according to the mural-painting process *in situ*. Other techniques, such as fresco or tempera, were optional. Artists or schools of art, who sent in small scale drawings, had to bear the initial expense of preparing them. When these were approved by the Committee, the out-of-pocket expenses paid in addition to a suitable honorarium Government undertook to pay for the finished pictures done from approved sketches but gave no guarantee that the finished paintings would permanently be preserved. Government intimated that historical or allegorical subjects would be given preference over religious ones and English artists living in India were barred from competition, the work being strictly reserved to Indian artists. Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that the specially appointed expert Committee approved of nearly all. A great deal of painting was completed and the work was continually progressing until the depression in the thirties dried up funds.

All-India War Memorial.—H. R. H. the Duke of Connaught on 10th February, 1921, laid the foundation stone of an All-India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's sake proceeded with slowly. The memorial was formally inaugurated by Lord Irwin in February, 1931, in the presence of representatives of every unit of the army in India, of the Royal Air Force and of a large concourse of official and other spectators.

It was decided in 1936 to erect a memorial statue to the King-Emperor George V, in Princes' place, the large park-like area lying between the All-India War Memorial and the Purana Qila. The origin of this proposal was a movement started among the Ruling Princes, some time previously, to erect a white memorial statue to the King in the new city and this scheme had made considerable progress when he died. The matter was then considered in a broader light and in consultation between the Princes and the Earl of Willington, the Princes agreed to merge their scheme in a larger one for an All-India memorial to the King. The Viceroy issued an appeal for subscriptions to the major scheme and he and the Countess of Willington opened the general subscription list with a donation of Rs. 5,000. Sir Edwin Lutyens was invited to submit a design for a memorial and the statue was eventually unveiled by the then Viceroy, Lord Linlithgow, on November 14, 1939.

Public Institutions.—The Government of India further in 1922 introduced and passed a Bill for the establishment of a unitary, teaching

and residential University in Delhi, the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university being a matter of time it was decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. The general question of the finances of the University was in 1927 the subject of inquiry by a special committee appointed by Government. For the time being the University was housed in the temporary buildings in old Delhi occupied by the Civil Secretariat until 1929 and in 1931 the old Viceregal Lodge was allocated to it for its future home. The Government of India have also allotted free land to various colleges in Old Delhi.

H. H. the Maharaja of Bhavnagar having offered Rs. 5,00,000 for the provision of some amenity in the new city, the Government of India decided to utilize the sum for the provision of a Stadium. The ground which they took for this was a large area lying immediately below the western walls of the Purana Qila, i.e., between them and Princes' place. This area was originally marked by Sir Edward Lutyens, in his plan, to be an ornamental lake. Practical consideration led to its abandonment for that purpose and the area was laid out as a park. A large proportion of the Maharaja's Rs. 5,00,000 was utilized for the provision of a huge brick grandstand overlooking the central portion of the park taken for the Stadium.

Inaugural Ceremony.—The New City was the scene of notable and elaborate inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones erected in various parts of the land by Asoka and were presented by Canada, Australia, New Zealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the ceremony of unveiling. New Zealand nominated a Member of the Government of India to act in her behalf for the same purpose.

City Extension.—The main direction for the future extension of the new city is southward, where for some three miles beyond the limits of present development, Government have land in their possession and have placed it at the disposal of the City administration. The New Delhi Civil Aerodrome lies immediately southward of the existing new City boundary on the southern side and the Earl of Willington in February 1936, opened alongside the high road there a fine new Willington Air Station, which is furnished with the most modern equipment for day and night flying. Building has already taken place in the same neighbourhood.

A New Delhi Municipal Committee with its own permanent official Chairman and Secretariat was established in 1932.

The Improvement Trust was instituted in 1937, its duties being to provide for the expansion of the new capital, including both old and new cities and urgently to deal with the insanitary overcrowding of the old city, a problem arising from the rapid increase of population and influx of refugees.

ADMINISTRATIVE PERSONNEL

Chief Commissioner, Shankar Prasad, I.C.S.
Deputy Secretary, Ministry of Finance, Delhi Province, P. K. Basu.

Registrar to the Chief Commissioner, P. H. B. Wilkins.

Deputy Commissioner, Rameshwar Dayal, P.C.S.

Division Units, Captain P. A. Jones.

Liaison Officer, Junior Division Units, Lt. S. Iqbal
Singh.

FOREIGN POSSESSIONS IN INDIA

FRANCE and Portugal are now the only remaining European powers with territorial interests in India after the withdrawal of the British. Of these, Portugal was the first to establish a maritime Empire in Indian waters and France had one of the powers that disputed among themselves the Indian market on the partial eclipse of Portugal following upon the union of that nation with Spain under Philip II in 1580.

FRENCH SETTLEMENTS

The French establishments in India, as defined by the Anglo-French treaties of 1814 and 1815, comprise an aggregate area of 203 square miles, with a total population of 323,295 according to the census of 1941. The establishments are:

- (1) On the Coromandel Coast: (a) Pondicherry, the capital, together with the adjoining territory, divided into six communes, (b) Karaikal and the dependent districts divided into six communes;
- (2) On the coast of Orissa: Yanam, with the dependent villages; the lodge of Masulipatam and the garden Francepeth;
- (3) On the Malabar Coast: Mahé with the adjoining territory; and the lodge of Calicut;
- (4) In Gujarat: The factory of Surat; and
- (5) In Bengal: Chandernagore with Gorcutty, and the lodge of Kasimbazar, Jongadia, Dacca, Balasore and Patna.

Following India's achievement of Independence in 1947, the Government of France made a gift of the various lodges, which were but isolated plots of land where formerly French factories had stood, to the Indian Union.

It further agreed as a result of negotiations with India to hold referenda in their remaining settlements in order to ascertain the people's will as to whether they would continue within the French Union or be merged in India. In keeping with this arrangement, a referendum was held in June 1949 at Chandernagore which voted overwhelmingly in favour of merger with India. The future of the remaining French establishments will be similarly decided in the course of this year (1949).

HISTORY

Long before the days of Louis XIV, efforts were made by the French to establish direct trade relations with India. In 1601, a Company of the St. Malo merchants fitted out two ships in an attempt to reach the East Indies. In 1604-5 followed the attempt of Henry IV who, emulating the example of the Dutch and the English, set up a French East India Company. In 1616, a French fleet, sailed from St. Malo for the Moluccas while in 1619 the two so-called "fleets of Montmorency" sailed for Malaya and Japan.

Though these early efforts met with scant success, interest in Eastern trade was kept up by the success of French merchants and travellers in exploring the sea route by the Cape as well as the much shorter land route via the Levant and Asia Minor. In 1612 Rigault, obtained from Cardinal Richelieu the privilege of sailing to Madagascar and establishing colonies and trade there. The charter granted to him led to the foundation of the La Compagnie d'Orléans which was granted the monopoly of Eastern trade for 20 years, and to whose endeavours was due the establishment at Fort Dauphin, the first port easily accessible to ships sailing to and from India. On the accession of Louis XIV, the great minister Colbert, convinced that French maritime trade could best be promoted by means of joint stock companies, proposed and carried out the establishment of a national institution uniting all the resources of the

country. This was the famous Compagnie des Indes Orientales. The King contributed three million livres free of interest from which were to be deducted all losses incurred during the first ten years, and the royal example was expected to be emulated by the nobles. The new Company was an official body. The King undertook to protect it and to escort its ships with his own men-of-war and granted it extensive powers including the powers to fly the royal flag, depute ambassadors, enter into treaties with and make war on Indian princes and in order to signify the great hopes he and his minister reposed in the venture, he also granted it arms and a motto *Fluctus quoquoque ferat*.

Thus equipped, the Company's fleet succeeded in occupying Madagascar and making Fort Dauphin the base of operations. It was not till 1668, however, that the first Comptoir or factory was founded at Surat by the Company's Resident, Caron. At about this time the Dutch, whose power had reached its apex in Indian waters, canvassed with the Indian princes against these newcomers, and Colbert, urged by the Company's factors to give the Indian princes a "sample of their master's power", despatched a squadron of 10 vessels under De La Haye with instructions to establish the French position firmly in India and also neutralise the propaganda of the Dutch by inspiring the Indian princes with a high opinion of the power as well as the justice of His Majesty. In the course of his expedition, De La Haye secured for the French the grant of Trincomalee from the King of Kandly, but failed to engage the Dutch fleet which had securely established itself in Trincomalee Bay. The result was that no sooner had the French squadron quitted the bay, than the Dutch seized the handful of men who had been left behind and took possession of Trincomalee, ejecting the French from Ceylon. De La Haye, however passed over to the Coromandel coast where he conquered St. Thome, a Portuguese position in the neighbourhood of Madras, which had ten years earlier been taken by the King of Golconda. At St. Thome the French expeditionary forces were besieged for two years. It was then that Bellanger de Lespency sent to Porto Novo to seek from the rival government of Bijapur provisions for the besieged, obtained from Sher Khan Lodi, the Governor, in addition to munitions and victuals, a site for a factory in a fishing village Pondicherry, which the Dutch had previously occupied and abandoned.

The city of Pondicherry was founded by Francois Martin who devoted himself wholeheartedly to its fortification and embellishment. But the Dutch, who had sworn to drive the French out of India, attacked and took it in 1693. Convinced of the decided superiority of their arms, they, too, gave themselves to beautifying the city and improving its defences. Certain that it would never be restored to the French. But in 1697 by the treaty of Ryswick, the French obtained the rendition of the settlement, and the Dutch had to rest content with the compensation of 10,000 pagodas which they were paid in return for the improvements they had effected. In the time of Dumas, the next governor, Pondicherry was attacked by the Marathas under Raghuola, fresh from their victory over the Portuguese at Bassein, but was defended successfully.

In 1746 while France and England were ranged on opposite sides in the War of the Austrian Succession in Europe, the French La Bourdonnais captured Madras and in retaliation an English squadron tried to seize Pondicherry only to be repulsed with heavy losses by Duplex, the Governor-General. Fortune, however, was not so partial to French arms in India during the Seven Years' War during which France and England were again fighting on opposite sides. In the course of hostilities against the French commander Lally took Madras which

was given to pillage and rapine. He also took and demolished Fort St. David near-by. But it was not long before the tide turned and the French were forced to capitulate at Pondicherry in 1761. The English took the town and wreaked vengeance by razing it to the ground with its fortifications, walls, and buildings. Simultaneously too France lost to the English all her other possessions in India. She secured their restoration at the Peace of Paris, which settled the disputes of the Seven Years War.

During the American War of Independence, France having made common cause with the rebel colonies against England her possessions in India were again seized by the English and remained in their possession till they were restored a second time by the Peace of Versailles, in 1783.

For yet a third time the French Settlements were seized by the English in 1793 during the Revolutionary and Napoleonic wars. They were ordered to be restored after the Peace of Amiens in 1802. But with the renewal of the war in 1803 the restoration of the settlements which had been retained by Lord Wellesley was cancelled. They were finally re-returned to France for the last time in 1816-17.

Chandernagore was acquired by the French in 1688 from the Delhi Emperor. Mahé was seized in 1725-26; Karaikal was secured in 1729 under a grant from Chanda Sahib and Yanam was seized in 1750 and formally ceded to France two years later.

COMMERCE AND INDUSTRIES

Domestic commerce is insignificant as the area is too small. The chief crops are rice, groundnuts, peas, lentils, vegetables, onions and other vegetables, betel, indigo, sugar-cane, banana and other fruits, coconuts and oleaginous grains. The major portion of these products is consumed in the districts themselves the only markets being the towns of Pondicherry, Karaikal, Yanam, Mahé and Chandernagore.

The chief exports are oil-seeds which are sent from the ports of Pondicherry and Karaikal. The imports are mainly manufactured goods, textiles and luxury articles from France and the countries on the Continent.

There are at Pondicherry 2 cotton mills and at Chandernagore 1 jute mill. The cotton mills have in all 1,966 looms and 85,976 spindles giving employment to some 7,000 people. Besides these there is one oil factory, several oil presses for groundnuts and one ice factory.

There is a Chamber of Commerce elected by the leading merchants at Pondicherry.

The only bank is La Banque D'Indo-chine, which caters for the needs of the local business.

Pondicherry is served by the Messageries Maritimes whose ships sail monthly from France to Indo China and by the steamers of the B.T.S.N. Co. plying fortnightly between the East Coast ports and the Straits Settlements. A railway line also connects Pondicherry with Villupuram, a junction on the South Indian Railway.

The Customs Union which was established as a result of negotiations with the Government of India in 1911 expired in 1918 and has so far not been renewed.

EDUCATION

At Pondicherry alone, there are at present, besides the Law School, and the Medical College, one undenominational College for secondary education, one secondary school, 5 public institutions for higher primary education, four schools preparing students for English examinations, fifteen public schools for boys, eighteen public schools for girls and twenty-nine co-educational, all imparting primary education.

At Chandernagore, the chief institution is the College Duplex formerly called St. Mary's Institution, under Government control. The minor settlements possess, gaudi, churches and school buildings and provide primary education. An excellent public library and a model record office at Pondicherry cater for all the needs of scholarship.

PONDICHERRY

Pondicherry is the chief of the French settlements in India and its capital is the seat of the Government. The city is situated in the district of South Arcot of the Madras Province, about 89 miles from Madras. It is divided by a canal into two parts, the Ville Blanche (or white city) and the Ville Noire (the dark city). The Ville Blanche is toward the east, on the seashore, and has a European appearance, the streets being broad and spacious, laid at right angles to one another. Numerous public buildings and charming hotels, magnificently laid out with courtyards and embellished with gardens and fountains, all in the Louis XIV style give the city an original and pleasing architectural aspect.

There is no harbour, but only a roadstead which is the best on the entire coast. Ships lie at a distance from the shore and contact with land is maintained by means of the usual *mandala* boats peculiar to this part of South India. There is a pier to facilitate the loading of ships. With a view to enhance its value in loading and unloading cargo, the pier has been extended for about 265 ft, giving it a total length of about 1,105 feet. Pondicherry is well placed at a centre of tourism, being but a few hours' motoring distance from the main beauty spots of South India, such as the famous fortress of Chhaji, the Seven Pagodas of Mahabalipuram, the temples of Chidambaram, Tiruvannamalai, Vellore and the city of Madras.

KARIKAL

Karikal is situated in the Tanjore District, and consists of a single tract of territory stretching along the east coast, between Tranquebar and Nagore. It is at a distance of 90 miles from Pondicherry. It covers an area of 53 sq. miles and is divided into 6 communes containing 110 villages. The soil is very fertile and is watered by eight tributaries of the River Cauveri, which by the periodical floods adds to the fertility of the land. The five canals with their ramifications complete the irrigation system. Karikal is the terminus of a line from Paralim on the Tanjore District Railway. The establishment has a population of 60,555, according to the 1941 census.

YANAM

The town is situated in the delta of the Godavari covering an area of 5 miles and is an enclave of the district of Godavari in the Madras Province. It is bounded on the south by the Godavari river and on the north by the River Coringa. The Godavari falls into the sea 12 miles from Yanam. As the mouth of the river is blocked the approach to Yanam is made by the River Coringa. The soil is fertile, and supports a population of 5,711.

MAHÉ

The territory of Mahé on the west coast consists of the town of Mahé on the left bank of the river of the same name; and the isolated district of Salutara on the right bank containing the 4 villages of Channara, Chalakara, Palour and Pandaguel. It lies within the district of Malabar in the Madras Province, and covers an area of 26 sq. miles. The river is navigable by boats of 20 to 25 tons for a distance of one to two miles in the interior.

The entrance of the river of Mahé is blocked by rocks, and the bar is dangerous except in very smooth water. An estimate in 1941 gave the population as 14,092. Rice is grown where water is plentiful.

CHANDERNAGORE

With a small surrounding territory on the right bank of the Hooghly, 22 miles by rail from Calcutta Chandernagore is a beautiful town with large streets laid at right angles to one another with elegant houses on either side. There are vestiges of a park and a chateau constructed by Duplex. The establishment has a population of 35,284.

PORTUGUESE SETTLEMENTS

Goa, Daman and Diu are all that remains to-day of Portugal's once vast and glorious maritime empire in the east. In its heyday it extended over a coastlength of thousands of miles from Aden on the Red Sea to Macau and Timor in the Far East. But after the annexation of Portugal by Spain in 1580 Portugal lost, one by one, her bastions, Aden, Ormuz, Basscin, Chaul, Ceylon and Malacca; and, shorn of their splendour, these three remnants of her supremacy on the seas constitute desolate reminders of an age that is past.

All the three settlements are situated within the Province of Bombay. Goa is on the Konkani Coast; Daman, along with the small territory of Prapaga-Nagar, lies on the Gujarat coast at the entrance to the Gulf of Cambay; and Diu is a tiny islet and along with the isolated spots, *Gogola* and *Sinhor* lies on the southern fringe of the Kathiawar peninsula. All together, they constitute what is styled under the new Portuguese Constitution the *Estado Portuguez de India*. They cover an aggregate area of 4,210 square kilometres and comprise a population of 624,177 inhabitants, according to the last census held in 1911.

HIISTORY

The genesis of Portugal's "adventure in the East" is to be found in the establishment by Prince Henry the Navigator of his school of navigation at Sagres in the middle of the 15th century. Following up the exploratory achievements of his predecessors who set out from here, Vasco da Gama landed at Calicut on the 20th May 1498. Within a decade the Portuguese, warring constant wars against the Arabs, Negroes, Ethiopians, Persians and Turks had succeeded in establishing themselves firmly at strategic points on either side of the Arabian Sea which they had converted into a home lake.

Alphonso de Albuquerque, who succeeded da Gama and other captains sought not merely to fix the broad limits of the Portuguese power but to lay and stabilize the foundations of an ambitious empire. Goa, which by reason of its ideal geographical position was at this time a flourishing and opulent trade centre, appeared to him indispensable for the realization of his dreams. This was to be the centre of all commercial and imperial activity, and along with Ormuz, the naval base at the head of the Persian Gulf commanding the approaches to the Red Sea and Malacca, another bastion in the East Indies, controlling the spice trade, would ensure the security of the vast maritime empire, opening up at the same time perspectives of fresh conquest in the Far East. Political conditions in India assisted these schemes and helped in the establishment of a regime of protectorates over the warring rajas who vied with one another to put themselves under the protection of the *feringhi* flag. Albuquerque easily annexed the city and island of Goa which was ruled by the Adil Shahis of Bijapur in 1510 with the aid of

the Vijayanagara admiral Timoja, and gradually consolidated the Portuguese sway over the land.

In 1540, dissensions broke out in the Adil Sahi family still ruling at Bijapur. Prince Meale Khan, one of the contestants for the throne called in the assistance of the Portuguese, who at the close of hostilities remained with the territories of Salcete and Bardez. These, together with the city and island of Goa make up what is known as the *Velhas Conquistas* or old conquests. The *Novas Conquistas* or new conquests comprising the rest of the present day Goa territory were acquired at various times after 1745.

In 1521 a Portuguese sailing vessel was driven by storm on the shores of Daman. An expeditionary force was subsequently sent to conquer it under Nuno da Cunha. Taken from the sultan of Cambay in 1529, it was reconquered by that potentate but was finally ceded to the Portuguese in 1556.

In 1535 Bahadur Shah, the sultan of Gujerat, hard pressed by the forces of Humayun was compelled to come to terms with the Portuguese and ceded to them Salcete, Basscin, and the islands of Bombay, Karanja, Elephanta and Trombay along with rights to construct a fortress on the island of Diu.

The Portuguese power continued to prosper till the appearance of the Dutch and the English in Indian waters in the beginning of the 17th century. These powers contested the maritime supremacy of Portugal now weakened considerably by her union with Spain. In 1603 the Dutch blockaded Goa but were compelled to withdraw after a month. They returned to the blockade in 1610, this time assisted by the Muslim powers on land. In 1622 the English and the Shah of Persia joined forces to wrest the naval base of Ormuz. Then the Dutch seized one after another the other important possessions: Malacca in 1641, Ceylon in 1656, Quillon in 1661, Cranganore in 1662, Cochim and Cannanore in 1663.

With the rise of the Maratha power, Portugal suffered further losses in her domains. In 1683 Sambhaji invaded Bardez and Salcete and all but succeeded in taking the city of Goa itself, but was compelled to withdraw by an incursion of the Mughal forces into his own territories. It was on this occasion that the Portuguese Governor Count of Alvor, feeling that all was lost, placed himself under the protection of St. Francis Xavier and as a symbol thereof surrendered under the Saint's hands his staff of authority, so that when the Maratha armies withdrew it came to be believed that the Mughal armies had appeared on the scene at the right moment by the Saint's intercession. To this day, in grateful memory of this miraculous deliverance, every new Governor accepts the staff of office from the hands of the Saint where it is deposited by his retiring predecessor.

In 1739 the Maratha general Chinnaji Appa annexed the entire province of the North comprising Basscin and Salcete. Only Daman and the fortress of Diu were now left to them out of this vast stretch of territory.

During the Napoleonic Wars in Europe, the English under the pretext of protecting the Portuguese settlements from the French occupied them and their military forces continued there with brief interruptions till 1815 the year of Waterloo.

Since then the Portuguese have ruled undisturbed what was left of their empire in India, though there have been periodic revolts in Goa. The *Ranes*, a Rajput tribe who had manned the Maratha armies, raised the banner of revolt in Satari in 1852, 1871, 1895, 1901 and 1912 finally to be put down with great severity. In the 1871 and 1895 revolts, they were joined by the native garrisons. On the latter occasion

the brother of King Carlos himself came to India to suppress the rebellion. The Ranes were defeated and broken up in 1912 and the pick of their youth deported to the African colonies where they perished. No further revolts have taken place in Satari.

The successes obtained by Indian nationalists have had their repercussions in Portuguese India. In 1946 a non-violent movement, with the object of securing civil liberties for the people was initiated in Goa under the leadership of the Indian Socialist leader Dr. Rammanohar Lohia. The *satyagraha*, however, proved ineffective in the face of mounting repression used by the Government and the only result was deportation of several popular leaders to Portugal after trial by a military court.

GOVERNMENT

The advent of Dr. Oliveira Salazar to power and the establishment of his *Estado Novo* has led to increasing centralization in the administration of Portuguese India. All measures of importance must be initiated by and carry the sanction of the home government in Lisbon. The powers of the Governor-General are considerably reduced and his functions may now be said not to pass beyond supervisory and executive. The Governor's Council, *Conselho do Governo* which assists him, is shorn of what little legislative powers it formerly possessed and its functions are now purely advisory, the nominated majority being predominant in all deliberations. Local self-government has been all but abolished. There are no elected municipalities and local boards in the villages as in former days. Each municipality is in charge of an administrative committee nominated by the Governor-General, who also appoints the presidents of all charitable and cultural associations in the country. A stringent censorship controls the freedom of the press, and every article, book or pamphlet has to be submitted to the board of censors before it appears in print. Infringements of the press laws are severely dealt with and newspapers are required to keep security deposits with the Government before being licensed for publication. Freedom of association is likewise controlled. No public meeting or assembly, be its purpose ever so innocuous, may be convened without previous permission of the authorities, and every intended talk and speech must bear the censor's visa.

The Governor-General is the head of the administration and is stationed in the capital *Cidade de Goa* formerly known as *Nova-Goa* and also *Panjim*. Secretariats for Home and Political Services, Finance, Customs, Education, Military Forces, Navy, Agriculture, Health Services and Public Works assist him. There are also three Departments for Posts and Telegraphs, Survey and Fiscal of the West of India Portuguese Guaranteed Railway. Associated in the task of government is the *Conselho do Governo* possessing restricted legislative and advisory powers. The Governor-General is its *ex-officio* president. Five members are elected by means of a very exclusive franchise, three to represent the *Velhas Condições*, one the *Novas Condições* and one the districts of *Daman* and *Diu*. Five others are nominated to represent the minorities, agriculture, commerce and the press. Besides these, four officials, the Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works sit at the Council's deliberations in their own right. Daman and Diu have each a district Governor.

In each district there is a District Council for the supervision of the various municipalities and other local bodies in its jurisdiction. For administrative purposes the district is divided into *Concelhos*, each *Concelho* being in the charge of an official styled the *Administrador*, and for judicial purposes it is divided into circuits or *Comarcas* each having its own court of original jurisdiction. An appeal lies from the decisions of these courts to the *Tribunal de Relacao* or High Court sitting in the capital and side by side with the latter there is also a *Tribunal Administrativo* to dispense justice under *droit administratif*.

The maintenance of law and order in the province of the *Comandante-Geral da Policia* with headquarters in the *Cidade de Goa* and having under him a descending hierarchy of various *Comandantes* and *Chefes de Policia* in the administrative sub-divisions. Each village or parish which is the smallest unit has its *regedor* corresponding to the Indian *patel*.

A striking feature of the rural administration is the continuance of the ancient Indian institution of the village community which has disappeared elsewhere in India. In places where the resistance to Portuguese domination has continued almost to our own days, as in the southern communes of Goa, Assolna, Cuncolim and Velim, the village communities were suppressed and their estates confiscated by the Government. But on the whole they have continued in operation.

The village community is an autonomous institution, socialist in its organization under which land is held in common by the original settlers of the village here called the *Gaunkarees*, thus preventing concentration of land in the hands of a few and promoting a rough equality, while preventing the domination by privileged few. The management is vested in a committee elected by the constituents. The community undertakes various duties in regard to the maintenance of schools, roads, dispensaries, etc., and of religious services without distinction of creed. It is responsible to Government for land revenue and compounds all the taxes by a lump sum paid into the exchequer. It is subject to supervision by the *Administracao das Comunidades* and cannot spend moneys without Government sanction.

COMMERCE AND INDUSTRIES

The towns of Portuguese India though few in number, serve as commercial centres for their districts; but with a restricted road mileage across the frontiers and in the absence any means of transport away from the only railway line and the rivers, commercial activity is confined normally to the local markets, except in isolated instances as in the case of the town of *Margao* in Goa which lies at the centre of rail and road traffic converging from the various points of the district.

The chief agricultural products of Goa are rice, coconuts, cashew-nuts, betel-nuts, mangoes, and sugar-cane. Of these only cashew-nuts, betel-nuts, coconuts and mangoes are exported in any considerable quantities, the rice grown not being sufficient for local consumption. Other exports include copra, lambroos, salt, self-fish and manganese ore. The only industries worthy of note are soap manufacture, tile manufacture, sugar and tinned food products and jaggery. The imports consist of rice, textiles and other manufactured goods, an unrestricted supply of which is just now available owing to the uneven situation created by the currency export regulations in force in the Indian Union, there being no such regulations in Portuguese India.

The economic situation in the country has become very acute in the last few years. During the war, an artificial panic created by the Portuguese Government's decision not to accept any longer Indian Rupee notes in their offices gave rise to a flourishing blackmarket where Indian currency was exchanged for the local rupee at a fabulous discount, varying from 10 to 25 per cent. The scarcity of the essential consumer goods drove thousands of people abroad into India to earn their living and the majority of these have not returned to their homes, thus maintaining the uneven situation created by the war exigencies. In 1945 the imports of Portuguese India amounted to Rs. 151 lakhs and the exports to only Rs. 9 lakhs. This enormous deficit in the trade balance, which is almost chronic, is made up from the remittances from emigrants, numbering over a lakh, who earn their living in India, Pakistan, Africa and other parts of the British Commonwealth.

Most of the trade of Portuguese India is with the Indian Union, Pakistan, Portugal, Portuguese African colonies and the countries of the Continent. Just at present, owing to the world currency situation, there is a glut of American goods on the market.

There are no banks operating in Portuguese territory with the exception of the Banco Nacional Ultramarino which has offices in the major towns.

A railway line maintained and run by the West of India Portuguese Guaranteed Railway Company, once a subsidiary of the Madras and Southern Mahratta Railway, joins the port of *Mormugao* with the junction of London on the M.S.M. Railway. It fulfils a very important role by providing an outlet to the sea for the products of this part of the Mahratta country.

Marmugao, which is the chief port, is also one of the major ports on the West Coast of India and is open to ocean going vessels of every size from all parts of the world. It is used by the ships of the B.I.S.N. Co. Ltd., going south to Colombo and the ports on the east coast as also by ships bound for the East African ports. *Marmugao* is a port of call for every coasting ship of India's merchant fleet.

EDUCATION AND CULTURE

Primary education is free and compulsory in schools maintained by the State of which there is at least one in every village. There are at present some 250 primary schools controlled and administered by a Board of Primary Education, *Conselho da Instrucao Primaria* with offices in the capital. In the *Cidade de Goa* there is a Lyceum for the study of Portuguese secondary education, a Normal School, and a Medical School. A Theological Seminary trains young men for the priesthood at Rachol. Over and above these, there are a number of English teaching High Schools run by private enterprise and by religious orders preparing students for the S.S.C. examination of the Bombay Government and the Entrance Examination of the University of Bombay.

There is in the capital the *Instituto Vasco da Gama*, a research association with an exclusive membership and its own research journal. The *Biblioteca Nacional* houses what is perhaps one of the best libraries of rare books and manuscripts on the west coast of India while the *Arquivo* contain an inexhaustible wealth of hitherto unexplored historical material.

GOA

The territory of Goa lies between the parallels of 15° 48' and 14° 30' latitude North by 73° 40' and 74° 19' longitude East. It has the island of *Agulhas*, once an important watering station for sailing vessels but now deserted, as a dependency at its southern extremity opposite *Karwar*.

The temperature varies between the highest mean of 90° F. recorded in April-May and the lowest mean of 70°-71° F. recorded in December-February. The year divides itself easily into two well distinguishable seasons: a dry season from October to the end of April, and a wet season from May to the end of September. The former is marked by land breezes and the latter by the South-West monsoon with almost incessant heavy rains from June to the middle of August.

The population of Goa is 540,925 of whom Christians form roughly one half, the rest being Hindus and Muslims. The latter, who were once the rulers, and were actually responsible for the foundation of the Old City of Goa now in ruins, have dwindled into insignificance both in number and influence. Racially, the people belong to the Aryo-Dravidian stock, speaking Konkani, a language having close affinities with Gujarati and Marathi, but entirely different as regards inflection of words, grammatical construction and syntax. The various powers

that ruled Goa have left their legacies in the form of loan words to be found in the present-day Konkani. Originally using the Kannada script, Konkani is now written by Christians in the Roman script and by Hindus in Devanagari.

The old social structure native to the Hindu society has persisted in spite of the influence of Christianity. The Goan Christians preserve the old castes and are proud to be the descendants of the ruling or priestly castes, Kshatriyas (Charados) or Brahmins (Saraswats). For the rest, they are completely westernized in their habits and mode of life.

During the Portuguese regime and with the advent of western civilization, increasing numbers of Goans have left their homeland in search of better opportunities of earning a livelihood. Goans are to be found occupying posts of every category in India, Pakistan, Africa, the Far East and even Europe and America.

The capital, Cidade de Goa, situated on the left bank of the Mandovi, stands on the site of an outpost of the Adil Shah, one of whose residences is still being used as the Government secretariat. Cidade de Goa is a charming city, laid out amidst the luxuriant vegetation of the river valley, and has a cosmopolitan population of 20,300 inhabitants. It possesses some magnificent public buildings, and elegant villas rise above the water-front. Some very good hotels, with excellent cuisine, western and Indian, cater to the needs of the tourist and the casual visitor. The port is visited by sailing craft and during the dry season coastal steamers call here regularly from Bombay and the intervening ports. There is also a ferry-boat that maintains hourly runs across the river to Belim and Verem on the other side for the benefit of people wishing to travel to Bardes and beyond.

Margao is the capital of Salcete. It is a thriving business centre lying midway between the port of Mormugao and the frontier on the railway line. It is served with many excellent arterial roads joining the various points in the district. It is also a centre of educational activity and possesses several English teaching convents and schools.

Vasco da Gama, another town, lies within two miles of Mormugao on the railway line. It is altogether a new city planned on modern lines and fostered by the Government's desire to promote the economic and industrial progress of the harbour, for which a special Department has been created with headquarters here. The only airport is within easy reach from here.

Old Goa, the old capital and the metropolis of the Portuguese Empire in the east is now deserted and in ruins. The only standing edifices are the Cathedral of Goa, the Basilica

of Bom Jesus where the body of St. Francis Xavier is enshrined, and a number of other churches and convents, all of them magnificent examples of well known styles of classical European architecture. Every few years the body of the Saint is exposed for public veneration and thousands of pilgrims from the world over crowd here, reviving for a few days the past grandeur of the city. The Government have recently drained and cleansed the place of the malarial scourge which was primarily responsible for its depopulation, and after inspection by a committee of inter-nation experts, the city is now used to quarter troops.

Calangute is a popular sea resort with a splendid sandy beach. In the hot weather months of March to May, the place becomes the haven of thousands of holiday-makers from all parts of Goa and the neighbouring places in the Indian Union.

Dud-Sagar is a magnificent waterfall, a regular cascade with milky white waters rushing down hundreds of feet from the heights of the Ghats. It lies on the railway line between Castle-Rock, the last station in the Indian Union, and Collem.

Arvaleim is another beautiful waterfall in Bicholim.

There are four major hospitals, the Hospital Central in the capital attached to the Medical School, the Hospicio de Sagrado Coracao de Maria in Margao maintained by a charitable trust, the Hospital of Ribandar run by the Santa Casa de Misericordia, another non-official charitable trust and the Asylo de Nossa Senhora de Milagres at Mapuca.

DAMAN

This remnant of the old province of the north lies between 20° 25' 26" latitude North and 72° 55' 12" longitude East in Gujerat. It also includes the two isolated enclaves of Drasa and Pragana-Nagar-Aveli, lying to the south-east and crossed by the Daman-Ganga river.

The climate does not differ from that of Goa, the country forming part of the same littoral of Konkani. But on the whole it is pleasanter and the temperatures are lower than those of Goa. During the South-West monsoon Pragana has a healthier climate than Daman. The entire territory has a total area of 62 square miles and a population of some 60,000 inhabitants, mostly of Gujarati extraction. It is easily reached from Bombay by the B.B. & C.I. Railway, being at a distance of 4½ hours' journey.

There are some very interesting historical relics here such as the old fort and a few surviving churches reminiscent of the old times.

DIU

About 150 miles to the north-west of Daman lies the tiny islet of Diu off the southern coast of Saurashtra, between 20° 42' 50" latitude North and 70° 58' longitude East. It is a small town separated from the mainland by a narrow arm of the sea. Dependent on it and surrounded by the territory of Junagad is the enclave of Gogola and also the island and fort of Pani Cota in the bay of Simbor.

Diu is reached from Bombay by the B.B. & C.I. Railway via Virangam and Delwada. Access by sea is easier and more rapid but there is no harbour. There is an excellent roadstead where ships can safely anchor in two fathoms of water.

The mean temperature is round about 70° F. and in winter it is very cold. The population is estimated at 19,731.

ADMINISTRATIVE OFFICIALS

Governor-General, Comandante Fernando Quintanilha Mendonca Dias
Chief of Military Staff (Chefe do Estado Maior), Major Francisco Rafael Alves
Commissioner of Police (Comandante Geral), Capt. Mario Santos
Director of Health (Diretor de Serricos de Saude), Dr. Antonio de Oliveira Guimaraes
Director of Posts & Telegraphs, Oliveira Chaves
Public Works (Obras Publicas), Director, Jose Pedro de Santana Godinho
Judges of the High Court (Tribunal de Relacao), Dr. Vergilio de Souza (Chief Justice); Dr. Jose Nicolau Sobrinho; Dr. Surama R. Rau; Dr. Antonio de Miranda
Director of Finances (Fazenda), Vasco de Ferreira Martins
Advocate General (Procurador da Republica), Dr. Melo Gouveia
Director of Agriculture, Eng. Edgar Vales
Director of Surveys (Agrimensura), Eng. Bernardino Camilo da Costa
Elected Members of the Governor Council (Conselho do Governo), Canon Castilho Serpa do Rosario Noronha; Antonio Jose Joao Francisco Pinto de Menezes; Antonio Anastasio Bruto da Costa; Vinaica Sinal Coissoro; Dr. Joao Felipe Ferreira
Indian Vice-Consul in Cidade de Goa, Ashok Mehta
Presidents of the Municipal administrative committee, Iltas; Dr. Socrates da Costa, Salcete; Dr. Alvaro Loyola Furtado, Bardes; Dr. Jaime Valfredo Rangel
H. E. the Patriarch of East Indies, D. Jose da Costa Nunes
Governor of Diu, Capt. Paiva Conceicao

**The Dominion
OF
PAKISTAN**

THE BACKGROUND OF PAKISTAN

PAKISTAN was established on August 15, 1947 as a Dominion by the division of the sub-continent, according to an agreed plan between the British Government and the two main Indian political parties—the Indian National Congress and the All-India Muslim League. The word Pakistan has variously been construed but the general Muslim view is that it stands for all that is pure and noble in Islam.

The conception of Pakistan was first put forward by the poet philosopher Allama Sir Mohammed Iqbal in the course of his presidential address to the Muslim League in December 1930. The scheme was, however, not officially adopted by the Muslim League, and remained an ideal till after a decade. Meanwhile, Mr. C. Rahmat Ali, a barrister, founded the Pakistan movement in 1931 with the object of dividing India into Pakistan and Hindustan. His Pakistan comprised the Punjab, North-West Frontier (the land of the Pathans), Kashmir, Sind and Baluchistan; the rest was Hindustan. This proposal was circulated to the members of the First Round Table Conference, but the Muslim League spokesmen did not at this stage officially sponsor the scheme in spite of the general sympathy of Muslims for the movement.

QUAID-E-AZAM

Although, since its inception in 1906, the Muslim League sought to arouse political consciousness among Muslims, this organisation did not become very powerful till Quaid-e-Azam Jinnah became its President at the Bombay session in 1926. The next ten years saw slow but steady consolidation of the Muslim League under his leadership. All the rival Muslim groups and parties, both inside and outside the Indian National Congress, were losing ground rapidly by the time the Second Round Table Conference concluded in London. As the Congress and the Muslim League could not reach any agreement on a future constitution the then British Prime Minister Mr. Ramsay MacDonald gave a decision generally called the Communal Award under which the Muslims got separate representation. When the first elections were held under the 1935 Government of India Act reforms, the Muslim League did not win as great a victory as was expected, although a majority of Muslim seats were captured by it. Nothing daunted, Mr. Jinnah continued to organise provincial branches. The hope that under the new constitution both Congress and the League would work Provincial Autonomy in such manner as would prepare them for a joint shouldering of higher responsibility under a federal centre, as conceived under the 1935 India Act, disappeared when the Muslim League declined to sign the Congress pledge and merge its parliamentary party with that of the Congress, a condition on which the Congress insisted for the formation of a Coalition Ministries. The Quaid-e-Azam refused to convert the League into as he called it "an understudy of the Congress."

The Lucknow session of the Muslim League in the autumn of 1937 found the League the most authoritative and representative organisation of the Muslims of India, although it was not the only spokesman for the community as many Muslims still remained outside the League either as members of the Congress or as members of other parties. When the Congress Ministries took non-League Muslims into the Government, it was construed as adding insult to injury, and a widespread campaign against the Congress administration ensued.

The outbreak of the Second World War came also as a blessing in disguise for the Muslim League which enhanced its power and prestige among the Muslims and its bargaining position with the British Power. Again the Congress attitude of neutrality to the war and its opposition to the war effort also helped the Muslim League

whose Working Committee declared that it was ready to offer whole-hearted co-operation if the Government recognised the League as the sole representative organ of the Muslims. The rift with the Congress became wider still when the resignation of Congress Ministries was celebrated as a "Day of Deliverance" by Muslim Leaguers throughout India.

In October 1939, the then Viceroy, Lord Linlithgow, initiated a series of negotiations in order to bring about rapprochement between the two parties. One of the purposes of the Conference was to make known the British war aims *vis-à-vis* India. The subsequent Viceregal pronouncement was hailed as a charter of freedom for minorities, particularly for the Muslims of India.

THE RESOLUTION

The next and in fact, the most important landmark in the history of Indian Muslims, is the resolution passed at the Lahore session of the Muslim League, urging the establishment of Pakistan. The resolution stated:

"While approving and endorsing the action taken by the Council and the Working Committee of the All-India Muslim League, as indicated in their resolutions dated the 27th August, 18th September, 22nd October 1939, and 3rd February 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of federation embodied in the Government of India Act 1935 is totally unsuited to, and unworkable in the peculiar conditions of this country, and is altogether unacceptable to Muslim India.

"It further records its emphatic view that while the declaration dated the 18th October 1939 made by the Viceroy on behalf of His Majesty's Government is reassuring, in so far as it declares that the policy and plan on which the Government of India Act 1935 is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan would be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims, unless it is designed on the following principle—*viz.*, that geographically contiguous units are demarcated into regions which should be so constituted with such territorial adjustments as may be necessary, that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India, should group to constitute "independent states" in which the constituent units shall be autonomous and sovereign.

"The adequate, effective and mandatory safeguards should be specifically provided in the constitution for minorities in these units, and in the regions for the protection of their religious, cultural and economic, political, administrative and other rights and interests, in consultation with them; and in other parts of India where the Mussalmans are in a minority, adequate, effective mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political administrative and other rights and interests in consultation with them.

"The session further authorises the Working Committee to frame a scheme of constitution in accordance with these basic principles providing for the assumption finally by the respective regions of all powers such as defence, external affairs, communication, customs and such other matters as may be necessary."

In a nutshell the resolution intended that the provinces of Sind, Punjab, N.-W.F.P. and Baluchistan in the north-west region and Bengal in the eastern region, should be constituted into independent states, and there should be no common centre for the Hindustan and Pakistan parts of the sub-continent.

THE BIRTH

From this day onwards, Quaid-e-Azam Jinnah who had become the permanent and undisputed President of the Muslim League, refused to consider any arrangement which did not recognise the validity of the two-nation theory. He explained that Pakistan alone would save Muslims from the tyranny of the Hindu majority in India. The two-nation theory caught the imagination of the Muslim mind and the stronger the Congress objection the more insistent the Muslims became. At the Madras session of the Muslim League in 1941, the Quaid-e-Azam called on the British Government to divide India and establish separate western and eastern zones where Muslims were in majority so that they were free to manage their affairs as they chose while adequate safeguards were to be provided for Muslims in Hindu areas. Later the League declared its opposition to the Cripps proposals which conceded the principle of provincial autonomy partly on the ground that the Congress had already rejected them and partly that they did not go far enough. It was about this time that the Quaid-e-Azam sought to establish League Ministries in provinces where Muslims were in a majority, and except in Sind and N.-W.F.P. he quickly succeeded; later Sind also swung into line when Khwaja Ismail Khan, Sind's non-League Premier was dismissed from office, for renouncing his titles.

The "Quit India" movement started by Mahatma Gandhi in 1942 actually gave the Muslim League a new slogan—"divide and quit". But efforts were made to find a solution by both Mr. C. Rajagopalachari, the Madras Congress leader (now the Governor-General of India), and later by Mahatma Gandhi himself, which would meet the League claim for Pakistan without loss of Indian unity. But it was too late. Still a last effort was made by the British Cabinet Mission consisting of Lord Pethwick-Lawrence, Sir Stafford Cripps and Mr. A. V. Alexander to preserve Indian unity. These three formulated a scheme which conceded the substance of the League demand of autonomous governments in the Western provinces of the Punjab, Sind, N.-W.F.P. and Baluchistan, and the eastern provinces of Bengal and Assam, with an All-India federation having only three common subjects of defence, communications and foreign affairs. The League agreed; but the Congress rejected the grouping principle unless the provinces were given the right to opt out of a group, prior to the framing of the constitution, which was not acceptable to the League. This again resulted in deadlock and having failed in their last effort to maintain the unity of India the British Government at last decided, with the agreement of the two parties to divide the country. And so a new state called Pakistan came to be established.

Pakistan is the fifth biggest state in the world, and the largest among Muslim states. It is bifurcated into two zones, separated from each other by over a thousand miles—one lying to the north-west of the Indian Union and the other in the east sandwiched between two of India's eastern-most provinces. It comprises Sind, N.-W.F.P., Baluchistan and the western part of the Punjab in the west, and the eastern part of Bengal coupled with the Sylhet district of Assam in the east.

CONSTITUENT ASSEMBLY

The first meeting of the Pakistan Constituent Assembly took place in the Assembly Chamber at 10 a.m. on Sunday August 10. Mr. Liaquat

Alli Khan, The Prime Minister proposed and Khwaja Nazimuddin (now the Governor-General of Pakistan) seconded that Mr. Jogendra Nath Mandal be the temporary Chairman. Taking the Chair, Mr. Mandal said :

"It is hardly necessary for me to impress on you the gravity and solemnity of the occasion. I hope you will agree with me when I say that the free independent state of Pakistan will bring to one and all citizens, prosperity, happiness and peace. I believe and it is my firm conviction, that the state of Pakistan will be one of the most powerful, resourceful and magnificent states in the world.

"I cannot help expressing on this momentous occasion my gratitude to and admiration of the Muslims of India, for Qaid-e-Azam Mohammad Ali Jinnah, the great creator and architect of the state of Pakistan. I have every confidence that under his able leadership, astute statesmanship, and through his untiring devotion to the cause of Pakistan, all prosperity and happiness will come to the people of Pakistan. It is needless for me to reiterate that Qaid-e-Azam Mohammad Ali Jinnah is the greatest statesman, and one of the greatest men in the world today.

"I would like to point out that not only will the people of Pakistan and India, but the people of the whole world, look to the Pakistan Constituent Assembly and find for themselves that the Muslim community, which was determined to acquire their legitimate rights and privileges and determined to have a separate state of Pakistan, will never lack in the quality of doing not only justice and fairness, but acts of generosity towards the people of minority communities."

ELECTION OF PRESIDENT

The election of the President took place the next day.

Qaid-e-Azam Jinnah was proposed and seconded by seven members for the Presidency and as there was no other candidate, he was declared elected. The President was then congratulated by Messrs. Liaquat Ali Khan, M. A. Khuhro, Abdul Kaseem Khan, Begum Shah Nawaz (League), Jogendra Nath Mandal (Depressed Class League) and the late Kiran Shanker Roy (Congress).

Mr. Liaquat Ali Khan said : "You have been rightly described as the architect of Pakistan and what greater fortune could we have than to have you as the President of this sovereign body to build the State which we have got through your devotion, untiring zeal, selfless service and unshakable determination?"

Mr. Kiran Shanker Roy said that having been a dreamer of Pakistan, it was but fair that Mr. Jinnah should also have the privilege of giving shape to his dream and be architect of its constitutional structure. He said that the Qaid-e-Azam was a great leader of Muslims and now the time had come for him to take up the leadership of the State which included not only Muslims but all communities.

The President, Qaid-e-Azam Jinnah, thanked the members for their tributes and said :

"I sincerely hope that with your support and your co-operation, we shall make this Constituent Assembly an example to the world." He said that they had the very onerous and responsible task of framing Pakistan's future constitution. They had also to function as a full and complete sovereign body and as the federal legislature of Pakistan."

SOCIAL EVILS

Describing the functions of the new State, the Qaid-e-Azam said :

"The first duty of a government is to maintain law and order, so that the life, property and

religious beliefs of its subjects are fully protected by the State. The second thing that occurs to me is this : one of the biggest curses from which India is suffering—I do not say that other countries are free from it, but I think our condition is much worse—is bribery and corruption. That really is a poison. We must put that down with an iron hand, and I hope that you will take adequate measures as soon as it is possible for this Assembly to do so. Blackmarketing is yet another curse. Now you have to tackle this monster too which today is a colossal crime against society in our distressed condition when we constantly face shortage of food and other essential commodities of life."

The Qaid-e-Azam continued : "I know there are people who do not quite agree with the division of India and the partition of the Punjab and Bengal. Much has been said against it, but now that it has been accepted, it is the duty of every one of us loyally to abide by it and honourably act according to the agreement which is now final and binding on all. A division had to take place. In my judgment, there was no other solution, and I am sure future history will record its verdict in favour of it. And what is more, it will be proved by actual experience as we go on that that was the only solution of India's constitutional problem.

"Now if we want to make this great State of Pakistan, happy and prosperous, we should wholly and solely concentrate on the well-being of the people and especially masses of the poor. If you will work in co-operation, forgetting the past, burying the hatchet, you are bound to succeed."

MAJORITY AND MINORITY

"We should begin to work in that spirit and in course of time all these angularities of the majority and minority communities the Hindu and the Muslim community because even as regards Muslims you have Pathans, Punjabis, Shias, Sunnis and so on, and among the Hindus, you have Brahmins, Vishnavas, Khatris, and also Bengaleses, Madrasis and so on,—will vanish. Indeed, if you ask me, this has been the biggest hindrance in the way of India's attaining its freedom and independence and but for this we would have been free peoples long ago. No power can hold another nation, and especially a nation of four hundred million souls in subjection. Nobody could have conquered you, and even if it had happened nobody could have continued its hold on you for any length of time but for this. Therefore, we must learn a lesson from this. You are free, free to go to your temples, you are free to go to your mosques or to any other places of worship in this State of Pakistan. You may belong to any religion, or caste or creed—that has nothing to do with the business of the State. We are starting with this fundamental principle that we are all citizens and equal citizens of one State."

In conclusion, the President said : "I shall always be guided by the principles of justice and fairplay. I am sure that with your support and co-operation, I can look forward to Pakistan becoming one of the greatest nations of the world."

The President then read the goodwill message he had received from the United States of America which hoped that the Constitution which the Pakistan Assembly would present to the world would reflect the steadfast devotion of its leaders to the principles of democracy and peace.

NATIONAL FLAG

Moving the resolution on the National Flag of Pakistan, Mr. Liaquat Ali Khan said that it was three fourth green with Inset of Crescent and Star, and one fourth white at mast end. He then unfurled it before the House saying that it would stand for freedom, liberty and equality. "This flag will protect and defend the integrity of the State. We have been

exploited for the last two hundred years and we should be the last people to use our flag for the purpose of exploiting other nations. Therefore, this flag of freedom will not only be for the people of Pakistan; this flag will be an emblem of peace to help in maintaining the peace of the world."

Then the West Punjab Congress member, Mr. Bhim Sen Sachar (now Prime Minister of East Punjab) asked the President whether he would be permitted to address the House in Hindustani. The President ruled that the language of the House was English, unless any member was unable to express himself adequately in English. Speaking in English, Mr. Sachar suggested a Committee of seven members to determine the design of the flag and report by next morning as the flag presented to the House by Mr. Liaquat Ali Khan did not have the previous approval of the minorities concerned.

The mover Mr. Liaquat Ali Khan, explained that as they had to have a flag on Pakistan Dominion Day (August 14) and as the time factor was important, he could not consult all members including even Muslim members. He pointed out that the white portion stood for the minorities. He asked the mover not to press his amendment. The mover however pressed the amendment which was negatived. The original motion on the flag was then accepted.

The President nominated the following members on the panel of Chairmen : Mr. Tazimuddin Khan, Dr. Omar Hayat Malik, Khan Sardar Bahadur Khan and Kiran Shanker Roy. No division was called during the session.

KING'S MESSAGE

On August 14, the then Governor-General of India, Lord Louis Mountbatten, having arrived in procession with the President of the Constituent Assembly of Pakistan, Qaid-e-Azam Jinnah took his seat. His Excellency read out His Majesty the King's message which stated :

"I send you my greetings and warmest wishes on this great occasion when the new Dominion of Pakistan is about to take its place in the British Commonwealth of Nations. In thus achieving your independence by agreement, you have set an example to all freedom loving people throughout the world.

"I know that I can speak for all sections of opinion within the British Commonwealth when I say that their support will not fail you in upholding democratic principles. I am confident that the statesmanship and spirit of co-operation which have led to the historic developments you are now celebrating, will be the best guarantee of your future happiness and prosperity.

"Great responsibilities lie ahead of you and your leaders. May the blessing of the Almighty sustain you in all your future tasks. Be assured always of my sympathy and support as I watch your continuing efforts to advance the cause of humanity."

IQBAL DAY

The idea of a separate homeland for the Muslims of India originated with Sir Muhammad Iqbal, as stated above. His dynamic poetry brought about an intellectual revolution among the Muslims. Once considered as an idle dream, the concept of Pakistan gradually established itself (see above) as the only solution of the Hindu-Muslim problem and under the determined leadership of the Qaid-e-Azam, it achieved fulfilment on 15th August, 1947, when India was partitioned and an Independent and Sovereign Dominion of Pakistan inaugurated. The tenth death anniversary of Iqbal came soon after the fulfilment of his dream.

So on the first death anniversary of the poet after the birth of Pakistan the people commemorated Iqbal Day throughout the country with a sense of gratification. As a mark of respect

to Iqbal's memory the Government of Pakistan declared the 21st April as a public holiday. Earlier, the Finance Minister had announced in his budget speech that the Government had made a provision of Rs. one lakh in the budget for the establishment of an Iqbal Academy. For now that Pakistan had been established, it was a fitting tribute to the memory of a great man that facilities should be provided for the study of his philosophy and the propagation of his message.

Iqbal Day was enthusiastically observed all over the country. At Karachi, functions connected with Iqbal Day were held under the auspices of Bazmi-I-Iqbal and spread over four days, from 21st April to 24th April, 1948. In view of the solemnity of the occasion, the functions opened on the 21st April with special prayers and readings from the Holy Quran. The second day was devoted to speeches on the life and works of Iqbal. High tributes were paid to his genius. Well-known critics and

commentators explained Iqbal's philosophy and outlined the part he played in the development of Urdu poetry. The third day was devoted to Qawall by Mubarak Ali Fatch Ali and party, who sang some of Iqbal's verses and the Shikwa. On the fourth day, an all-Pakistan Mushaira was held at which well-known poets recited their poems.

Impressive ceremonies were also held in Lahore, Dacca and London.

PHYSIOGRAPHY

PAKISTAN consists of two geographical units: Eastern Pakistan with one large province, East Bengal, including the rich Sylhet district of Assam; and Western Pakistan comprising West Punjab, Sind, Baluchistan, North-West Frontier Province and the States which have acceded to Pakistan.

Western Pakistan adjoins Afghanistan and Iran in the west and north-west and the Indian Province of East Punjab and the Great Indian Desert in the east. To the north lies the State of Jammu and Kashmir; to the south and south-west the Arabian Sea.

East Bengal, the largest and the most thickly populated province of Pakistan is separated from Western Pakistan by more than a thousand miles of Indian territory. It is bounded on the north by the hilly regions of Jalpaiguri, Darjeeling and parts of Assam; in the south by the Bay of Bengal; in the west by the Indian provinces of West Bengal and Bihar and in the east by the Assam Province. The narrow strip of the Chittagong Hill Tracts adjoins Burma.

From its most northerly point to the sea-coast in the south, Western Pakistan covers a distance of nearly 800 miles, while its western tip at Killa Robat is separated from the Indian border by about 700 miles. The entire area to the north and west of the land is covered by the great ranges of the Hindu Kush and the Sulaiman mountains rising in places, to a height of 14,000 feet. The Salt Range and its arid plateaux lie slightly towards the east of these mountain systems. To the south and south-west of this region stretches a vast plain right up to the Arabian Sea.

All the five rivers of Western Pakistan, Indus, Jhelum, Chenab, Ravi, Sutlej rise in the Himalayas and after long courses amid the snow-capped ranges debouch on the plains. The slope of the low country is to the south and south-west and this determines the course of the rivers. With the passage of time each stream has cut for itself a wide valley which lies well below the level of the plain.

Of these five rivers the longest is the Indus. A mighty stream when it emerges from the Hazara Hills, it flows almost due south past Attock—the oil district of Western Pakistan—where it enters a deep gorge. It flows on through the Punjab and enters the Province of Sind where the huge Lloyd Barrage spans its waters. The other four rivers which help to make West Punjab one of the richest wheat and cotton growing areas in Asia, also rise in the Himalayas and after traversing the plains of the West Punjab join the Indus which flows into the Arabian Sea.

LANDSCAPE

Western Pakistan presents great variations in landscape, from the snow-covered peaks of the upper Himalayas to the grey, sombre desert of Sind. In the North-West Frontier Province where the land lies on an average more than 4,000 feet above sea level, the scenery is rugged. At places there are vivid expanses of green. In the Salt Range of the West Punjab the landscape takes on a gentler tone; the slopes are often covered with green box and bogmyrtle.

But the true beauty of the West Punjab and Sind landscapes lies in the plains. As harvest time approaches the traveller sees an endless expanse of waving crops of varying shades of colour above which the villages seem to rise like islets in a sea of green. After the harvest the whole aspect is changed and the rich brown of the fields contrasts sharply with the dull green foliage of groves and plantations.

In Baluchistan the general outlook resembles that of the Iranian plateau and, though sometimes oppressive in the severity of its lines, the landscape is not without a certain rugged charm. Barren, scrubby mountains rent by huge chasms and gorges alternate with arid deserts and stony plains. The colours vary from a monotonous drab to warm brick-yellow, orange and sometimes even deep mauve. There are intermittent valleys of considerable size where the land is irrigated and rich crops of all kinds and fruits are grown. Within the mountains lie narrow glens, fringed in early summer by the brilliant green of carefully terraced fields. The clear streams are bordered by rows of willow trees often interlaced with a profusion of vines.

SEA-COAST

The sea-coast is arid and devoid of vegetation, but there is a good harbour at Karachi and many fine sandy beaches. Western Pakistan, except for the coastal strip in Sind, is subject to extremes of climate. In January and February the night temperature reaches freezing point, while during the day the temperature does not rise above 75°. The bright sunshine and the keen invigorating air make Western Pakistan in winter one of the healthiest spots in the world. In the summer months, on the other hand, the heat is fierce and the temperature ranges between 90 and 120°. The nights, however, are usually cool. These extremes of temperature have bred a people remarkably hardy and vigorous, endowed with good physique great energy and stamina.

EASTERN PAKISTAN

Nearly the whole of the 54,000 square miles of Eastern Pakistan is a vast alluvial plain with hardly a hill or even a rock visible for miles. Only on the south-eastern frontier a succession of low mountain ranges cover the east of the Chittagong Division. The most outstanding feature of the Province is the network of its rivers—the Ganges and the Brahmaputra with their tributaries. These rivers furnish an admirable and cheap means of transport; they contain an inexhaustible supply of fish and bring down vast quantities of fertilizing silt which they deposit over the surface of the land.

Although East Bengal is largely a plain, the landscape cannot be described as dull, for even in the dry months the groves of bamboo, mango, the graceful areca and coconut palm, tamarind, peepal and other trees afford a profusion of green vegetation. In the rainy season the young rice-seedlings cover the ground for miles with a delicate green. In December the mature plants turn golden and are ready for the sickle.

The dense forests of the famous Sunderbans in the south abound in big game such as tigers, leopards, bears, wild hog and other animals.

Although East Bengal is situated almost entirely outside the tropical zone, its climate for about two-thirds of the year (from the middle of March to the end of October) has a tropical character, i.e., high temperature and humidity and a dry season following heavy rains. From November to February, the climate is delightfully cool, the humidity is slight and the rainfall generally scanty. Eastern Pakistan does not suffer from the same rigours of climate as Western Pakistan, the mean temperature during the cold months being 61° and during the hot season about 83°.

SOME STATISTICS

The total area of Pakistan according to the Indian census of 1941 is 369,780 square miles, which is distributed as follows:—

| | Sq. Miles |
|--------------------------------------|----------------|
| East Bengal | 49,270 |
| Sylhet District | 4,050 |
| TOTAL FOR EAST PAKISTAN .. | 53,320 |
| Baluchistan | 54,400 |
| N.-W.F.P. | 14,260 |
| West Punjab | 62,000 |
| Sind | 48,140 |
| Bahawalpur State | 17,500 |
| Baluchistan States | 70,500 |
| Khairpur State | 6,000 |
| N.-W.F.P. States | 25,000 |
| TOTAL FOR WESTERN PAKISTAN .. | 306,860 |
| TOTAL FOR PAKISTAN | 360,780 |

POPULATION

The total population of areas now comprising Pakistan, including the States that have acceded to it so far, according to the 1941 census, on the basis of the Boundary Commission's Award, is as follows:—

| | Population in millions |
|---|------------------------|
| West Punjab | 15.80 |
| Sind | 4.53 |
| Baluchistan | 5.50 |
| N.-W.F.P. | 3.04 |
| East Bengal & Sylhet | 42.07 |
| Bahawalpur | 1.34 |
| Khairpur | .31 |
| Makran | .09 |
| Khairan | .03 |
| Las Bela | .07 |
| Tribal Areas including Dhir, Swat and Chitral | 2.38 |
| Total | 70.33 |

Previous census have revealed that the average annual increase in the population is about 14 per cent for the whole sub-continent. There is every likelihood that the same rate of increase has been maintained in the present census decade, 1941-51 in Pakistan. It is therefore estimated that during the seven post-census years the population of Pakistan may have increased by 7-77 millions, thus bringing the total population from 70-33 millions in 1941 to 78-10 millions in 1948.

The population figures however have been further affected due to the recent influx and outflux of population as a result of the communal disturbances after the partition of the sub-continent. Making allowance for these changes the present population may be surmised as follows:—

| | |
|--------------------------|-------------------|
| East Pakistan | 46,720,000 |
| Baluchistan | 560,000 |
| N.-W.F.P. | 3,200,000 |
| Sind | 5,150,000 |
| West Punjab | 19,740,000 |
| Bahawalpur State | 1,450,000 |
| Other States | 3,380,000 |
| Total | 80,260,000 |

DENSITY

The density of population per square mile according to 1941 is as follows:—

| | Area in square miles | Population in millions | Density per sq. mile |
|------------------|----------------------|------------------------|----------------------|
| Eastern Pakistan | 53,920 | 42.07 | 780 |
| Western Pakistan | 306,860 | 28.26 | 92 |
| Pakistan | 360,780 | 70.33 | 194.9 |

The density of population for 1948 is estimated as follows:—

| | | | |
|------------------|---------|-------|-------|
| Eastern Pakistan | 53,920 | 46.72 | 870 |
| Western Pakistan | 306,860 | 33.64 | 109.3 |
| Pakistan | 360,780 | 80.26 | 222.4 |

RURAL AND URBAN

The distribution of urban and rural population according to the 1941 census was as follows:—

| | Percentage of urban to total population |
|--------------------------|---|
| Eastern Pakistan | 4.8 |
| Western Pakistan | 14.5 |
| Pakistan | 11.1 |

The very low percentage of urban population in Pakistan indicates the importance of agriculture in the economy of the country and the comparative lack of development in industries and the trade. This is particularly so in Eastern Pakistan where the urban population is only 4.8 per cent of the total.

There is reason to believe that there has been a substantial increase in the urban population in Western Pakistan due to the recent exchange of population, as a large number of refugees coming from rural areas have settled down in towns and cities. But this is altogether unlike the natural urbanization of population as a result of economic development. It has in fact created serious problems in housing, public health and transport. It is likely, however that the concentration of people in towns and cities would create conditions in which trade and industry may prosper.

About seven million Muslims migrated to Pakistan after the recent disturbances. The number of persons who left Pakistan is estimated at 5 millions. About six millions of those who migrated into Pakistan have already been absorbed in the economy of the country. Efforts are now being made to settle the rest as expeditiously as possible.

THE PEOPLE

THE 80 million odd inhabitants of Pakistan do not all come from one racial stock.

There has been a great mingling of races and cultures—Indo-Aryan, Semitic, Mongol and Dravidian. The result is something like the U.S.A., a variety of physical types, language groups, food habits and local customs and usages. Thus in the West Punjab (pop: 16 million), the physical type is distinctly Aryan, there being few traces of aboriginal or foreign blood. The typical Punjabi is of medium height, spare but muscular, broad-shouldered with dark eyes and an ample beard. His hair is invariably black but the complexion varies from a deep olive-brown to fair. His language is Punjabi though Urdu is the literary language and is widely understood and spoken.

The Pathan of the North-West Frontier Province (pop: 3 million) is taller, somewhat heavier in build, the rigours of life and climate in his barren hills making him broad-boned and capable of harder living. In stature and physique the Frontier Pathan can stand comparison with any other people in the world. His general bearing is proud and resolute, with courage writ large on his face. His language is Pushto but he understands Urdu.

The Baluch (Baluchistan pop: half a million), differs markedly from his Pathan brother. His build is shorter, more spare and wiry. He has a long, oval face, an aquiline nose and wears his hair in long oiled curls. The Baluch Pathans are expert horsemen and generally carry swords or long knives for their defence.

Sind has a population of more than 4,500,000. The Muslims of the province are by race Pathans, Arabs, Baluchs, Brahmins, Jats, Makranis and original Sindhis. The Jat and the Makrani are allied to the Baluch and have the same physical characteristics. The descendants of the Arabs who settled in Sind after having conquered it in 712 A.D., are chiefly Saiyyids and number more than 100,000. They are of medium height and fair with long noses and a narrow facial index.

The original residents of Sind are tall, robust, dark-complexioned and of muscular build. They make strong and hardy cultivators and are by temperament gentle. Of the numerous tribal divisions among the Sindhis, the Sunro and Samo represent the dynasties which ruled in Sind from the 11th to the 16th century. The Mushanos are boatmen and fishermen,

forming a distinct group with their own customs and folklore.

In East Bengal (pop: 42 million) there has been an admixture of the Mongoloid and Dravidian strains. The average Bengali is, therefore, different in physical characteristics from the average Western Pakistani. He is shorter in stature than the Pathan and of smaller build. His language is Bengali.

The great unifying force amidst these diversities of race, language and physical environment in Pakistan is its culture and civilisation. Nearly 80 per cent of the people of Pakistan are Muslims. Islam has given them a single social, ethical and legal code, and thus they form a single brotherhood. For the vast majority of the people of Pakistan the times of prayer, the days of fasting, the places of pilgrimage, the laws of marriage, succession and inheritance are the same. So are the essential ceremonies attending birth, marriage and death, days of rejoicing and of national mourning. This consciousness of common beliefs, rights and duties has given the people strong social and political cohesion.

FESTIVALS

THE greatest and the most popular Muslim festival is Id-ul-Fitr which marks the end of Ramazan, the month of fasting. It is a day of rejoicing as it marks the successful conclusion of 30 dawn-to-dusk consecration fasts and a month spent in prayer and austere self-denial. It is celebrated with equal enthusiasm by all classes of people. Everyone, however humble his position, puts on new garments. About 9 in the morning the entire male population moves towards the Id-gah, the place of Id-prayer, where a congregational prayer is led by an Imam (congregation leader). After the prayer it is customary for Muslims to embrace one another, irrespective of wealth and position.

At an Id gathering you will see Cabinet Ministers embracing their domestic servants, Ruling Chiefs embracing court-boys, and big landlords embracing small tradesmen.

The day is spent in visiting friends and relatives and the commonest refreshment served is a kind of fine spaghetti called sawayyan prepared in sugar, milk and cream.

Another important festival is Id-ul-Zuha which is held in commemoration of Abraham's intended sacrifice of Ismail. This festival has all the features of Id-ul-Fitr except that the animal sacrifice is enjoined on all who can afford it. Camels, sheep, goats or calves are sacrificed

according to the person's means and it is obligatory to give away the skin of the animal as charity and to distribute two-thirds of the meat among the poor.

Moharram, the first month of the Muslim year, is a period of mourning although the elaborate and symbolic expression of grief is sometimes mistaken for foreigners to be the celebration of a festival. The first twelve days of the month are devoted to the commemoration of the martyrdom of Hussain, the grandson of the Prophet, who was killed in a religious war on the battlefield of Karbala in Iraq 1,300 years ago. The main items of the Moharram

commemoration are the Majlis and the Tazia processions. The former is a meeting at which a learned theologian gives a discourse on the historical and religious significance of the tragedy of Karbala. The Tazias which are taken out in procession are artistic and often colourful replicas in wood, paper and other materials of the tomb at Karbala.

These, however, are not the only festivals of the people. At many places local fairs are held to commemorate the birth or death anniversary of saints or holy men. These fairs are not without their social and economic significance, for at every fair, which usually continues for a number of days, bazars are set up and business

is transacted. Most of the participants being villagers, the fair furnishes an excellent opportunity for the exchange of information and the propagation of new ideas.

In East Bengal where there is a large and cultured Hindu minority, some Hindu festivals are celebrated with great enthusiasm. Hindu festivals are largely seasonal. Thus the festival of Holi, which is held in March-April, signalizes the beginning of spring. It is a joyous festival and on that day the Hindus sprinkle coloured water on each other.

Deepavali, commonly called Devali, is celebrated in October-November and marks

the beginning of the Hindu commercial year. The festival is celebrated by lavish illumination and Hindu shops and houses are decorated with lights. On this day many Hindu merchants renew their account books and white wash their houses. The festival is dedicated to Lakshmi, the goddess of Wealth.

Dussehra, the most important festival for Bengali Hindus, is celebrated in September-October and commemorates the victory of Durga, the consort of Shiva, over the buffalo-headed demon, Mahishasur. Durga's image after being worshipped for nine days is immersed into the river. The ceremony is accompanied by offerings of flowers and devotional music.

LANGUAGE AND LITERATURE

WITH its several provinces, each inhabited by a largely homogeneous racial group and each having its own tongue, it is only natural that Pakistan should have variations of language from province to province. But there is a common language which is spoken and understood in every province and which is the *lingua franca* of Pakistan. This language is Urdu. When the Muslims first came to India in the 8th century they found several languages spoken in this country. The necessity of communicating with the inhabitants of the country gave rise to the first faint beginnings of a new language consisting of elements of Persian, Arabic, Turki and the various dialects spoken in India, known as the prakrits. Since the Muslims made Delhi their capital, Sanskrit and Brij Bhusha, the two dialects spoken around Delhi and its environs, Meerut, Agra and Mathura, became the main base of Urdu and supplied it the grammar, syntax and the largest part of its vocabulary. The other prakrits, spoken in the various provinces of the country, supplied it with innumerable words, with Muslim sufs, divines, soldiers, administrators sent to all parts of the country absorbing its language and culture. Thus a language of the common people was evolved which was a blend of Arabic, Persian, Turki and native dialects.

By the beginning of the 14th century poetical and mystical words were being written into this new language. Under the Moghals (1526-1857) it rose to high literary standards. This language, which was called Hindi (Persian word meaning 'pertaining to India') up to the time of Akbar, now came to be called by the Turkish word Urdu—meaning the language of the camp. When Shah Jahan (1627-58) built the Red Fort at Delhi and established his new capital there, he raised the status of the language by calling it Urdu-e-Moalla or "exalted Urdu". The court language was still Persian, but the language of the people and of the ladies of the palace was henceforth Urdu. While Urdu had been maturing in the zenanas and bazars of Delhi in the fifteenth and sixteenth centuries, it was being nourished and used for literary expression in the south under the Bahmani Kingdom (1347-1526) and its successors. Thus the first definite school of Urdu poetry made its appearance in the first decade of the 16th century and flourished in the Deccan until the rise of the Delhi school in the first decade of the 18th century.

URDU LITERATURE

The early specimens and works of Urdu are religious in character or are long tales in verse. The style often lacks perfection and grace and the images and similes are simple. Although Persian influence is easily discernible, the poetry of the Deccan was essentially Indian in theme and inspiration. With the 17th century, however, Persian influences became more active and when Delhi took to writing in Urdu her poetry became modern, and the classical age

that thus began with the commencement of the 18th century lasted till the first two decades of the present century.

During the last 50 years, or so, Urdu has been profoundly affected by Western thought and literature under whose influence new literary forms have sprung up. Moreover, a vast body of scientific work from English and the continental languages has been translated into Urdu. In the first decade of the 20th century Muslim political consciousness found a vivid and forceful expression in this language. Hali, Akbar, and Iqbal were three outstanding figures who instilled a new life into Muslim thought through their poetry. Urdu poetry can justifiably claim a high place among the literatures of the world. The poetry of Mir Annes, Ghalib, and Iqbal has attained a stature which is in no way inferior to that achieved by Homer, Dante, Goethe and Shakespeare.

During the last 15 or 20 years Urdu literature has been considerably influenced by the New Writing Movement in Europe, U.S.A. and China, and the Urdu short story and poetry today can stand comparison with the best in international literature. The novel, the drama and other forms of literature are practised and a large number of daily newspapers and magazines are published in Urdu throughout the country.

PUNJABI LITERATURE

Although the province of the Punjab has played a leading role in the development of Urdu and some of the most famous writers of Urdu today belong to the Punjab, the spoken language of the province is Punjabi. It is a sister dialect of Prakrit and bears a close resemblance to Urdu. It is thus easy for an inhabitant of the Punjab to speak and understand Urdu and nearly everybody is able to speak it. Nevertheless, Punjabi has a literature of its own and poetry and folk-songs are still written in this language. One of its classics, the famous *Hir Ranjha* of Waris Shah, a mystical poem of several thousand verses, is ranked amongst the great poems of the world. Another great poem is the *Sohani Mahnuwal*, a love story written by Fazal Shah. Both these poems are extremely popular, particularly in the villages. Education in the Punjab is imparted through the medium of Urdu except in the Universities where the medium of instruction is English. Urdu is also the court language in the Punjab.

SINDHI LITERATURE

Sindhi is the language spoken and written in Sind. Although an offshoot of the Indian Prakrit, it was the first language of the sub-continent to come under the influence of Arabic due to the Arab occupation of Sind in the 8th century A.D. Sindhi is written in the old Na'khi Arabic script and 30 per cent of its vocabulary consists of Arabic words. Its literature is,

comparatively speaking, small but contains some excellent poetry such as is found in highly cultivated languages only. Among the Sindhi poets the works of Shah Abdul Latif are universally popular.

PATHAN LITERATURE

The language of the Pathans is Pushtu which does not belong to the Indo-Aryan family of languages and is, therefore, very different from Urdu, Sindhi, Punjabi and Bengali, the main Pakistani languages of Indo-Aryan origin. It is written in a modified Arabic script and contains many words of Arabic and Persian which bring it close to Urdu. Pushtu literature has been traced back to the 7th century and consists mainly of poetry, lyrical as well as mystical. Khushal Khan Khattak and Ishman Naba, both belonging to the 17th century, are regarded as the national poets of the Pathans. They have left complete *deevans*, or collections of poems. Pushtu is spoken both in the North-West Frontier Province and Afghanistan, with some variations in vocabulary and script.

BENGALI LITERATURE

The language of East Bengal—Bengali—has a highly developed literature of its own. Belonging to the Indo-Aryan group of languages it has a predominantly Sanskrit vocabulary although a large number of Persian and Arabic words have become part of the language as a result of Muslim influence. Its script is also of the same family as Deva Nagari although it has existed independently for at least eight centuries. A hundred years ago Bengali prose and poetry were so heavily encumbered by Sanskrit words as to be unintelligible to the common people. In the early years of the 19th century, however, Raja Ram Mohan Roy, Akshay Kumar Datta and Ishwar Chandra Vidyasagar initiated a movement for simpler expression and a greater use of the spoken word in literature. This movement later blossomed into a renaissance which produced such great literary figures of modern Bengal as Bankim Chandra Chatterji, Mahasudhan Dutta and Sir Rabindra Nath Tagore. Of these, Tagore achieved international recognition with his lyrics and plays which were largely inspired by Bengali folk-songs and many of which have been translated into English. He also wrote a large number of novels, short-stories, plays and philosophical discourses. Bengal has also produced some great Muslim poets and the songs of Alaul, Qazi Nazrul-Islam and Jaseem-ud-Din are sung throughout East Bengal, and some of Jaseem-ud-Din's poems have been admirably translated into English under the title, *The Painted Quilt*.

Although it is expected that Urdu will in due course replace English, yet it is obvious that this process must be gradual, and since English has now become an international language it will continue to be spoken, read and written, perhaps as widely as at present.

FINE ARTS

MODERN times have seen a revival of painting among the Muslims. Abdur Rahman Chughtai and Fyze Rahimin are two Muslim painters whose works have been exhibited in Europe and widely appreciated. Among the younger painters of today the powerful yet sensitive work of Zaiul Abedin deserves special mention.

Painting, like architecture, received a great impetus under the Moghal Emperors and here too, it was the Persian tradition which held sway for nearly three centuries beginning with the reign of Akbar. The Moghal school used mainly mineral colours of lamp-black where black was used. Beginning with some specimens which have a strong religious element akin to calligraphy and book-illumination, the art developed in the later periods into extremely delicate and accurate portraiture combining a brilliant use of colours with perfect draughtsmanship.

Some of these specimens, happily preserved in the various museums and private collections show keen insight into character and extraordinary mastery of detail. Lack of encouragement in the reign of Aurangzeb led to a rapid decline of the art, and Persian masters, who had been brought to Delhi by the earlier

Emperors and had enjoyed their patronage, ceased their visits to India. Muslim genius for this particular form of art was consequently smothered by neglect.

In music, as in architecture and painting, Muslim influence introduced profound changes. The cultural renaissance initiated by Muslims in North India influenced music to a greater degree than it did architecture and painting, so that it is hard to tell what the Indian musical scale was prior to the Muslim era. By the 13th century, i.e. in the reign of Allauddin Khilji, Arabian musical instruments had come into use. Thus the Arabic word mizrab for plectrum; Tabla, the Indian percussion instrument from the Arabian tabla and the classical drone instrument for accompaniment, Tambour, have all Arabic roots. The elaborate Qanoon, the rich-toned Rabab, the Tarab and the large drums called Naqqarah also came from Arabia. The most popular string instrument—Sitar—was invented by the great Muslim poet and savant, Amir Khusro, in the reign of Allauddin Khilji.

In the reign of Akbar (1556-1605), the great court musician, Tansen, gave a new orientation to Indian classical music by introducing scores of new ragas or musical modes, such as the

varieties of Todi, Darbari, Adana, Kafi, Bahar, Sarang and many others. Tansen also left nearly 500 compositions in the Dhrupad style which form the main bulk of the true classical Indian music today.

In the 18th century an entirely new school of music was founded by Muslim composers which in the course of two centuries has superseded the rigorously classical Dhrupad. This is known as the Khayal style which combines elegance with a greater freedom of rhythm, phrasing and intonation than the Dhrupad.

In the 19th century the Punjab developed an extremely charming style of singing known as the Tappa in which greater emphasis is laid on voice-culture and sweetness than on the strict observance of rules.

Music in the sub-continent was melodic or modal, and harmony was never attempted by Indian musicians. However, Allauddin Khan and his son, Ali Akbar, two gifted Muslim musicians have successfully introduced certain forms of orchestration. In Pakistan, Lahore and Dacca are active centres of musical learning, and Muslim artists are still the acknowledged masters of music, both instrumental and vocal in the entire sub-continent.

ARTS AND HANDICRAFTS

SKILLED craftsmen in Pakistan have a long tradition of exquisite workmanship, but the advent of machinery led to the decline of cottage industries. This decline has been specially noticeable in the handloom industry. Until the early 19th century, Dacca muslin was popular with the world's dress connoisseurs, and large quantities of it were exported to the European markets. Subsequently, however, the machine-made products of Manchester killed this industry though the material is still produced in small quantities. The finer hand-woven and hand-spun varieties of fabrics are in no way inferior to silk in softness and are as durable. Another product of great beauty is the Dacca Jamana which consists of delicately woven white patterns on a white background of fine muslin.

Embroidery of a high standard is common among the Brahuis of Baluchistan. The finest is called mosaic and consists of very close work in the form of satin-stitch, the designs being primarily geometric. Saddle-bags and handbags richly ornamented with shell-are also made in the Barkhan Tehsil (Loralai District) of Baluchistan.

Dera Ismail Khan, Kohat and Peshawar in the North-West Frontier Province produce fine silk fabrics, generally woven for turbans and mostly

in grey or blue, with richly worked end-pieces in gold thread. In the Hazara District of the same province beautiful striped and check material is woven for turbans and lo! cloth.

An interesting product of Peshawar is a cotton fabric decorated with a substance called roghan, a preparation of oil made by Afridis where the material derives its name—Afridi Monjama (wax-cloth). The roghan is applied in a plastic condition to the fabric by means of an iron style on the lines of the required pattern. It is then pressed into the cloth with the moistened tip of the finger when it adheres firmly to the texture.

The Kohat turban is ornamented with coloured silk and stripes at the ends which recall the Algerian stripe pattern. The Bangashi, as this pattern is called, is distinctive of a particular kind or clan. Multan in West Punjab and Bahawalpur State also produce beautiful silk fabrics, specially turbans and waist-bands.

Pottery for every day use is made in almost every village in Pakistan but some districts specialize in art pottery. Earthen vessels decorated with water-colours are made at Peshawar, while Gujrat in West Punjab produces beautiful light pottery called 'paper pottery'

because of its extreme fineness. Coloured faience or tiled work of Persian origin is done in Multan.

Swords and hunting knives of good quality are made in the North-West Frontier Province and in Baluchistan while surgical instruments (largely used in the last war) are made in Sialkot. Sialkot also produces world famous sports requisites and E.P.N.S. ware. Copper-ware, specially trays, ewers with basins and wine bowls are made in Peshawar and are often exact reproductions of famous Persian originals so familiar to the students of art. Silver filigree work of a very high quality is done in Dacca in East Bengal. Bengal is also famous for its fine ivory-carving, and Rangpur produces exquisitely carved decorative pieces which require as many as eight different tools before the finished product is ready.

The leather workers of the Frontier Province and West Punjab make sandals and shoes and handbags which are richly embroidered in gold and silver thread and are exported abroad. Good leather work is also done in Bengal where decorations on leather are first drawn with a fine needle and then coloured with specially made pigments.

ARCHAEOLOGY & ARCHITECTURE

BURIED cities dating back more than 5,000 years, and monuments of outstanding architectural and artistic interest form part of Pakistan's archaeological heritage and furnish one of the richest fields for antiquarian research. Of the standing monuments, 172 lie in West Pakistan and 79 in Eastern Pakistan. While it has been ascertained that ancient mounds in Eastern Pakistan contain the structural remains of Buddhist monasteries and Brahminic sanctuaries of the first millennium of the Christian era, those in Western Pakistan contain extensive remains of ruined cities and citadels of that highly developed pre-historic culture which is now known as the Indus Valley Civilisation. Four such ancient sites have been excavated so far in Western Pakistan. The one at Nal in Baluchistan has yielded vast remains of what was probably a royal cemetery. At Mohenjodaro

in the Larkana District of Sind, a city of metropolitan proportions has come to light which, together with the portable finds it has yielded, has made archaeological history. At Chanhu Daro, in the Nawab Shah District of Sind a town of the same period as that unearthed at Mohenjodaro has been revealed, while at Harappa in the Montgomery District of West Punjab, the remains of a vast citadel of the Mohenjodaro period have been exposed to view. Evidence of the immense variety of finds recovered from these sites of more or less contemporary period of pre-historic antiquity has established the fact that 3,000 years before Christ the people of those areas which are now known as Baluchistan, Sind and West Punjab, though not aware of iron and its uses and still making implements of chert and quartz for occupational purposes, were living in planned cities and well

designed houses and had, in respect of the art of living, attained a high degree of culture and refinement in the development of which pictographic script played a conspicuous part. The Indus Valley Civilisation flourishing 5,000 years ago is one of the three oldest civilisations discovered so far in the world.

In Pakistan the archaeological remains of the known period of history, as opposed to pre-history, embrace a period of more than 2,600 years beginning with the 7th Century B.C. The famous ancient city of Taxila, situated 21 miles north of Rawalpindi in Western Pakistan and extensively explored during the last 30 years, has furnished a great field for antiquarian research of absorbing interest. The excavations have brought to light the remains of three cities which flourished from the 7th Century B.C. to the

5th Century A.D. under the successive political and cultural domination of the Achaemenid Persians; the Macedonians of Alexander's army; the Mauryas of Asoka's time; the Hellenised Bactrians; the Sakas or the Scythians; the Pahlavas of Parthia and the Kushans of Purushapura, or modern Peshawar. For about ten centuries—between 500 B.C. and 500 A.D.—Taxila was a great seat of culture and learning and a meeting ground for diverse cultural influences of Eastern and Western countries.

The Yusufzai tract with its neighbouring valley of Swat, north of Peshawar, is a happy hunting ground for the students of ancient plastic art. This tract in ancient days was called Gandhara and, during the first centuries of the Christian era its people developed a school of sculpture which specialised in applying the classical forms of Greek art to Indian and particularly Buddhist subjects. Known as the "Gandhara School of Art", or "Graeco-Buddhist sculpture", specimens of these beautifully handled sculptured pieces are to be found in abundance in the whole of the Yusufzai tract. They have excited much interest and admiration in art circles in Europe and U.S.A.

The architecture which has left the deepest impress upon the buildings of Pakistan, however, as of the entire sub-continent, is the Muslim architecture of Turkish, Persian and Central Asian origin brought to India by its Muslim conquerors.

ISLAMIC ARCHITECTURE

The period of Muslim rule over India, beginning with the 13th century and extending right up to the middle of the 18th century, is the greatest building era in Indian history which is also the history of Pakistan. This is exemplified in its spectacular achievements no less than in the elaboration and full realization of certain principles and forms which became fundamental to all later Indian architecture. The most valuable contribution of Islamic architecture is the dome of monumental size used in the building of mosques, shrines and tombs throughout the sub-continent. The minaret, the niche, the monumental arch and other achievements in the sphere of architectural

decoration, such as stucco, mosaic faience, pietra dura and the colourful inlay work along with thousands of other decorative devices, are some of the gifts which Islam later bestowed on all Indian architecture through the Moghals. Thus the famous Taj Mahal at Agra, the Pearl Mosque in the Red Fort at Delhi, the Jama Masjid at Delhi, the buildings of Fatehpur Sikri and of the Agra Fort are essentially Muslim in inspiration and execution and, though situated in India today, are a fundamental part of the heritage of Pakistan.

Muslim monuments which have survived in Pakistan belong mostly to the Moghal period. Even some of these were destroyed during disturbances in the Punjab previous to the beginning of British rule. The most important Moghal monument in Pakistan is the Fort at Lahore. Its existence can be traced back to the 10th century, but it was Akbar who enlarged and rebuilt it when he held his court here between 1578 and 1598. Various structures were, however, added by the Emperors Jehangir, Shahjahan and Aurangzeb. The Elephant Gate, which was the Royal entrance is gorgeously decorated with tile mosaic. The unique feature of this decoration is that some panels depict living beings, a practice not found in Islamic architectural decoration. The ornamentation is continued on the Fort wall which is 500 yards long and 16 yards high, in other words a surface of nearly 8,000 square yards is covered with these brilliant tiles. In these panels elephants, camels, horses and human figures have been depicted with vigour and restraint. The other important buildings of the Fort are a palace built in parts by Jehangir and Shahjahan, a lovely mosque in white marble called Moti Masjid or Pearl Mosque, the Shish Mahal or Palace of Mirrors with its wonderful pietra dura decoration and the ornamental Shah Burj or Royal Tower, built by Shahjahan. There are also mausoleums of Jehangir and his queen, Nur Jahan.

Wazir Khan's Mosque, built in Lahore in 1634, is an extremely beautiful building. Its brick walls are covered with inlaid work of the Kashii type, a kind of mosaic of glazed tiles. The structure and the decorations are notably Persian in character. From the gallery round

the minarets one can have a very fine view of the city. The Badshahi Mosque, built by Aurangzeb is a structure remarkable for its enormous size, though not so much for its elegance. It is the largest mosque in the world and can hold a congregation of 100,000 at a time.

Sind provides archaeological material worth a life-time of study and research. Nearly every district of this ancient land is strewn with monuments dating from pre-historic times to the middle of the last century. At Mohenjodaro relics contemporaneous with and similar to those at Babylon have been discovered, while Brahmanabad, Mirpur I has, and Jarak have Buddhist stupas and antiquities. Alor, Hyderabad, Sukkur and Larkana have many interesting monuments worth studying. Thatta 50 miles from Karachi, is full of Muslim monuments dating from the 13th century. The most important among these is a great mosque built by Shahjahan as a memorial to his visit to Thatta when, having quarrelled with his father, Jehangir, he was for the time being an exile from the Court. This mosque is one of the few surviving Moghal buildings in brick. Its great feature is its coloured tile-work within, the whole interior being covered with it. The tiles are of beautiful colour and show an infinite variety of pigments and design.

At Bahapur in the Badshahi District of Eastern Pakistan a 10th century Buddhist temple and monastery of brick masonry, the largest of its kind in the sub-continent, has been recently unearthed and is now being preserved with care. Gaur and Pandua in Eastern Pakistan possess a remarkable array of Muslim monuments.

Apart from the pursuit of archaeological exploration and excavation of ancient sites, and preservation and conservation of standing monuments which are its primary functions, the Department of Archaeology of the Government of Pakistan is also responsible for the maintenance of three museums of exclusively archaeological exhibits at the three famous archaeological centres of Mohenjodaro, Harappa and Taxila which have long since become places of pilgrimage for the serious as well as the casual students of the history of this ancient land.

A REVIEW OF THE YEAR 1948-49

SEPTEMBER 12, 1948, was the darkest day in the history of Pakistan. The nation woke up to find that the Founder and Architect of Pakistan, Mohammad Ali Jinnah was dead, and also that Indian troops had entered Hyderabad State.

The death of the Quaid-e-Azam occurred at 10-25 p.m. on September 11, 1948 within six hours after his return by air from Quetta. He was suffering from pulmonary tuberculosis and was ailing for a long time. But he never omitted to do his official duties even for a single day.

It is stated that on September 11, 1949, the Quaid-e-Azam expressed his desire to return to Karachi from Quetta. An ordinary Military Dakota was immediately got ready and it arrived at Mauripur without any notice whatsoever. The Quaid-e-Azam was borne on a stretcher in a Military Ambulance Car from the airfield to the Governor-General's House. When he expired there was no one at his bed-side except his sister Miss Fatima Jinnah and his personal Assistant Mr. Farukh Amin. Word was immediately sent to the Prime Minister who summoned an urgent meeting of the cabinet at the Governor-General's House. The Sind Governor, Shaikh Ghulam Hussain Hidayatullah was at a dance. When the message reached him—the party broke up but nobody yet knew what had really happened. Newspaper offices began to receive telephone calls: "Has war broken out between Pakistan and India? Is

the Quaid-e-Azam all right?" Speculation and suspense ended when a laconic official communiqué issued about 3 a.m. gave the news about the Quaid-e-Azam's death. The funeral took place on September 12. An enormous procession followed the gun carriage on which was carried the body of the Quaid-e-Azam to his last resting place. The whole country was plunged in gloom and despair.

After the Quaid-e-Azam's death Al-Haj Khwaja Nazimuddin, till then the Premier of East Bengal was appointed Governor-General of the Dominion.

DISMISSAL OF KHUHHO

Two events which must be treated at some length are the dissolution of the Khuhro Ministry in Sind and of the West Punjab Ministry.

On April 26, 1948, Mr. Mohammad Ayub Khuhro was dismissed by the Governor of Sind, from the Premiership of the province. The official announcement said that there was a *prima facie* case of mal-administration, gross misconduct in the discharge of his duty and responsibility, and of corruption against Mr. Khuhro. A Special Tribunal consisting of the present Chief Justice of the Federal Court of Pakistan, Sir Abdur Rashid, and Justice Shahabuddin, a Judge of the East Bengal High Court was appointed to inquire into the 62 charges against Mr. Khuhro. After an enquiry which lasted a long time the Tribunal submitted

its report to the Sind Governor. Out of a total of 110 findings recorded by the Tribunal, 60 went against Mr. Khuhro while 50 were in his favour. The Court remarked: "The allegations proved against Mr. Khuhro range from mere violation without any motive to flagrant breach with a definite motive of the provisions of law, rules and conventions. Some of the cases were of victimisation of those persons who in discharge of their duties had to act against him; in some cases the motive was to oblige a friend or a member of his party or to favour a relative; while in some other cases the desire was to advance his own personal interests."

The Special Prosecution Counsel Parmanand Kundanmal had submitted a list of 62 charges. The Court had held 114 sittings. 86 witnesses had been examined on behalf of the Sind Government, 20 witnesses had been examined for the defence. On behalf of the Government 1,173 documents had been produced as exhibits. The defence had produced about 173 documents.

No charge of corruption was proved against Mr. Khuhro but "a number of charges of 'mal-administration' and 'gross misconduct' in the discharge of his duties and responsibilities" by Mr. Khuhro were substantiated by overwhelming evidence produced on behalf of the Government."

On March 22, the Governor-General of Pakistan disallowed Mr. M. A. Khuhro for a period of three years under Section 8 of the

Public & Representative Offices (Disqualification) Act 1949 from being chosen as a Minister, Deputy Minister or Parliamentary Secretary, whether for a Federal Government or Provincial Government, a member of the Constituent Assembly, the Legislature of the Dominion or a Provincial Legislature, any local body or local authority and also declared him ineligible for any office of profit under the crown.

Immediately after the dismissal of Mr. Muhammad Ayub Khulroo, Pir Iqbal Bakhsh was elected the leader of the Muslim League Party in the Sind Assembly and he formed a new Ministry with Mir Ghulam Ali Khan Talpur, Mr. Miran Muhammad Shah and Mr. Muhammad Azam as Ministers. On February 4, 1949, however, Pir Iqbal Bakhsh was disenfranchised as a sequel to the findings of the Sind Election Tribunal. Mr. G. M. Syed had filed an election petition against Kazi Muhammad Akbar, a near relative of Pir Iqbal Bakhsh. The Tribunal found both Pir Iqbal Bakhsh and Kazi Muhammad Akbar guilty of malpractices during the general elections to the Sind Assembly.

Pir Iqbal Bakhsh's resignation was followed by a regular tussle for the premiership of the province. A meeting of the Sind Muslim League Assembly Party was held in Hyderabad Sind and Mr. Yusuf Abdulola Haroon, who was not a member of the Sind Assembly, was elected as the leader. Mr. Yusuf Haroon formed a new cabinet consisting of Kazi Fazlullah, Mir Hundi Ali Talpur and Syed Miran Muhammad Shah.

Pir Iqbal Bakhsh has filed a petition in the Sind Chief Court challenging the validity of the constitution of the Election Tribunal on technical grounds.

PUNJAB MINISTRY

In the West Punjab, allegations and counter-allegations by rival groups in the League Assembly Party led Miran Muhammad Shah and Sardar Shaukat Hayat Khan to resign from the Ministry. Efforts were made to compose the differences but to no avail. Eventually on January 22, 1949 the Governor-General dissolved the West Punjab Assembly and the Ministry and orders were passed to prepare for general elections.

An Inquiry (which is still in progress) was instituted against the then Premier, Khan Iftikhar Hussain Khan of Mandot on alleged charges of maladministration and corruption.

The moment the Governor Sir Francis Mudie took over under Section 92A, a campaign began against him in the press and the Province at large. The agitation gained momentum when the question of the appointment of Advisors to the Governor came up. The Provincial League started a "recall Mudie" campaign. The Prime Minister Mr. Liaquat Ali Khan agreed to give the Advisors powers equal to those of a cabinet. Sir Francis disagreed with the Prime Minister's decision and submitted his resignation which was accepted. Sir Francis was then granted leave preparatory to retirement till October 2, 1950.

Sardar Abdul Rab Nishtar, a senior member of the Pakistan Cabinet, in charge of Communications was appointed the Governor of West Punjab with effect from August 2, 1949.

TRADE, COMMERCE

Other items which complete the review may be briefly noted.

So far as trade and commerce are concerned Government insisted on Pakistani firms being associated with the cotton trade. Messrs. Powell Duffryn Technical Services Ltd. were appointed by the Government for carrying out a survey of the coal mining industry. Sterling releases in London and current earnings of foreign exchange enabled the Government to follow a liberal import policy which resulted in a general revival of trade. At present the number of items for which licenses are required for import from sterling and soft currency areas are negligible. Imports of capital goods and machinery were

also freely allowed from hard currency countries. But control on import of consumer goods from hard currency areas remains. In general the import policy has resulted in a fall in the prices of consumer goods and greater availability of such goods. The country has a favourable balance of trade and the currency has a high value. The response to the loans floated by the Government was unexpectedly good and encouraging. The country's credit, in fact is very high. A ten-year industrial development plan was drawn up to include hydro-electric projects, jute, cotton, mineral resources, oil prospecting.

In the educational sphere religious instruction was made compulsory with a view to imparting the correct conception of Islam.

So far as the States were concerned the Prime Minister declared that he was in favour of responsible government and also revealed that the rulers for their part were agreeable to the idea. The Prime Minister expressed the hope that by the time the new constitution was ready they would be able to bring state administration on a par with provincial administration.

Pakistan decided to remain in the British Commonwealth. But this decision, it was explained, would in no way compromise the country's independent status. At the U.N.O., for instance, Pakistan refused to identify itself with any power bloc. Relations with Afghanistan were slightly strained over the question of the status of the N.-W.F.P. and the border areas. But the tension greatly relaxed when both Pakistan and Afghanistan agreed to jointly enquire into a bombing incident in Afghan territory which had aggravated the situation. So far as relations with India were concerned, it was hoped that there would be more friendly feeling with the cessation of hostilities in Kashmir. The exodus of the minority community from East Bengal, came to an end.

PAKISTAN'S ADMISSION TO THE U. N.

Pakistan was admitted to the United Nations on the 30th of September 1947, at an impressive ceremony in which the delegations of all the principal countries of the world participated. The amount of international good-will that Pakistan had secured was evident from the speeches made by the representatives of the leading countries of the world. Mr. Herbert McNeill, the British delegate, who formally moved that Pakistan and Yemen be admitted to the United Nations said, "Not only is my delegation glad that these two admissions are about to receive final approval but we are also confident that both these countries will make decisive contributions to our deliberations. My delegation is particularly interested in the admission of Pakistan. Although it is only very recently that they have attained the status which, I am sure, they will adorn, they have already shown great virility, and if their delegation has not been inside the Assembly upto this moment, it has not been far off in the wings and many of us have enjoyed the advantage of their advice. Sir Zafrullah Khan is well-known to many of us. He will be a great asset in the work of the Assembly and the Committees."

The Indian delegate, Mrs. Vijayalakshmi Pandit, extended her welcome to Pakistan after Egypt, U.S.A., Iran and Iraq had supported the admission of Pakistan to the U.N. Speaking from the rostrum of the General Assembly, Mrs. Pandit said, "It is especially a matter of gratification to us of India that our sister nation should take her due and legitimate place in the international community here and make her contribution to the solution of the problems that face the world."

"We are all aware of the position she holds in area, population and resources among the nations of Asia and her association must, therefore, be a source of strength to us. We of the Indian delegation welcome her and wish her all success in her new responsibilities."

After Turkey, the Lebanon and Brazil had supported the two admissions, President Arafat put the formal motion to the vote. Of the 64 nations present 58 voted in favour of the motion and one against, the adverse vote coming from Afghanistan.

Sir Mohammad Zafrullah Khan, Pakistan's Chief delegate was then invited to the President's rostrum where he signed his country's adherence to the U.N. Charter. After the President had expressed the Assembly's deep sense of satisfaction at Pakistan's admission, Sir Zafrullah Khan went to the rostrum and made his reply. In the course of his speech he said: "On behalf of my Government, I beg to convey to the United Nations the assurance that Pakistan will do all that lies in its power to bring about better understanding between nations and make the utmost contribution of which it is capable towards securing and maintaining lasting peace."

SUPPORT FOR U.N.O.

"It will also be ready and indeed anxious, to make its own contribution towards the alleviation of all forms of human suffering and distress and the promotion of beneficent co-operation among nations for the general raising of the standards of living and the fostering of liberty and tolerance throughout the world."

Declaring that, in a sense the admission of Pakistan to the U.N. was not the admission of a new member, Sir Zafrullah Khan added: "Inasmuch as Pakistan had been part of India, it was in effect under the latter under a signatory to the Treaty of Versailles and an original member of the League of Nations. I recall that I had the honour of leading the Indian delegation to the last session of the Assembly of the League of Nations at Geneva in December 1939. In the same sense, Pakistan, as part of India participated in the San Francisco Conference in 1945 and became a signatory of the U.N. Charter."

"Therefore, Pakistan is not a new member of the U.N., but a successor to a member State which was one of the founders of the Organisation." While fully appreciating the ideals of the U.N., Sir Zafrullah continued, "the Pakistan delegation are equally conscious of its handicaps and shortcomings. We are convinced that the U.N. offers to mankind its last chance of salvation in the political, economic and social fields, and that our united efforts ought to be directed towards strengthening the organisation and discovering the means of making it work in the spirit in which it was founded and towards the achievements of the ideals which have been set up as its goal. Pakistan will always make its fullest contribution towards that end."

In a press statement on the admission of Pakistan, the U.S. Secretary of State, Mr. George Marshall said: "Pakistan has just begun its career, as a member of the community of nations, but we have every reason to believe and expect that its role and its contribution to the United Nations will be of much importance. The Government, and people of the United States look forward to collaborating with Pakistan in the United Nations."

Pakistan's first official task as a member was to take part in the vote for the election of three new members to the Security Council to replace Poland, Australia and Brazil.

FOREIGN RELATIONS

A more detailed treatment of Pakistan's foreign relations are given below:

The country's representation abroad was increased by the opening of Legations in Jeddah and Baghdad and by the posting of a senior official as Permanent Representative with the United Nations. A junior officer was sent to Nanking to make preliminary arrangements for the opening of an Embassy in China. Recently Pakistan has appointed an Ambassador in Turkey, a High Commissioner in Canada and a Minister in Syria. Plans for Missions in Nairobi and Colombo were well advanced. In addition, the Zaidah, Kandahar and Jalalabad Consulates were taken over from the United Kingdom

Government, a Deputy High Commissioner was posted to Calcutta, and a Permit Officer to Bombay. The agreement of the Chinese Government to the opening of a Consulate-General in Kashgar (Shukiang) was received; and an officer was expected to reach there by the long mountain trail through Gilgit, before the second anniversary of Independence. Steadily progress was made in the organisation of Missions, *e.g.*, with effect from April 1949 Pakistan set up its own passport and visa issuing organisation, and 80,000 Pakistan passports were printed and issued to applicants.

PAKISTAN FOREIGN SERVICE

To man these and other Missions, a Pakistan Foreign Service was created. It consisted initially of about 120 officers of whom 13 Third Secretaries were appointed on the result of a competitive examination held in January 1949, and up to 85 vacancies were advertised for filling by nomination through the Pakistan Public Service Commission.

FOREIGN REPRESENTATIVES IN KARACHI

The diplomatic representation of foreign Powers in Karachi increased. The Transjordan Minister presented his credentials on December 9, 1948, the Saudi Arabian Minister on January 17, 1949 and the Norwegian Minister on May 9. The existing Egyptian and Iranian Embassies received their Ambassadors in January and April 1949 respectively. Consuls-General for the Argentina and Spain also arrived. The Indian High Commissioner, Mr. Sri Prakasa, was transferred as Governor of Assam and was succeeded by Dr. Sita Ram; the French Ambassador was transferred; his successor has not yet been appointed. The High Commissioner for Australia arrived in May 1949. Turkey appointed another Ambassador in place of H.E. Yahya Kemal Bayitli who has retired. The new ambassador's arrival in the capital is expected soon.

INTERNATIONAL CONFERENCES

The General Assembly of the United Nations held their third regular session in two parts. The first part was held at Paris from 21st September to 12th December, 1948, while the second part was held in New York from 15th April to 18th May, 1949. Pakistan participated

in both of them, and the delegations were led by the Foreign Minister. The agenda for the second part of the session was comparatively short, and so a smaller delegation was sent to this part of the session.

Of the various items on the agenda, Pakistan was mainly interested in the following:—the problem of Palestine; the draft convention on Genocide; the draft Declaration on Human Rights; the question of the incorporation of South-West Africa in the Union of South Africa; the question of Indians and Pakistanis in the Union of South Africa; the question of the admission of the so-called State of Israel as a member of the United Nations; the problem of Indonesia; and the disposal of the former Italian colonies.

Pakistan's continuous championship of the Arabs against the so-called State of Israel for a time held up the admission of Israel as a member of the United Nations.

Pakistan consistently opposed, on the principle of self-determination, the return to Italy of her former colonies and advocated, in case immediate independence was not granted, their administration under the direct control of the United Nations. In the event the so-called Bevin-Storza compromise proposal on this subject was defeated.

Efforts were made by Pakistan to give the Convention on Genocide a retrospective effect, but this was not successful.

The South African desire to incorporate the territory of South-West Africa in the Union of South Africa was opposed.

During the year under review, the Government of Pakistan participated in a number of other international conferences, *e.g.*, the conference of the parties to the General Agreement on Tariffs and Trade at Annecy in France in April and May, 1949.

Of the various subsidiary organs of the United Nations, the Government of Pakistan are represented on the "Little Assembly," the Economic Commission for Asia and the Far East, and the United Nations Special Committee on the Balkans. Pakistan has also been elected a member of the Fiesd Commission of the United Nations, and the nomination of a Representative is under consideration.

THE COMMONWEALTH

The conferences of the greatest interest were undoubtedly the two Commonwealth Prime Ministers' Conferences held in London and the series of conferences with India held at Karachi and at New Delhi. The two London conferences were informal gatherings of leading statesmen and made no commitments; their recommendations, *e.g.*, regarding the status of High Commissioners and the all-important constitutional issue, were placed before the Commonwealth Governments concerned for their decision as independent countries.

INDONESIA

As a protest against Dutch aggression in Indonesia, Pakistan suspended all Dutch flights over Pakistan from 24th December, 1948, and cancelled the fuel licence of the K.L.M. Pakistan consistently supported the grant of independence to Indonesia.

CONFERENCE WITH INDIA

Inter-Dominion conferences were held with India in December 1948 and April 1949, in which agreement was reached on a number of outstanding problems, political, economic, financial and miscellaneous. The December conference reaffirmed that the responsibility for protecting the lives and property of the minorities rested with the Government of the Dominion in which they resided, and that their allegiance and loyalty was to the State of which they were citizens. Both Dominions undertook to discourage propaganda for the amalgamation of India and Pakistan or portions thereof. Monthly Inter-Dominion conferences were provided for to discuss outstanding problems. Provision was also made for frequent meetings between the Premiers and Chief Secretaries of East and West Bengal and the Inspectors-General of East and West Punjab. It was decided that the boundary of East and West Punjab should be demarcated, the respective Financial Commissioners making recommendations to this end; and for the boundary demarcation of East and West Bengal, it was decided to set up a Tribunal of three eminent judges. Each Dominion undertook to set up an organisation at the Centre to watch the implementation of Inter-Dominion Agreements.

THE NEW CONSTITUTION

H. E. Khwaja Nazimuddin
GOVERNOR-GENERAL

THE Constituent Assembly of Pakistan has not made much progress in the drafting of a new constitution for the Dominion. An objectives resolution moved by the Prime Minister on March 7, 1949 was adopted. A Basic Principles Committee was set up to report as early as possible, in accordance with the motion adopted by the Assembly, on the main principles on which the constitution of Pakistan is to be based. The work of some of the committees set up earlier was also reviewed.

The Objectives Resolution, extracts from the Prime Minister's speech, the personnel of the main and the sub-committees, short notes on the functions which are assigned to them, and the work that the committees have done so far are all given below.

OBJECTIVES RESOLUTION

"In the name of Allah, the beneficent, the Merciful:

Whereas sovereignty over the entire universe belongs to God Almighty alone and the authority which He has delegated to the State of Pakistan through its people for being exercised within the limits prescribed by Him is a sacred trust:

This Constituent Assembly representing the people of Pakistan resolves to frame a constitution for the sovereign independent State of Pakistan:

Wherein the State shall exercise its powers and authority through the chosen representatives of the people.

Wherein the principles of democracy, freedom, equality, tolerance and social justice as enunciated by Islam shall be fully observed;

Wherein Muslims shall be enabled to order their lives in the individual and collective spheres in accordance with the teachings and requirements of Islam as set out in the Holy Quran and the Sunna;

Wherein adequate provision shall be made for the minorities freely to profess and practise their religions and develop their cultures;

Whereby the territories now included in or in accession with Pakistan and such other territories as may hereafter be included in or accede to Pakistan shall form a Federation wherein the units will be autonomous with such boundaries and limitations on their powers and authority as may be prescribed;

Wherein shall be guaranteed fundamental rights including equality of status, of opportunity and before law, social, economic

and political justice, and freedom of thought, expression, belief, faith, worship and association, subject to law and public majority;

Wherein adequate provision shall be made to safeguard the legitimate interests of minorities and backward and depressed classes;

Wherein the independence of the judiciary shall be fully secured;

Wherein the integrity of the territories of the Federation, its independence and all its rights including its sovereign rights on land, sea and air shall be safeguarded;

So that the people of Pakistan may prosper and attain their rightful and honoured place amongst the nations of the World and make their full contribution towards international peace and progress and happiness of humanity."

PRIME MINISTER'S SPEECH

Moving the Resolution the Prime Minister said among other things: "Pakistan was founded because the Muslims of this sub-continent wanted to build up their lives in accordance with the teachings and traditions of Islam, because they wanted to demonstrate to the world that Islam provides a panacea to the many diseases which have crept into the life of humanity today....

"All authority is a sacred trust, entrusted to us by God for the purpose of being exercised in the service of man, so that it does not become an agency for tyranny or selfishness. I would, however, point out that this is not a resuscitation of the dead theory of divine right of kings or rulers, because, in accordance with the spirit of Islam, the preamble fully recognises the truth that authority has been delegated to the people, and to none else, and that it is for the people to decide who will exercise that authority.

"For this reason it has been made clear in the Resolution that the State shall exercise all its powers and authority through the chosen representatives of the people.

"This is the very essence of democracy, because the people have been recognised as the recipients of all authority and it is in them that the power to wield it has been vested.

"I just now said that the people are the real recipients of power. This naturally eliminates any danger of the establishment of a theocracy. In the technical sense theocracy has come to mean a government by ordained priests, who wield authority as being specially appointed by those who claim to derive their rights from their sacerdotal position. I cannot overemphasise the fact that such an idea is absolutely foreign to Islam. Islam does not recognise either priesthood or any sacerdotal authority; and, therefore, the question of a theocracy simply does not arise in Islam. If there are any who still use the word theocracy in the same breath as the polity of Pakistan, they are either labouring under a grave misapprehension, or indulging in mischievous propaganda.

"You would notice that the Objectives Resolution lays emphasis on the principles of democracy, freedom, equality, tolerance and social justice, and further defines them by saying that these principles should be observed in the constitution as they have been enunciated by Islam. It has been necessary to qualify these terms because they are generally used in a loose sense. For instance, the Western Powers and Soviet Russia alike claim that their systems are based upon democracy, and, yet, it is common knowledge that their politics are inherently different. It has, therefore, been found necessary to define these terms further in order to give them a well-understood meaning. When we use the word democracy in the Islamic sense, it pervades all aspects of our life; it relates to our system of Government and to our society with equal validity, because one of the greatest contributions of Islam has been the idea of the equality of all men. Islam recognises no distinctions based upon race, colour or birth. Even in the days

of its decadence Islamic society has been remarkably free from the prejudices which vitiated human relations in many other parts of the world.

"Similarly, we have a great record in tolerance, for under no system of Government, even in the Middle Ages, have the minorities received the same consideration and freedom as they did in Muslim countries. When Christian dissentients and Muslims were being tortured and driven out of their homes, when they were being hunted as animals and burnt as criminals—even criminals have never been burnt in Islamic society—Islam provided a haven for all who were persecuted and who fled from tyranny. It is a well-known fact of history that, when anti-Semitism turned the Jews out of many a European country, it was the Ottoman Empire which gave them shelter. The greatest proof of the tolerance of Muslim peoples lies in the fact that there is no Muslim country where strong minorities do not exist, and where they have not been able to preserve their religion and culture. Most of all, in this sub-continent of India, where the Muslims wielded unlimited authority, the rights of non-Muslims were cherished and protected. I may point out, Sir, that it was under Muslim patronage that many an indigenous language developed in India. My friends from Bengal would remember that it was under the encouragement of Muslim rulers that the first translations of the Hindu scriptures were made from Sanskrit into Bengali. It is this tolerance which is envisaged by Islam, wherein a minority does not live on sufferance, but is respected and given every opportunity to develop its own thought and culture, so that it may contribute to the greater glory of the entire nation...."

ISLAMIC SOCIETY

"The next clause of the Resolution lays down that Muslims shall be enabled to order their lives in the individual and collective spheres in accord with the teachings and requirements of Islam as set out in the Holy Quran and the Sunna. It is quite obvious that no non-Muslim could have any objection if the Muslims are enabled to order their lives in accordance with the dictates of their religion. You would also notice that State is not to play the part of a neutral observer, wherein the Muslims may be merely free to profess and practise their religion, because such an attitude on the part of the State would be the very negation of the ideals which prompted the demand of Pakistan, and it is these ideals which should be the cornerstone of the State which we want to build. The State will create such conditions as are conducive to the building up of a truly Islamic society, which means that the State will have to play a positive part in this effort. You would remember that the Quaid-e-Azam and other leaders of the Muslim League always made unequivocal declarations that the Muslim demand for Pakistan was based upon the fact that the Muslims had way of life and a code of conduct... Indeed, Islam lays down specific directions for social behaviour, and seeks to guide society in its attitude towards the problems which confront it from day to day: Islam is not just a matter of private beliefs and conduct. It expects its followers to build up a society for the purpose of 'Good life'. As the Greeks would have called it, with this difference, that Islamic 'good life' is essentially based upon spiritual values. For the purpose of emphasising these values and to give them validity, it will be necessary for the State to direct and guide the activities of the Muslims in such a manner as to bring about a new social order based upon the essential principles of Islam, including the principles of democracy, freedom, tolerance and social justice.

"These I mention merely by way of illustration; because they do not exhaust the teachings of Islam as embodied in the Quran and the Sunna. There can be no Muslim who does not believe that the word of God and the life of the Prophet are the basic sources of his inspiration. In these

there is no difference of opinion amongst the Muslims and there is no sect in Islam which does not believe in their validity. Therefore, there should be no misconception in the mind of any sect which may be in a minority in Pakistan about the intentions of the State... No sect, whether majority or a minority, will be permitted to dictate to the others, and, in their own internal matters and sectional beliefs all sects will be given the fullest possible latitude and freedom. Actually we hope that the various sects will act in accordance with the desire of the Prophet who said that the differences of opinion amongst his followers are a blessing. It is for us to make our differences a source of strength to Islam and Pakistan, not to exploit them for narrow interests which will weaken both Pakistan and Islam. Differences of opinion very often lead to cogent thinking and progress....

MINORITIES

"In our desire to build up an Islamic society we have not ignored the rights of the non-Muslims. Indeed, it would have been un-Islamic to do so, and we would have been guilty of transgressing the dictates of our religion if we had tried to impinge upon the freedom of the minorities. In no way will they be hindered from professing, or practicing their religion or developing their cultures. The history of the development of Islamic cultures itself shows that the cultures of the minorities, who lived under the protection of Muslim States and empires, contributed to the richness of the heritage which the Muslims built up for themselves. I assure the minorities that we are fully conscious of the fact that if the minorities are able to make a contribution to the sum total of human knowledge and thought, it will redound to the credit of Pakistan and will enrich the life of the nation. Therefore, the minorities may look forward, not only to a period of the fullest freedom, but also to an understanding and appreciation on the part of the majority which has always been such a marked characteristic of Muslims throughout history.

"The Resolution envisages a federal form of Government because such is the dictate of geography. It would be idle to think of a unitary form of Government when the two parts of our country are separated by more than a thousand miles. I, however, hope that the Constituent Assembly will make every effort to integrate the units closer and forge such ties as would make us a well-integrated nation. I have always advocated the suppression of provincial feelings, but I want to make it clear that I am not an advocate of dull uniformity. I believe that all the areas and units which form Pakistan should contribute to the richness of our national life. I do, however, want to make it clear that nothing should be permitted which, in any sense, tends to weaken national unity, and provision should be made for bringing about a closer relationship amongst the various sections of our population than exists today. For this purpose, the Constituent Assembly will have to think anew as to what will be the best method for the distribution of subjects between the Centre and the units, and how the units should be defined in our new set up....

"It is our firm belief and, we have said this from many a platform, that Pakistan does not stand for vested interests or the wealthy classes. It is our intention to build up an economy on the basic principles of Islam which seeks a better distribution of wealth and the removal of want, poverty and backwardness—all that stands in the way of the achievement of his fullest stature by man—must be eradicated from Pakistan. At present our masses are poor and illiterate. We must raise their standard of life and free them from the shackles of poverty and ignorance.

"So far as political rights are concerned, everyone will have a voice in the determination of the policy pursued by the Government and in electing those who will run the State, so that they may do so in the interests of the people. We believe that no shackles can be put on thought and,

therefore, we do not intend to hinder any person from the expression of his views. Nor do we intend to deprive anyone of his right of forming associations for all lawful and moral purposes.

"In short, we want to base our polity upon freedom, progress and social justice. We want to do away with social distinctions, but we want to achieve this without causing suffering or putting fetters upon the human mind and lawful inclinations.

"There are a large number of interests for which the minorities legitimately desire protection. This protection the Resolution seeks to provide. The backward and depressed classes are our special charges. We are fully conscious of the fact that they do not find themselves in their present plight for any fault of their own. It is also true that we are not responsible by any means for their present position. But now that they are our citizens, it will be our special effort to bring them up to the level of other citizens, so that they may bear the responsibilities imposed by their being citizens of a free and progressive State, and share them with others who have been more fortunate than themselves. We know that so long as any sections amongst our people are backward, they will be a drag upon society and, therefore, for the purpose of building up our State we must necessarily look to the interests of these sections...."

COMMITTEE WORK REVIEWED

Besides passing the Objectives Resolution the Assembly considered at the same session the report of the Committee on the Addition and Re-distribution of Seats and passed a Bill whereby 6 new seats were created in the Constituent Assembly, 5 for Muslims from West Punjab, and one for Muslims from Sind.

A considerable amount of work was also done by the several Constitutional Committees which had been set up earlier.

The Committee on Fundamental Rights of Citizens of Pakistan and on Matters Relating to Minorities which had appointed two sub-committees to deal with the two questions separately, considered the report of the Sub-Committee on Fundamental Rights of Citizens of Pakistan and directed that the Sub-Committee should re-draft its report in the light of the Human Rights adopted by the U.N.O. General Assembly. A fresh report in the light of these directions was then rapidly prepared. It is expected that the report will be dealt with at an early date.

The other Sub-Committee which dealt with Matters Relating to Minorities, elicited public opinion on this subject by means of a questionnaire and prepared a statement which is to come up at the next meeting of the Sub-Committee.

Two other Committees, namely, the States Negotiating Committee and the Tribal Areas Negotiating Committee, have also made some progress. The latter Committee, however, has been hampered in its work by the absence of data which is now being collected.

BASIC COMMITTEE PERSONNEL

The President of the Assembly: The Honourable Sir Mohammad Zafullah Khan; The Honourable Mr. Ghulam Mohammad; The Honourable Khawaja Shahabuddin; The Honourable Pirzada Abdus Sattar; The Honourable Mr. Fazlur Rahman; The Honourable Mr. Jogendra Nath Mandal; Maulana Shabbir Ahmad Osmani; Dr. Omar Hayat Malik; Dr. Ishlaq Hussain Qureshi; Kamini Kumar Datta; Begum Jahan Ara Shah Nawaz; Malik Mohammad Firoz Khan Noon; Sris Chandra Chattopadhyaya; Mian Mumtaz Mohammad Khan Daultana; Maulana Mohammad Akram Khan; Mian Mohammad Iftikhar-ud-Din; Khan Sardar Bahadur Khan; Dr. Mahmud Hussain; Begum Shaista Suhrawardy Ikramullah; Prem Hari Barma; and the Mover.

The Committee has powers to co-opt not more than ten Members who need not be Members of the Constituent Assembly.

Accordingly the Basic Principles Committee later co-opted Mr. Nurul Amin, Premier of East Bengal, Mr. Abdul Qayyum Khan, Premier of North-West Frontier Province, Mr. Yusuf Haroon, Premier of Sind and Chief Justice Sir Abdur Rashid, of the West Punjab High Court, as members of the Committee.

Federal Constitution and Distribution of Powers Committee.—The Hon'ble Mr. Ghulam Mohammad; The Hon'ble Mr. Fazlur Rahman; The Hon'ble Khawaja Shahabuddin; The Hon'ble Sir Mohammad Zafullah Khan; The Hon'ble Mr. Pirzada Abdus Sattar; The Hon'ble Mr. Nurul Amin; The Hon'ble Mr. Yusuf Haroon; The Hon'ble Mr. Abdul Qayyum; Maulana Shabbir Ahmad Osmani; Prof. I. H. Qureshi; Dr. Mahmud Hussain; Malik Mumtaz Mohd. Khan Daultana; Maulana Mohd. Akram; Dr. Omar Hayat Malik; S. C. Chattopadhyaya; Malik Firoz Khan Noon; Prem Hari Barma; Karamat Ali.

Judiciary Committee.—The Hon'ble Mr. Jogendra Nath Mandal (*Chairman*); The Hon'ble Sir Mohammad Zafullah Khan; The Hon'ble Mr. Pirzada Abdus Sattar; Maulana Shabbir Ahmad Osmani; Chaudhury Nazir Ahmad Khan; K. K. Datta; The Hon'ble Sir Abdur Rashid.

Franchise Committee.—The Hon'ble Mr. Fazlur Rahman (*Chairman*); The Hon'ble Mr. Pirzada Abdus Sattar; The Hon'ble Mr. J. N. Mandal; Sardar Bahadur Khan; Begum Jahan Ara Shah Nawaz; Begum Shaista Ikramullah; Mian Iftikhar-ud-Din; Prem Hari Barma; Karamat Ali; Malik Firoz Khan Noon; Maulana Akram Khan; Maulana Shabbir Ahmad Osmani; The Hon'ble Mr. Ghulam Mohammad; S. C. Chattopadhyaya.

FUNCTIONS

A Board of Experts set up by the Basic Principles Committee will recommend the basic principles of Islamic political ideology to be incorporated into the Constitution in order to fulfil the purpose of the directives laid down in the Objectives Resolution. The task of this Board would be of a technical nature. It will, therefore, consist of well-known scholars who are reputed for their knowledge of Islamic History, Jurisprudence and polity.

The Federal Constitution Committee will deal with the question of the type of federation to be set up, the number of units and distribution of powers, etc. This Committee will in the first instance make recommendations on the general features of the Federal Constitution, as for example, the composition of the Legislature, powers and functions of the two Houses, if it happens to be bicameral, and the extent to which the principles of the separation of powers between the Executive, Legislature and Judiciary is to apply.

The question of the Head of the State, his functions and powers also falls within the scope of this Committee.

The Franchise Committee will deal with the question of the electorates, constituencies and the method of election, both to the Central as well as Provincial Legislatures.

The Judiciary Committee will examine the entire organisation of the Judiciary and make recommendations with regard to the composition, powers and functions of all the Courts, and will suggest what provisions should be incorporated into the constitution in order to secure the independence of the Judiciary as laid down in the Objectives Resolution.

GOVERNMENT OF PAKISTAN PERSONNEL

GOVERNOR-GENERAL

His Excellency Khwaja Nazimuddin.

PERSONAL STAFF

Private Secretary. S. M. Yusuf.
Assistant Private Secretary. Farrukh Amin.
Personal Secretary. Syed Sajid Ali.
Military Secretary. Col. G. Knowles.
Assistant Secretary. Khan Saheb Shamsuddin Ahmed.
Comptroller. A. Beck.
Aide-de-Camp. Lt. S. Mazhar Ahmed, R.P.N.
Aide-de-Camp. Captain N. A. Hussain.
Aide-de-Camp. F. Lt. Imtiaz Khan, R.P.A.F.
Honorary Personal Physician. Lt.-Col. M. H. Shah, M.B.B.S. (P.B.), M.R.C.P. (Lond.), M.R.C.S. (Eng.), D.M.P. (Eng.).

EAST BENGAL PROVINCE

EAST Bengal, as a province of the Dominion of Pakistan, was constituted under the Indian Independence Act, 1947. It comprises the eastern territories of the partitioned province of Bengal and the former Assamese district of Sylhet, with the exception of certain thanas in the Karimganj sub-division. The area of East Bengal is 54,091 sq. miles, and the total population 41,949,710. Out of this 29,481,099 are Muslims, 11,736,926 are Hindus, 56,882 are Christians and 1,197 Sikhs. The density of the population is 775.

H. E. Sir Frederick Bourne
GOVERNOR

The capital of the Province is Dacca and its chief port Chittagong. The language spoken is Bengali.

The principal crops are rice and jute. The province is rich in raw material but industries are not developed.

The districts included in the province of East Bengal are as follows:—

(1) Dacca Division: the districts of Dacca, Mymensingh, Faridpur and Bakarganj; (2) Chittagong Division: the districts of Chittagong, Tipperah, Noakhali, Chittagong Hill Tracts and Sylhet; (3) Rajshahi Division: the districts of Rajshahi, Dinajpur, Rangpur, Bogra, Pabna, Kushtia, Jessore and Khulna

The districts with their sub-divisions are as follows:—

Rajshahi (Sadar, Noagang, Natore and Nawabganj); Dinajpur (Sadar and Tankarganj); Rangpur (Sadar, Kurigram, Gaibanda and Nilphamari); Bogra (Sadar), Pabna (Sadar and Sirajganj); Kushtia (Sadar, Chundama and Mohorpur); Jessore (Sadar, Jhendiha, Magura and Narail); Khulna (Sadar, Sakhlra and Bagerhat); Chittagong (Sadar, Cox's Bazar); Tipperah (Sadar, Brahmanbaria and Chandpur); Noakhali (Sadar and Feni); Chittagong Hill Tracts (Rangamati, Bamgarh and Bandarban); Sylhet (North Sylhet, South Sylhet, Habiganj and Sunamganj); Dacca (Sadar, Manikganj, Narayanganj and Munshiganj); Mymensingh (Sadar, Tangail, Netrokona, Kishoreganj and Jamalpur); Faridpur (Sadar, Goalundo, Madaripur and Gopalganj); Bakarganj (Sadar, Patuakhali, Bhola and Pirojpur).

East Bengal is deficit in cereals. The normal annual production of cereals (excluding seed requirements) is 6.41 million tons and consumption, at 14.3 oz. per diem per capita, 6.57 million tons. The province is subject to frequent floods which damage the crops and increase the

deficit. Since the establishment of Pakistan the deficit is being made good mainly by imports by sea from Western Pakistan. In order to procure and hold a large stock of rice which can be distributed equitably and at moderate prices, the provincial Government are trying this year, in addition to optional sale, an experiment of compulsory levy under which people owning 10 acres or more of rice growing land will be asked to surrender to Government 75% of their surplus produce after meeting their requirements for food, seed and wages and rent in kind. East Bengal is also deficit in some other essential commodities, such as edible oils, sugar and textiles. Its 4 sugar factories produce annually 25,000 tons of sugar which is about half of its requirements. Its 1 textile mills produce about 250,000 bales of cloth annually while it requires about 250,000 bales.

A few more figures about the Province may be of interest. The number of district Boards is 15; of Local Boards, 4; of Union Boards, 3,520; of Municipalities, 50; of hospitals, 402; of beds in hospitals, 7,255; of dispensaries, 1,156; of Municipal water works, 26 and of tube wells in rural areas, 50,000.

1948-49 REVIEW

While the year 1947-48 in East Bengal was spent mainly in bringing order out of complete dislocation in every sphere of administration the year 1948-49 saw the implementation of some of the nation-building schemes aimed at making a backward province more advanced educationally, commercially and industrially. The last 24 months have been spent mostly in drawing up plans, holding surveys, collecting data and statistics and similar other preliminary activities.

FOOD

Although 80 per cent of the total area of East Bengal is under cultivation, the province is already mentioned a deficit area so far as food is concerned. This is due to the fact that the yield per acre is very small. As against 71 mds. per acre in Spain, 34 mds. in Egypt, 42 mds. in Japan, only 12½ mds. is the average yield per acre in East Bengal. This poor productivity has engaged the serious attention of the Government who are taking measures to effect greater yield, thus bringing about a permanent solution of the food problem of the province. In this connection, 15 schemes involving a total expenditure of Rs. 24,20,000 are already in operation. About 2,18,000 acres of land have come under these schemes and an additional yield of about 20,00,000 tons of food products is expected. Another 15 crops scheme—extending over five years—has been prepared by the Provincial Government and has now been submitted to the Centre. The Provincial Government expect to get the necessary funds for the 5-year plan from the Government of Pakistan as loan.

LAND REFORMS

The tillers of the soil in East Pakistan constituting about 95 per cent of the total population can look forward to the amelioration of their condition as a result of the various agrarian reforms and enactments undertaken by the Provincial Government. Some of the Acts have already been passed by the Provincial Legislative Assembly while the most important piece of legislation viz., the State Acquisition Bill, envisaging the abolition of the Zamindari system, is also expected to be passed shortly.

To regulate the rights and liabilities of the tenants of the non-agricultural land, viz., their landlords—another important legislative measure—the East Bengal Non-agricultural Tenancy Bill, 1949, popularly known as Chaudhina Satva Bill was passed by the Assembly. The incidents of non-agricultural tenancies had

so far been governed by the terms of contracts and the provisions of the transfer of property Act, 1882. But as the provisions of that Act did not provide for adequate protection to the lessees, the *Chaudhina* Bill was necessary. The Chaudhina Bill seeks to give to the non-agricultural tenants, possessing non-agricultural lands for a period of twelve years or more, permanent heritable and transferable rights in such lands. Provisions have also been made in the Bill for protecting all non-agricultural tenants against illegal exactions and arbitrary eviction and enhancement of rents.

According to the Inter-Dominion agreement a Bill for the protection and management of Evacuee property in this province has also been passed.

HEALTH

The rural population has claimed the special attention of the Government. An elaborate health scheme for them has been drawn up and when it is fully implemented, East Bengal will have a thoroughly organised rural health service bringing medical aid within easy reach of the villagers in the remotest corner of the province.

Under the scheme already in process of implementation by the Provincial Public Health and Medical Department there will be a well-equipped dispensary for every two unions and the existing thana dispensaries. These will be provided with four beds each for the treatment of emergency cases and will be under the management of the District Boards.

Under the scheme, 300 health centres and 414 thana dispensaries will be functioning under the direct supervision and control of the Government, within a period of 5 years. All the Salar and Sub-division hospitals, hitherto controlled by public bodies, have already been provincialised and attempts are now being made to bring these upto a standard level.

In continuation of the anti-malaria campaign launched in 1948, the authorities are now taking vigorous measures in this direction with the assistance of malarial experts of the World Health Organisation. Two health experts of the W.H.O. who very successfully conducted a similar campaign in Italy are now in East Bengal and are making field experiments in one of the malaria centres in the district of Mymensingh. East Bengal Government have sanctioned Rs. 75,000/- in the first instance, in this connection. Arrangements are being made by the health authorities to carry on such experiments in several other selected centres simultaneously. Anti-malarial drugs worth Rs. 1,50,000/- have been distributed throughout the province through the Rural Health Staff during the year.

The East Bengal Anti-Tuberculosis Association was formed with H.E. the Governor as patron and the Provincial Health Minister as President. Twelve 20-bed T.I. segregation clinics are now functioning in the districts. While the construction of a 52-bed T.B. ward in the premises of the Mitford Hospital has been sanctioned, the question of establishing a permanent T.B. Hospital near Dacca, as a long term measure is being seriously considered. One medical officer has been sent to Copenhagen for specialised training in the treatment of T.B.

A society for the prevention of Blindness in East Bengal has been formed recently. The Provincial Government have sanctioned a capital grant of Rs. 16,000/- for the purchase of an ambulance which will be used as an Eye Mobile Dispensary. A Blind Relief Camp opened shortly in the premises of the Medical College, Dacca, is capable of affording relief to 500 patients per month. Under the supervision of Dr. T. Ahmad, the renowned eye specialist who is the Principal of the Medical College, the camp is rendering great service to the public.

EDUCATION

For overhauling the present system of education, in conformity with Islamic ideology, East Bengal Government's Education Department has set up a high power committee known as the "East Bengal Educational System—Reconstruction Committee". The Committee has been asked to go into the question of how the system of education can be reconstructed. While these arrangements are in progress, the usual form of teaching is continued to avoid any dislocation in the sphere of education. Separate arrangements for suitable education of the minority communities are also being made. Along with various other reports, the 'Reconstruction Committee' has been asked to suggest if any change is necessary in the present form of female education.

The task of standardising the Bengali language through which education is to be imparted in the province has been entrusted to another High Power Committee known as the "East Bengal Language Committee".

While various schemes for the improvement of Dacca University, involving heavy financial commitments are under consideration, a committee appointed by the Government of East Bengal has been asked to enquire into and report about the financial condition of the University.

The Eden Intermediate College for girls, the Dacca Intermediate College and the Jagannath College have been merged into first grade colleges. A Primary Teachers Training College, started at Mymensingh in 1948, has been functioning smoothly.

By promulgating the East Bengal Educational Ordinance, Government have transferred the management and control of the Old Madrasahs from the Dacca University to a Madrasah Examination Board formed on the lines of the Central Madrasah Examination Board of undivided Bengal. The syllabus of the Old Madrasah has been provisionally determined according to the recommendations of the Madrasah Syllabus Committee of undivided Bengal.

An "Institution of Fine Arts" has also been established at Dacca.

While there are already 33 Government Secondary Schools and 1,260 non-government Secondary Schools, a new High School has been started at Sylhet this year. The Eden High Schools for girls which was so long housed in the premises of the Eden Intermediate College has been amalgamated with the Qumrunisa Girls High School. Arrangement for imparting education through the medium of Urdu in all the classes of the Khulna and Jessore Zilla Schools and the Qumrunisa Girls School at Dacca, is being made. Government sanction for opening such classes has already been accorded.

The Government of East Bengal have assumed control over the finances of the East Bengal Secondary Education Board, while a Bill for controlling and regulating the secondary education in the province is under the consideration of the Government.

Free primary Education has been continued in 14 districts of the province while compulsory Free Primary Education has been introduced in two thanas of the Chittagong District.

The Alsanullah Engineering School which has since partition been converted into a first-grade Engineering College with arrangement for teaching both Degree and Diploma Courses is functioning properly. Equipment of the latest model for the Engineering College is being imported from overseas.

On the Commercial Education side, B.Com. classes have been opened this year in the Jagannath Intermediate College, while arrangements for imparting such education in the Dacca University, the Chittagong Commercial College and the Dacca Intermediate College continue. Facilities for teaching commerce have been provided in M.C. College, Sylhet this year.

HOUSING

The most pressing need in the capital of East Pakistan is the expansion of accommodation—residential, office, commercial and for industries, schools, colleges, hostels and a number of other institutions. Engineers are now busy with the construction of permanent and semi-permanent buildings for the purpose.

Forty-two three-storied buildings are being erected at a cost of about Rs. 67 lakhs containing 504 flats—456 two-room and 48 three-room. It is expected that work will soon commence on another 42 similar 3-storied buildings. Temporary hostels for 500 University students and semi-permanent sheds to house nurses and medical students have already been constructed. Besides, extensive additions and alterations have been made to the Medical College Building. Construction of a Central Medical Store at Tejgon at an estimated cost of Rs. 4 lakhs is in progress.

One of the buildings of the University Hall, the Jagannath Hall which after make-shift arrangements was made to serve as the Legislative Assembly Hall has now been thoroughly renovated.

Similar construction work has been taken up at Chittagong, Khulna and other outlying stations. Nissen huts have been erected at Chittagong while temporary quarters for clerks at Kushtia and 15 additional food storagewards for the Civil Supplies Department are under construction.

Among projects ready for immediate execution are quarters for officers and staff of the State Bank of Pakistan, headquarters for officers and staff at Majilj where the headquarters of Naokhali district have recently been shifted, construction of a second storey over the Mitford Hospital at Dacca for opening a Tuberculosis patients ward and 25 quarters for members of the University teaching staff.

ROADS

Sixteen roads covering 300 miles are already stated are under construction. Of these the most important are the 50 miles long Mymensingh-Tugueal road, the 33 miles Chittagong-Rangamati road, the 20 miles Mymensingh-Hatua road, the 23 miles Chaudhanga-Jhenidah road, the 18 miles Sathkira-Ellispur road and the 18 miles Meherpur-Chaudhanga road. With a view to starting work on more projects as soon as those in hand are completed, a survey of 28 projects involving about 550 miles of roads is proceeding at present. While work on the immediate needs of the province to improve its neglected road communication system is being pursued, a comprehensive five-year road plan has been prepared for the systematic development of national and provincial highways as well as district and village roads. The scheme envisages construction of 5,000 miles of roads at an estimated cost of more than 35 crores of rupees.

JUTE

The Government of East Bengal formulated their policy about the production and export of jute in such a way as to maintain the supply of the commodity throughout the world and to create circumstances under which the growers can receive a fair price for their produce.

About 75 per cent of the entire world production of jute, and indeed cent per cent of the best quality of it, is grown in East Bengal. The normal annual consumption of jute overseas is about 3,000,000 (three million) pressed bales of 400 lbs. each. The output of pressed bales from East Bengal increased from 9,04,674 during the year 1947-48 to 11,35,823 this year.

In order to enable the growers to sell their crop with a full knowledge of the prevailing market rates in Calcutta as well as the baling

centres in this province, Government made elaborate arrangements for disseminating quotations of prices of different grades of jute through the 54 jute grading parties and other agencies throughout the province. To further safeguard their interests against all sorts of prevalent malpractices a sub-committee has been formed and entrusted with the task of devising ways and means for fixing definite standards of the different grades of jute, weights used by the buyers while purchasing it, etc. For regulating and controlling the jute prices and for standardising the baling capacity of presses two other sub-committees have been formed, while steps have been taken to acquaint the growers with the art of assortment of jute in different grades.

To minimise the chances of exploitation of the growers by the purchasing parties, the East Bengal Jute Dealers Registration Ordinance, 1948, under which all categories of dealers are to be registered and licensed, has been promulgated while a monthly bulletin giving a summary of jute statistics comprising all possible data relating to the condition of jute markets both inside this province as well as abroad is regularly published. The utility of this bulletin having been recognised both in U.K. and the U.S.A., many foreigners have become regular subscribers.

To give a lead to private enterprise, which is shy at present, Government are trying to set up two jute mills.

For popularising cottage industries in jute such as carpets, cushions, sacks, etc., a Jute Weaving Demonstration Party has been stationed at Narayananganj.

INDUSTRIAL DEVELOPMENT

Only 12 per cent of the industrial establishments that were in existence in undivided Bengal fell to the share of East Bengal, where there were, only 7,600 industrial workers on August 14, 1947. Ever since the advent of the British whatever industries developed in Bengal were located in and around Calcutta, the districts comprising the new Province of East Bengal being a mere hinter land supplying raw materials for those industries. The task of development of industries in a Province primarily agricultural is therefore, a very difficult one, requiring well drawn up plans, crossing of many initial hurdles and, above all, time. The Government of East and Pakistan have taken up the question of industrialisation in right earnest. The past two years have been spent mainly in collecting the requisite data and statistics, holding site surveys, and preparing plans some of which have been finalised.

While plans are being drawn up for the establishment of various industries, like paper, jute, leather, sugar, etc., which will be set up more or less in a large scale, Government have already chalked out plans for the revival and rehabilitation of cottage industries like shell and horns' button industries, conch industry, hand-loom industry, etc. It may be mentioned here that cloth produced by hand-loom has been selling at a proportionately cheap rate in the market and there is a great demand for it specially in the rural areas.

AID TO INDUSTRY

To render all possible assistance to private enterprise in developing industry, Commerce and Trade, the Provincial Government amended the State-Aid to Industries Act this year and are making arrangements for giving loans and grants to bona fide industrialists. Sufficient funds have been sanctioned for the purpose.

The Soap Industry of East Bengal which has had a century old reputation and extensive market, experienced great difficulties during

the period of control. It has now been thoroughly rehabilitated with a steady supply of caustic soda and soda ash. All the factories of East Bengal are now normally functioning with Government assistance.

Help is being given to industrialists in the procurement of machinery and raw materials in transport and in the acquisition of land.

A number of schemes relating to the establishment of a Ceramic, a Tanning and a Textile Institute have been finalised and arrangements for imparting Vocational as well as other Technical Education have been made. Some of these schemes are already in execution.

A Tanning Institute is now under construction at Hazaribagh, Nawabganj, and Dacca. Pending establishment of the Laboratory of this Institute, arrangements have been made with the Dacca University to conduct Research in Tanning questions. A Textile Institute has been provisionally started at the Dacca Government Weaving School, Narinda. A site has also been selected at Narayanganj for opening a full-fledged institute, the construction of which will start shortly.

ADMINISTRATION

GOVERNOR

His Excellency Sir Frederick Chalmers Bourne, K.C.S.I., C.I.E., I.C.S. (Retd.).

MINISTRY

Prime Minister-in-Charge of (1) Prime Minister's Department, Planning Department, Prime Minister's Secretariat and Cabinet Secretariat, (2) Home Department excluding the Jails Branch, (3) Judicial and Legislative Department and (4) Public Relations Department, The Hon'ble Mr. Nurul Amin.

Minister-in-Charge of the Department of Civil Supplies, The Hon'ble Mr. Syed Muhammad Afzal.

Minister-in-Charge of Finance Branch of the Finance and Revenue Department and Commerce and Industries Branches of the Department of Commerce, Labour and Industries, The Hon'ble Mr. Hamidul Huq Chowdhury.

Minister-in-Charge of Education Branch of the Department of Education and Registration, The Hon'ble Mr. Abdul Hamid.

Minister-in-Charge of Department of Communications, Buildings and Irrigation, The Hon'ble Mr. Hassan Ali.

Minister-in-Charge of Agriculture and Co-operation Branches of the Department of Agriculture, Co-operation and Relief and Labour Branch of the Department of Commerce, Labour and Industries, The Hon'ble Mr. Abdul Metaleb Malik.

Minister-in-Charge of Department of Health and Local Self-Government, The Hon'ble Mr. Muhammad Habibullah Chowdhury.

Minister-in-Charge of Relief and Rehabilitation Branches of the Department of Agriculture, Co-operation and Relief, Registration Branch of the Department of Education and Registration and Jails Branch of the Home Department, The Hon'ble Mr. Mahbuddin Ahmed.

Minister-in-Charge of the Revenue Branch of the Finance and Revenue Department, The Hon'ble Mr. Tafazzal Ali.

THE GOVERNOR'S PERSONAL STAFF

*Private Secretary, J. S. Treanor.
Military Secretary, Major W. J. B. Purcell.
Aides-de-Camp, Captain, Dost Muhammad Khan and Lt. Montez, R. P. N.*

HOME DEPARTMENT

*Chief Secretary, Aziz Ahmed, O.B.E., P.A.S.
Secretary, M. Azhar, O.B.E., P.A.S.
Secretary and Provincial Transport Commissioner, W. A. S. Lewis, P.A.S.*

Deputy Secretaries, D. Khalid Power, P.A.S.; Khan Bahadur A. Ali; W. B. Kadri, P.A.S.; J. S. Treanor, P.A.S.

*Deputy Provincial Transport Commissioner, Captain M. A. Vazir, M.A., M.Sc.
Assistant Secretaries, Maulvi Md. Wazir Rahman, A. Q. Ansari, Maulvi Abdul Bari Khan, Maulvi Shamsher Ali Khan.*

*Assistant Provincial Transport Commissioner and Asstt. Secy., MVI. Md. Tafazzal Hussain (Ex-Officio).
Registrar, Maulvi Md. Fazlul Bari.*

HEALTH AND LOCAL SELF-GOVT. DEPARTMENT

*Secretary, A. H. Quraishi.
Deputy Secretary, Maulvi Muhammad Abdul Kasem.
Asstt. Secretaries, Maulvi Serajud-Doula Khan; Maulvi Muhammad Korban Ali.
Registrar, Abdur Rahman Khan.*

CIVIL SUPPLY DEPARTMENT

*Jt. Secretary and Director-General, A. A. Shah.
Dy. Secretaries, Khan Bahadur K. A. Taib; K. S. Islam.
Asstt. Secys., S. H. Ali and Mouli Yusuf.
Registrar, Maulvi, M. A. Matin.*

JUDICIAL AND LEGISLATIVE DEPARTMENT

*Secy., Judicial and Legislative and Suppl. and Remembrancer of Legal Affairs, M. A. Isplahi.
Dy. Legal Remembrancer, S. Afzal.
Deputy Secretary, Legislative Department, Mujibar Rahman Khan.
Asst. Secy., Maulvi Amnul Islam Khan.
Joint Asstt., Syed Ahsan Ali.*

AGRICULTURE, CO-OPERATION AND RELIEF DEPARTMENT

*Joint Secretary, Khan Bahadur M. A. Majid.
Director of Relief and Rehabilitation and Joint Secretary (Relief), Maulvi Mizanur Rahman.
Deputy Secretaries, Khan Bahadur F. Rahman, Khan Sahib Maulvi A. K. Razul Karim.
Assistant Secretaries, Maulvi M. Abed, MVI, Mazharul Karim, MVI, Shafiqur Rahman.
Registrar, Maulvi Md. Ahmed.*

EDUCATION AND REGISTRATION DEPARTMENT

*Secretary, F. A. Karim.
Asstt. Secy., Khan Sahib Md. Fazlul Haque.*

COMMUNICATIONS, BUILDINGS AND IRRIGATION DEPARTMENT

*Secretary, Khan Bahadur Saiyid Farrok Meerza.
Dy. Secys., Khan Bahadur A. W. Syeduddin Khan and Khan Sahib Muhammad Abdul Jalil.
Assistant Secretaries, Maulvi Mogenuddin Khan, Khan Sahib Md. Abdul Hanz.*

FINANCE DEPARTMENT

*Secretary, M. H. Ali.
Dy. Secretaries, Khan Sahib Muhammad Nahi, Khan Sahib Khalid Ahmed.
Asstt. Secretaries, Maulvi Gulam Ali, Maulvi Wazid Ali Sarkar, Maulvi Khan Sahib A. Hafiz and Maulvi A. F. M. Yusuf.*

REVENUE DEPARTMENT

*Deputy Secretaries, Khan Bahadur Mahbubuddin Ahmed, Khan Sahib Md. Razuddin Ali.
Asstt. Secretary, Maulvi Md. Harun Mallick.*

COMMERCE, LABOUR AND INDUSTRIES DEPARTMENT

*Secy., Nasir Ahmed.
Deputy Secretary, D. S. Ite.
Asstt. Secretaries, Abdul Khair, Maulvi Shahuddin Muhammad.*

PLANNING DEPARTMENT

Joint Secretary, Khan Bahadur M. A. Majid.

MISCELLANEOUS APPOINTMENTS

*Inspector-General of Police, Zakir Hussain.
Surgeon-General, Lt.-Col. E. G. Montgomery.
Accountant-General, Syed Hasan.
Inspector-General of Prisons, Vacant.
Inspector-General of Registration, Khan Bahadur Maulvi M. S. Khan.
Director of Agriculture, A. M. Mustafa.
Director of Industries, Maulvi M. A. Azam.
Director of Fisheries, Maulvi Q. M. Rahman.
Chairman, Public Service Commission, A. J. Doshi.
Secretary, P.S.C., Khan Bahadur Rahman.
Director of Animal Husbandry, S. M. Ali.
Member, Board of Revenue, K. B. Md. Mahmud.
Asstt. Secy. to H.P.M., Habibul Huq.
Commissioners of Divisions, M. M. Stuart (Dacca Div.), N. M. Khan (Chittagong Div.), T. J. M. N. Chowdhury (Rajshahi Div.).
Chief Inspector of Primary Education, Khan Bahadur Abdul Hakim.
Director of Public Instruction, Dr. M. Qudrat-I-Khuda.
Exercise and Tazation Commr., K. B. Afazuddin.
Director of Supply and Distribution, K. B. Md. Mahtabuddin Sarkar.
Provincial Rationing Authority, W. A. S. Lewis.
Conservator of Forests, Y. S. Ahmed.
Registrar, Co-operative Societies, Khan Bahadur Chowdhury Asfar Ali.
Special Relief Officer, Mahtabuddin Ahmed.
Labour Commissioner and Chief Inspector, Shops and Establishments, S. A. E. B. Murschedi.
Electrical Adviser and Chief Electric Inspector Yusuf Ali.
Registrar of Jt. Stock Companies, B. Huq.
Special Officer, Paper Control, N. H. Khandker.
Special Officer, Jute Price Control, K. Ahmed.
Director of Public Health, Lt.-Col. F. M. Khan.
Chief Engineer, Public Health, A. Latif.
Director-General of Procurement, S. B. Hatch Burwell.
Director of Textiles, Khan Bahadur Hafizur Rahman.
Director of Movements, A. W. Khan.
Orphanage Officer, Mir Khalilur Rahman.
Director of Publications and Ex-Officio Jt. Secretary, K. M. Ahmed.
Secretary, Board of Revenue, Maulvi Md. Ershad.
Deputy, Post Master-General, Abdul Hamid Khan.
Director of Agriculture (Administration), K. B. S. Abdullah.
Chief Engineer (Communication and Buildings), Khan Bahadur Md. Solaiman.
Chief Engineer, Irrigation, Major Andrews Phinlay.
Director of Agriculture (Research), S. Hedyet Ullah.
Superintendent, Transport operations, Captain A. W. Thurlby.
Superintendent, Road Transport Maintenance, J. B. Chaghtal.
Engineer and Ship Surveyor and Engineer Superintendent Government Dockyard, M. I. Kidwai.
Financial Adviser, Civil Supplies Department, K. A. Mohin.
Director of Publicity and Joint Secretary to the Government of East Bengal, Mahmud Hussain.
Assistant Directors of Publicity, Anwar Hussain, M.A., M. Maswood, S. A. Wafa.
Chief Rural Publicity Officer, Maulvi Qazi Din Mahammad.
Song Publicity Organiser, Jasinuddin.
Additional Song Publicity Organiser, Abbasuddin Ahmed.
President, Secondary Education Board, Ibrahim Khan.
Secretary, Secondary Education Board, Osman Gani.
Controller, Secondary Education Board, Ali Noor.
Official Receiver, High Court, Dacca and Administrator-General and Official Trustee, M. S. Zolna.
Director of Land Records and Surveys, Khan Bahadur S. A. Majid.*

NORTH-WEST FRONTIER PROVINCE

THE North-West Frontier Province of Pakistan is an irregular strip of country lying north by east and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hindu Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the south of the Province from Baluchistan.

H. E. Lt.-Col. Mohammad Khurshid
GOVERNOR.

The greatest length of the Province is 408 miles, its greatest breadth 279 miles and its total area about 39,276 square miles. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills containing the Districts of Peshawar, Mardan, Kohat, Jammu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the five districts in the second division contain 14,200 square miles.

The mountain regions, north and west, are occupied by tribes subject only to the political control of the Governor in his capacity as Agent to the Governor-General. The area of this tract is roughly 24,988 square miles and in it are situated, from north to south, the political agencies severally known as the Malakand, Khyber, Kurram, North Waziristan and South Waziristan Agencies.

Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans-border territory are internally administered by the Political Agents, but the bulk of the trans-border population is free from any internal interference, so long as offences are not committed and the tribes observe the conditions on which allowances are paid to many of them.

The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistan in 1919 and the protracted punitive operations against the Waziris and Mahsuds in 1919-1920. These resulted in the establishment at Razmak, a position dominating the Mahsud Waziri country,

of a permanent garrison of 10,000 troops drawn mostly from stations lying in the plains immediately below the hills. A circular road from Bannu, through Razmak to Sararogha, Jandota and back to the Derajat provided communications and transport with this force and facilitated its mobility. The effect of this measure was a marked improvement in the internal peace of the Tribal area.

The separation of the Frontier Province from the Punjab aimed at achieving the double object of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the establishment of improved relations between the local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headquarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department.

In April 1932 the Province was constituted a Governor's Province. In political questions there is no intermediary between the Governor and the local officer; an arrangement designed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is selected.

The advisability of re-uniting the Province with the Punjab was much discussed in certain Indian political circles and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and non-officials to investigate it. The Committee, presided over by D. de S. Bray, the then Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous witnesses. Its members were Messrs. Raza Ali, H. Rangachari, Chandrasekhar Shalabhadra, N. M. Sanarath and K. B. Abdul Rahim Khan, then members of the Legislative Assembly, H. N. Bolton, I.C.S. (Foreign Dept.) and A. H. Parker, I.C.S. (Punjab). The inquiry developed practically into a contest between Muslims and Hindus on communal lines. The Hindus, allied in sympathy with their co-religionists in the Punjab, demanded the reunion of the administered districts of the Province with the Punjab or, if that was not attainable then the placing of the judicial administration of the Province under the Punjab High Court at Lahore. The Muslims on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the border.

The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for—

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India;

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister;

Appointment of a second Judicial Commissioner which was later sanctioned and reform of the judicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

"If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving, we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her."

Under the Government of India Act of 1935, N.W.F.P. became a full-fledged Governor's Province; and on the division of the sub-continent into India and Pakistan the people of the Frontier Province in a referendum voted for joining the latter and so the Province became part of Pakistan.

THE PEOPLE

The total population of the N.W.F.P. (1941 census) 5,415,969, made up as follows:—

| | |
|-----------------------|-----------|
| Hazara | 796,230 |
| Trans-Indus Districts | 2,241,837 |
| Trans-Border Area | 2,377,599 |

This last figure also includes estimated population for these parts of the Agencies and district tribal territory where no census was taken. Peshawar, the Capital, had in 1941 a population of 173,420.

There are only 632.3 females per 1,000 males in the towns and 887.6 females per 1,000 males in rural areas. This disproportion of the sexes cannot at present be explained in the N.W.F.P. The discrepancy is greater here than in any other Province. Both the birth and death-rates of the Province are abnormally low. The birth-rate in the administered districts, according to the last available official reports (1945) is 16.74 and the death-rate 11.14.

The dominant language of the Province is Pushtu and the population contains several linguistic strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Rajput and other tribal divisions. The Muslim tribes constitute almost the whole population and before partition Hindus amounted to only 5 per cent of the total and Sikhs to a few thousands. This percentage has further decreased owing to the migration of Hindus and Sikhs to the Indian Union since the establishment of Pakistan. The occupational cleavage of the population confuses ethnical divisions.

Under the Muslim Personal Law (Shariat Act) Application Act VI of 1935 Shariat or Muslim Law governs all questions regarding succession, special property of females, betrothal, marriage, divorce, dower, guardianship, minority, bastardy, family relations, wills, legacies, gifts or any religious usage or institution including Waqf (trust and trust property) in cases, where the parties are Muslims, except in so far as such Law has been altered or abolished by legislative enactment or is opposed to the provisions of the North-West Frontier Province Law and Justice Regulation, 1901.

In cases where the parties are Hindus the rule of decision applicable in such matters is usually custom or in the absence of custom the Hindu Law (see Section 27 of the North-West Frontier Province Law and Justice Regulation, 1901). The total number of civil suits instituted was 11,996 and the total number of offences reported was 56,489 in 1946.

The climatic conditions of the N.-W.F.P., which is mainly a mountainous region, but includes the Peshawar Valley and the river in tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the sub-continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The air is generally dry and hence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the south-west monsoon, when moisture is brought up from the Arabian Sea and the Bay of Bengal; the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely.

TRADE AND OCCUPATION

The population derives its subsistence almost wholly from agriculture. Wheat covered 972,247 acres of land in 1946-47 of which the area under irrigation was 379,560 acres. The total area of the province under maize was 459,774 acres, and the total area under sugarcane 112,078 acres. The Province is practically without manufactures. There is no considerable surplus of commercial products for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade route which connects the trans-border tribal territories and the marts of Afghanistan and Central Asia with Pakistan and India, but the influence of railways is diminishing the importance of these trading interests. The new roads in Waziristan are already largely utilised by the tribal inhabitants for motor traffic. Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poor means of communication, have to some extent been deprived of access to outside markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the popularly administered districts as in the Punjab area. The cultivated area of the land amounts to 25 per cent, and unutilised 1.75 per cent.

The work of civilisation made steady progress, both by the improvement of communications and otherwise. Relations with the tribes generally improved, trade advanced, free medical relief was vastly extended, police administration was reformed and the desire of people for education was judiciously and sympathetically fostered. Though in this respect there was complaint against the limitations imposed by financial entanglements. In the popularly administered districts the total percentage of male scholars to the total male population is 7.2 and that of female scholars to the total female population is 1.7 for the year 1946-47. 25 per cent males and 7 per cent females of the total population are returned as literates. The figures for males denote a very narrow diffusion of education even for an Eastern country. Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13.9 per cent are returned as literate. Most of these women have now left the province. The inauguration of a system as light railways throughout the Province, apart from all considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, and the lesser work of the Peshawar canal, completed some years ago, are bringing ease and prosperity to a number of peasant homes.

The number of hospitals and dispensaries in 1946 was 190 and the total expenditure Rs. 14,50,976. The total number of doctors was under 1,300; 2 officers 6; W.M.S. officers 3; I.M.D. officers 1; Assistant Surgeons 32 and sub-assistant Surgeons 101.

ADMINISTRATION

The administration of the North-West Frontier Province is conducted by H. E. the Governor and Agent to the Governor-General with the Council of three ministers as follows:—

- (1) Hon'ble Abdul Qayyum Khan (Chief Minister).
- (2) Hon'ble Mian Jaffer Shah (Education, Revenue & Civil Supplies).
- (3) Hon'ble Mohammad Farid Khan (Health & Local Self Govt.).
- (1) Officers of the Pakistan Political Service.
- (2) Officers of the Pakistan Civil Service.
- (3) Members of the Provincial Executive and Judicial Service.
- (4) Members of the Subordinate Civil Services.
- (5) Superintendents and Assistant Superintendents of Police.
- (6) Officers recruited for the service of departments requiring special knowledge—Military, Engineering, Education, Medicine and Forestry.

The cadre posts reserved for officers coming under the 1st and 2nd heads above are:—

| | | |
|--|---|----|
| Administration .. | Chief Secretary, Revenue and Development Commr. | 1 |
| | Secretary, Development Departments. | |
| | Home Secretary. | 6 |
| | Dy. Commissioners. | |
| | Political Agents .. 5 | 11 |
| | Asst. Commissioners and Asst. Political Agents | |
| | The Judges. | 8 |
| | The Hon'ble Judicial Commissioner's Court. | |
| | Three District and Session Judges. | |
| | Two Additional District and Sessions Judges. | |
| | One Senior Sub-Judge, Peshawar. | |
| Hon'ble the Judicial Commissioner's Court & District Judges. | | |

The districts under the Deputy Commissioners are divided into two to three sub-collectorates in charge of tahsildars, who are invested with criminal and revenue powers, and are assisted by naib-tahsildars, who exercise similar powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some other parts of the sub-continent is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancestry, real or imaginary.

Modern municipal local government has been introduced into the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools. The Province forms a single educational circle and only possesses two forest divisions, that of Hazara and of Kohat. The P.W.D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D., who is also *ex-officio* Secretary to H.E. the Governor. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the Government. The revenue administration of all the six administered districts is controlled by the Revenue and Development Commissioner. For the administration of civil and criminal justice there are three Civil and Sessions Judges and two

additional District and Sessions Judges and several Magistrates and Sub-Judges. The court of the Judicial Commissioner which consists of the Judicial Commissioner and another Judge is the controlling authority in the Judicial branch of the administration and is also the highest criminal and civil tribunal in this Province.

EDUCATION

Among the various nation-building schemes of the Province, education has very rightly received prior attention of the Government, provision for this head having been enhanced by as large a sum as ten lakhs.

The outstanding feature of the Province's educational scheme has been the formulation of a 3-year educational expansion programme which provides for the establishment of 3 high, 6 middle, 6 lower middle and 60 primary schools for boys and 4 middle, 12 lower middle and 30 primary schools for girls. It also makes provision for a degree college for women with science and medical courses.

The Government also initiated a scheme for opening new primary, middle and high schools in tribal areas, not neglecting at the same time, the education of refugee children, who were given priority and afforded full facilities for free education throughout the Province.

Female and adult education also received particular attention of the Government; the number of institutions during the year being 8 high, 9 anglo-vernacular middle, a vernacular middle, and 136 primary schools in the first category. Altogether 76 adult education centres are functioning in the Province.

Another noteworthy feature was the introduction of compulsory religious education in schools.

INDUSTRIAL DEVELOPMENT

With its vast resources, the North-West Frontier Province could make rapid progress in industrialization.

While coal prospecting in the Province has been successfully carried out, with a coal-mine already functioning, sugar production in the Province also promises to be very considerable. One sugar mill is already working and another is being built, with an auxiliary distillery, capable of producing not only a very large tonnage of sugar but also power alcohol out of its molasses.

Soaking of hides has begun at a big tanning factory at Nowshera which is capable of handling one thousand hides and skins per day and a pharmaceutical factory established at Peshawar is manufacturing tinctures, spirits, medicinal syrups, etc.

Since no industrial development is possible without cheap power, the Government have been endeavouring to increase the production of cheap power as far as possible by harnessing the Province's hydro-power resources.

The Governor of N.-W.F.P. inaugurated the extension of the Malakand Hydro-Electric scheme to Wana on May 1, 1949 thereby linking the Frontier Province's power supply to the West Punjab Electricity Grid System which marks the completion of another phase of electrical development in the country.

It is noteworthy that this new transmission line was designed, fabricated and erected by the staff of the N.-W.F.P. Electricity Department and it is claimed to be the first extra high tension line in Pakistan which has been engineered entirely by a single Department.

Two other schemes, one designed to produce 16,000 kW of electricity at Barak, and another ten-acre project at Warak to produce as much as one lakh kW, are well under way. This power, in addition to irrigating more than 45,000 acres of tribal land, will help the development of sugar, cement textile and other industries and the electrification of railways.

AGRICULTURAL DEVELOPMENT

During 1948-49 the North-West Frontier Province made a remarkable contribution towards increasing the agricultural wealth of the nation. The activities of the Agricultural Department of the Province may be divided into various sections, namely, botanical activity under which a new Basmati variety of rice, much superior in quality to the local variety, has been found; and experiments to produce hybrid corn by crossing suitable combinations, as also the work of inbreeding maize varieties are well under way; chemical activity under which some very useful work was carried out and hundreds of samples comprising soils, manures, sugarcane, pulses, drug plants, fruits, etc., were chemically analysed both for the Department and the public; entomological activity, under which valuable work in preventing crops and fruit trees from damage by pests of various kinds was recorded.

In addition to carrying out survey and control of plant diseases, the Department of Agriculture, N.-W.F.P., also produced two very useful sugarcane varieties which are expected to increase the production of sugarcane in the Province.

The question of agricultural development of tribal areas under a planned scheme is receiving the active consideration of the Government.

AGRARIAN REFORMS

Agriculture being the chief occupation in the Province, the Government pursued a bold and progressive agrarian policy, aiming at the elimination of middlemen.

Extensive Government lands in the Dera Ismail Khan District which were on long leases with private individuals were resumed by the Government on the expiry of lease periods and split into holdings of 12½ and 25 acres each. They were partly leased out and partly sold to actual tillers of the soil, both local and refugees.

In order to put an end to the traditional tenant-landlord dispute in the Province, the Provincial Government appointed a Committee to examine the question and make recommendations as to how the occupancy tenants, as a class, can be eliminated either by converting them into full owners of land, or, in some cases, making them non-occupancy tenants. As a result of the labours of this Committee, a Bill entitled the "N.-W.F.P. Tenancy Bill" proposing to extinguish occupancy tenancy completely, was introduced in the last session of the Frontier Assembly, and was in the Select Committee Stage at the time of writing.

Yet another bold measure on the part of the Government was the abolition of the medieval jagirdari system, directing the savings thus accrued for the welfare of the people of the Province. There were 300 jagirs in the N.-W.F.P. costing the Government over Rs. 1,000,000 annually in one form or another. Some of these jagirs were pro-British while others were granted by the Government of undivided India prior to the introduction of provincial autonomy.

The N.-W.F.P. Government has been the pioneer in the matter of doing away with the jagirdari system in the country.

The Government have also inaugurated a scheme of colonisation of tribesmen, specially Mahsuds, on lands on banks of the Indus in Dera Ismail Khan District. The scheme, which involves an area of nearly 10,000 acres, will in addition to help improving the economic condition of the tribesmen, also go a long way towards easing the food problems of the Province. So far an area of 1,872 acres has been allotted for settlement and further area of 5,000 acres is being cleared and will be distributed as soon as it is fit for cultivation.

Owing to favourable food position, it became possible for the Provincial Government during the year to increase the daily quota of food-grains to the normal six Chhattaks per head and also to relax various food control measures and restrictions on the storage. This resulted in levelling up of the foodgrain supplies and prices in the surplus and deficit pockets of the rural

areas thus affording appreciable relief to the poorer sections of the people.

The Government also found it possible to remove restrictions on the export of certain consumer goods to the advantage of the consumers.

LIVESTOCK

As agricultural development without healthy livestock is hardly possible, the Government have in their Animal Husbandry Department a very useful auxiliary to the Agricultural Department. This Department ran 77 veterinary hospitals treating as many as about 4 lakhs of animals of all description and thus saved a great number of the Province's valuable livestock.

The Provincial laboratory produced about 3½ lakhs of doses of various vaccines, with which about two lakhs of animals were inoculated against various contagious diseases, thereby reducing fatalities to livestock to the minimum.

A testimony to the valuable work done by the Province in this respect is provided by the fact that the Central Pakistan Government chose to convert the Provincial Laboratory into the Pakistan Animal Husbandry Institute.

Care of public health received prompt attention of the Medical Department which successfully checked a serious outbreak of cholera in Peshawar and parts of Mardan District and also carried out a vigorous campaign against an equally serious and more widespread outbreak of typhus fever.

Training of doctors and compounders and a scheme for the organisation of Blood Banks, in order to meet the requirements of civil hospitals for blood serum and blood plasma in times of emergency has also been initiated.

PUBLIC WORKS

With a view to increasing production, and thereby diminishing shortage of food from which the North-West Frontier Province generally suffers, several irrigation works of considerable importance in addition to the remodelling of two important aqueducts, were undertaken during the year by the Public Works Department. The irrigation works include, among others, remodelling of Katha Jang Distributary, the Toland Flood Irrigation Scheme and the Kri Sheikhan Irrigation Scheme in the Kohat District, the extension of the Mamakhel Jaidil Canal in the Damm District, the remodelling of the Takarwah Distributary in Dera Ismail Khan District, provision of tube-well irrigation in Qasba Bagram, Peshawar, etc.

Seven new roads have been completed, either wholly or partially, in various Districts of the Province at a total cost of Rs. 13,02,803.

Work is in hand on the priority drinking water schemes in the Southern Districts of the Province. An expenditure of Rs. 57,000 during the current financial year in addition to the expenditure of Rs. 100,000 already provided in the Budget, has been sanctioned for drinking water supply schemes in Bannu District. The expenditure of Rs. 2,82,000 in 1950-51 and 2,11,000 in 1951-52 has also been sanctioned. Similarly, a sum of Rs. 1,50,000 in addition to the Rs. 100,000 already provided in the current Budget has been sanctioned for extending such schemes in the southern half of the Kohat District. An expenditure of Rs. 2,50,000 in 1950-51 and 1,59,000 in 1951-52 has also been sanctioned for this District.

GOVERNMENT TRANSPORT

The North-West Frontier Province has introduced a road transport service of its own, which has proved to be immensely popular with the public, while at the same time financially profitable to the Government.

A fleet of 73 vehicles—40 buses and 33 trucks—is now operating on various routes in all the six districts of the Province, affording to the public regular, quick and comfortable movement.

LAW AND ORDER

A notable achievement of the Provincial Government in this sphere of life is the marked decline in violent crimes, including murders and dacoities, in the tribal areas. In the Province also complete peace prevailed during the year.

The year also marked the passage and enactment of important legislation calculated to wipe out corruption.

Development of the Peshawar museum on scientific lines and the establishment of a Central Record Office for the preservation of official records and historical documents for the encouragement of historical research has been yet another notable development of the North West Frontier Province.

FINANCES

In order to meet the excess in expenditure over the income of the Provinces a subvention of Rs. one crore per annum is given by the Government of Pakistan out of Central Revenues.

Revenues are expected to reach a figure of Rs. 3,60,60,000 and expenditure Rs. 3,79,01,000, for the year 1948-49. The Central Pakistan Government will continue to pay the usual subvention of one crore of rupees. The sales tax on cloth has been raised from six pias to one anna. A cess of six pias per annum has been imposed on sugarcane. Sales tax has been levied on cement and iron. Complete prohibition has been enforced in the Province.

ADMINISTRATIVE PERSONNEL

(For Ministry see p. 618.)

H. E. the Governor and Agent to the Governor-General: H. E. Lt.-Col. Mohammad Khurshid. Secy. to the Governor—E. J. M. Dent. Judd. Commissioner—Hon. K. B. Mudd. Ibrahim Khan, B.A., LL.B. Judge, Judd. Commrs. Court—Hon'ble Malik Khuda Baksh.

Rev. & Development Commr.—L. W. Woodbridge. Under Secy., Rev.—A. A. Farooq, M.A. (officiating Under Secy., Local Self Govt.).

Ch. Secy.—Major P. C. Bailey, O.B.E. Commr. & Secy. to Govt., Dev. Depts.—Major Ishaq Hussain, P.A.S.

Director of Civil Supplies and Jt. Secretary—M. Ghulam Ishaq, B.Sc.

Home Secretary—M. Ahmad, P.A.S.

Financial Secretary—Abdul Jalil.

Adv. General and Secy. to Govt., Leg. Dept.—Sheikh Mohammad Shah, B.A., LL.B.

Director of Information & Under Secretary, Dept. of Information—A. K. Qureshi.

Asst. Secy., Finance—M. Sikandar Khan.

Asst. Secretary (Poll.)—M. R. Gallyot.

Indian Personal Asst. to H. E. the Govr.—K. S. Ghulam Sarwar Khan.

Registrar, Civil Secretariat, N.-W.F.P.—P. W. Martin.

Secretary, Public Works Dept.—Lt.-Col. J. R. Hamsworth, R.E.

Inspector-General, Civil Hospitals—Col. A. K. Sahib-Zain, O.B.E., I.M.S.

Inspector-General of Police—O. G. Grace, O.B.E., I.P.

Commandant, Frontier Constabulary—Sardar Abdul Rashid Khan, O.B.E., P.P.S.

Director of Public Instruction—Mohammad Aslam Khattak, M.A. (Oxon.), Bar-at-Law.

Superintendent, Archaeological Survey—Dr. M. Nazim, M.A., Ph.D. (Cantab.).

Dist. and Sessions Judge—Arbab Taj Mohammad Khan, B.Sc., LL.B.

Add. Dist. and Sessions Judge—Khan Habibulla Khan, B.A., LL.B.

2nd Add. Dist. and Sessions Judge, Peshawar—Mirza Fazal Rahman, B.A., LL.B.

Dist. and Sessions Judge, D. I. Khan—Raja Mohammad Nazir, B.A.

Dist. and Sessions Judge, Hazara—Khan Sahib Abdul Latif Khan.

Resident and Political Agents.

Nawabzada Saeedullah Khan, P.A.S.

Lt.-Col. Mohd. Sharif Khan, Dir., Swat and Chitral.

K. B. Arbab Ahmad Ali Jan.

Atta-Ullah Jan Khan, K. S., B.A., LL.B.

K. B. Mohammad Nawaz Khan.

Major Mufti Mohd. Yusuf, M.C.

Deputy Commissioners.

K. B. Hidayatullah Khan.

K. S. Ghulam Sarwar Khan, B.A., LL.B.

Captain Allah Dad Khan.

Mohd. Jan Khan, B.A., LL.B.

K. S. Abdur Rashid Khan, M.A., LL.B.

K. S. Nawabzada Sher Afzal Khan.

Former Chief Commissioners.

The Hon'ble Lieutenant-Colonel Sir Harold Deane, K.C.S.I., from 9th November 1901 to 3rd June 1908. Died 7th July 1908.

The Hon. Lieutenant-Colonel Sir George Ross-Kepell, G.C.I.E., K.C.S.I., from 4th June 1908 to 9th September 1919.

The Hon'ble Sir Alfred Hamilton Grant, K.C.S.I., K.C.I.E., from 10th September 1919 to 7th March 1921.

The Hon'ble Sir John Loader Maffey, K.C.V.O., C.S.I., C.I.E., I.C.S., from 8th March 1921 to 6th July 1923.

The Hon'ble Sir Horatio Norman Bolton, K.C.I.E., C.S.I., I.C.S., from 7th July 1923 to 30th April 1930.

The Hon'ble Sir Stuart Pears, K.C.I.E., C.S.I., I.C.S., from 10th May 1930 to 9th September 1931.

The Hon'ble Lieut.-Col. R. E. H. Griffith, C.I.E., from 10-9-30 to 17-4-32.

Former Governors.

H. K. Sir Ralph Griffith, K.C.S.I., C.I.E., from 18th April 1932 to 1st March 1937.

H. E. Sir George Cunningham, G.C.I.F., K.C.S.I., K.C.I.E., O.B.E., from 2nd March 1937 to 2nd March 1946.

H. E. Sir Olaf Caroe, March 1946.

H. E. Sir George Cunningham, Aug. 1947—April 1948.

NORTH-WEST FRONTIER PROVINCE LEGISLATIVE ASSEMBLY

Speaker—The Hon'ble Nawabzada Allah Nawaz Khan, Bar-at-Law (D. I. Khan South Mohmandan Rural).

Deputy Speaker—Nawab Qutab-ud-Din Khan (Tank, Mohdn. Rural).

The Hon'ble Khan Abdul Qayum Khan, Bar-at-Law (Peshawar City, Mohdn. Urban); Khan Abdul Aziz Khan (Umananur, Mohdn. Rural); Khan Abdullah Khan (D. I. Khan North, Mohdn. Rural); Pir Mohd. Abdul Latif Khan (Lakki West, Mohdn. Rural); Khan Abdul Qayum Khan, B.A., LL.B. (Upper Pakhli, Mohdn. Rural); Arbab Abdur Rahman Khan (Doudai,

Doudai, Mohdn. Rural); Khan Amin Jan Khan-Khalils (Mohdn. Rural); K. S. Assadullah Jan Khan (Kutachi, Mohdn. Rural); Qazi Ataulah Khan, B.A., LL.B. (Amirzai, Mohdn. Rural); L. Bhanji Ram Gandhi, B.A., LL.B. (D. I. Khan Town, General Urban); Sultan Hassan Ali Khan (N.W. F. P. Landlords); Sardar Ishar Singh, Bar-at-Law (Hazara Jardan, Sikh Rural); The Hon. Mian Jaffar Shah (Nowshera South, Mohdn. Rural); Khan Jalal-ud-Din Khan (N.W. F. P. Towns); L. Kanwar Bhan (D. I. Khan, General Rural); Mehta Madan Lal, B.A., LL.B. (Peshawar West, General Rural); L. Mohr, Chand Khanna (Peshawar Cantonment, General Urban); L. Kewal Ram, B.A., LL.B. (Bannu Town, General Urban); L. Koto Ram, B.A., LL.B. (Bannu, General Town); Dr. Khan Sahib (Hastnagar South, Mohdn. Rural); L. Mohan Lal Gulati (Kohat, General Rural); Khan Mohd. Ishaq Khan (Kamalzai, Mohdn. Rural); Khan Mohd. Aslam Khan (Tori North Mohdn. Rural); The Hon. Khan Mohd. Farid Khan (Tanawal, Mohdn. Rural); Arbab Mohd. Sharif Khan (Bara-Mohmands, Mohdn. Rural); Khan Mohd. Yaqub Khan (Bannu East, Mohdn. Rural); Syed Mohd. Yaqub Shah (Nowshera North, Mohdn. Rural); Mohd. Zaman Khan (Haripur North, Mohdn. Rural); Khan Mohd. Zarin Khan (Bazai, Mohdn. Rural); Khan Muniatullah Khan (Hazara, Mohdn. Rural); Mian Musharaf Shuh (Peshawar Landlords); S. Parbat Singh (Peshawar, Sikh Rural); Pir Shahinshah (Kohat, Mohdn. Rural); S. Qaim Shah, B.A., LL.B. (Hastnagar North, Mohdn. Rural); Sardar Ram Singh (Southern Districts, Sikh Rural); Khan Sahib Gul Khan (Tori South, Mohdn. Rural); Captain Zain Mohd. Khan, S.B., O.B.E. (Abbottabad West, Mohdn. Rural); Khan Yalysa Jan Khan, M.A. (Peshawar City, Mohdn. Urban); Khan Taza Khan (Lakki East, Mohdn. Rural); Lt. Mirad Khan (Haripur South, Mohdn. Rural); Raja Sardar Khan (Abbottabad East, Mohdn. Rural); Khan Malik-ur-Rahman Kayani (Hangu, Mohdn. Rural).

SIND PROVINCE

WITH the division of the sub-continent on the basis of the Indian Independence Act, 1947 the province of Sind was constituted a part of the Dominion of Pakistan.

Sind is one of the two provinces created in 1936, the other being Orissa. Unlike the latter, which has been carved out on a linguistic basis from three older provinces, Sind was a compact unit and was considered a province within a province even before its separation. From the point of view of geography, ethnology and language, Sind has greater affinity to the Punjab than to Bombay. Nevertheless it has been attached to the Bombay Presidency administratively ever since its conquest by Sir Charles Napier in 1843.

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about twenty years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming majority, should have separate administrative machinery under the next reformed constitution. What was started as a bargaining point in inter-communal negotiations has now become an accomplished fact.

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be summarised by the remark, "There is thus

obviously no question of Sind standing surety for the Barrage—the problem is whether the Barrage can stand surety for Sind."

H. E. Shaikh Din Mohammad
GOVERNOR

DEMAND FOR SEPARATION

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation. Wide

divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs. 80 lakhs, the revenue from the Barrage being eaten up by interest charges. Roughly from 1945 onwards, there would be a surplus from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

With the stage set for the advent of the new province, an Order-in-Council was issued in January, 1936, announcing that the new province would start on its career on April 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is inaugurated in accordance with the provisions of the Government of India Act, 1935.

Of a permanent character were those provisions of the Order-in-Council which sever Sind from Bombay and settle the liabilities of the parent and the infant in respect of development loans incurred during the joint family period. Lands, forests, buildings, property, etc., would pass to the province where they were situated. Arrears of taxes would belong to the province where the taxed property was situated or the taxed transaction took place. Of the outstanding Bombay Irrigation Debt incurred before April 1, 1921, Rs. 2,74,96,384, including Rs. 73,687 of the debt on account of the Lloyd Barrage and Canals system, would be borne by Sind, and the rest by Bombay.

Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabad section (which is chargeable neither to Bombay nor

to Sind) would be borne by Sind. The outstanding Bombay debt on account of the Bombay Development Scheme would be the debt of Bombay alone. Other loan works would be chargeable to the province where the works were located.

It was also understood that the Central Government would have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Centre and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry. He completed his investigations and submitted his report, according to which Sind got a cash subvention of Rs. 105 lakhs for a period of ten years, after which the aid would be progressively decreased. According to the Niemeyer recommendations, Sind would get after the first five years of provincial autonomy 2 per cent. of the distributable portion of the income-tax revenue.

POPULATION

Sind has an area of 48,136 sq. miles and a population of 4,535,008 (1941 census). Of this, the Hindus (including Scheduled castes) numbered 1,229,926 and the Muslims 3,298,325. As a result of the recent upheaval nearly 8 lakhs of Hindus including 20,000 Sikhs have migrated to India since August 1947. There has been a corresponding migration of Muslims into Sind as a result of which the Muslim population has increased by about a million. The rest of the population is made up of 20,209 Christians; 31,011 Sikhs; 3,987 Jains; 3,838 Parsis; 1,082, Jews and 36,930 others.

According to the census of 1941, 389,333 males and 90,020 females in the Province of Sind are literate, representing 15.6 per cent. and 4.4 per cent. of the male and female population respectively. The position community-wise may be described as follows: 138,249 Muslim males and 16,416 Muslim females; 231,869 Hindu males and 64,498 Hindu females are literate.

The language of the Province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in Perso-Arabic script, is nearer the original Sanskrit than any other Indian language. The Hindus are far more advanced than the Muslims and in the pre-Partition days enjoyed a virtual monopoly of the trade of the province. As against 263 Hindu literate males per 1,000 only 44 Muslims per 1,000 were literate; 51 per 1,000 literate Hindu females compared against 5 literate Muslim females. The number of those literate in English are 119 per 10,000—186 per 10,000 males and 34 per 10,000 females.

On March 31, 1947 there were 3,778 educational institutions of all kinds in Sind out of which 537 were for girls. There were ten colleges in the province with 4,236 students on the rolls. There were 235 secondary schools for boys with 41,922 students on the rolls, and 38 for girls with 9,251 students. There were 2,511 primary schools for boys with 168,937 students on the rolls and 426 schools for girls with 41,735 students.

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. Ten per cent. are engaged in manufacturing industries, most of which are, however, of the cottage type, there being very few factories in Sind.

LLOYD BARRAGE

The cultivable area of the province is mostly commanded by the Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees.

The Barrage owes its existence largely to the zeal of Lord Lloyd, an ex-Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi alone knows, for the Barrage has converted a waterless desert into a smiling garden flowing with milk and honey.

The Lloyd barrage is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles, and that of water courses over 30,000 miles. The total length is thus some 36,000 miles.

The total quantity of earthwork involved, excluding that for the watercourses was 628 crores cubic feet of earthwork which means a solid column measuring 100 feet by 100 feet extending to a height of over 115 miles.

The function of the Barrage is to head up the river at Sukkur and from that to distribute it all the year round according to the requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river—four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder East and the Khairpur Feeder West. Those on the right bank are the North Western Canal, the Rice Canal and the Dadu Canal.

The total number of openings in all the canal Head Regulators is 55, each being of 25 feet span and each opening being equipped with three electrically operated gates. The total discharge of water into all the canals is approximately 45,763 cu. sec. or 255.17 gallons per second. The total length of all irrigation channels including old and new watercourses is 64,300 miles. To accomplish this staggering feat, excavation of earthwork to the extent of 7,500,000,000 cubic feet was involved, as much as would fill a drain 14 feet wide and four feet deep, dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows:

Wheat 2,440,000 acres; cotton 850,000 acres; rice 625,000 acres; *jowari*, *bajri*, etc., 635,000 acres; and oilseeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,133,000 tons; cotton 549,000 bales; rice 447,000 tons; *jowari*, *bajri*, etc., 271,000 tons; and oilseeds 117,000 tons.

The area irrigated in Sind by the Barrage canals and other capital work during 1943-44 was 5.21 million acres.

With the construction of the Barrage the area under cotton cultivation increased from the pre-barrage figure of 253,232 acres to 878,627 acres in 1943-44. The area under wheat increased from 480,000 in the pre-barrage period to 1,259,212 acres in 1943-44. The area under rice cultivation in 1943-44 was 1,385,825 acres.

FINANCES

The Sind Government have already started preliminary work connected with the building of another barrage across the Indus river in Lower Sind involving a total cost of 23.57 crores. The project consists of a barrage to be constructed above Kotri, a quarter mile below the Jamshoro regulator of the Fuleli Canal, a feeder on the

right bank of the Indus. The barrage is designed to be strong and big enough to pass a flood of 750,000 cu. sec. as against a maximum in the last 40 years of 613,000 reduced by future Punjab and Upper Sind withdrawals. The barrage, when completed in 1953 is expected to irrigate 22.5 lakhs acres.

Sind has, for some years, enjoyed a fair share of Indian prosperity as reflected in the provincial budgets. On the eve of partition, Sind wiped off all her debts to the undivided Government of India and thanks to war boom, built up her finances through large land sales and sale of foodgrains, apart from war-time benefits from the Allied operations.

The Budget for 1949-50 shows a deficit of Rs. 1,76,58,000.

The anticipated revenue for the year is Rs. 7,40,91,000 as against the anticipated expenditure of Rs. 9,17,49,000.

The real deficit is expected to be only Rs. 96,58,000. The Centre has provided Rs. 60 lakhs towards the acquisition of Karachi and the province has received another Rs. 20 lakhs as its share of the Central Sales Tax.

To balance the Budget, an emergency cess on land revenue at an additional rate of two and a half annas on every rupee of land revenue assessment and another on "jagir" have been levied. Prices of stamps and registration fee have been enhanced.

Sind's most remarkable enterprise recently is the development of industrial trading estates at Karachi, Hyderabad and Sukkur, on the lines of those established in Great Britain after the depression of 1931. The Karachi Industrial Estate has already made a beginning and the Government have sanctioned Rs. 25 lakhs towards the expenses. Preparations are in full swing for the construction of a textile mill, a chemicals factory and a shipbuilding yard to be built with the technical help of the famous British shipbuilders, John, Brown and Co., who built the "Queen Elizabeth". The estate will be situated near West Wharf.

LAND TENURE

The Government have been considering for some time past, steps necessary to ameliorate the lot of the cultivator. They have, therefore, at the last session of the Legislative Assembly introduced a Tenancy Bill to give tenancy rights to tenants at will, subject to certain qualifications. The Bill will also give the cultivator a bigger share of produce, put an end to "malwars", prohibit forced labour, establish local tribunals to settle the disputes between the two classes, on these tribunals, cultivators will have their representatives and regulate the duties and responsibilities of both the landlord and the tenant.

The measures recommended by the Hari Enquiry Committee, set up under the chairmanship of Sir Roger Thomas, C.I.E., are also receiving consideration. At the same time the Government have under consideration the question of the abolition of Jagirs granted by Kalhoras and Talpurs and continued by the British. The Sind Premier has firmly sounded this note, in the last session of the Legislative Assembly.

PROHIBITION

The Government's policy of gradual Prohibition, originating from 1938 was spurred by the advent of Pakistan. For the reformist zeal of the religiously minded class of people demanded complete Prohibition. Though that is the ultimate goal of the Government, to be achieved in the near future, it could ill afford to enforce complete Prohibition all at once on account of its limited resources—Prohibition will cost the Province one Crore of rupees annually - and the peculiar geographical position of the Province. Temperance, however, is being promoted by all

possible means. The measures so far adopted through legislation and by executive orders are as under:—

- (1) Charas and Ganja are totally stopped.
- (2) Consumption of Intoxicants by a person below the age of 20 is prohibited, by an Act.
- (3) The smoking of opium too is prohibited by Act and restricted to addicts, who possess Exemption Certificates.
- (4) Government have also taken steps towards the reduction in the number of excise shops, curtailment of hours of sale of excisable articles, all round increases in excise fee and duties, reduction in the limit of possession of intoxicants, prohibition of sale of Bhang Chota and Majun, abolition of low duty area for the purpose of sale of opium and rationing of opium drugs in the case of retailshops.
- (5) Closure of country Liquor, and Foreign Liquor off and on and of Toddy on Fridays and other holidays.
- (6) Prohibition of sale of Liquor in bulk.
- (7) Prohibition of Advertisement of Foreign Liquor.

Besides speeding up Prohibition, the Government have taken another step towards the moral re-arrangement of the people, by appointing a Committee to make recommendations on banning Prostitution. These recommendations will be implemented without any loss of time.

EDUCATION

In the field of education, innumerable changes have been effected during the second year (1948-49) of Pakistan. They may be summed up as under:

Primary—(a) Compulsory Primary Education was introduced in 9 more Talukas, which bring the total number of such Districts to 22 out of 60. Compulsion will be gradually introduced in all Talukas.

(b) Compulsory Quranic Teaching and teaching of Urdu in Sindhi Schools, and Sindhi in Urdu Schools were enforced.

(c) Training of Primary Teachers for 2 years has been made compulsory, for which 3 residential training institutions—two for men and one for women teachers—have been established.

(d) The Sind Zamindari Education Act has been enacted for educating the children of Zamindars in Primary Education compulsorily.

(e) 566 scholarships of the value of Rs. 2 each and 75 of Rs. 3 each were sanctioned in Primary Schools.

Secondary—(a) 3 abandoned High Schools were re-started and 3 middle schools were raised to the status of High Schools. Suitable Private bodies were encouraged to start abandoned schools.

(b) Hur boys were exempted from the payment of Fees.

(c) At present in the 14 Government Secondary Schools, there are 50 per cent scholarships besides 2,011 School Scholarships.

(d) Additional Divisions in several Government High Schools have been opened.

Higher—(a) Government took over two Arts Colleges (at Shikarpur and Hyderabad) and one Science College at Karachi and one Commercial College also.

(b) A special Grant-in-aid was given to the Technical Institute, Sukkur, to accommodate suitable trainees selected by P.W.D. of Sind Government.

(c) 150 scholarships of Rs. 50 each were awarded by the Government to deserving trainees at this Institute and at the N.E.D. Engineering College, Karachi.

(d) 372 College-scholarships were sanctioned by the Government.

(e) Government also sanctioned 107 scholarships of Rs. 30 each p.m. and 14 of Rs. 40 for Arts & Science Colleges and 4 of the values of Rs. 40 each p.m. for the Commerce College.

Technical—(a) Scholars are awarded stipends every year for overseas training in various technical subjects, under the scheme sponsored by the Central Government.

(b) The Government of Sind arranged a two year special overseas course in 1948 at the Indian Institute Sukkur and the N.E.D. Government Engineering College, Karachi. These men will be required at the Lower Sind Barrage where work is in progress.

(c) The N.E.D. Government Engineering College has also been arranging classes for training of Ex-service personnel of the Government of Pakistan at their request. It will now arrange for the training of Mechanical Engineers for Pakistan Railways.

(d) To give impetus to the air and sea training the schemes of (1) Pilot Training Course and (2) Naval Scholarship have been sanctioned.

Female—(a) 11 Girls Primary Schools were opened.

(b) The Government has taken over a Girls' High School at Hyderabad and opened additional Divisions and classes in the Middle Schools.

(c) 60 College Scholarships and 526 School Scholarships were awarded to deserving girls.

In order to promote the Education of Muslims in the Province, the Government have also established a fund called "Sind Muslim Education Cess Fund" consisting of Rs. 10 lakhs set apart from the proceeds of the cess levied under the Sind Muslim Education Cess Act. The interest realised from the investment is utilised for awarding scholarships for higher education abroad.

To enrich the Sindhi Language, two Monthlies "Akhhbar-Taleem" and "Mulla Magazine" are published by the Principal Training College, Hyderabad. The Government have also constituted a Central Advisory Board of Control for Sindhi Literature, which collects old manuscripts of Sindhi authors and publishes them in original and translations.

AGRICULTURAL DEVELOPMENT

The future of Sind depends on Agriculture, which is the chief industry of Pakistan. The area actually sown in this Province is more than 5,108,000 acres and the area under current fallows is over 5,000,000 acres. The canals issuing from the Sukkur Barrage together with their distributaries and water courses measure nearly 50,000 miles in length—all from a river passing through 300 miles of the territory.

The Lower Sind Barrage, work on which has already started is going to bring another 2½ million acres of land under flow irrigation and will greatly add to the prosperity of Sind.

The Province grows almost all kinds of agricultural crops—Rice, Wheat, Barley, Jowar, Bajri, Malze, Gram, Pulses and Cotton. Sugarcane and tobacco are also grown.

After the Partition, when the Hindu Technical Staff, which constituted 80 per cent of the Department, migrated the Province had many formidable difficulties to face. Now, however, the services of the Muslim agriculturists, who have come from all over the sub-continent are fully enlisted, but there are still gaps to be filled.

The King George V Agricultural College at Sukkur, now with its 4 years' course, also turns out a large number of trained personnel. The place being unsuitable for experimental purposes, it is now proposed to shift this College and the Agricultural Research Institute to Hyderabad, for which land has been selected. This Institute will be the biggest of its kind in

Pakistan. When the Lower Sind Project comes into existence, it will help a great deal in developing the new area.

In each Taluka Farm there are demonstrative plots and the Department gives out thousands of maunds of wheat, Paddy and Gram seed to the registered growers. Last year the total quantity of cotton seed given to growers was about 50,000 maunds. Their "putties" are joined in the presence of Department officers so that there is no mixing. Recently a scheme has been evolved by Government to take 7,000 acres of land in the cotton belt and then sub-lease it to a recognised Co-operative Society, for reproducing nucleus cotton seed, which would come in all to about 30,000 maunds. Along with this Co-operative Training Society, a Co-operative Ginning and Pressing Factory will also be established, and only 50 per cent of its shares will be held by the Government. This will push up development work in cotton—the certification and sealing of 2 lakh maunds of cotton will further ensure purity and germination of the cotton seed. An Act aiming at the zoning of cotton may also be introduced.

The Research Department apart from Research Stations at Sukrand, Dokri and Mirpurkhas maintains four auxiliary Farms, which will be soon mechanised. The main research work which is concerned with wheat, tobacco, sugar-cane, manures and control of pests and diseases is carried on at Sukrand. Research work on rice is carried on at Dokri, and on fruit at Mirpurkhas, where it is now proposed to establish a Fruit and Vegetable Products Laboratory, to can fruit and prepare Jams, Jellies and Squashes.

LIVESTOCK

The following is the animal population of Sind:—

| | | | |
|-----------|-------|-----------|-------------|
| Buffaloes | | 7,01,618 | } 26,60,952 |
| Cattle | | 10,59,334 | |
| Sheep | | 6,38,040 | |
| Goats | | 14,14,285 | |
| Horses | | 1,05,784 | |
| Poultry | | 8,03,438 | |
| Camels | | 1,05,475 | |
| Donkeys | | 1,25,740 | |

Cattle breeding is receiving due attention. The demand for the Red Sindhi Breed, which ranks among the finest in the world, has increased so much after Partition that the Government instituted a special census of this breed to find what number can be exported to other parts of the world. The Government proposes to hand over its Willingdon Cattle Breeding Farm to the Central Government and open similar Farms at Mirpurkhas and Hyderabad, instead. Research on Bhagnari breed and Thari breed is being carried on at Dokri and Sukrand respectively. The Government also maintains 200 stud bulls and there is a proposal for the castration of scrub bulls.

Sind's poultry is undeveloped. But a scheme has now been prepared to control poultry diseases and establish a first class poultry multiplication Centre which should produce 30,000 chicks annually and train Hari's sons in Poultry, at the rate of 48 a year.

Sind has 40 Veterinary Hospitals, of which 13 are under the control of the Government and the rest under the dual control of the Government and the District Local Boards.

The Veterinary Department has to be in constant touch with the public and besides the investigation and control of disease it has to carry on research work and manufacture Rinderpest Vaccine. The deadly disease of Rinderpest is controllable now, but so active

It is not possible to reach the scene of outbreaks of contagious diseases because means of locomotion on bad roads are slow. So the Government are now contemplating to start mobile dispensaries.

FORESTS

The total area of Forests of Sind is about 727,000 acres. Of this, the Interior Forests occupy 269,500 acres and the Riverain Forests, 457,500 acres. No change occurs in the former, but area under the latter varies from year to year due to erosion and accretion activities of the river. Irrigation also varies from year to year according to the size of floods. The Inland Forests receive irrigation through sluices provided in the embankment to let in flood water. The supply of water is uncertain and irrigation has become more unsatisfactory by the construction of Barrages in the Punjab and Sind.

The present annual rate of production of firewood is 12-15 cu. ft. per acre in Inland Forests, and 25 to 30 cu. ft. in Riverain Forests. Though the firewood requirements of Sind and Baluchistan are about 55 million cu. ft., the normal yield of Sind Forests is about 16 million cu. ft.—the balance is being met by Revenue and Zamindari Forests. As with the increase of population in town the demand for firewood will rise to 80 million cu. ft. within 10 or 15 years, the Forest Department intends to raise irrigation plantations in about 350,000 acres, in the Sukkur Barrage, Lower Sind Barrage and Upper Sind Barrage Zones. In the Sukkur Barrage Zone plantation work is in progress in about 20,000 acres. Trees will be planted in all the strips along the Sukkur Barrage canals, minors and channels, which cover 6,000 miles. This will go a long way in meeting increased demands.

The major Forest Produce of Sind is firewood, charcoal and timber. The principal Forest species are (1) Babul, (2) Kandi, (3) Lal, and (4) Bahan. Babul yields timber used for carts, agriculture implements, poles, etc. Kandi and Babul also make excellent charcoal. Lal gives firewood of medium quality. Bahan is used for building, turnery, lacquer work and

packing cases. After the creation of Pakistan there is a keen demand for Bahan in Match manufacture and in 1948, 17,000 cu. ft. of it were supplied at the rate of Rs. 2 per cu. ft. to West India Match Company, Lahore.

The minor Forest produce are (1) Kauh Sar and reeds, (2) Babul Bark, (3) Lac, (4) Lal brushwood and branches of mulberry, (5) Gum. Of these 10,000 tons of Kauh Sar is available and can be used to establish Straw Board Mills. Babul bark is utilised in Tanning Factories and we have one at Hyderabad. The estimated out-turn of lac is about 120 maunds.

As for the production of Exotics, useful for industries, the following species have been tried with good results (1) Tall, (2) Mulberry, (3) Simal, and (4) Bamboos. Of these Tall makes excellent timber for building construction; mulberry is suitable for sport goods and its leaves for silk worm Rearing Farms, Simal and Bamboos can be grown easily in Sind.

MEDICAL FACILITIES

The Medical Department of Sind maintains 8 District Civil Hospitals in which there is a total indoor accommodation of 943 beds. Most of the rural dispensaries have provision of 4 male and 6 female indoor accommodation. The total number of dispensaries in the Province is about 90.

The Province of Sind is singularly fortunate in that plague is totally absent. Nor is Influenza a public health problem any more. Likewise Cholera has never been a serious menace.

Smallpox is the only principal epidemic disease prevalent in this Province throughout the year, but generally it assumes a mild form. Vaccination, therefore is compulsory in all towns and arrangements for it exist in each Taluka. The incidence of this disease in 1948 was negligible.

The post-partition era has brought in its wake a rise in the incidence of Malaria, by the influx of shattered refugees. The resources of the Department were therefore harnessed and drugs issued liberally—6 million anti-malaria drugs were given free, at a cost of

Rs. 1,30,000 to the Department. A special anti-Malaria drive was also undertaken in Larkana District and Lower Sind. It is hoped that before long this disease, too, will be exterminated from the Province.

LOCAL SELF-GOVERNMENT

Local Self-Government in the Province comprises 8 District Local Boards, 6 Borough Municipalities and 20 District Municipalities. Notified Area Committees and Sanitary Committees in towns and villages respectively also come under Local Self-Government.

Conditions, though better than before are not yet normal. 18 Municipalities are under supersession. They will be restored when conditions become normal. At present their administrators are assisted in matters of general policy by Advisory Committees appointed by the Government.

The administration of the local bodies will further improve, as the Government have decided to take over the control of key posts of Local Bodies services.

FOOD AND CIVIL SUPPLIES

(a) **Foodgrains.**—Being a surplus Province in all major foodgrains, Sind is feeding today millions in East Pakistan. During 1948-49 half of its rice surplus, viz. 79,000 tons was exported to East Pakistan. Its total exports of rice will come to about 150,000 tons, though its actual production of rice has gone down by about 125,000 tons due to floods. The Province is the chief supplier of the Pakistan Army, too, and through it, it has also given 6,000 tons of rice to Kashmir Refugees. In the same way supplies are sent to small States, like Makran, Kalat and Isabella, etc. During 1948-49 Sind declared a surplus of 40,000 tons of wheat, and 20,000 tons of gram. This year's (1949-50) surplus is 75,000 and 20,000 tons respectively and it might be increased still further to 100,000 and 30,000 tons respectively. The current year has a bumper crop and a rich procurement is expected.

STATISTICS OF MAJOR FOODGRAINS (in tons)

| | | Acreage. | Yield. | Procurement. | Export. |
|---------------|----------|-----------|----------|---------------|----------|
| Rice | 1948-49 | 12,41,000 | 4,13,600 | 1,78,000 | 1,41,000 |
| Wheat | 1948-49 | 11,27,090 | 3,00,000 | 1,18,000 | 20,000 |
| | 1949-50* | 14,43,600 | 3,91,000 | not available | 75,000 |
| Gram | 1948-49 | 4,18,000 | 89,000 | 37,000 | 7,000 |
| | 1949-50* | 4,14,000 | 70,000 | not available | 20,000 |

* Acreage, yield, etc. are all estimates.

(b) **Cloth Supply.**—There is plenty of foreign cloth in the market including Indian cloth on the latter of which Rationing continues. During March and April, 1949, about 3,279,303 yards of cheap Czechoslovakian cloth was imported by the Government at reduced customs duty.

(c) **Fuel.**—The Province is surplus in charcoal and firewood and has exported 58,000 maunds of charcoal and 520,000 maunds of firewood to Quetta and 300,000 maunds of firewood to West Punjab.

The fodder position too is satisfactory.

(d) **Smuggling.**—Smuggling which started immediately after Partition has now been stopped by the Enforcement Police. The Enforcement staff detected 167 cases in 1948-49, (of which 69 were decided), seized 350 camels,

6 bullocks, 3 carts and confiscated 2,500 maunds of foodgrains. The fact that the border is long necessitated concentration on stocks of foodgrains in villages, so that the procurement figures during the year were found quite satisfactory.

(e) **Controls.**—To ensure equitable distribution and reasonable prices the following commodities are still controlled: Rice, wheat, gram, jwar, bajra as also sugar, cloth, charcoal, firewood, coal, hard coke and fodder.

(f) **Procurement.**—This is done through Sind Purchasing Board and Wheat Purchasing Department. The Government is now contemplating nationalising them, to ensure maximum procurement.

(g) **Storage of Foodgrains.**—At present Government-owned sheds and godowns are few in number and so privately owned buildings

have been taken on rent. Necessary alterations are also being made in storage bulk bins in Sind, which were constructed by the former Government of India and abandoned for being faulty.

Precautionary steps are taken to guard against infection and experiments are also being tried every year, as storage has become a highly specialised branch of Science.

LAW AND ORDER

Immediately after Partition due to political upheavals, the state of security in the Province deteriorated. Serious crimes reached their highest peak by the first quarter of 1948. And so an additional armed force, about 1,600 strong, was raised. That did not help much, for the Hurs were regularly absconding from camps and committing violent offences, and there were plenty of bad characters everywhere.

Operations and sweeps by the Police continued, patrolling was speeded up and various posts were established on the border.

At first the gang of Hamzo Rind was eliminated. Then members of the Hur Gang of Usman Jangro were encountered, killed or captured. Next Abdul Mari, Miro Nizamani and Phil Machi, the terror of Sind were all tackled. Operations against Khosas were also successful.

The present strength of the police, 18,000 is inadequate; the 3 wings of S.P.H. (Infantry, Horse and Camel) which has a numerical strength of 2,500 are not well-equipped. Adequate provisions for the training of personnel have to be made a highly efficient system of intelligence has to be organised, and armoured cars and mobile sets of Wireless have to be introduced.

In order to curb the Hurs and criminal tribes they were all transferred to criminal settlements of which there are eleven in all, with a total population of 6,237. Settlers placed in them are engaged in Agriculture or other avocations by which they earn their living. The settlers are not only usefully employed but an attempt is made to reform them by religious discourses and adult instruction. Free Primary Education is provided for their children.

ANTI-CORRUPTION DRIVE

The Anti-Corruption Department of the Sind Government came into existence on May 21, 1948. It has a skeleton staff of one Anti-Corruption Commissioner, 3 Deputy Superintendents, 12 Inspectors, 18 Head Constables and 60 Constables.

By the end of March 1949 the Department received 410 complaints, of which 71 have been filed and 194 are in hand, 145 cases involving 185 Government servants, have been registered, of whom 89 have been suspended including a Deputy Collector, an Executive Engineer, Sub-Divisional Officers, Mukhtars, S. Rishidars, Station Masters, Police Sub-Inspectors, Head Constables, Constables, etc.—the highest number being in the Police Department, 62, 53. Fourteen of these cases have been disposed of by courts, resulting in the conviction of 9 and the acquittal of 5; other cases are pending or under investigation.

INDUSTRY

After partition, the rate of progress of industry in Sind has been steady. The different Sections of the Department of Industries have been well co-ordinated. The Industrial and Commercial Intelligence Section attended to thousands of enquiries, made progress in the compilation of Trade Directory, conducted a census of Industrial Production and economic surveys of handloom, pottery, oil milling, lacquer, soap industries, etc. The Section for "Dissemination of Technical Information" is building up a technical library.

The "Technical Assistance" Section carried out a rapid survey of the Province regarding the availability of raw material. The Department of "The Development of Cottage Industries" also did good work in its 8 handloom Cotton Centres, Demonstration Parties, Training Schools, 4 Wool Centres and its Handicrafts School for Women.

Sind has great industrial possibilities particularly for the development of those industries which may help the agriculturists directly or indirectly, such as (a) Glass, Cement, Pottery and Paints; (b) Fish oils, Fish meal and Manures, Fish Glue and Gelatine and Pearl Buttons; (c) Biscuit and Confectionery, Starch, Glucose, Cotton Textiles and Oilmilling, Soap and Glycerine, Straw Boards, Sericulture and Cigarettes; (d) Tanning Extracts, Match Industry, Sugar, Plywood and Shellac; and (e) Tallow, Leather, Animal Glue, Bones and Bone Fertilizers, Wool and Animal Hair, Dairy Products and Fruit Canning.

The result of the effort to build up Industrial estates (mentioned earlier) and the establishment of factories has been extremely good and the following statistics may be of interest.

The total number of tenants on the two Estates at Karachi and Hyderabad is now fifty-five, occupying approximately an area of 300 acres. The number of enquiries received by all the three Estates (Karachi, Hyderabad, Sukkur) for factory plots total over 250 and come from such places as far apart as Rawalpindi and Birmingham. Factory construction already completed by the Estate Administration exceeds 82,500 sq. ft., whilst Godowns erected total approximately 1,00,000 sq. ft. with a further 45,360 sq. ft. of steel work available and awaiting erection. In addition over 4 miles of railway have been completed 3½ miles of water distribution system, with 4 miles of all weather metalled road nearing completion, and about 3½ miles of kutchra road. A Post Office has been established on the Karachi Estate for the convenience of tenants, as well as facilities for obtaining petrol. Work is actually in progress laying nearly 5 miles of 11,000 volt cable to give factories an adequate supply of power, and the construction of an additional 12" pipeline to bring in a further 8 lakh gallons of water has been sanctioned for completion before the end of 1949.

To enable these works to proceed without delay the Sind Government have made available to the Estate Administration funds or services totalling Rs. 59 lakhs. A further Rs. 6 lakhs have been advanced to ensure that adequate supplies of electric power are available to meet all the requirements of industry on the Hyderabad Estate.

The prospects of the Industrial Estates are bright and the Administration is already examining fresh developments. Prominent among these are the provision of a combined vocational training centre and labour exchange on each Estate to train refugees and unskilled labour for employment in the various Estate factories, the provision of a central workshop on each Estate, to undertake jobbing work for tenants, the holding of stocks of cement, steel and other building materials on site for the use of factories as required and a further increase in Godown accommodation for the use of tenants.

HYDRO-ELECTRIC SCHEMES

The Sind Government have proposed to develop Hydro-Electric Power for industrial purposes and home use in middle and upper Sind. Apart from Kairi-Bachar Scheme, waterfalls in Rohri Canal and Eastern Nara are proposed to be exploited and it is estimated that 16,300 k.W. of electric power would be generated on the three falls of Rohri canal at Sukkur, Yusuf Dhari and Kumbhina and one fall at mile 23 of Eastern Nara.

Final schemes are not yet ready but the preliminary estimates show that the whole project will cost about Rs. 559.5 lakhs.

ADMINISTRATIVE PERSONNEL

GOVERNOR

His Excellency Shaikh Din Mohammad.

PERSONAL STAFF OF THE GOVERNOR

Private Secretary, Aftab Ahmad Kazi.

Personal Secretary, J. Cardero.

Military Secretary, Capt. F. R. Mee. Kernan. A.D.C., Captain Zulfikar Ali.

CABINET

Chief Minister (Finance, Services, General Administration, Legal and Political Services), The Hon'ble Yusuf Abdoolah Haroon.

Minister for Revenue and Refugees Rehabilitation. The Hon'ble Syed Miran Mohammad Shah.

Minister for Home, Education, Health, Excise, L.S.G., The Hon'ble Kazi Fazlullah.

Minister for P.W.D., The Hon'ble Mir Bunde Ali Khan Talpur.

Minister for Civil Supplies, Agriculture, Industries, Forests, The Hon'ble Mr. Nour Mohammad Shah.

SECRETARIES TO GOVERNMENT

Chief Secretary and Secretary, Political Services and General Administration, N. A. Faruqui, O.B.E.

Revenue Secretary and Revenue Commissioner, S. Ridley.

Secretary, Public Works Department and Chief Engineer, Sind, Mohammad Moosa.

Secretary, Public Works Department, Lower Sind Barrage and Chief Engineer, Lower Sind Barrages, S. W. Russell.

Finance Secretary, R. A. Mohammadi. Secretary, Agriculture, Industries and Fisheries, R. A. Teare.

Secretary, Legal Department and Remembrancer, Legal Affairs, Mohammad Baksh Memon.

Secretary, Education, Health and Local Self Government, K. S. Yar Mohammad A. Memon.

Secretary, Food and Civil Supplies, A. G. Hunn.

Secretary, Sind Legislative Assembly, Zafar Ali Shaikh.

HEADS OF DEPARTMENTS

Revenue Commissioner, S. Ridley.

Deputy Commissioner, Excise, Capt. Jaffer Ali Khan G. Azha.

I. G., Police, A. W. Pryde.

I. G., Prisons, Dr. B. Balach.

Anti-corruption Commissioner, Mohammad Hussain.

Director of Publicity, Abdur Rehman Kazi.

Superintendent, Government Press, I. H. Siddiqui.

Director of Industries, M. A. Memon.

Director of Agriculture, A. M. Mustafa.

Director of Fisheries, Dr. R. Qureshi.

Director of Veterinary Services, M. Mohey-Deen.

Registrar, Co-operative Societies, Mohammad Azam Abdul Khaliq Awan.

Chief Conservator of Forests, Syed A. Vahid.

Director of Public Health, Dr. O. M. Abkanl.

I. G., Civil Hospitals, Dr. A. M. Abbasl.

Director of Public Instruction, Dr. U. M. Daudpota.

Advocate-General, Fateh Chand Assudomal.

Development Commissioner and Labour Commissioner, N. A. Faruqui.

HEADS OF DEPARTMENTS, CENTRAL

Accountant-General, Pakistan Revenues, S. Mush-taq Ahmad.

Deputy Controller, Military Accounts, T. G. Nasir Khan.

Commissioner of Income Tax and Collector, Salt Excise, L. W. Thompson.

Collector Customs, Sind and Baluchistan Circle, Hmuddin.

Director of Posts and Telegraphs, Sind and Baluchistan Circle, Syed Nusrat Ali.

Deputy, Central Intelligence Officer, Abdullah Fateh Din.

D.S.P., Special Police Establishment, Sind Branch, Khan Sher Hasan Khan.

Station Director, Pakistan, Radio, S. S. Niazi.
Officer on Special Duty, Archaeology, H. H. Khan.
Cancellation Officer, Labour, Sulaiman Mahmud.
Port Health Officer, B. F. Khambata.

PUBLIC SERVICES COMMISSION

Members: H. D. Hingorani; N. M. A. Siddiki.
Secretary: K. S. Qazi Abdul Ghani Faiz Mohammad.

SIND LEGISLATIVE ASSEMBLY

At the time of the partition of India and the establishment of Pakistan, the Sind Legislative Assembly had 60 members but the representation of the European community was reduced from three seats to one. After the budget session of the Assembly, held in the last week of February 1948, eight members of the Congress Party resigned from the Legislature. In the by-election caused by the elevation of the late Mr. Ghulam Hussain Hidayatullah as the

Governor of the province Mr. Ghulam Nabi Khan Pathan was elected. The Congress members who have submitted their resignations so far are: Prof. Ghanshyam Jetthanand, leader of the Congress Party, Swami Krishnanand, N. E. Malkani, Nevandram Vishandas, Nihaladas C. Vazirani, P. V. Tahirmanani, R. K. Sidhwa and Vishnu Nendram Sharma.]

Speaker:—The Hon'ble Mr. Agha Badruddin.
Secretary:—Zafar Ali Shaikh.

Members:—Abdus Sattar Abdul Rahman Pirzada; Mir Ahmed Khan Abdulhah Khan Talpur; Akbarshah Ahmed Shah Sayed; Haji Alimahomed Attamahomed Mari; Ali Gohar Khan Haji Khan Mahar; Pir Ali Shah Bhawanshah; Agha Badruddin Ahmed Shamsuddin Khan Durani; Anwar Hussain Ghulam Hussain Hidayatullah; Mir Bandehal Khan Talpur; Choithram T. Valecha; Haji Fazul Mahomed Khan Laghari; Fazlullah Uchehullah Kazi; Mir Ghulam Ali Khan Talpur; Ghulam Nabi Khan Pathan; Makhdoom Ghulam Hyder Zahiruddin Qureshi; Ghulam Muhammad; Muhammad Hashim Wassan; Ghulam Nabi

Muhammad Ibrahim Dehraj; Haji Ghulam Rasool Khan Jatoli; Dr. Gobindram D. Punjabi; Haridas Lalji; Holaram H. Keswani; Lt.-Col. W. B. Rossack; Mir Haji Hussainbakhsh Khan Talpur; Hon'ble Pir Ilahi Bakhsh Nawazali; Isardas Varidmal; Jaffer Khan Taj Mahomed Khan Jamali; Mrs. Jambai G. Allam; Miss Jothi T. Sipahimalani; Sardar Kaiser Khan Gulmahomed Khan Bozdar; Madhondas Shivalomal; Mahmood Abdullah Haroon; Menghumal Permal; Miran Muhammad Shah Zamilabdin Shah Sayed; K. B. Haji Moulabakhsh Muhammad Umer Soomro; Dr. Muhammad Akbar Abdul Qayoom Kazi; Muhammad Ayub Shah Muhammad Khan Khushro; Muhammad Azam Muhammad Ibrahim; Muhammad Khan Nawab Ghaffi Khan Chandio; Haji Muhammad Hashim Gazdar; Muhammad Mujtaba Muhammad Mustafa Kazi; Sardar Nabibakhsh Ilahibakhsh Khan Bhutto; Nui Mahomed Khan Sher Muhammad Khan Durrani; Nur Muhammad Shah Muradali Shah Partabzai Khansukhdas; Rahimbakhsh Allahbakhsh Khan Soomro; Sardar Khan Dilmurad Khan Khoso; Sirumal Kapaddas; Simpal Vishandas Tahiram Tekchand; Togachi Mir Mahomed Nohari.

WEST PUNJAB PROVINCE

WEST Punjab Province was formed after the partition of August 15, 1947. It comprises the whole of the Rawalpindi and Multan Divisions, the Districts of Gujranwala, Sialkot, Sheikhupura, Lahore minus half the Kasur Tehsil (180 villages out of 353 in this Tehsil having been assigned to East Punjab) and the Shakargari Tehsil of the Gurdaspur District.

The correct figures for area, population, etc. are as follows:

Area: 58,000 sq. miles (according to revenue records 37,190,935 acres).
 Density: 340.
 Population: 18,852,000.
 Males: 10,126,000.
 Females: 8,726,000.
 Muslims: 18,425,000.
 Christians: 426,000.
 Others: 1,000.
 Villages: 19,700.

AGRICULTURE

Nearly 50 per cent. of the total area is under arable farming, over 3 per cent. under forests, and 28 per cent. and 19 per cent. respectively, lying as "culturable" and "unculturable" wastes. 33 per cent. of the cultivated area depends upon rain and the rest is irrigated from a network of canal system and by surface percolation wells, tube-wells, etc.

The Lower Jhelum, the Lower Chenab, the Sutlej Valley and the Havell Canals, respectively, command 3.3, 3.1, 1.3 and 1.3 million acres. A new project, known as the Thal, when completed, will irrigate another 2 million acres. Irrigation from this project has already begun.

Wheat and rice are the chief staple crops of the Province and cover about 37 and 5 per cent. (respectively) of the total area sown. Cotton is the chief cash crop of the Province and covers 10 per cent. of the total area sown under crops. Short staple indigenous cottons are chiefly for home use and long staple West Punjab American Cottons for export. The improved strains are of over 1 inch staple length and spin more than 40 highest standard warp counts. Sugarcane and oilseeds are other important cash crops and occupy 11 per cent. each of the area under all crops. Other important crops are grain and pulses 13 per cent., millets 12 per cent. and fruits and vegetables 4 per cent.; of fruits citrus is by far the most important.

Livestock is important from the agricultural as well as food and commercial points of view. The bovine population aggregates to nearly 9

million heads and sheep and goats 4 million. Large profits are derived from cattle and dairy trades. The productions of hide and skin are also important industries.

H. E. Sardar Abdur Rah Nishtar
GOVERNOR OF WEST PUNJAB

INDUSTRIES

The industrial and commercial life of the Province was completely paralysed owing to the partition. It would take time to reconstruct the industry of the Province so that it can be an asset to the country. The number of factories registered under the Factories Act, 1934 can be divided into two categories seasonal and perennial. Cotton ginning and pressing factories form more than 90 per cent. of the total number of seasonal factories, the remaining are engaged in rice husking, sugar and fruit canning. Among the perennial factories the most important are textile mills, foundries and engineering workshops, cement factories, flour mills, glass and rubber factories, chemicals including turpentine, matches, paints and varnishes, petroleum refineries, sports and surgical goods. The two largest textile mills are situated at Lyallpur and Okara respectively.

Sialkot enjoys international fame on account of its sports goods and surgical instruments. Other industrial concerns of note in the Province are a turpentine and resin factory at Jallo; a factory for the hydrogenation of vegetable oils at Lyallpur; cement factories at Wah and Dandot; tanneries at Wazirabad and Sialkot; factories for the manufacture of electrical apparatus at Lahore and Rawalpindi and for the manufacture of sewing machines at Lahore.

Small-scale and cottage industries have also suffered much due to communal disturbances. These industries form a heterogeneous group comprising industries of a most varied character and of different sizes and forms of organisation. Some cottage industries are of considerable importance such as the manufacture of iron safes at Gujranwala; veterinary and surgical instruments at Sialkot and Lahore; pottery making at Gujrat; ivory carving at Chiniot; cutlery at Nizamabad and Wazirabad and utensils at Gujranwala. There is a big factory of footwear near Lahore. The manufacture of cycle parts has been taken up at Lahore and Sialkot. The sericulture industry has to make almost a fresh start as it has only one silkworm rearing station at Murree but a large number of agriculturists in submontane tracts are taking an increasing interest in silkworm rearing and reeling operations. There is an Arts and Crafts Depot at Lahore which provides a market for artistic wares and helps to secure improvement in design and workmanship.

The oil industry has a big future. The Attock Oil Company is engaged in extracting and refining mineral oils in the Rawalpindi District.

COMMUNICATIONS

The P.W.D. Buildings and Roads Branch looks after the communications in the West Punjab. The mileage so far installed and maintained is as under:—

| | |
|-----------------------|-------------|
| P.W.D. | 2,812 miles |
| District Boards | 343 miles |

In addition to this, it has been proposed to construct the following categories of roads for the post-war period in the first five-year programme:—(a) Arterial Roads, 2,391 miles; (b) District Minor Roads, 847 miles; (c) Village Roads (soil stabilised) 1,115 miles.

The Department hopes to complete the above programme by the end of 1952-53 when the mileage available for traffic in the West Punjab is expected to be as follows:—

| | |
|---------------------------------------|--------------|
| Metalled roads | 6,238 miles. |
| Village roads (soil stabilised) | 1,115 miles. |

In addition to the above existing and proposed road mileage, the Department looks after 1,300 miles of unmetalled roads and controls through the District Boards, a mileage of 11,567 of unmetalled roads, thus bringing the total of unmetalled class I, II and class III roads to 13,067 miles, partly bridged and partly unbridged.

Capital expenditure on development schemes could only be financed with loans. In this respect the provincial Government entered into an agreement with the Central Government early in 1948 that the former would raise no loans in the open market but obtain them from the latter. These loans were to be given for schemes which the Central Government approved and a Financial Adviser on behalf of the Centre was appointed later in order to watch expenditure in the province. For capital expenditure on development schemes planned by the various departments the provincial Government prepared an ambitious budget of about Rs. 12 crores for the financial year 1948-49; but only a little over Rs. 5 crores could be spent actually on account of non-availability of material.

Sec. 92-A GOVERNMENT

The departments remained under the control of an elected Ministry only for a part of the financial year. Owing mainly to the abnormal conditions through which West Punjab had passed, certain healthy and important conventions of democracy did not start operating in the province as they should have done in the interests of good administration. There was a growing tendency on the part of Members of the provincial Legislature to interfere with the day to day working of the administrative machinery, with postings, transfers and promotions of officials and so on. Matters grew worse when the party supporting the Ministry in the Legislature divided itself into two almost equal groups, one of them determined to keep the Ministry in office the other seeking to oust it. The extent to which M.L.A.s were allowed to interfere with the work and discipline of public servants during this period of political intrigues and strife had a most unfortunate effect on the tone and morale of the administration. H. K. the Governor-General at last intervened and dissolved the Legislature and the Ministry on January 24, 1949 and instructed the provincial Governor to take over the administration of the province under Section 92-A of the Constitution Act, pending new elections. These, according to the present plans, are to be held during 1950.

Efforts have been made under this interim arrangement to restore proper momentum to the administrative machinery and to schemes of reconstruction and development initiated during the preceding year.

Among the first important steps taken under the Section 92-A regime to put the progress of West Punjab on a sound basis was a penal law enacted to save the province from the danger of losing foreign markets for its cotton. West Punjab had developed over a long number of years special varieties of long staple and medium staple cottons which had gained distinction and popularity in international markets. After Partition the new allottees of spinning factories in their hurry and inexperience mixed up these types with the short staple *desi* cotton and dumped on the market a commodity very much different from what the buyers were used to get. Muhajir (refugee) agriculturists, used to sowing *desi* cotton in East Punjab, preferred to stick to it. In any case, pure seed of improved types had become rare owing to the admixture of all types of cotton seeds in the spinning factories. The most important cash crop of this province, which was the main source of its prosperity in the past, was thus faced with a very dark future. To remedy this state of affairs at once a law was enforced in April 1948, making it an offence for any one to grow any but a prescribed type of cotton in a particular area. Along with this a hurried, but successful, effort was made to provide the necessary amounts of pure cotton seed for the various areas concerned. This and a widespread campaign of publicity by officers of the Agriculture Department has ensured a

proper standardisation of the cotton crop that the province will grow during the current year (1948-50).

THAL PROJECT

Special attention was also paid to a scheme to irrigate and colonise a wide expanse of desert. Known as Thal, in the north-west of the province, which is by far the most important scheme of economic development that the province has in hand. It is an old scheme, which remained in abeyance for various reasons in the past. Construction work on it was eventually started shortly before the 1939 War and partly completed during the War. The scheme was revised after Partition by the West Punjab authorities and efforts were made to speed it up. The colonisation of this inhospitable desert where sand storms some times undo within a few hours what man may take months to build, presents special difficulties in the beginning. Once, however, this area has been properly developed, it will not only add 15 to 18 lakhs of acres to West Punjab's good agricultural land, but also become a beehive of trade and industries. Afforestation and agriculture will, it is expected, completely change the present forbidding aspects of its climate.

In order to overcome the initial difficulties, a Board has now been created on the lines of the famous Tennessee Valley Authority in America, to co-ordinate various inter-dependent aspects of development, such as construction of irrigation channels, building of roads, afforestation, electrification, necessary help and assistance to the settlers (who will practically all be drawn from among refugees) to build their houses and start agricultural operations. The Board, which will eventually become a statutory body when a law is enacted, will offer blocks of land in a semi-developed shape to the settlers. The Board will not only deal with land already owned by government, but also acquire privately owned areas for purpose of systematic colonization. It has drawn up elaborate maps of future villages, market towns, roads, forests and fruit gardens and the scheme is to be completed by rapid stages. A small part of the Thal area has already been colonized by the families of the Muhajir personnel in the Pakistan Army. They have even reaped a bumper crop of wheat and grain from the virgin lands.

Another of the basic problems of West Punjab is that of arresting the deterioration of land through water-logging in canal-irrigated areas. The remedial measures, never quite adequate, that were being taken before Partition, could not be fully maintained during the subsequent years. They are now being changed in the light of the present needs and conditions of the province. Similarly, steps have been taken to give fresh impetus to departmental work in connection with long-term schemes of developing and expanding West Punjab's scanty forest wealth, improving the number and breeds of its cattle, developing its supply of electric energy and expanding its industries and other basic factors of economic prosperity. The proposed hydro-electric power plants will make this province independent of East Punjab and will provide a network of criss-crossing which will supply energy everywhere at economic rates.

On the eve of the second anniversary of Pakistan conditions in West Punjab present a happy contrast to those which the province has passed through. Nature has helped the efforts of its people by giving the province a bumper wheat crop which has surpassed the records of a long time. Already the provincial authorities have offered the Central Government two lakh tons of wheat as surplus beyond the needs of the province. The problem of the shortage of food is now a thing of the past. There is practically no black-market in the province in any of the essential commodities. About 40 lakhs of the refugee population have been settled in the rural areas and about 15 lakhs in the urban areas. It has been estimated that between 75 and 80 per cent of the refugees resettled in urban areas have been properly absorbed in the economic life of the province at a level not lower than their pre-partition position. The problem of finding

full and useful employment for the rest has still to be solved. It is being studied by an Inquiry Committee and whatever interim steps are possible are being taken to solve it. For the agriculturist Muhajir population an elaborate plan of giving semi-permanent proprietary rights to those who were land-owners in their original homes is being implemented. It has meant the study and tabulation of voluminous records and claims. The scheme is, however, well under way. Its completion will greatly help in ensuring due relief for Muhajir land-owners and also in the maintenance of the productive value of evacuee lands.

ADMINISTRATION

Prior to the amendment of Government of India Act in 1919 the head of the administration was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the Act of 1919 the Province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. With the introduction of part III of the Government of India Act, 1935, this Executive Council was substituted by a Council of Ministers and the Legislative Council by an enlarged Legislative Assembly with wide powers of legislation and control. After the establishment of Pakistan, the Provincial Government has been and is being carried on according to the provisions of the Government of India Act, 1935, as modified by the Pakistan (Provisional Constitution) Order, 1947. The business of Government is carried on through the usual Secretariat which consists of six Secretaries, designated as (1) Chief, (2) Home, (3) Finance, (4) Industrial and Medical, (5) Civil Supplies, (6) Refugees and Rehabilitation Secretaries, three Deputy Secretaries, one additional Deputy Secretary, three Under-Secretaries, and two Assistant Secretaries. Seven Assistant Directors in the Civil Supplies Department are also Under-Secretaries. In the Public Works Department, there are five Chief Engineers (Secretaries of Branches), one in the Buildings and Roads Branch, one in the Electricity Branch and three in the Irrigation Branch while the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The three Financial Commissioners are also Secretaries to Government in Revenue, Resettlement and Colonies and the Development Departments. The head of the Police Department is Joint Secretary and of the Education Department a Secretary to Government. The Headquarters of the Government is at Lahore. Under the Governor, the province is administered by three Commissioners (for Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—16 in number—each of whom is in charge of a district.

The principal heads of Department in the Province are the three Financial Commissioners (who are the highest Court of Revenue Jurisdiction, and heads of the Departments for Land Revenue, Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies, the Deputy Commissioner of Criminal Tribes and the Legal Remembrancer.

JUSTICE

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil jurisdiction in special cases. The Court sits at Lahore and is composed of a Chief Justice and five Puisne Judges and one additional Judge. Subordinate to the High Court are the District

and Sessions Judges (12 in number) each of whom exercises civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulations is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

LOCAL GOVERNMENT

Local Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district, of a Corporation at Lahore or of Municipal, Town, and Notified Area Committees, each exercising authority over an urban area, and of Panchayats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession and other taxes and miscellaneous fees, and those of the Lahore Corporation and Municipal, Town, and Notified Area Committees from octroi or terminal tax and other forms of taxation, from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local opinion, civil and criminal justice, the abatement of nuisances and other matters. In order to modernise the towns of the province, the Punjab Town Improvement Act, 1922, which provides for the constitution of Improvement Trusts, has been extended to five important towns.

POLICE

The Police force is divided into District Police, Railway Police, Criminal Investigation Department, Provincial Additional Police and Border Police. The combined force is under the control of the Inspector-General of Police, who is a member of the gazetted force and has under him four Deputy Inspectors-General, three in charge of ranges comprising several districts, one in charge of the Criminal Investigation Department and of the Finger Print Bureau at Lahore. The Railway Police is under an Assistant Inspector-General. The West Punjab Constabulary and Border Police are controlled by their commandants. The District Police are controlled by Superintendents each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

EDUCATION

Rapid strides have been made in education in West Punjab during the last two decades. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains 13 arts colleges (including one for Europeans and three for women), five normal schools for males, 6 training classes, and combined institutions for females, 106 secondary schools for boys and girls and 33 centres for vocational training. Apart from these institutions for general education, Government maintains 9 higher grade professional institutions, viz., the King Edward Medical College, the Montgomery College of Dentistry and Veterinary College at Lahore, the Agricultural College at Lyallpur, the College of Engineering and Technology at Muzhapura, the Central Training College, Lahore, the Lady MacLagan Training College for Women, Lahore, and the Chelmsford Training College at Ghorazali and one school, viz., the Engineering School at Basul.

At present the Department of Education is in the charge of the Secretary, Education Department, who is assisted in the work of administration by the Director of Public Instruction. The percentage of literacy for people between 10 and 40 years of age is 15.

MEDICAL

The Medical Department of West Punjab is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Lieut.-Colonel. He is assisted by an Assistant Inspector-General of Civil Hospitals, who is an Officer of the rank of a Civil Surgeon; a Lady Assistant Inspector-General of Civil Hospitals, who is senior Member of the Women's Provincial Medical Service and a Personal Assistant of Gazetted Rank.

PUBLIC HEALTH

The following personnel of the West Punjab Public Health Department are responsible for the control of communicable disease and for the carrying out of work designed to improve the health of the people:—

Headquarters staff:—

Director of Public Health; Assistant Director of Public Health, Vaccination; Officer-in-Charge, West Punjab Epidemiological Bureau; Officer-in-Charge, Anti-malaria Operations; Nutrition Officer; Provincial Public Analyst; Inspectors of Health Centres and two Assistant Inspectors; the Principal, West Punjab Health School; and a Woman Assistant Surgeon.

Public Health work is organised in 2 "Ranges" each in charge of an Assistant Director of Public Health. The Assistant Director of Public Health, Lahore Range, also acts as Personal Assistant to the Director of Public Health.

Sixteen districts came to the share of West Punjab and to man the health services the Public Health Department was left with only 8 District Medical Officers of Health. Consequently, one officer had to be placed in charge of two districts.

To make up the deficiency in officers on account of the lack of properly qualified District Medical Officers of Health, sanction of Government was obtained for 16 posts each of Assistant Medical Officers of Health, and Sub-Assistant Health Officers, one for each District of the Province, so that, sanitary work in general and refugee problem in particular may be properly attended to.

The basic public health staff for each District is:—

- 1 District Medical Officer of Health, 1 Assistant Medical Officer of Health, 2 Sub-Assistant Health Officers (including one sanctioned by Government in connection with refugee work), 4 Sanitary Inspectors, 1 Superintendent of Vaccination, 16 Vaccinators.

The basic district staff is reinforced from the following cadres organised for special work:—

Public Health Corps Units concerned primarily with the control of epidemic disease and sanitation in rural areas.

There are 16 corps units each consisting of—

- 1 Sanitary Inspector, 2 Sanitary Supervisors, 12 Sanitary Patrols (Labourers).

An Anti-malaria Organisation consisting of:—

- 1 Entomological Assistant, 8 Anti-malaria Sanitary Supervisors, 15 Anti-malaria Sanitary Patrols, 1 Laboratory Assistant (Junior Grade) in each of the 8 Districts and 2 Anti-malaria Sanitary Supervisors, 10 Anti-malaria Sanitary Patrols, 1 Laboratory Assistant (Junior Grade) work in each of the remaining 8 Districts of the West Punjab under the control of the Officer-in-Charge, Anti-malaria operations.

These units are detailed for duty in the malarious areas of the Province.

A field Epidemiological Unit for the investigation of outbreaks of epidemics especially malaria is functioning in the Province under the control of the Officer-in-Charge, Anti-malaria Operations, and includes the following personnel:—

- 6 Sanitary Supervisors, 12 Sanitary Patrols, 1 Laboratory Assistant (Junior Grade).

There is also a Malaria Field Epidemiological Research Station consisting of an Entomological Assistant, a Field Assistant, a Laboratory Assistant and a Clerk. Its main object is to work out biological methods for the control of malaria in the Province, especially in the water-logged areas.

Two chemical laboratories are functioning in West Punjab a Headquarters Laboratory at Lahore and a Divisional Laboratory at Rawalpindi. The Headquarters Laboratory is in charge of the Provincial Public Analyst, who is assisted by four Analytical Assistants. The Divisional Laboratory is in charge of a Deputy Provincial Public Analyst, and two Analytical Assistants work under him.

Problems relating to nutrition are investigated by specially trained staff which includes:—

- 1 Nutrition Officer and 2 Sanitary Inspectors.

Increasing effort is being directed towards ensuring that food-stuffs sold throughout the Province are of good quality. 24 Government Food Inspectors are employed, in addition to those appointed by local bodies, who regularly sample wholesale and retail stocks. Samples are examined at the Headquarters Laboratory and also at the Divisional Laboratory at Rawalpindi.

Government has recently expanded maternity and child welfare work. There are now throughout the Province 75 maternity and child welfare centres staffed by fully trained lady health visitors, who supervise the training and work of indigenous dais.

A special organisation for the prevention and treatment of hookworm disease is in operation in the areas in which this disease is prevalent.

The following institutions contribute to the control of disease and the training of health personnel:

The Epidemiological Bureau—Bacteriological and Pathological Laboratories. Training of Sanitary Inspectors.

The West Punjab Vaccine Institute. Training of Sanitary Inspectors, Sanitary Supervisors, Lady Health Visitors, Medical Students and Vaccinators, Production of Vaccin lymph.

The West Punjab Health School—Training of Lady health visitors.

RURAL DISPENSARIES

An altogether new departure in the Public Health Policy has been made in recent years by the taking over by the Public Health Department of a number of rural dispensaries which formerly were under the control of the Medical Department. Eighty-nine dispensaries are working at present under the control of the Public Health Department. The idea that curative and preventive medicine should go hand in hand, has thus been given a practical shape.

In addition to the curative work that these dispensaries are required to perform, much useful public health work has been achieved through the staff of these dispensaries. The doctors in charge of these dispensaries are required to tour within five miles radius of their dispensaries and in addition to attending to the sick in their homes, are now responsible for carrying out preventive health work under the supervision of the Public Health Department.

Whole-time Municipal Medical Officers of Health are employed in the following towns:—

Lahore, Rawalpindi, Multan, Sargodha, Lyallpur, Sialkot and Kasur.

All District & Municipal Medical Officers of Health are Inspectors under the Factory Act and are responsible for ensuring that the rules laid down for safeguarding the health of workers are observed.

There is also a provincial Sanitary Board consisting of official and non-official members, and the Director of Public Health, acts as its Secretary. The functions of the Board are advisory; the Board also gives grants-in-aid to local bodies for the execution of sanitary works.

The Office of the Director of Public Health, maintains records of vital statistics and conducts research pertaining to them under the supervision of the Statistical Officer.

There is a Public Health Branch of the Public Works Department, which is concerned with the planning and carrying out of work in connection with the provision of water-supply and drainage and sewerage schemes in towns and villages. The Branch functions under an expert in Sanitary Engineering who has the status of a Superintending Engineer and is assisted by a number of Executive Engineers, Sub-Divisional Officers and Subordinates.

1949-50 BUDGET

The provincial budget for the year 1949-50 shows a surplus of Rs. 9 lakhs. The revenue for the year is estimated at Rs. 11.07 crores and expenditure at Rs. 16.62 crores, coverable by the following new taxes:

Water rates (abiana) increased by 40 per cent., bringing a revenue of about Rs. 150 lakhs. It has been decided to levy "mulajir" cess of two annas per rupee to land revenue and water rate before the next two harvests which yields Rs. 50 lakhs.

Agricultural income-tax, levied last year for one year, will be reimposed this year, yielding Rs. 40 lakhs.

Electricity rates charged to consumer have been increased from April 1, 1949, bringing an additional revenue of Rs. 14 lakhs.

The rates of entertainment tax will be increased, collecting Rs. ten lakhs.

The additional revenue by the new taxation totalled Rs. 2.64 crores, converting the deficit into a surplus of Rs. nine lakhs.

ADMINISTRATION

Governor, H. E. Sardar Abdul Rab Nishtar.

PERSONAL STAFF

Secretary, S. Ghias Uddin Ahmed, P.A.S.

Military Secretary, Major J. M. E. Wainwright.

Aide-de-Camp, Captain J. N. B. Baillie-Hamilton.

CIVIL SECRETARIAT

Chief Secretary, S. Fida Hassan, O.B.E., P.A.S.

Secretary, Medical and Industries, S. M. Hassan, P.A.S.

Secretary, Civil Supplies Department, R. D. Howe, P.A.S.

Secretary, Finance Department, H. J. Pearson, O.B.E.

Home Secretary, S. Ahmed Ali.

Financial Commissioners, Akhtar Hussain, O.B.E., P.A.S. (Resettlement & Colonies); J. W. Hearn, C.S.I., C.I.E. (Development); M. I. Rahim, P.A.S. (Revenue).

PUBLIC WORKS DEPARTMENT

Irrigation Branch.

Secretary (Irrigation Branch), K. B. M. A. Hamid.

Secretary (Northern Canal), K. B. Pir Muhammad Ibrahim.

PROJECT AND ELECTRICITY.

Secretary, K. B. S. I. Mehabub.

BUILDINGS AND ROADS BRANCH.

Secretary and Chief Engineer, K. B. A. Karim.

PUBLIC SERVICES COMMISSION

Chairman, Mirza Abdul Rahim.

Member, Ch. Nazir Hussain, B.A., LL.B.

Member from N.W.F.P., Wazirzada Gul Muhammad Khan.

Secretary, F. D. Saify.

MISCELLANEOUS DEPARTMENTS

Director of Agriculture, Malik Sultan Ali Noon.

Director of Land Records, Iqbal Sher Muhammad Bhuttar, P.C.S.

Director of Public Instruction, B. A. Hashmi.

Inspector-General of Police, Khan Qurban Ali Khan, P. P. S.

Abdur Rab Nishtar .. 1949

BALUCHISTAN

BALUCHISTAN is an oblong stretch of country occupying the extreme western corner of Pakistan.

It is divided into two main divisions: (1) what was called British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by a treaty signed in 1879; (2) Baluchistan Leased and Tribal areas with an area of 11,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed direct, under British officers. The States of Kalat, Las Bela, Makran and Khuran with an area of 79,546 square miles, which were also regarded as parts of Baluchistan have acceded to Pakistan.

The legal position in regard to the former British Baluchistan and the Leased and Tribal territory is fluid.

The whole Province embraces an area of 134,002 square miles and according to the census of 1941 contains 857,835 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Iran. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren sun-burnt mountains, roofed by high chains and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1839; it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachhi, Quetta and Mastung were handed over to the Amir of Afghanistan

and Political Officers were appointed to administer the country. After the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalat.

The founder of the Baluchistan Province as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorapur, Sibi, Zawara Valley and Thal-Chotali were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

INDUSTRIES

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrigh, which has the heaviest rainfall, records no more than 14.72 inches in a year. In the highlands few places receive more than 10 inches and in the plains the average rainfall is about 5 inches, decreasing in some cases to 3.

The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes.

The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass also in Sur Range in Quetta-Pishin District. Chromite is extracted in the Zhoib District near Hindubagh. Limestone is quarried in small quantities. Gypsum is mined in the Silei District near Spintangi Railway Station.

Education is imparted in public schools of all kinds. There is a widespread desire for education amongst the more enlightened headmen round about Quetta and other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts.

GOVERNMENT

The Baluchistan administration is directly under the Centre.

The Interim arrangement for associating the people of Baluchistan with the administration of the province, the Baluchistan Council, was installed on June 11, 1949 at Quetta, almost fifteen and a half months after the historic announcement by the late Quaid-e-Azam Mohammed Ali Jinnah at the Siba Durbar in February 1948.

Two Advisers, Qazi Mohammad Isa Khan, President of the Baluchistan Provincial Muslim League and Khan Bahadur Sardar Noor Mohammad Khan Gola have also been appointed to the 15-member Council to advise the A. G. G. on matters pertaining to Education, Agriculture, Health, Forests and Animal Husbandry. That is to say, Baluchistan has much the same kind of Government as the British Indian Provinces had under the Reforms of 1919.

The Baluchistan Council will advise the Agent to the Governor-General and Chief Commissioner on the following:-

1. matters of general policy relating to administration, schemes of development and proposals for legislation but NOT on matters relating to day to day administration and to individual appointments.
2. Financial matters including proposals for budget estimates.
3. Questions affecting the implementation of general policy and schemes of development and
4. such other matters as the A. G. G. may refer to it for advice. In case of dispute as to whether any matter falls within the scope of the Council, the decision of the Chief Commissioner, who is also the President of the Council shall be final.

The rights and privileges of the member of the Council in regard to resolutions and interpellations shall be analogous to those of the members of the Central Legislature, provided that the President may in public interest prohibit the discussing or asking of questions on or giving information on any matter.

The Council shall meet at least once in four months.

The Advisers shall discharge their functions under the direction of the Agent to the Governor-General and Chief Commissioner and may be dismissed by the Governor-General. The Governor-General may, if he considers it in public interest to do so, suspend or dissolve the Council at any time.

Political Agents and their Sub-Divisional Officers discharge many functions. They are Magistrates, Revenue officials, Customs officials, Excise officials, Rationing officials, Custodians of Evacuee Property, Assistant Rehabilitation Commissioners, Registrars of Marriages, Commissioners under the Workmen Compensation Act, etc.

The Marri and Bugti tribes enjoy a special position in that no land revenue is collected from them and in the case of the Marri tribe, the tribe is administered through the Tumandar who maintains his own jails and levies.

Apart from Quetta where there is a Municipality, other large towns are Bazar Fund areas. The Political Agents concerned administer the Bazar Fund funds.

Individual Service Allowances are granted to important Sardars and Malikhs and the system of tribal responsibility is strictly enforced.

Apart from tribal levies, there are four corps of Civil Armed Forces for the protection of the frontiers with Afghanistan and Iran. They are Zhoib Militia, Pishin Scouts, the Chaghal Levy Corps and the Mekran Levy Corps.

Magistrates in Baluchistan exercise powers both under the F.C.R. and under the regular law.

There is a small separate Judiciary consisting of the Judicial Commissioner, the District and Sessions Judge and the Sub-Judges. Civil cases under the regular law are referred to the Sub-Judges.

The Baluchistan Police Force operations in "A" areas which are the larger towns and villages where the Headquarters are located. In these areas the regular Law is enforced, but under the provisions of the F.C.R. certain cases where the parties are tribesmen and a more satisfactory solution is likely to be found under the F.C.R., cases can be referred to the Jirga.

In "B" area the Police have no jurisdiction and law and order is maintained by the tribal levies. The cases are referred to Jirgas under the provisions of the F.C.R. and orders passed by Magistrates having powers under the F.C.R.

Jirga members are appointed by the Political Agents and are always men of standing in their tribes.

Cases referred to these Jirgas are decided according to *Rozaj* which varies between tribes.

Important cases and all changes in *rozaj* are referred to the Shahi Jirga whose members are appointed by the Agent to the Governor-General. Members of this Jirga are all important Sardars and membership is almost hereditary.

Cases between the members of tribes of two different Agencies are referred to Joint Jirgas, and these are held between Agencies and State and Inter-Provincial Jirgas with other Provinces.

PERSONNEL

The following is the full list of the 15 members of the Baluchistan Council:

MUSLIM LEAGUE:

Qazi Mohammad Isa Khan (First Adviser); Mir Qadir Bakhshi; Malik Jan Mohammad Kandi; Seth Mohammad Azam; Sardar Iqbal Mohammad Khan Jogazai; Malik Dad Khan; Mir Ismail Khan Khosa; Malik Shah Jehan.

SARDARS: Sardar Nawab Mohammad Khan Jogazai; Sardar Khan Bahadur Noor Mohammad Khan Gola (Second Adviser, *Joined League*); Sardar Gulistan Khan Sherani; Sardar Mohammad Akbar Khan Sanjrani; Sardar Bazar Mohammad Khan Belkhal.

QUETTA MUNICIPALITY: Elda Ali Ali Bhoi (Chairman of the Council); MINORITIES: A. K. Patel (Parisi).

Out of the five Sardars, two, Sardar Mohammad Khan Jogazai and Sardar Mohammad Akbar Khan Sanjrani have not so far attended any meeting of the Council.

The Sardars, who have formed themselves into a Tribes Federation are pressing for election of the members of the Council on the basis of adult franchise. They claim that if elections were held the Tribes Federation would sweep the polls.

Agent to the Governor-General and Chief Commissioner, The Hon'ble Mr. Amin-ud-din, P.A.S.

Revenue and Judicial Commissioner, Lt.-Col. R. N. Bacon, O.B.E.

Secretary to the A. G. G. and Chief Commissioner in Baluchistan, Major H. A. Arthington Davy, P.A.S.

Under-Secretary to the A. G. G., Khan Sahib Sardar Abdul Hakim Khan, P.A.S.

Deputy Inspector-General, Frontier Corps, Col. W. H. Fitz Maurice.

Secretary to the A. G. G. in P.W.D., Lt.-Col. R. H. Muirhead, O.B.E.

Superintending Engineer, Irrigation, Khan Bahadur Abdul Rehman.

Director of Education, I. N. Khan.

Chief Medical Officer, Inspector-General of Prisons and I.C. Anti-Malaria Operations, Major N. A. Kureshy.

Senior Superintendent of Police, H. D. M. Scott.

Additional Superintendent of Police, Quetta-Pishin and Sibi, Khan Sahib Mirza Bashir Ahmad.

Director of Agriculture, Abdul Aziz Khan.

Director of Food Supplies, Khan Bahadur Shah Zaman Khan.

Dy. Director of Food Supplies, Khan Abdullah Khan.

District and Sessions Judge and Custodian of Evacuee Property, P. E. Miall.

Rehabilitation Commissioner, Khan Sahib Agha Syed Sarwar Shah.

Political Agent, Quetta-Pishin, Major R. K. M. Saker, O.B.E.

Political Agent, Zhoib, Nawabzada Mohammad Aslam Khan.

Assistant Political Agent in Zhoib, Khan Sahib Agha Mir Yakub Shah.

Political Agent, Baluch States, Major D. G. Thornburgh.

Political Agent, Loralai, Khan Bahadur Sher Zaman Khan.

Political Agent, Sibi, Khan Ghulam Haidet Khan.

Assistant Political Agent, Sibi, Sardar Mohd. Isa Khan.

Political Agent, Chagai, Khan Sahib Said Ali Khan.

Assistant Political Agent, Mekran, Lt.-Col. Azizullah Khan.

Assistant Political Agent and Colonisation Officer, Nasirabad, Khan Sahib Abdullah Khan.

KARACHI ADMINISTRATION

THE Karachi Administration came into existence on 23rd July, 1949 after the separation of Karachi from Sindh. It inherited a population of nearly six lakhs of refugees. The rate of inflow since then has been 5,000 per month. There are now about 60,000 homeless refugees in Karachi; the rest have been provided with shelter.

The housing problem in Karachi presented itself in unprecedented acuteness. Since the separation of Karachi, a substantial number of houses have been constructed for the refugees. 2,000 houses are nearing completion in the Pir Ilahi Baksh Colony No. 2; 500 in the Bilhar Colony on Masson Road, and 100 in Pir Ilahi Baksh Colony No. 1. Three thousand and four hundred acres of land have been allotted to the four housing societies, namely the Karachi Co-operative Housing Societies' Union Federation Ltd., the Pakistan Employees' Housing Society, the Bombay Muslim Housing Society and the U. P. Muslim Society. Considerable difficulties presented themselves in the allocation of land to these various housing societies, but eventually it was found possible to evolve a *via media*. Schemes are also being examined for the construction of 10,000 houses for the poorer classes of refugees in the Gollimar Area.

The Central P.W.D. hopes to complete the construction of 80 A and B type flats and 3,000 Quarters of C, D and E type within the 1949-50 financial year. Everywhere in Karachi construction work is in full swing.

Only a negligible proportion of the refugees is out of employment. The refugees staying in the M. A. Jinnah Road Camp, Clayton Road Camp, and Hajj Camp have been rehabilitated in cottage industries like thread ball making, weaving, utensil making and carpentry. Most of them are doing well as petty shopkeepers, hawkers and artisans. New stalls, market places and small-scale business centres have come into existence and have been laid out without impairing the sanitary or the civic pattern of the city.

The system of allotment of houses was faulty. There were cases where a single individual got an allotment of large accommodation, and others where the same family was split up in

different accommodations. The result was that accommodation was grossly under-occupied and apart from anything else, served as a source of great impetus to the Pagaré racket. The new scheme of house rationing aimed to do away with such inequities. Unfortunately it was grossly misunderstood and while some people thought that outsiders would be imported into their houses in complete disregard of the necessities of privacy, others considered that house rationing would solve the problem of accommodation outright and that every one would have a house. The amendment in the Rent Restriction Act has made it possible to remove the gross inequities of under occupation which existed before.

The problems connected with the maintenance of law and order have vastly increased owing to the influx of lawless elements which have no stake in the country. A drive has been launched to clear the city of desperadoes and an elaborate network of Police Patrols with reinforced vigil and alertness has reduced crime, although every instance of crime receives very wide and sometimes exaggerated publicity.

The position in regard to the supply of essential commodities has been throughout satisfactory. There was acute shortage of sugar and charcoal but the position in regard to these commodities is now eased. The individual ration card system has eliminated the chances of black-marketing. Over a lakh of bogus ration cards were voluntarily surrendered by the people.

The exodus of Hindu teachers left behind a void in the educational life of the Federal Capital. The budget for Primary Education which used to be in the neighbourhood of Rs. 16,00,000 in the prepartition period was reduced by nearly 50 per cent even though the population increased three-fold. The lacunae have since been filled and all the educational institutions in Karachi are now working in full swing. In fact many more institutions have since come into existence.

Public Health services and facilities for medical treatment were unsatisfactory in the beginning. The Sind Government did not part

with the Dow Medical College and Civil Hospital. The Jinnah Central Hospital which was taken over by the Karachi Administration was imperfect from several points of view. A Managing Committee has been working now for six months with Begum Liaquat Ali Khan as President and is trying to improve the conditions in the hospitals. Efforts are being made to segregate the lepers and the resources of the Hiranand Leper Asylum are being augmented for this purpose. The Government are also considering the scheme submitted by the Administration for the establishment of a Poor House in Malir.

The affairs of the Karachi Municipal Corporation were at a very low ebb. Sanitation of the city was appalling and trespassers and encroachments had practically blocked the streets. Now the pavements and streets have been mostly cleared and alternative arrangements have been made in a compact area where a market for hawkers and petty shopkeepers, who were previously thriving on the public highways, has been established. The sanitary conditions still admit of more improvement than has been effected so far, and steps have been taken to construct pavements at the various places. The Cleaner Karachi Campaign did not get sufficient co-operation from the public but the more important localities in the city have since been put in a more hygienic condition.

The Administration is also giving effect to the Anti-Prostitution Act recently passed by Parliament. As soon as a Poor House is established it will be possible to remove beggars from most of the Karachi streets.

A Karachi Board of Film Censors has been established with a view to preventing the display of films which are objectionable on moral or political grounds or from the security point of view. The Board is a mixed body of officials and non-officials and its work has enabled the Administration to keep a strict censorship over films which may have otherwise exercised an unwholesome influence on the public. Two films were banned upon the recommendations of this Board, one on political and the other on moral grounds.

THE STATES OF PAKISTAN

THE June 3 plan of Lord Mountbatten met the somewhat baffling question of the States by by-passing it. It gave to the States, what amounted technically to "freedom of action." It also implied a similar freedom for the two successor States, India and Pakistan, to formulate their own policies towards the States. Pakistan's policy in this matter was to respect the right of every State to decide its own future. The success of this policy has been amply demonstrated by the ready and willing accession of all the States expected to accede to Pakistan except Kashmir.

The ties which now bind these States to Pakistan are all the stronger for having been freely entered into.

BAHAWALPUR

It is the only State in the former Punjab which, due to its geographical position, acceded to Pakistan. This it did on October 7, 1947.

Situated in the extreme south-west of west Punjab, it lies 300 miles from north-east to south-west, while its breadth is nowhere more than 40 miles. The State has an area of 17,494 sq. miles. The general appearance of the land is one of barrenness. There are no hills, and no

streams except a few pools and backwaters of the rivers, Sutlej, Chenab and Indus. Three separate tracts can be distinguished: (a) Rohi or Cholistan which is the eastern part of the State and western part of the Rajputana desert. This part gets hardly any rain. Water level being 80 ft. below the sandy surface of the earth, subsoil irrigation is also not possible. Hence there is hardly any cultivation. (b) The soil of the central tract consists of clay mixed with sand. The Sutlej Canals have been instrumental in bringing a large part of this tract under cultivation. The State is in fact the major partner in the great Sutlej Valley Project. (c) The western strip called Sind is an old dry river valley. This is the most fertile part of the State because the river Indus has always been a source of the country's irrigation. The climate is abnormally hot and dry.

Apart from the main agricultural products such as wheat, gram, dates, mangoes, fruits and cotton, 'kankar' abounds in several places, more especially in the Minchinabad Tahsil. Manufacture of carbonate of soda and salt-petre from saline earth is a common industry in most of the villages in Minchinabad and Khairpur. Leather goods, metal and porcelain vessels are also made and exported to the neighbouring Provinces.

POPULATION, REVENUE

The average revenue of the State is over Rs. 3,35,00,000 per year. The last Budget Report of Bahawalpur State estimated the revenue receipt and expenditure for the year at Rs. 3,86 lakhs and 3,26 lakhs respectively. The Prime Minister indicated in the same Report that great potentialities for development existed in the State and that the process of development would be accelerated.

Considering the area of the State, the total population is low, 1,341,209. About 9,000 sq. miles being desert the majority of the population live in the Sind tract.

In the upper parts of the State the language is Multani or Bhawalpuri whereas the dialects of Rajasthan, Jatki and 'ubhechar' are commonly used in the rest of the State.

The rulers of Bahawalpur claim their descent from the Abbasid Caliphs of Egypt. During the days of Nadir Shah Durrani, Daud Khan occupied this part of the country, and his son Mubarak Khan and grandson Bhawal Khan later consolidated their position as Chiefs of the State.

In 1833, Bhawal Khan III entered into a treaty with the British Government, by which his independence under British suzerainty was recognized.

The present ruler, Nawab Haji Sadiq Mohammed Khan, succeeded his father in 1907.

The administration is in charge of the ruler as the head of the State. He is assisted by a number of Ministers who are in charge of different portfolios. The whole State is divided into three Nizams, and each Nizam is under one Nizam who is the Chief Executive of the area. The principal court of judiciary known as Sadr Adalat was established in 1870. A large number of the Acts, including the Penal Code and Procedure Code, in force in the area formerly known as British India have been adopted.

The sixteen municipalities are administered by the official and non-official representatives of the State. The P.W.D. working under the Muslim-i-Tamir has carried out some very useful schemes of reconstruction.

KALAT

Bounded on the west by Persia, on the east by Bolan Pass, the Marri and Bugti Hills, on the north by Chagai and Quetta-Pishin Districts and on the south by Las Bela and the Arabian Sea, Kalat, the biggest State in Baluchistan lies on the western border of Pakistan. It has an area of 53,995 sq. miles. Except for the plains of Kharan, Kachhi and Dasht in Makran the whole country is mountainous. The main ranges of mountains are the central Brahui, Kirthlar, Pab, Siahay, and Central Makran. They are intersected here and there by many small rivers the biggest of which is the river Rakshian flowing from south to north.

The country consists of rugged, barren and subarid mountains, rent by chasms and gorges, alternating with arid deserts and stony plains, so that the whole state is deficient in water. The soil is sandy but here and there alluvial deposits of bright red clay are found in the northern parts of Makran.

Permanent irrigation is possible only in the few tracts where water is obtained from karez, springs and rivulets of which there are not many; for the rest most of the vegetation depends upon the flood-water of the rivers.

The staple food of the people is wheat and jawar but on the coast of Makran dates are consumed in very large quantity. Rice, barley, millet, tobacco, potatoes and melons are also cultivated on a comparatively small scale. Pomegranate, apricot, almond, mulberries, vine and apple are also grown and exported.

Marri, Kachhi and Sarawan are famous for the excellent breeds of their cattle and horses. Among the forest products are medicinal drugs, and gum Arabic. All these products are exported but not in large quantity.

A few minerals have been discovered but no schemes for developing them on scientific lines have yet been prepared. In the Sor Ranges of Sarawan coal is mined but it is not of superior quality. Good earth salt, which is a very profitable industry in Kalat, is obtained from swamps by means of irrigation. Ferrous sulphate is obtainable in Jhalawan while iron ore, sulphur and petroleum are found at Shoran.

INDUSTRY

Cloth is made from cotton at Kachhi and Brahui. The women folk of these places are expert at needle work. Experiments in sericulture were conducted at Mastung but the industry could not thrive. Bark, coarse wool from sheep and goats is exported in large quantities. Fine and artistic embroidery of the Persian type pile-carpet making, manufacturing of leather goods, palm bags and mats are the commonest professions of the men and women in Kachhi, Mastung, and Kalat.

The total population of the State is 2,53,305. The people live in small villages in huts and tents. In the whole area of 53,995 sq. miles there are not more than 1,500 villages.

Brahuis, Baloch, Delwars, and Jats form the agriculturist class. "Loris" are artisans, while fishermen and seamen, who live on the Makran coast come from "Mels" and "Koras" communities. The whole of the population is organized in tribes who usually pay their revenues in kind. Barter is still in vogue in some parts of the country. The languages spoken are Balochi, Brahui, Delwari and Sindhi.

REVENUE

Before the birth of Pakistan, the revenue of the State used to be derived from three main sources:—(1) Subsidies and rents by the British Government according to the treaty of 1876; (2) Interests on the investments and, (3) Land Revenue. From the first two the average annual income amounted to about Rs. 1,30,000. The land revenue is paid in kind, the rates varying from $\frac{1}{4}$ to $\frac{1}{2}$ of the produce. There are some other taxes as well which bring the total rate of taxation up to almost $\frac{1}{2}$ of the total produce. Zar-i-Kalang and Zar-i-Shah are also levied at some places. Transit dues and Octroi (Sung) are additional sources of income. The total average revenue is over Rs. 14,00,000 per annum.

The whole State is divided into 5 divisions, Kachhi, Sarawan, Jhalawan, Makran and Kharan, the last being quasi-independent. In Makran the Gichkis, Nausherwanis, Bizanjans and Marwaris are the principal holders of Jagirs. They enjoy almost complete independence in revenue, civil and criminal matters. But they are still under the suzerainty of Kalat in accordance with the practices of the feudal system.

The forefathers of the present ruling dynasty were under the suzerainty of Kabul, but during the Afghan War of 1838, they established direct relations with the British Government.

In 1854, their alliance with the British was further strengthened and the Kalat rulers came under complete British protection.

The present ruler, H. H. Sir Ahmad Yar Khan, is known for his broad mindedness. He takes a keen interest in the welfare of his people and pays Rs. 50,000 out of his own privy purse towards the cost of education which is free.

The State which until sometime back was absolutely without any regular means of communication is now closely linked with Quetta, Peshawar and other places of importance in the neighbourhood.

The State acceded to Pakistan on March 31, 1948. Since then all possibilities of development have been and are being explored.

KHAIRPUR

This State covering an area of over 6,000 sq. miles lies in Upper Sind. The climate is hot and dry and the average rainfall is never more than 15" a year.

The soil is cultivable and agriculture is the chief occupation of the people. Wheat, cotton and other grains are the main products. Irrigation is by canals branching off from the river Indus at the Lloyd Barrage.

Oil seeds, ghee, tobacco, hides, wheat and cotton are exported and fetch a good price. Carbonate of Soda, Fullers' earth and wool are also produced. Among the manufactures are cotton, silk and woollen cloth. Lacquer work, carpet making and pottery are other important means of livelihood which are open to the artisan class. The population of the State is about 3,05,787 and the language spoken Sindhi. The average annual revenue of the State is about 52 lakhs.

The founder of Khairpur was a nephew of the ruler of Sind with the name Mir Sohrab Khan Talpur. The State was recognized by the British in 1852. The present ruler, H. H. Mir Faiz Muhammad Khan, succeeded to the gadi in 1935.

LAS BELA

The State of Las Bela lies one hundred and fifteen miles to the north-west of Karachi. It is separated from Sind by the river Hub. The greater part of the State consists of the valley and delta of the Puruli river. The area of the State is 7,043 sq. miles and the population 69,067. The average annual revenue is a little over Rs. 5,00,000 per year.

The rulers of the State claim their descent from Abul-Manad of the Qureshi tribe of Arabia. The name of the present ruler is Jam Mir Ghulam Qadir Khan. He is assisted in matters of administration by a Wazir. The State acceded to Pakistan on March 17, 1948.

KHARAN

This small State lying in the south of Kalat has an area of 18,508 sq. miles. The geographical and economic conditions are almost identical with those of Kalat.

The ruling dynasty belongs to the tribe of Nausherwanis who are the descendants of the old Kiani dynasty of Persia. The present ruler Sardar Bahadur Nawab Habibullah Khan Nausherwani is assisted by a Wazir in matters of administration. The State is divided into fifteen Nubats, five major and ten minor ones. The Nubats are appointed by the Chief himself.

CHITRAL

This is another border State lying in the north-west of Pakistan. Surrounded by the Hindu Kush mountains on the north, Badakhshan and Kafiristan in the west, Dir in the south and Gilgit, Mastuj and Yasin in the east, it covers an area of about 4,000 sq. miles.

The State can be divided into the valleys of Turikho, Mulkies, and Trich. These valleys are extremely fertile, and wheat, barley, maize and rice are grown in abundance.

Iron, copper, and ornament of superior quality are found in Koshkar. The mines are not however, fully worked. According to geologists it is possible the State contains more mineral wealth which is not yet explored.

The population of the State is 80,000 and the average annual revenue about Rs. 80,000. The exports of Chitral consist of daggers, sword hilts, and embroidered pieces of cloth, while fruits are another important source of income. Under British rule the Mchdar of Chitral used to receive an annual subsidy in return for services in the defence of the border line.

H. H. Mohammed Muzaffarul Mulk, the present Mchdar of Chitral, is a descendant of Baba Ayub who in the beginning of the 17th century settled in Chitral and entered the service of the then Rais of Chitral, who was a member of his own family. After a hundred years the Rais line became extinct and a descendant of Baba Ayub, Mchdar Shah known as Shah Kator I, became the Chief of Chitral.

DIR

The territory of this State, over 3,000 sq. miles in area, includes the country drained by the Panj Kora and its affluents down to its junction with Bajaur Rud.

The Nawab of Dir is also an over-lord, drawing tributes from a number of petty chiefs. In Dir proper live the Yusufzai Pathans while the non-Pathans are confined to the upper valley of Panj Kora known as Dir Kohistan. The river valleys are fertile and produce fruit in abundance. There are some forests on the flanks of the mountains, wherefrom timber is procured and exported. The average annual revenue of the State is over Rs. 3 lakhs. This income is mostly drawn from the forest of Panj Kora Valley. The population of the whole State is a little over 80,000.

The State was founded in the 17th century by Mulla Iltas known as Akhund Baba, but real power was first acquired by his grandson, Ghulam Khan.

Recently much improvement has taken place in the State. A motor road has been constructed to join Dir to Malakand. A private telephone line has also been established between Chakdara and Dir.

SWAT

This small State is situated in the valley of river Swat flowing on the borders of the N.W.F.P. The State can be divided into two sections, Swat Kohistan and Swat proper. The former is drained by the upper reaches of the Swat river and its affluents as far South as "Ain". The area of the State is about the same as that of Dir, about 3,000 sq. miles. The lower valley is peopled by the Akazai branch of the

Yusufzai Pathans while Swat Kohistan is peopled by Torwals and Garhwis. The fertility of the State depends upon the Swat river. The main commodity which is exported is fruit.

The ruler who consolidated his position in Swat during the period 1917-22, is a descendant of Akhund Sahib. The ruler's headquarters, Saidu Sharief, are 38 miles from Malakand and are linked with it by a motor road.

AMB

This State is situated in the upper valley of the Indus where the river divides the State territory into Trans-Indus territory and Feudal Tanawal.

The latter section lies on the left bank of the Indus and occupies the centre of the western part of Hazara district. The area of the state is only 225 sq. miles and the population 47,916. The main occupation of the people is agriculture.

The capital contains an Arms Factory where breach loading mountain guns, rifles and ammunitions are made by hand.

PHULERA

This is a minor portion of Feudal Tanawal. It consists of 98 small villages with a population of 8,757. The name of the ruler is K. S. Abdul Latif Khan.

ADMINISTRATIVE SERVICES

OWING to the small number of Muslims in the Civil Services of undivided India, one of the main difficulties which Pakistan encountered immediately after Partition was shortage of officers. Efforts were made to reduce this shortage to some extent by re-employing certain European officers of the former Secretary of State's Services on contract terms. These contracts were offered only to officers whose records showed that their ability and experience were above the average and the terms offered to them were attractive but not extravagant. In order to obtain officers for Junior Secretariat and Administrative posts, the General Administrative Reserve, which had been constituted in India, was expanded in Pakistan and 50 candidates were selected for appointment to it towards the end of 1948 from those who had been recommended as suitable by the Pakistan Public Service Commission.

Nine war service candidates, who had been recommended by the Federal Public Service Commission (India) as suitable for appointment to the war-reserved vacancies in the Indian Civil Service, and 18 candidates who qualified in India in the July, 1947 examination for recruitment to the Superior Services have been appointed to the Pakistan Administrative Service, which is the successor of the Indian Civil Service. Another examination was held at Karachi, Lahore and Dacca, in January, 1949, and it is hoped to appoint the next batch of candidates some time in September, 1949.

An Academy for the training of P.A.S. probationers was established at Lahore. The probationary course is for two years, the first year to be spent at Lahore and the next year, or the major part of the next year, in East Bengal. The Director of Academy is a senior member of the former Indian Civil Service. The probationers are given instruction in law and in Islamic culture. In addition they visit various centres of Government activity in West Pakistan, e.g., G.H.Q. at Rawalpindi, the Secretariat at Lahore, the Agricultural College at Lyallpur. They are also taught to ride.

The shortage of officers still persists and it has been decided to make further *ad hoc* recruitment from amongst those who have applied for appointment to the Pakistan Foreign Service but may not be selected, and also from amongst those who apply in response to an advertisement which it is hoped to issue shortly. The primary aim is to attract persons who have previous experience of Government service.

RECRUITMENT POLICY

In undivided India, direct recruitment to the All-India and Central Services had to be made in such a way as to secure certain fixed proportions of vacancies for Muslims and other minority communities. The question of the reservation on

a communal or territorial basis of the vacancies to be filled in Pakistan engaged the attention of Government early in 1948. It was decided that, in view of their educational advancement, the minorities in Pakistan do not require any reservation in their favour. There is, however, a 6 per cent reservation for the Scheduled Castes. In general, 15 per cent of vacancies are to be reserved for candidates who may not have acquired Pakistan domicile. The remaining 85 per cent of vacancies will, in the case of the All-Pakistan Services, be divided among the candidates belonging to the various provinces of Pakistan in the ratio of the Provincial cadre strengths, while, in the case of the Central Services, the vacancies will be divided on 50:50 basis between candidates belonging to East and West Pakistan. The Scheduled Castes reservation will be reckoned against the quota of the Province of Origin of the Scheduled Castes candidates concerned.

SURPLUS STAFF OF THE MINISTERIAL ESTABLISHMENT

The existence of staff surplus to requirements, was a very serious problem for Government to deal with and it took some time to settle the difficulties arising out of this problem. However, a considerable portion of the surplus staff was absorbed by the middle of 1948 and final orders on the subject were issued in July that year. Such of the staff as were not capable of absorption were served with notices of termination of their services but orders were issued to the effect that, *ceteris paribus*, they should receive priority over direct recruits in the filling of future vacancies.

A number of persons belonging to Indian Provinces were employed before the Partition by the Government of India. Although no options were allowed to employees of Provincial Governments in India, this class of Government servants exercised an option under a misapprehension and such of them as opted in favour of Pakistan came to Pakistan after Partition, and brought with them a difficult problem. It was, however, decided to accept them as regular officers. The question of transfer of their previously accrued rights is being taken up by the Ministry of Finance with the Government of India.

A number of persons who were not given the right of option left their posts and came to Pakistan. The question of transfer of their service records was taken up with the Government of India and arrangements have now been made with that Government to transfer and obtain their records on a reciprocal basis.

It was brought to the notice of the Cabinet Secretariat that persons who originally opted for Pakistan provisionally but changed their option finally in favour of India within the time

limit allowed for the purpose were not being entertained by the Government of India. That Government have been asked to take steps to ensure that the undertaking given to these optees that their provisional option would not in any way adversely affect their terms and conditions of service is honoured.

It has been decided that 60 per cent of the existing posts up to and including posts of Assistant Secretary and the corresponding rank should be made permanent in the various offices of the Central Government. Details as to how individuals should be confirmed against these posts are expected to issue in the near future.

FUTURE RECRUITMENT

The Cabinet Secretariat are considering the question of future recruitment to the ministerial staff in the Central Secretariat. At a meeting of the Secretaries to Government on 31st March last, certain recommendations were made in this connection and these will be implemented after approval.

To meet the future requirement of the Central Secretariat and its attached Departments, examinations for the grades of Assistants and Clerks are being held by the P.P.S.C. in June 1949.

The Establishment Branch of the Cabinet Secretariat is being consulted daily by other Ministries on various matters relating to the administration of Government. This Branch, in fact, the custodian of the rights and privileges of Government servants and it may be said that one of its most important duties is to exercise constant vigilance in seeing that the rights of Government servants are not overlooked or flouted.

PAY COMMISSION REPORT

The Pakistan Pay Commission appointed by Government in February 1948 to enquire into and report on the conditions of service of the Central and Provincial Services and their scales of pay and allowances, has submitted its report on the services under the Central Government. The report which covers about 300 printed pages has been engaging the attention of Government for some time past and it will take some time more before it is possible for Government to take decisions on all the numerous recommendations made by the Commission. Government have, therefore, dealt first with the recommendations affecting the scales of pay and allowances of non-gazetted officials. They have decided to accept the pay scales recommended by the Commission for the non-gazetted staff and in the

case of many of the categories, in order to afford as much relief as possible, have to some extent improved on the Commission's proposals specially in the matter of the starting salaries. The following are the pay scales accepted by Government:—

| Serial No. | | Existing scales. | Scales sanctioned by Government. |
|------------|--|-----------------------|--|
| 1. | Superintendents in offices other than the Secretariat where there is a departmental examination, as for instance, in the Audit and the Posts and Telegraphs Departments. | 175 15 400 | 200-15-380 15 500 |
| 2. | Stenographers | 125-5-180 10 300 | 160 10-250-15 325 |
| 3. | Assistants (Selection grade) | 140-10-310-15-400 | 330-10 400 100 (probation) 160-10-250 15-400 |
| 4. | Promotion posts for Upper Subordinates (a) vide 7 (a) below. (b) vide 7 (a) below. | No comparative scale. | (a) 185-15-350 with special pay upto Rs. 50. (b) 185-195 15 300. |
| 5. | Divisional Accountants, Superintendents in Departments where there is no departmental examination. | 80 8-200-25 2-225. | 125-10-225-E.B.-10 275-E.B.-25 2-350. |
| 6. | Graduate Clerks | 60-5-100-10-120 | 85 6-115-15 2-175-E.B.-10-225. (a) 125-25 2-350. |
| 7. | Upper Subordinates, i.e., Matriculates with 2 or 3 years' training in technical institute; Selection grades for skilled workmen. | 70-5-150-10-200 | (b) 125-10-225 |
| 8. | Highly skilled, Grade I | No comparative scale | 75-5 180 with efficiency bar at 100. 60-4 100-E.B.-5-120. 60-2 80. |
| 9. | Routine Clerks | 40-5-80 | |
| 10. | Skilled workmen, car drivers and trained non-Matriculates. | 45 | |
| 11. | Posts requiring literacy in English; Record sorters, etc. | 20-1-40 | 40-2-60 |
| 12. | Semi-skilled, duffries, etc. | 15-1/2-20-1-30. | 38-1-45 |
| 13. | Unskilled workmen engaged in manual or manipulative work or required to walk long distances. | 14, 15, 16 | 33-1/2-37 |
| 14. | Unskilled workers | 14, 15, 16 | 28-1-2-32. |
| 15. | Peons | 14, 15, 16. | 28 1/2-32 |
| 16. | Jamadar | 22-25 | 28 1/2-32 with special pay of Rs. 5. |

It should be noted that the above are standard scales into which the numerous existing categories of non-gazetted Government servants have to be fitted. The Commission have dealt with this in Part III of their Report and Government expect that the fitting-in process will be completed in a month.

DEARNESS ALLOWANCE

Government have also accepted the rates of Dearness Allowance recommended by the Commission for the non-gazetted staff which are as follows:—

| | |
|--|---|
| Employees drawing pay below Rs. 50 | Rs. 26 if residential accommodation is not provided otherwise Rs. 24, plus a dearness allowance of Rs. 1 in the case of Class IV employees. |
| Employees drawing pay from Rs. 50 to 100 | Rs. 30 |
| " " " " " 101 to 175 | 27 1/2% subject to a minimum of Rs. 30. |
| " " " " " 176 to 400 | 17 1/2% subject to a minimum of Rs. 48 |
| " " " " " 401 to 500 | Rs. 70 p.m. |
| " " " " " 501 to 750 | Rs. 85 p.m. |

In Eastern Pakistan an extra dearness allowance of Rs. 6 p.m. will be drawn in addition to the above as the cost of living is higher there.

HOUSE ALLOWANCE

(a) In stations where accommodation is difficult, i.e., Karachi, Lahore, Rawalpindi, Dacca, Chittagong, and Sialpur Government have also accepted the Commission's recommendation to grant the following House-rent allowance for other than Class IV Government servants, subject to the usual conditions:—

| | |
|--|-----------------------------------|
| Govt. servants drawing below Rs. 55 p.m. | Rs. 6. |
| " " " " " from Rs. 55 to 100 | Rs. 8. |
| " " " " " 101 to 250 | Rs. 10. |
| " " " " " 251 to 400 | 4% limited to a maximum of Rs. 15 |

(b) In the case of Class IV Government servants the Commission have recommended and the Government have agreed to provide them with free residential accommodation or the payment of the following rates of house-rent allowance in lieu thereof:—

| | |
|---|---|
| Karachi, Lahore, Rawalpindi, Chittagong, Dacca and Sialpur. | Rs. 5 p.m. (inclusive of Rs. 2 included in the rate of Rs. 26 for dearness allowance mentioned in para. 2 above). |
|---|---|

Again, in the stations mentioned in para. (a) above where the accommodation problem is difficult and a Government servant whose pay does not exceed Rs. 175 is forced to live at a distance of 3 miles or more from his place of duty, the Commission have recommended the payment of a Conveyance Allowance of Rs. 5 p.m. This recommendation has also been accepted by Government.

HOUSE BUILDING ALLOWANCE

In order further to ease the difficulties caused by a shortage of accommodation Government have also agreed to grant house-building advances to Government servants posted in Karachi, Rawalpindi, Lahore, Dacca, Chittagong and Sialpur on the following terms:—

(i) the amount of advance will be limited to 18 months' pay;

(ii) the advance will be recovered over a maximum period of 6 years.

OTHER RECOMMENDATIONS

Government have decided to give retrospective effect to these recommendations from the 1st January, 1949 with the following modification in the case of railway employees. The latter are, at present, in addition to certain cash dearness allowances, receiving benefits from the railway grain shops. The Pay Commission have recommended the abolition of the grain shops concession and to give railway employees the same rates of cost of living allowance as have been agreed to for other Government servants. The winding up of the railway grain shops has also been recommended by the committee which was specially appointed by Government to enquire into the working of these shops. The Government have, therefore, decided to abolish the grain shop concession from 1st April, 1949 and to give the railway employees from that date the Dearness Allowance at the rates recommended by the Commission. The improved pay scales for railway employees will, however, be given as in the case of other Government servants from 1st January 1949 and the arrears payable in this respect to the railway employees upto 31st March 1949 will be the difference between their new pay in accordance with the improved pay scales and their present pay plus the Interim Relief. In order not to inconvenience the railway employees who have been availing of grain shops concession and who will now have to make their purchases of cereals, etc. from the civil shops, Government have decided to continue the existing railway grain shops upto 30th June 1949, but the sales of various commodities to the railway employees will be at controlled rates and where no controlled rates exist, at local market rates. The future cash emoluments of railway employees will show a marked improvement on their present rates of pay and allowances including the benefit of grain shops concession.

The minimum emoluments which the lowest paid employees will now get will be Rs. 55 p.m. in West Pakistan as against Rs. 40-12 drawn by him at present. If he is also entitled to house-rent and conveyance allowances in big cities, like Karachi, Lahore, etc., his emoluments will be Rs. 63 p.m. In Eastern Pakistan he will be entitled to an additional Rs. 6 p.m. making a total of Rs. 69.

COST OF RECOMMENDATIONS

The net extra cost next year resulting from these decisions will be approximately Rs. 4 crores. This does not include the cost on account of certain other subsidiary benefits to the lower paid employees which are still under the consideration of Government and on which decisions will be taken shortly. Government have accepted this burden on their resources at a time when the strictest economy is called for in every direction and the demands for the defence of the country are also heavy in the conviction that this relief to the lower paid employees is quite essential. The prices of some commodities are already declining and a substantial fall in food prices in the near future is expected. With this prospect and the increased emoluments now sanctioned the circumstances of the non-gazetted staff should show considerable improvement.

EDUCATION

EDUCATION in the areas included in Pakistan received a great set-back as a result of the partition of India. The mass migration of the Hindus from Pakistan resulted in the closing down of a good number of schools and colleges and these could not be re-opened as most of the school buildings were and have been occupied by the refugees who poured into Pakistan in large numbers.

The migration of trained and experienced Hindu teachers and the lack of libraries, museums and scientific apparatus in colleges, were also responsible for throwing the educational organisation into confusion.

The students who migrated to Pakistan had to turn to employment rather than to studies owing to economic difficulties. The number of students being thus reduced, most of the experienced and trained teachers who came from India had to be given employment in government or commercial offices. Those who could not be so provided found themselves without employment.

Thus with little enthusiasm on the part of the citizens of Pakistan for higher academic education and the preoccupation of Central and Provincial Governments with political affairs, very little attention has been paid to education in Pakistan.

Since August 15, 1947, there has been a separate Ministry of Education in the Central Government, the present Minister of Education being the Hon'ble Mr. Fazlur Rehman, who is also holding the portfolios of Industries, Commerce and Works. The Provincial Governments are fully autonomous in regard to education except in respect of educational development programme for which they receive grants-in-aid from the Central Government. The Education Minister is advised by an Educational Adviser who is also the Ex-officio Joint Secretary of the Education Ministry. There are also a Deputy Secretary and an Assistant Secretary to the Ministry.

There are two Assistant Educational Advisers: In-charge of General and Technical Education respectively; and one Education Officer assisted by two Assistant Education Officers.

In the provinces also 'Education' is under the control of a Minister, with the exception of the West Punjab, where Section 92A Rule prevails, and Baluchistan which received its first instalment of reforms in June, 1949, and where Education is controlled by the Chief Adviser to the Agent to the Governor-General of Pakistan, assisted by a Superintendent of Education. The Director of Public Instruction is the permanent head of the department, and also acts as expert Adviser to the Minister.

EAST BENGAL

Education Minister. The Hon'ble Mr. Abdul Hamid; *D.P.L.*, Dr. Mohammad Qudrat-i-Khunda.

WEST PUNJAB

D.P.L., B. A. Hashmi.

NORTH WEST FRONTIER PROVINCE

Education Minister. The Hon'ble Mian Jafar Shah; *D.P.L.*, Mohammad Aslam Khan Khattak.

SIND

Education Minister. The Hon'ble Kazi Fazlullah; *D.P.L.*, In U. M. Daudpota.

BALUCHISTAN

Education Adviser. Qazi Mohammad Isa Khan; *Director of Education.* K. S. I. M. Khan.

In Pakistan there are three Universities (the Sind University, the West Punjab University, the Dacca University) which are also the examining bodies for the respective areas.

The whole structure of education in Pakistan and particularly in Karachi is being overhauled. Primary schools which in some provinces comprise four classes and in others five, are to be standardised, and Higher Secondary Schools, including the first year of the Intermediate Education, with a 3-year University degree are to be reintegrated. In this connection the Central Advisory Board of Education has met twice at Karachi and Peshawar. Its recommendations are being examined by the Pakistan Government and also by the Provincial and States Governments.

Council of Technical Education.—The Council of Technical Education for Pakistan set up in 1948 by the Pakistan Government also had two meetings since June, 1948. The recommendations of the Council with regard to standardisation of Engineering Degree Courses, establishment of polytechnics, and technical high schools are under active consideration by the authorities. A number of sub-committees set up by the Council are at present engaged in formulating different schemes for the development of technical education in the country.

Historical Records and Archives Commission.—In pursuance of the Government resolution of April 14, 1948, a Historical Records and Archives Commission was set up in order to recommend ways and means of preserving all manuscripts, records, documents and archives of historical and cultural interest. It held its first meeting at Karachi in December 1948 and recommended *inter alia* the formation of a number of regional survey committees for the survey and salvage of historical records and for the preparation of guides to Archives in Pakistan. The Government are considering the recommendations.

History Board of Pakistan.—Realising the great need of rewriting text-books for educational institutions in Pakistan, the Education Ministry have set up an Editorial Board of scholars representing all areas of Pakistan to take up the preparation of syllabuses and text-books of history.

The History Board which was set up in March 1949 in Karachi includes the Pakistan Deputy Minister for the Interior, Dr. Ishtaq Hussain Qureshi, Dr. Mahmud Hussain, Educational Adviser to the Pakistan Government, and representatives of the Universities. The Board has also been entrusted with the preparation of a standard work on the history of the Indo-Pakistan sub-continent.

At a meeting held in Karachi on July 7, 1949, the History Board finalised the pattern of the new Pakistan history and the principles on which it should be based. It was emphasised that the official history should strictly confine itself to the bare facts but should be underlined with the spirit of the renaissance of the Muslim nation in the Indian sub-continent, culminating in the establishment of Pakistan.

A number of writers have been selected and various chapters of the official history have been assigned to them for re-writing. The work is expected to be ready within six months for the approval of the History Board. It is said that new light on Tipu Sultan, Sirajuddaula and Mohammad Tughlak, the last of whom is sometimes described as the "wisest fool" in Indian history would be thrown. There also appears to be general agreement on the point that it was growing provincialism which had begun to take root in the 16th century and not the "Jocran Policy" of Aurangzeb or the interference funds among the Moghal princes, which was responsible for the downfall of the Moghal Empire. Much evidence will be put forward to support this view.

The Board has also accepted the theory that the British expansion in the sub-continent was illegal, an abuse of the facilities enjoyed by "foreign" trading concern. The "Black Hole"

incident, will be eliminated, and the "treacherous role" played by Lord Clive and Warren Hastings will be fully described. The Board also decided that the history to be taught in Pakistan schools should cover the pre-Vedic and the later Hindu period before the advent of Islam in the eighth century.

Among those who are selected to re-write history are:—Mr. M. B. Ahmed, Secretary, Constituent Assembly; Mr. S. M. Ikram, Joint Secretary, Ministry of Information and Broadcasting; Professor Haleem and Professor Rajkumar Chakravarty from East Bengal; Mian Abdul Aziz and Mr. Namadar Khan from West Punjab; Dr. Pithawala and Dr. Daudpota from Sind; and Professor Mahmud Hasan and Dr. Salim from Karachi.

EDUCATION IN KARACHI

Karachi, the capital of Pakistan, with a population of over a million has a relatively small number of schools for its population. The Education Ministry of the Central Government, is maintaining and directly administering over 20 primary and secondary schools. The total enrolment numbers over 50,000, and the schools have a complement of over 350 teachers.

In the beginning it was the intention of the Pakistan Government to hand over these schools to the Government of Sind but with the separation of Karachi the position changed completely and the Karachi Administration took over all primary and secondary schools with the exception of one school which is still being administered by the Sind Government.

There are, however, still about 90,000 students who are yet to be accommodated in the schools; and the managements have to resort to two or three shifts to cope with the problem.

There are only seven colleges in Karachi—Sind Muslim College, Islamia College, Dow Medical College, N.E.B. Engineering College, Commerce College, and a girls' College, with the Sind University as the examining body for the whole area. A girls' college was started in July 1949 and the Pakistan Government hope to start a technical high school and a science college, costing about 20 lakhs, within a short period.

A proposal for setting up a full-fledged first class residential University in the capital, with all the colleges in Karachi affiliated to it, is now under the consideration of the Education Ministry.

On the recommendations of the Karachi Inquiry Committee, constituted to devise ways and means to cope with the education problem in the capital which is serious, the Ministry of Education has evolved a 5-year-plan to open 500 primary schools and 100 secondary schools with an estimated cost of over 10 lakhs. Primary education will be made compulsory and free. The Karachi Administration has been asked to get all buildings at present occupied by the refugees vacated without any further delay.

Madame Maria Montessori, the well-known Italian educationist, paid a visit to Pakistan to organise a Montessori Training Course for teachers in Karachi.

The Pakistan Government selected about 30 teachers who had a three months' course, commencing from July 4, 1949.

Baluchistan Tribal Area.—A special provision of Rs. 5 lakhs was made in the budget for 1948-1949 for the educational uplift of the tribal areas in the North-West Frontier Province and Baluchistan. In consultation with the local administration, a scheme for the educational development of tribal areas in Baluchistan was prepared and sanctioned by the Government. Under this scheme, the Sandeman Higher Secondary School, Quetta, has been raised to the standard of a degree college, one middle school and one primary school have been raised to the High School and Middle School standard respectively, and 40 primary and 30 adult education centres have also been opened.

N.-W.F.P. Tribal Area.—In December last, sanction for the establishment of 30 adult education centres (with immediate effect) and the opening of 36 primary schools with effect from the academic session, April 1949 in the tribal area, was conveyed to the Local administration.

Girls College at Peshawar.—The Pakistan Government have given a grant both recurring and non-recurring for the establishment of a combined Science and Arts Degree College for girls at Peshawar in the 1949-50 budget.

Cultural Relations with other Countries.—The Government of Pakistan have in consultation with the Universities made arrangements for the study of French, Russian, Chinese and Spanish to encourage Pakistan nationals to learn some of the more important foreign languages. Lecturers in these languages who will be selected by the Pakistan Public Service Commission will be attached to the Universities in Pakistan for this purpose. French will be taught in the Universities of Sind and Dacca, while facilities for learning Russian, Chinese and Spanish will be provided in the Universities of Sind, Dacca and Punjab respectively.

To promote cultural contacts with the outside world, the Pakistan Government have also decided to offer 12 scholarships to students from other countries for technical training in Pakistan. Six of these scholarships will be offered to students from the Muslim countries of the Middle East and the others to Muslims from the near and far East countries. To cement the already friendly relations with other Muslim countries of the world, the Government have established cultural associations—Pakistan-Iran Cultural Association, Pakistan Arab Cultural Association, Pakistan Afghanistan Cultural Association and the Pakistan Turkish Cultural Association. Branches of all the associations have been set up in Dacca and Lahore and a branch of the Pakistan Afghanistan Cultural Association at Peshawar. These associations receive grants from the Government of Pakistan.

Iqbal Academy.—The Constituent Assembly of Pakistan has set up a Foundation Committee for the establishment of "Iqbal Academy"

with the object of popularising the philosophy and poetry of Dr. Sir Mohammad Iqbal. The Academy has so far met twice and approved the following proposals put forth by the Education Division with a view to achieving the above object:—Institution of Research Scholarships; Institution of Memorial Lectures on Iqbal; Reward of Literary Contributions on Iqbal; Translation of Iqbal's works into foreign and regional languages; Prominence to the poetry and philosophy of Iqbal in the programmes of Radio Pakistan; and inclusion of a representative selection of Iqbal's poetry in Urdu and Persian text-books. The Central Government has sanctioned Rs. one lakh as capital and Rs. 25,000 as a recurring grant for the proposed academy.

Anjuman Taraqqi-e-Urdu.—In view of the yeoman service rendered by the Anjuman Taraqqi-e-Urdu in the cause of Urdu literature, the Pakistan Government has sanctioned the payment to the Anjuman of a grant of Rs. 25,000 for the year 1948-49.

The Anjuman Taraqqi-e-Urdu is opening an Urdu College for Karachi in the near future. Urdu will be the medium of instruction in the college.

National Museum.—The Education Ministry appointed last year a special committee to frame a scheme for the establishment of a national museum at Karachi. Taking this scheme as the basis, Dr. R. E. Mortimer Wheeler, the Archaeological Adviser to the Government of Pakistan submitted a revised scheme. This revised scheme has since been accepted by Government of Pakistan and the museum will begin functioning in the near future.

As a result of an agreement with the Indian Government, the Pakistan Government will get their share of exhibits from India. The bulk of these exhibits will form part of the national museum of Pakistan at Karachi.

Educational Information Bureau.—The Bureau's library has grown considerably. The Bureau now possesses a large number of books including books on education, reference books, educational reports, calendars of the important

Universities in the United Kingdom, the United States of America and other countries like Australia. The library also maintains classified records of press notes and articles on education published in various newspapers.

Scheduled Caste Scholarships.—The educational uplift of the Scheduled Castes has continued to receive the attention of the Education Ministry and scholarships estimated to cost Rs. 1,20,000 were awarded to 276 Scheduled Caste students for pursuing scientific, technical and professional studies in Pakistan and India.

U.N.E.S.C.O. The question of Pakistan's membership of the U.N.E.S.C.O. has not yet been finally decided. Invitations were received by the Ministry of Education for participation in the following conferences:—

1. The 11th International Conference on Public Education held at Geneva in June, 1948. Mr. Latif, Deputy Secretary, and Mr. Akhtar Husain, Assistant Education Adviser, attended the Conference as Pakistan's representatives. Mr. Latif was elected one of the three Vice-Presidents of the Conference.

2. Berne Convention of the Laws of the Copyright Act. The Educational Attache, London, was deputed to attend this Conference held at Brussels in June 1948. The question of ratification of either the existing text or the revised text of the Act is under the consideration of the Pakistan Government.

3. Conference of the Representatives of Universities held at Utrecht (Holland). In accordance with the decision of the Inter-University Board of Education for Pakistan, Dr. O. M. Malik, Vice-Chancellor, Punjab University and Chairman of the Inter-University Board and Dr. A. Waheed, represented the Pakistan Universities at the Conference.

4. Beirut (Lebanon) Conference of the U.N.E.S.C.O. A delegation of observers consisting of Dr. Mahmood Hasan, Educational Adviser, and Dr. S. M. Husain, Vice-Chancellor, Dacca University, was sent to attend the third session of the General Conference of the U.N.E.S.C.O. at Beirut.

LAWS OF 1948

STATISTICALLY, the December session of the Assembly makes impressive reading. During the 10 days' session, 565 questions were dealt with, 10 official bills were passed, and a large amount of other business was conducted. Six Select Committees were also set up to examine the bills which were before the House.

Among the Bills passed by the House, the most interesting were the Hoarding and Black-marketing Bill and the Sind Rent Restriction (Amendment) Bill. Hoarding and black-marketing being comparatively novel offences, no comprehensive definition was found in the existing laws, thus causing great difficulty in punishing anti-social elements effectively. The Bill therefore provided a definition, a deterrent punishment and also a machinery for expeditious trial to root out this evil.

The Sind Rent Restriction (Amendment) Bill which was intended to ease the acute shortage of accommodation by making it possible to ration residential accommodation provided requisite power to the authorities to meet the situation effectively.

In the course of the same session, the Constituent Assembly (Legislative) also tackled a most important and far-reaching piece of legislation, the Public and Representative Officers (Disqualification) Bill, 1949. The purpose of this measure was to purify public life and strike effectively at the evils of bribery, corruption, jobbery, favouritism, nepotism, maladministration, wilful misappropriation or diversion of

public money, and any other abuse of official power or position. By enacting this Bill, Pakistan has forged an instrument which could effectively probe into misconduct in high places.

The Budget Session of the Constituent Assembly (Legislature) commenced on February 14, 1949, and continued till March 10, 1949. Fourteen Official Bills and 1 Non-Official Bill were passed and a large number of non-official resolutions were dealt with. The Central Budget for the year 1949-50 took up 7 days out of the total of 10 days of sitting. It was presented to the House on February 28, 1949, at 3 p.m. The general discussion took up 3 days and the demand for grants another 3 days. As many as 110 cut-motions were received out of which only 10 could be discussed. In addition, 3 Bills relating to Finance were passed.

Among other legislation, the most important were the Pakistan Finance Corporation Bill and the Bombay Prevention of Prostitution (Karachi Amendment) Bill. The object of the first Bill was to set up a much needed organisation for the provision of credit for medium and long-term capital requirements of industry which fell outside the normal activities of commercial banks. The other bill, as its name signifies, made certain changes in the existing laws to eradicate the evil of prostitution from the Federal capital.

The following is a list of the Acts passed by the Pakistan Constituent Assembly (Legislative) between March 19 and November 20, 1948.

The Railways (Transport of Goods) Amendment Act, 1948. The Railways (Transport of Goods) Act, 1947 came into force on March 25, 1947 for a period of one year. This Act gives powers to the Central Government to issue directions in regard to priority of transport of goods by Railways. The conditions which necessitated this control still existed and had been aggravated by the shortage of coal. It was considered that the powers of priority movement should be retained by the Central Government for a further period of two years.

The Constituent Assembly (Legislature) Members' Allowances Act, 1948.—This Act provided that the members of the Constituent Assembly (Legislature) shall receive travelling allowances and daily allowances at the same rates and under the same conditions as are or hereafter may be applicable to the members of the Constituent Assembly. Under Section 20 of the Government of India Act, 1935, as adapted, members of the Federal Legislature are entitled to allowances at rates and under conditions applicable to members of the Legislative Assembly of the Indian Legislature. These rates are much lower than those laid by Honourable the President for the members of the Constituent Assembly. This bill was passed to introduce the necessary uniformity.

The Income Tax, Excess Profits Tax and Business Profits Tax (Amendment) Act, 1948.—The changes in the tax law are designed firstly to reduce evasion and secondly to encourage

the establishment of new industries in Pakistan. In pursuance of the first object, the Act removes the restrictions placed by the Amendment Act of 1939 on the reopening of assessments and gives powers to the Income Tax Officer to visit business premises and call for and inspect accounts. It also defines more precisely the functions and powers of the Appellate authority. In pursuance of the second object it grants exemptions from tax for a period of five years in respect of profits of new industrial undertakings which do not exceed 5 per cent of the capital employed.

The Pakistan General Sales Tax Act, 1948.—The Act imposed a Central Sales Tax on the sale of goods in the provinces of Pakistan with effect from April 1, 1948. The existing Provincial enactments imposing the tax in East Bengal, West Punjab, and Sind ceased to operate except for the purpose of assessing and collecting tax on sales made prior to 1st April 1948.

The Insurance Amendment Act, 1948.—Under the provisions of sub-section (1) of section 7 of the Insurance Act, 1938, insurers are required to keep certain specified amounts as deposits with the Reserve Bank of India. When, by virtue of the Pakistan (Adaptations of existing Pakistan Laws) Order, 1947, the Insurance Act, 1938 became applicable to Pakistan with effect from 15th August 1947, it became necessary for insurers operating in Pakistan or desiring to do so to make separate additional deposits of amounts in Pakistan in relation to the insurance business done in this dominion. Although it is considered that the provision regarding separate deposits for business done in Pakistan is essential, nevertheless taking into consideration that insurers will now have to make two deposits in respect of the business which they carried on formerly and the smaller amount of business available in Pakistan, it was proposed to reduce the deposit amount by 50 per cent. Power was taken by the Central Government for fixing a date on which the provisions of the bill should be brought into effect.

Code of Civil Procedure (Amendment) Act, 1948.—Under section 80 of the Civil Procedure Code, notices of suits against the Central Government had to be served on a Secretary to Government. Such notices of suits in connection with compensation claims and summonses were being received in very large numbers in the Communications Ministry (Railway Division). It was felt that in the interests of economy it would be desirable that the notices should be served on the General Manager of the Railway concerned instead of the Secretary, Government of Pakistan, as at present it was, therefore, proposed to amend section 80 of the Civil Procedure Code to provide for notices of suits relating to affairs of a Government Railway, being served on the General Manager of the Railway concerned.

Pakistan Criminal Law Amendment Act, 1948.—The object of this Bill is to provide for more speedy trial and more effective punishment of cases of bribery and corruption. It was felt that the Prevention of Corruption Act II of 1917 passed soon after the passage by the Government of India of the Delhi Special Police Establishment Act XXV of 1946, did not provide for speedy trials, and bribe-takers still continued to abuse the privileges given to them under the present law by taking advantage of transfer applications and *de novo* trials, and thus defeat the object of their prosecution and the ends of justice. With a view of thwarting such abuse of privileges the Pakistan Government considers that a law should be enacted for speedy trials and for the more effective punishment of certain offences, and this Bill is designed for this purpose.

The Karachi Port Trust (Amendment) Act, 1948.—Karachi, the major port of Pakistan, was administered by a body of trustees appointed under the Karachi Port Trust Act, 1886. Section 82 of the Karachi Port Trust, 1886, enabled the Central Government to revoke, after giving a notice of six months, the powers of the trustees of the Karachi Port only in case the trustees failed to accomplish the purpose intended to be accomplished under the Act. It was proposed to amplify the provisions of section 82 so as to

enable the Central Government to take over and delegate the powers, at present exercised by the trustees for the purpose of maintenance, improvement, development or better administration of the Port at any time when Government consider such a step necessary.

The Chittagong Port (Amendment) Act, 1948.—The Chittagong port has assumed special importance consequent on the establishment of Pakistan. Its present position as the only major port in Eastern Pakistan has made it imperative for Government to ensure that nothing impedes the execution of plans, development which would enable the port to handle all the passenger and commercial traffic of its hinterland. The Chittagong Port was under dual control. The jetties, wharves, quays, godowns and all traffic movements in the port area were controlled by the Eastern Bengal Railway, while the Port Commissioners were responsible for keeping the Karnafull River open and navigable for ships using the Port and for levying Port charges. Section 101 of the Chittagong Port Act enables the Government to revoke, after giving notice of six months, the powers of the Commissioners only in case the Commissioners failed to accomplish the purpose intended to be accomplished under the Act. It was proposed to amplify the provisions of Section 101 so as to enable the Central Government to take over and delegate the powers at present exercised by the Commissioners for the purpose of maintenance, development, or better administration of the Port at any time when Government consider such a step necessary.

Pakistan Armed Forces (Recruitment & Conditions of Service) Act, 1948.—A doubt arose whether the Pakistan Government were competent to determine the conditions of service of officers holding the King's Commission in the Defence Forces of Pakistan. The legal authorities had advised that as the Governor-General represented His Majesty for the purposes of the Government of the Dominion, no reference was necessary to any authority in the U.K. and that all that was necessary was that the Central Government, of which he is the head, be empowered to regulate and control conditions of service as regards pay, leave, pension and general rights of the Defence Services of Pakistan, including King's Commissioned Officers. The Bill was designed to confer the necessary authority on the Central Government.

The Pakistan Federal Legislature (Deputy President's Salary) Act, 1948.—The object of the Bill was to provide a suitable monthly salary to the Deputy President of the Constituent Assembly of Pakistan (Legislature) under sub-section (4) of Section 22 of the Government of India Act, 1935, as adapted by the Pakistan (Provincial Constitution) Order, 1947. The salary was proposed to be fixed at Rs. 2,000 p.m. throughout the year in order to enable the Deputy President to devote his whole time to the duties of his office. He would not draw the ordinary daily allowance admissible to members of the Constituent Assembly when the Assembly would be in session.

Sea Customs (Amendment) Act, 1948.—It had been reported that salt dealers, taking advantage of the period of three years allowed by the Sea Customs Act, were deliberately delaying the clearance of their stocks from bonded warehouses at customs ports in order to create a shortage in the interior and force up the price of salt. It was, therefore, proposed that the Chief Customs Officer of a port should be given power to require the owner to remove his salt from a warehouse at any time after it has been kept there for four months.

Indian Merchant Shipping (Amendment) Act, 1948.—After the partition of the country into separate Dominions, much difficulty was felt at times in obtaining the services of certificated officers at the Pakistan ports, as laid down by Section 11 of the Indian Merchant Shipping Act, 1923. For the interim period, in order to avoid the Pakistan Shipping being held up unnecessarily, it was proposed that Government should take power to exempt any ship or class of ships from the provisions of the said Section.

The West Punjab Special Tribunal (Abolition) Act, 1948.—The work of the West Punjab Tribunal, constituted by a joint order made by the Governor-General of Pakistan and India under Section 9 of the Independence Act 1947, had been at a standstill owing to the absence of accused persons or witnesses or both. The expense in maintaining the Tribunal was a useless burden on the finances of the Government. The object of the Bill was to abolish the Tribunal and to make provision for the continuance of the trial of three cases pending before the Tribunal to the court of the District Magistrate of Lahore or any Magistrate subordinate to him.

The Arbitral Tribunal (Dissolution) Act, 1948.—The Arbitral Tribunal which was set up by the Arbitral Tribunal Order, 1947, made under Section 9 of the Independence Act, 1947, was no longer required as all the references made to it had already been disposed of and under Article 4 of the Order no further reference could be made to it after January 1, 1948. The Arbitral Tribunal (Dissolution) Bill, 1948, was introduced for the abolition of the Tribunal.

Protection of Ports (Special Measures) Act, 1948.—On the recommendations of a committee of officials and non-officials instituted to enquire into the causes of a fire at Chittagong Port, the Bill was introduced in the Legislature to declare the Chittagong port as "Protected Area," and to regulate the entry of the general public into its premises. The Government were also advised to take the same measures in regard to Karachi port.

The United Nations (Privileges & Immunities) Act, 1948.—The bill was introduced in the Pakistan Legislature to give effect to the Convention of the Privileges and Immunities of the United Nations.

The Salt Duty (Pakistan) Ordinance, 1948.—The Ordinance was promulgated throughout Pakistan by the Governor-General in exercise of powers conferred by Section 42 of the Government of India Act, 1935 as adapted by the Pakistan (Provincial Constitution) Order, 1947. The Governor-General of Pakistan added the following to Section 112 of the Indian Railways Act, 1930: "The burden of proof that there was no intention to defraud shall lie on the accused." In Section 113, clause 1, a fullstop was substituted after the word "originally started" and the subsequent portion of the clause was deleted.

Indian Railways Act (Amendment) Ordinance, 1948.—In exercise of the powers conferred by Section 42 of the Govt. of India Act, 1935 as adapted by the Pakistan (Provincial Constitution) Order, 1947, the Governor-General of Pakistan added the following to Section 112 of the Indian Railways Act, 1930: "The burden of proof that there was no intention to defraud shall lie on the accused." In Section 113, clause 1, a fullstop was substituted after the word "originally started" and the subsequent portion of the clause was deleted.

Indian Military Personnel Amnesty Ordinance, 1948.—In accordance with an Inter-Dominion Agreement that general amnesty should be granted to military personnel of the other Dominion, the Governor-General promulgated the Ordinance that no legal proceedings should be instituted in any Pakistan court against any member of the Indian military forces engaged in duties connected with internal defence or protection of evacuation of refugees in any part of Pakistan. All previous proceedings should be suspended and the convictions by any Pakistan court would be remitted.

The Cantonments (Requisitioning of Immovable Property) Ordinance, 1948.—The Central Government was empowered to requisition any immovable property (excluding the places of religious worship) by order in writing and to deal or use with the property in such manner as it thought fit.

Pakistan Special Police Establishment Ordinance, 1948.—The Pakistan Special Police Establishment, the superintendence of which is vested with the Pakistan Central Government, was constituted to investigate offences committed in connection with matters relating to the Central or provincial Governments.

The Indian Income Tax (Amendment) Ordinance, 1948.—A Second Proviso to Section 8 of the Indian Income Tax Act, 1922, was inserted providing for the exemption from income-tax of the interest receivable on security issued by the Central Government with the condition that interest shall not be liable to income-tax or super-tax.

Essential Personnel (Registration) Ordinance, 1948.—All essential personnel over the age of 18 and under the age of 55 years, residing in Pakistan and not employees of Pakistan Government, or the provincial Governments, were liable to register themselves at the Employment Exchanges.

West Punjab Disturbed Areas (Special Powers of Armed Forces & Validation of certain Acts) Ordinance, 1948.—The Commissioned Officers, warrant officers and non-commissioned officers of the Military, of Air Forces in area declared disturbed areas in West Punjab were empowered to arrest any person who has committed or was to commit a cognizable offence, enter and search without warrant any premises to recover any person believed to be wrongfully restrained or confined, or any property suspected to be stolen property or any arms believed to be unlawfully kept.

Pakistan (Exchange of Prisoners) Ordinance, 1948.—The ordinance was promulgated by the Governor-General of Pakistan to implement an agreement with the Government of India regarding the exchange of certain classes of prisoners between the Dominion of Pakistan and the Dominion of India. The provincial Governments were authorised to issue warrants for the custody and removal of transferable prisoners from the places of detention for his delivery at a place specified in the warrant. The provincial Governments, District Magistrates, Additional District Magistrates or Sub-Divisional Magistrates were authorised to issue warrants for the custody and removal of repatriated prisoners.

Pakistan Currency Ordinance, 1948.—The Central Government were authorised to issue Pakistan one Rupee Notes which would be current in Pakistan in the same manner and to the same extent and as fully as the Rupee Coin. They should also be legal tender in Pakistan for the payment of any amount.

Foreign Exchange Regulation (Amendment) Ordinance, 1948.—The following explanation was added to Section 8, Sub-Section 1 of Foreign Exchange Regulation Act VII of 1947:—

"The bringing or sending into any part or place in the territories of Pakistan of any such article as aforesaid, intended to be taken out of the territories of Pakistan without being removed from the ship or conveyance in which it is being carried shall none the less be deemed to be

bringing or as the case may be sending, into the territories of Pakistan of that article for the purposes of this Section."

Pakistan Refugee Rehabilitation Finance Corporation Ordinance, 1948.—The Ordinance was promulgated for the constitution of a corporation to render financial assistance in the rehabilitation of refugees. For the purposes of the administration of the Corporation, a Board of 10 Directors to be appointed by the Central Government, was set up. Not more than four of these Directors would be official.

The Central Excises and Salt and the Indian Tariff Act (Amendment) Ordinance, 1948.—The Ordinance was promulgated to provide for the imposition of an excise duty on cigarettes and for alteration from time to time of the preferential rates of duty.

The Pakistan (Control of Entry) Ordinance, 1948.—The Ordinance was promulgated to control the entry of persons coming from India into Pakistan. No person proceeding from any place in India would, unless exempted, enter any place in Pakistan, unless being a person domiciled in Pakistan or India, or he was in possession of a valid permit, or being a person not so domiciled, he was in possession of a valid passport.

Pakistan (Economic Rehabilitation) Ordinance, 1948.—The Ordinance was promulgated to make necessary provision for the restoration and maintenance of the economic life of Pakistan and the orderly settlement of the refugees in Pakistan. The Government would appoint Rehabilitation Commissioners and Deputy and Assistant Rehabilitation Commissioners to carry out the resettlement.

Pakistan (Protection of Evacuee property) Ordinance, 1948.—The ordinance was promulgated to make provisions for the protection and care of the property of evacuees from Pakistan. The Pakistan Government would appoint Custodians who would be a Judge of a High Court, an Additional, Deputy or Assistant Custodian would perform his duties under the general superintendence of the Custodian.

The Banking Companies (Restriction of Branches) Act (1946) Amendment Ordinance, 1948.—In clause (a) after the words and figures "Indian Companies Act 1913," the following words were added: "and includes every banking company incorporated in any place outside Pakistan and carrying on or intending to carry on business as a banking company in any province of Pakistan." And after clause (b) the following clause was inserted: "new branch" includes a branch which is reported after being temporarily closed.

The Indian Tariff Act (Second Amendment) Ordinance, 1948.—The Indian Tariff Act

was further amended to provide for the imposition of an export duty on mesita fibre.

The Riot and Civil Commotion Risks Insurance (Repealing) Ordinance, 1948.—The Ordinance was promulgated to repeal provisions of the Riot and Civil Commotion Risks Insurance Ordinance, 1917. Sections 5, 6, 8 and 10 of the Riot and Civil Commotion Risks Insurance Ordinance were repealed.

Pakistan General Sales Tax (Amendment) Ordinance, 1948.—The Ordinance was promulgated to authorise the Central Government to notify that the tax would be imposed only at a single point in the series of sales by successive dealers, and that the tax should be charged at such rate as might be specified in the notification.

The Indian Companies (Amendment) Ordinance, 1948. For clause (a) of sub-section (3) the following clause was substituted, namely, "Crown," "Empire," "Empire," "Empire," "Imperial," "King," "Queen," "Quaid-i-Azam," "Jinnah," "Royal," "State," "Dominion," "State Bank," "Bank of Pakistan," or any word which suggests or is imputed to suggest the patronage of His Majesty or the Quaid-i-Azam or of any member of the Royal Family.

It was laid down in the Ordinance that no company, unless it had obtained the authorisation in writing of the Secretary-General shall be registered by a name containing in any form the name of the United Nations.

The Trade Marks (Amendment) Ordinance, 1948.—The following was added after clause (b) of Section 69 of the Trade Marks Act, 1940:— "the emblem, the official seal and the name of the United Nations, or of any subsidiary body set up by that body or any abbreviation of any such name in such manner as to be calculated to lead to the belief that he is duly authorised by the Secretary-General of the United Nations to use the aforesaid emblem, seal or name."

The Cantonment Acts (1924) Amendment Ordinance, 1948. In clauses (b) and (c) of sub-section 27 of the Cantonment Act, 1924, for the word "twelve" the word "six" was substituted.

The Land Control (Capital of Federation) Ordinance, 1948.—The ordinance was promulgated to make provision for controlling the transfer and the market value of certain lands within the limits of the Capital of the Federation. No person could transfer any land lying within the specified area except with the prior approval of the Central Government in writing or any transfer made in contravention of this section would be void.

| D'Costa, B.A., LL.B. | | Official Commissioner. |

POSTS AND TELEGRAPHS

THE widespread disturbances which broke out on the eve of the partition affected the working of the Posts and Telegraphs Department very adversely. Most of the staff that had opted for Pakistan could not get to Pakistan and the Hindu staff in Pakistan in most cases had left their jobs. Attacks on the railway trains paralysed the communication system and the Posts & Telegraphs services were almost completely disrupted. The route from Delhi to Karachi via East Punjab was cut off.

The Department had a difficult task to perform. On the telegraphic side, it had to maintain telecommunication services, overseas communication links, arrange for spare parts and stores for the installations and also train the staff, with hardly any Posts & Telegraphs Workshops, store depots or training establishments.

The booking of accountable articles and issue of money orders for India was suspended and could not be re-opened till November, 1947. The exchange of mails between the two Dominions at Lahore and Amritsar had to be abandoned. About 5,000 bags full of mails were despatched from Lahore in the beginning of October to Amritsar in a sealed wagon attached to a refugee train and about 10,000 bags were received from Amritsar in the same manner. Such exchanges at an interval of a week continued between Lahore and Amritsar till it became possible to divert all service mails via Hyderabad (Sind) and Marwar. In the meantime, the posting of the staff was regularised and the staff too was getting trained. Short courses of intensive training and energetic drives to clear accumulations of mail were arranged which brought about considerable improvement in the situation.

Through the Orient Airways, air mail service was established in West Pakistan as well as between East and West Pakistan in October, 1947. In May 1948, daily air mail service was established between Dacca and Karachi. Air mail service to other eastern countries except China has also been started and now the air mail mileage, both inland and foreign, stands at 5,000 miles.

Soon after its establishment, Pakistan became a member of the Universal Postal Union which entitled her to exchange correspondence both by surface and air with all the other member countries under the rules and regulations of the Universal Postal Convention. Pakistan has also executed so far postal agreements with 18 foreign countries for the exchange of postal parcels. At present sea mails are being exchanged through Bombay due to the absence of any regular ship services of reasonable frequency from Karachi. Efforts are also being made to establish direct money order service with all the countries in the sterling area which was suspended in October 1947 due to foreign exchange control.

At the termination of the Stand-still Agreement in March, 1948, customs barriers went up restricting the exchange of parcel mails and other dutiable correspondence with West and East Pakistan at Bombay and Calcutta respectively. These bottle-necks caused inordinate delay in the transmission of postal articles. The application of international rates to inter-Dominion mails worsened the situation still further. An agreement, however, was reached at one of inter-Dominion Conferences and it was agreed to revert to the exchange of mails more or less on internal lines and to lower the rates to the level of the internal rates with effect from May 15, 1948. This resulted in considerable improvement in the carriage of mails.

Articles of postal stationery continue to be in short supply due to lack of Forms Press. But certain steps had to be taken to assert the independent working of the Department. Postage stamps overprinted "Pakistan" were therefore introduced from October 1, 1947 and postal stationery from January 1, 1948. Later on, designs were prepared for regular postage stamps, commemorative stamps and the postal stationery of Pakistan in general. One-anna refugee relief

labels were introduced in January and the sale proceeds of Rs. 5 lakhs were contributed to the Quaid-Azam's Relief Fund. Philatelic Bureaus have also been opened at Karachi, New Delhi, Rangoon, Sydney, Washington, London, Tehran and Kabul.

To give relief to the destitute refugees coming from India, the Government of Pakistan allowed limited withdrawals from the Post Office Savings Banks Accounts in Pakistan from the accounts of those refugees standing in India, as also full encashment of the certificates held by them. The Government also entered into a reciprocal arrangement with India by which the despatch of pass-books as also the application of transfers to the other Dominion was dispensed with. This removed the inordinate delays in the transfers of accounts and the risk of losing pass-books.

Pakistan lost all the Posts & Telegraphs Workshops, training establishments, technical centres and main stores depots. The overseas communications service was handled from Bombay, with beam wireless circuits both from telegraphy and telephony. Due to war time pressure, the telephone system in Pakistan required immediate replacement of such equipment, or sometimes complete overhauls. Other difficult questions were expansion of the telegraph and telephone services and long distance telephone facilities for civil use.

The Department successfully solved all these complicated problems. A wireless link between East and West Pakistan was established on October 26, 1947. The submarine cable between Karachi and Muscat which had been damaged long before partition, was repaired and overseas traffic re-started on November 18, 1947.

Plans have been prepared to establish telecommunication training centres in Pakistan for training all categories of staff and utilising the spare manufacturing capacity of the Railway Workshops for the manufacture of telecommunication apparatus and line stores. Local telephones have been expanded and long distance circuits, both telegraph and telephone, have been added on various routes. Since the establishment of the new state the telephone circuits between Lahore and Karachi have been increased from 3 to 6. The telegraph carrier channels on the same route have been increased from 6 to 18. Arrangements are in hand for adding 3 additional telephone channels from Karachi to Sukkur and from Sukkur to Lahore.

In Karachi alone, over 2,500 new telephone connections have been installed. The telephone exchange at Lyallpur has now been replaced and an entirely new automatic equipment has been installed. Expansion of telephone facilities at Lahore and Rawalpindi is also being planned.

A new 500 lines exchange was installed at Dacca in replacement of the old exchange with 300 lines. Three additional trunk telephone circuits were made available between Dacca and Chittagong. New telephone exchanges have been opened at Kushtiya and Rajshahi. Trunk telephone facilities have also been provided at Kushtiya, Rajshahi, Bahra, Faridkot, Habiganj and Jessore. Dacca has now direct telephone line to most of the places in East Bengal including Sylhet.

New trunk telephone exchanges are being installed at Lahore, Peshawar and Hyderabad (Sind). Three additional carrier channels have been provided between Sukkur and Quetta. Installation of "Voice Frequency" telegraph systems for providing 2 telegraph channels between Karachi and Quetta and Rawalpindi and Peshawar is in hand.

At the time of partition, almost all telegraph lines connecting various stations in Pakistan passed through Indian territory. The work of diversion was quickly taken in hand and before November, 30th, 1947, all lines connecting telegraph office and telephone exchanges lying in Pakistan were re-routed to pass within Pakistan territory only. Even telegrams between East and West Pakistan are transmitted by wireless. With this change, Dacca Telegraph Office is becoming a very important telegraph office in Pakistan.

The under-water cable crossing the Padma river at Gournali Ghat failed in September, 1947, but alternative route via Mymensingh was brought into service without any serious delay. Repairs to this cable are now under way.

Plans have been drawn up for the installation of wireless links between all important centres. The installation of more powerful transmitters for communication with countries abroad has also been planned.

INLAND POSTAL SERVICE RATES

| | |

Urgent Service in Foreign Telegrams is admitted to all countries with the exception of the following :-

United States of America and possessions, Fiji Islands except Suva, Netherlands East Indies, New Hebrides including Port Vila, Japan, Ifni and Reunion.

Charges for Urgent Telegrams are double the ordinary rates.

CIVIL AVIATION

DURING the first 18 months of Pakistan's existence the air services of the country under-went a great expansion. Policies and agreements have been reviewed and settled in the light of the new conditions, and the foundations laid for a further development of Pakistan's air services.

The Pakistan Civil Aviation Department is planned on a new basis. It is now sub-divided into six divisions dealing with: (1) Aerodromes and air traffic control; (2) Aeronautical tele-communications and radio navigational aids; (3) Regulations, publications and international relations; (4) General Administration; (5) Air transport operation and aircrew training and licensing; (6) Aeronautical inspection and examination and licensing of aircraft maintenance engineers.

Of these Divisions, the work of the first four, which are primarily concerned with the ground organisation, will be co-ordinated by a Deputy Director General. Officers of the Central Public Works Department will also be attached to the Headquarters Office of the Civil Aviation Department and accommodated therein to ensure satisfactory co-ordination in the planning and execution of Civil Aviation works. For training technical personnel for the Aerodrome and Communication Services, an Airway Training Centre will be established at Karachi Airport.

The sanctioned strength of the Department includes 134 gazetted officer posts, 556 other technical posts and 630 other non-technical posts, making a total of 1,320 posts. Compared with these requirements, the regular staff of the Department who opted for Pakistan numbered only 44 gazetted officers, 207 other technical staff and 307 other non-technical staff, making a total of 558 personnel. The sanctioned posts are being filled, firstly, in the light of the recommendations of Departmental Promotion Committees which are reviewing the suitability of members of the existing staff and, secondly by direct recruitment to vacancies which cannot be filled in by promotion.

AIR SERVICES

At the time of partition, the Orient Airways was the only air transport company registered in Pakistan and its operations were limited to the Calcutta-Akyab-Rangoon service. Under a standstill Agreement with India, this service was allowed to continue and new services were introduced under a temporary agreement which came into force on October 1, 1947. Soon air services were started from East to West Pakistan and from Karachi to Quetta, Lahore, Rawalpindi and Peshawar and also between Calcutta, Dacca and Chittagong. On March 11, 1948, a service was started from Karachi to Ahmedabad and Bombay.

These new services have meant a vast increase in air activities. The average monthly mileage covered by the Orient Airways is 1,43,983 as compared with 41,880 miles at the time of partition. This works out at an increase of 213 per cent or just over 1,00,000 miles per month. The number of services also increased from 1 to 7 and the total mileage of routes from 685 to 4,960, that is more than seven-fold.

In the meantime, the Government also formulated its policy and settled long-range questions. On December 4, 1947, the Government of Pakistan announced their decision to leave the operation of Scheduled air service to private enterprise subject to control and regulation through a system of licences and definite allocation of routes. The number of companies was limited to two with Pakistan capital and under the control of Pakistan nationals. An Air Transport Advisory Board presided over by a former High Court Judge was set up and its recommendations accepted by the Government.

New air transport licences have been granted to the Orient Airways and Pak Air Ltd. The services and the minimum of frequencies to

be operated in each direction by the two Companies subject to agreement with the other Governments are as follows:

Orient Airways Service

1. Karachi—Quetta—Lahore (twice a week)
2. Karachi—Lahore—Rawalpindi—Peshawar (three times a week)
3. Karachi—Delhi—Allahabad (non-traffic stop)—Calcutta—Dacca—Chittagong (three times a week)
4. Karachi—Ahmedabad—Bombay (three times a week)
5. Karachi—Quetta—Zshidan (Duzdab)—Moshed—Teheran (once a week)
6. Calcutta—Dacca (daily)
7. Dacca—Chittagong—Sylhet (daily)
8. Calcutta—Chittagong (daily)
9. Chittagong—Akyab—Rangoon (daily)

Orient Airways Ltd. consists of 23 aircraft, which include 20 Douglas D.C., one Sentinel I.S., and 2 Beechcraft Expeditor. On March 31, 1949, the route and total mileage covered by the Company was 11,304 and 1,67,310 respectively.

Pak Air Services

1. Karachi—Lahore (daily)
2. Karachi—Delhi (daily)
3. Lahore—Delhi (daily)
4. Lahore—Rawalpindi—Peshawar (three times a week connecting with Lahore—Delhi)
5. Karachi—Bombay—Colombo (three times a week)
6. Karachi—Calcutta—Rangoon—Singapore (three times a week)
7. Karachi—Cairo via intermediate points to be agreed (twice weekly)

The Pak Air Company's aircraft include 5 Douglas D.C. 3, 2 D.C., 4 Skymasters, and one C-46 curls commando. On March 31, 1949, the monthly route and total mileage covered was 3,574 and 1,04,121.

REPAIR AND OVERHAUL

The Government's air transport policy included the formation of a company to provide common facilities required by the airlines and by the Royal Pakistan Air Force, particularly facilities for the repair and overhaul of aircraft and for the training of aircraft mechanics and maintenance engineers. Accordingly, on June 22, 1948, the Government announced that it had approved the formation of a company to be known as "Pakistan Aviation Ltd." to be financed, directed and controlled by the Government and the two Pakistan airlines in partnership. Its authorised capital is Rs. 40 lakhs of which the Government share is Rs. 21 lakhs, the balance of Rs. 19 lakhs being subscribed in equal proportion by Orient Airways Ltd. and Pak Air Ltd. The Government thus has controlling interest. The airship hangar at Karachi Airport is being taken over by the Company for its operation and it is estimated that the organisation will ultimately be required to overhaul more than 70 air frames and 400 engines annually. This will require a staff of at least 500.

FLYING CLUBS

At the time of partition, two flying clubs were operating in Pakistan, Karachi Aero Club and the Northern India Flying Club at Lahore. The former has continued its activities without interruption but in the latter case operations were interrupted for a considerable period by difficulties arising out of partition. Provision has been made for subsidies to these clubs to be continued during the current financial year and for assistance to be given to an additional club to be started at Dacca to cater for the requirements of Eastern Pakistan.

Pakistan Government have accordingly sanctioned the following means of financial assistance to all flying clubs during 1949-50:—

- (1) A lump sum grant of Rs. 40,000 per annum, supplemented by a fixed amount per annum for every hour flown in excess of 1,000 hours.
- (2) From April 1, 1949, Government will not pay in respect of flying done by members over 28 years of age. For others Government will pay Rs. 20 out of the cost of Rs. 35 per flying hour.
- (3) Bonus for issue of new "A" licences has been enhanced from Rs. 250 to Rs. 300 per licence.
- (4) A sum of Rs. 1,730 has been sanctioned for the purchase of instruments of instruction in ground subjects.

The number of aircraft in use between Karachi and Lahore clubs are 2 Fox Moths, 4 Austers and 2 Tiger Moths. The number of pilots trained up to March 31, 1949 by the two clubs is 61. The Dacca Flying Club, which has not commenced operation so far, has given four Mark V Austers and one Fox Moth on the basis of a loan. The question of establishing a flying club in Rawalpindi is also under consideration.

The National Operators have formulated a scheme in consultation with Government, whereby a pilot, after having acquired a minimum experience of 100 hours Solo Flying and A.I. licence through the flying club, is employed by them as a Cadet pilot. This cadet is given advanced training in technical and other ground subjects and drafted as supernumerary pilot on regular services in order to acquire the requisite flying experience and other qualifications necessary for obtaining a "B" licence. The national operators thus serve a twofold purpose, that of helping to produce national commercial pilots and also finding employment for them. The result is that with Government subsidisation and the national airlines' assistance, a Pakistan national can now obtain a commercial pilot's licence at a cost substantially lower than previously.

To make up for the non-existence of a flying school the Government have decided to send for training four Pakistani instructors at the Air Services Training Ltd., Hample, Southampton. Arrangements are being made to train 6 pilots at the same institution for an English 'B' licence course. The selection is to be made from candidates having 100 hours or more Solo Flying experience.

AERODROMES

Though the development of civil aerodromes has been retarded by financial restrictions and shortage of experienced personnel, the organisation now approved provides for a limited development and operational manning of the following aerodromes to appropriate standards:

Western Pakistan

Karachi Airport, Lahore, Quetta (Samnagli), Hyderabad (Sind) (Bholari), Multan, Rawalpindi, Jacobabad and Peshawar.

Eastern Pakistan

Chittagong, Dacca (Teggaon) and Sylhet. Karachi Airport and the Flying Boat Base which is maintained by the B.O.A.C. at Karachi Creek, have been designated as International Airports, and it is proposed to so designate the aerodrome at Chittagong when the new areas and the aerodrome has been developed to satisfactory standards. The aerodrome at Bholari, in addition to serving Hyderabad (Sind) will provide a diversionary aerodrome when flying

conditions are bad at Karachi. In addition to the aerodromes listed above others are being maintained for future development to meet the needs of feeder air services.

The prominent position of Karachi Airport on the International trunk routes and the rapid expansion of national air transport activities require the continued development of this airport as a matter of the first importance. The shortage of domestic and other accommodation and the need for augmenting the electricity and water supplies to meet the increasing demand are under consideration together with plans for the construction of a new hotel and a new runway designed to take the heaviest types of aircraft likely to be used in future. The average monthly traffic figures at Karachi Airport during the period January to May 1948 were as follows:

| Aircraft arrivals and departures 1949 per month | |
|---|--------------|
| Passengers disembarking | 8,228 |
| and embarking | 8,524 |
| Passengers in transit | 3,524 |
| Mail—onloaded and | |
| offloaded | 107,722 lbs. |
| Mails in transit | 221,797 lbs. |
| Freight inloaded and | |
| offloaded | 339,523 lbs. |
| Freight in transit | 158,214 lbs. |

Soon after partition, the Government of Pakistan notified its adherence to the Convention

on International Civil Aviation and to the International Air Services Transit Agreement and on December 5, 1947 the new State became a member of the International Civil Aviation Organisation which has its headquarters in Montreal. Pakistan has also become a member of the Commonwealth Air Transport Council which has its Secretariat in London.

Before partition, agreements for the operation of air services had been concluded between the Government of India and the Governments of the U.S.A., France and the Netherlands. By virtue of the Indian Independence (International Arrangements) Order, 1947 these agreements were accepted as binding on Pakistan and the other contracting parties who have confirmed their acceptance of the position.

AIR AGREEMENTS

During 1948, Pakistan entered into several agreements with other countries and also joined International Organisations and participated in their meetings.

The air agreement between Pakistan and Ceylon was signed on March 1, 1949. The agreement between Pakistan and Australia was signed at Karachi on June 3, 1949. Negotiations of bilateral agreements with Egypt, Turkey, Norway, Iraq, Syria, Ethiopia, Burma and Czechoslovakia are envisaged and will be concluded as early as possible. Six countries

at present have permanent bilateral air agreements with Pakistan, namely, United States of America, Netherlands, France, India, Sweden and Ceylon.

INTERNATIONAL CIVIL AVIATION ORGANISATION

A Pakistan Delegation led by the Pakistan High Commissioner in India, Mr. Mohammad Ismail, attended the first International Civil Aviation Organisation, South-East Asia Regional Air Navigation, meeting held at New Delhi in November-December, 1948. The third Session of the Communications Division of International Civil Aviation held at Montreal in January, 1949, was also attended by a representative of this Department, Mr. M. A. Rafi, Deputy Director of Communications.

Mr. D. O. Bagalkot, Director of Communications, has proceeded to Canada to attend the third Assembly of the International Civil Aviation Organisation to be held in Montreal, Canada, commencing June 7, 1949. He will also have an opportunity to attend the Commonwealth Air Transport Council meeting. The fourth Session of the International Civil Aviation Organisation Legal Committee will also be held in Montreal at the same time. On the agenda are matters such as Revision of Warsaw and Rome Conventions, the legal aspects of search, assistance and rescue, and the avoidance of double insurance requirements.

RADIO PAKISTAN

ON the creation of the Dominion of Pakistan, three regional broadcasting stations were handed over to Radio Pakistan. These were: one 5-kW medium wave station at Lahore; one 10-kW medium wave station at Peshawar and one 5-kW medium wave station at Dacca. These stations had a comparatively small range and were primarily intended to meet local needs.

Since the partition (15th August, 1947), a further station has been set up at Karachi. This station was inaugurated on the first anniversary of Pakistan, the 15th August, 1948, with two small transmitters, one short wave and the other medium wave. Another 10-kW medium wave transmitter was set up at Karachi in November, 1948. This enabled the Karachi station to be heard satisfactorily within a radius of 60 to 70 miles.

In addition to the above, one 7.5-kW short wave transmitter has also been set up at Dacca. This enables the Dacca station to feed the whole of Eastern Pakistan on medium or short wave and provides a radio link between the Eastern and Western Pakistan.

Two short wave transmitters each of 50-kW are being installed in Karachi and are expected to be ready by about the end of the year 1949. These two transmitters will give Radio Pakistan a short wave coverage of the entire Dominion and in addition enable it to feed a number of European, Middle East and Far East countries.

The future expansion programme of Radio Pakistan envisages installation of medium wave transmitters at places which are out of reach for existing medium wave transmitters.

Pakistan Broadcasting Service comprises the following units: 1. News Organisation under the Director of News, Radio Pakistan, Lahore. 2. Broadcasting stations of Radio Pakistan at Karachi, Lahore, Peshawar and Dacca. 3. News Units at Peshawar and Dacca. 4. Office of the Research Engineer, Radio Pakistan, Karachi. 5. Office of the Engineer-in-Charge, High Power Transmitters, Radio Pakistan, Karachi. 6. Office of the Maintenance Engineer, Radio Pakistan, Karachi. 7. Office of the Editor-in-Charge, Radio Journals, "Pakistan Calling" and "Ahang." Radio Pakistan, Karachi. 8. Director of Training School, Radio Pakistan, Karachi.

All the above offices are subordinate to Radio Pakistan Headquarters (Office of the Controller of Broadcasting), which latter serves as a co-ordinating link between them and the Government of Pakistan through the Ministry of Interior, Information and Broadcasting Division. The Controller of Broadcasting is assisted by two Deputy Controllers (Programmes and Administration), a Director of Engineering who is assisted by an Additional Director of Engineering. The Deputy Controller, Administration is assisted by the Administrative Officer and the Deputy Controller, Programmes by the Assistant Director of Programmes.

Programme Journals.—At present, two fortnightly programme journals in Urdu and English entitled "Ahang" and "Pakistan Calling" respectively, are published. A similar fortnightly programme journals in Bengali will be published in the near future from Dacca.

Programmes. The existing programmes of Radio Pakistan because of the limitations of its transmitters are directed entirely to the Home audiences of each region and consist of the following:—

Entertainment items, e.g., music, dramas, features, etc.; spoken word items, e.g., lectures, talks, debates, discussions; variety programmes, reviews, radio presentations, religious services, recitations, school and university broadcasts, nation building and educative themes and news.

General Programmes.—There are broadcasts in Urdu, the regional languages and English and take approximately 20 to 40 per cent. of the total broadcast transmissions of each unit.

News. Radio Pakistan broadcasts news in Urdu, English, Bengali, Pushtu, Afghan, Persian and Kashmiri which take up 33 per cent. of the total broadcast time of each Station. The entertainment and music items consume about 40 to 50 per cent of the total broadcasting time.

The percentage of the various items at the stations of Radio Pakistan varies as follows:—

| Station. | Total Transmission Time: Daily Hrs. | Percentage of the duration of different items as compared to the total duration of transmissions. | | |
|------------------|-------------------------------------|---|--------------|-------|
| | | Music. | Spoken Word. | News. |
| Karachi | 9½ | 30 | 40 | 30 |
| Dacca | 9 | 35 | 35 | 30 |
| Lahore | 9½ | 27 | 43 | 30 |
| Peshawar | 9½ | 32 | 38 | 30 |

Select Audience Programmes.—These programmes are directed to special audience groups, such as, women, children, rural, troops, schools and universities and take 1-66 per cent. of the total broadcast time of each station. Out of these, programmes meant for community listening, e.g., "schools," "rural" and "troops" are broadcast from Lahore and Dacca.

Rural Broadcasts.—Due to the shortage of transmitters and community listening sets in rural areas these broadcasts are at present

restricted in extent. The Peshawar and Lahore stations broadcast programmes for rural audiences, the latter station doing a composite programme for rural listeners and troops daily for one hour.

As regards the Dacca Station, there were no community sets for the rural areas now forming part of East Bengal at the time of the partition; and rural broadcasts from that station have not so far been arranged.

Steps are now being taken both by the Central and Provincial Governments to encourage the installation of community receiving sets in rural areas. But Radio Pakistan would be able to arrange such programmes on an extensive scale only after the net-work of medium wave transmitters all over the country has sufficiently progressed.

Popular Programmes.—The following feature programmes of the various stations of Radio Pakistan are particularly popular among the listeners :—

| | | |
|-----------|--|---|
| LAHORE: | "Pakistan Hamara Hai" (Urdu) | Broadcast on Mondays, Wednesdays, Thursdays, Fridays and Sundays. |
| PESHAWAR: | "Waqt ki Awaz" (Formerly Zindabad Pakistan) (Urdu) | Broadcast on Tuesdays, Saturdays and Sundays. |
| PESHAWAR: | "Nawe Wadue" (Pushtu) | Broadcast on Mondays and Wednesdays. |
| DACCA: | "Amader Pakistan" (Bengali) | Broadcast daily. |
| KARACHI: | "Istiqbal-e-Pakistan" (Urdu) | Broadcast on Mondays. |

From the number of listeners' letters received, it can be inferred that these programmes have a special appeal for the audiences of Radio Pakistan.

MEDIUM AND SHORT WAVE STATIONS

KARACHI CENTRE:

- 363.6 metres (825 Kc/s)
 - 206.6 metres (1252 Kc/s)
- First Transmission .. 7-30 a.m. to 9-30 a.m.
 Second Transmission .. 12 Noon to 2 p.m.
 Third Transmission .. 5-30 p.m. to 11 p.m.

LAHORE CENTRE:

- 276 metres (1086 Kc/s)
- First Transmission .. 7-30 a.m. to 9-30 a.m.
 Second Transmission .. 12 Noon to 2 p.m.
 Third Transmission .. 5-30 p.m. to 11 p.m.

PESHAWAR CENTRE:

- 764.9 metres (629 Kc/s)
- First Transmission .. 7-30 a.m. to 9-30 a.m.
 Second Transmission .. 12 Noon to 2 p.m.
 Third Transmission .. 5-30 p.m. to 11-15 p.m.

DACCA CENTRE:

- 257.1 metres (1167 Kc/s)
 19.64 metres (15270 Kc/s)
 25.23 metres (11890 Kc/s)
- First Transmission .. 7 a.m. to 8-30 a.m.
 Second Transmission .. 11 a.m. to 1 p.m.

Third Transmission .. 4-30 p.m. to 10 p.m.
 On Fridays the second transmission at all Western Pakistan Stations are from 12 Noon to 1 p.m. only and at Dacca from 11 a.m. to 12 Noon only.

NEWS SERVICES

KARACHI & LAHORE CENTRES:

- 7-30 a.m. to 7-45 (English).
 7-45 to 8 (Urdu).
 12-40 p.m. to 12-50 (English).
 12-50 to 1 (Urdu).
 5-30 to 5-40 (English).
 5-40 to 5-50 (Urdu).
 5-50 to 6 (Local News and Announcements).
 8-15 to 8-30 (English).
 8-30 to 8-45 (Urdu).
 10 to 10-5 (Late news in English and Urdu).

PESHAWAR CENTRE:

- 9-5 a.m. to 9-15 (Pushtu).
 12-30 p.m. to 12-40 (Pushtu).
 6-30 to 6-40 (Pushtu).
 (Urdu and English news bulletins from Peshawar are broadcast at the same time as from Karachi and Lahore).

DACCA CENTRE

- 7-15 a.m. to 7-30 (Bengali).
 7-30 to 7-45 (English).
 7-45 to 8 (Urdu).
 11-40 to 11-50 (English).
 11-50 to 12 noon (Bengali).
 5-30 p.m. to 5-40 (English).
 5-50 to 6 (Local News and Announcements).
 7-45 to 8 (Bengali).
 8-15 to 8-30 (English).
 8-30 to 8-45 (Urdu).

CALL-SIGNS

As approved by the Pakistan Radio Board, the following call-signs have been allotted to the various stations of Radio Pakistan enforced with effect from the 29th April, 1949 :—

| Name of the Station. | Type of Transmitter. | Call-Sign. |
|--|-----------------------------------|--------------------|
| Lahore .. | Medium wave | APL |
| Dacca .. | Medium wave | APD |
| Dacca .. | Short wave | APD1 |
| (For other short wave frequencies at Dacca) APD2, 3 and so on. | | |
| Karachi .. | Medium wave | APK |
| Karachi .. | Subsequent short wave frequencies | APK2, 3 and so on. |
| Peshawar .. | Medium wave | APP |

THE STATE BANK OF PAKISTAN

JULY 1, 1948, was a memorable day in the financial history of Pakistan. On that day the State Bank of Pakistan was formally declared open by the Quaid-e-Azam. To avoid dislocation in the monetary system of Pakistan, it was imperative for Government to have complete control over its currency. It was, therefore, a question of time before Pakistan had a Central Bank of its own. It is matter for gratification that the State Bank has commenced to function much earlier than was anticipated at the time of the partition of India.

It was in the fitness of things that the founder of Pakistan, Quaid-e-Azam Mohamed Ali Jinnah, should have been asked to perform the opening ceremony of the Bank. Addressing over 1,500 distinguished guests, including the Prime Minister of Pakistan, the Governor of Sind, the Members of the Pakistan Central and Sind Governments, and the members of the Foreign Diplomatic Corps, the Quaid-e-Azam declared:

"The opening of the State Bank of Pakistan symbolizes the sovereignty of our State and I am very glad to be here today to perform the opening ceremony."

Messages of good-will were received from Australia, Burma, Canada, Ceylon, China, Egypt, India, Iraq, New Zealand, Spain, Turkey, the U.K. and U.S.A. were read out by the Secretary of the Bank.

CONSTITUTION AND FUNCTIONS

Describing the functions of the State Bank, Mr. Zahid Husain, Governor of the Bank, remarked:

"The State Bank of Pakistan has from today taken the place of the Reserve Bank of India in Pakistan, and we now enjoy complete independence in the domain of banking and currency without which our freedom to order our

economic affairs would be very severely restricted and circumscribed. The State Bank will be the banker of the Central and Provincial Governments of Pakistan. It will be the Bank with which other banks will maintain their reserves of cash balances. It will have the sole right of issuing currency notes in Pakistan and will be responsible for managing the currency of Pakistan in the best interests of the country."

Unlike some of the other Central Banks, the State Bank of Pakistan will not be controlled by a few private individual shareholders. The initial capital of the Bank has been fixed at three crores of rupees divided into 3,00,000 shares of rupee 100 each. The majority of these shares (51 per cent) have been, under the law, purchased by the Central Government as the representative body of the people, and the remaining shares (49 per cent) have been made available to the public. But here also a limit of 500 shares has been fixed for one person singly or jointly with other persons. Special preference has been given to small investors.

The cumulative dividend to be distributed among the shareholders will not exceed the rate of 4 per cent per annum. The surplus profit will be transferred to the Reserve Fund until this amounts to three crores of rupees, the initial share capital of the State Bank. When this target has been reached, the remaining profits will be handed over to the Central Government.

Every scheduled Bank will have to maintain a balance with the State Bank, the amount of which shall not at the close of business on any day be less than 5 per cent of the demand liabilities and 2 per cent of the time liabilities. The State Bank, however, will not engage in trade or influence directly any of commercial or the industrial undertakings.

The Governor will be the Chief Executive Officer who, on behalf of the Central Board, will conduct all the necessary business of the

Bank. The supervision and direction of the affairs and business of the State Bank will be entrusted to a Central Board of Directors. The Board will consist of the Governor, the Deputy Governor, if any, and 7 Directors. Five Directors will be appointed by the Central Government and one will be elected from each area by the shareholders registered in Karachi, Lahore and Dacca separately.

ADVISORY BOARDS

The Central Board will be, from time to time advised by the local Boards of the three areas. Each local Board will consist of 4 members elected from amongst themselves by the shareholders registered in the area concerned and not more than five members nominated by the Central Government from amongst the shareholders registered in that area. No shareholder can be registered in more than one of the circles. In exercising the power of nomination the Central Government will aim at securing the representation of territorial or economic interests not already represented, and in particular interests of the co-operative banks. This provision has been made so as to bring the agricultural class in touch with the central banking authorities of Pakistan.

The State Bank will thus control the currency and monetary policy, which is a factor of supreme importance in the economic life of the country. It is, however, considered necessary that the business of the Bank should be conducted on purely scientific lines under the guidance of the best available experts and that the Bank should be kept as free from political influences as possible. It has been accordingly provided that no member of the Cabinet or any Provincial Legislature will be eligible as Governor or Director of the Bank. Similarly all Government or State officials who draw their salaries from the Government Treasury shall be debarred from becoming Directors of the Bank.

PAKISTAN'S SECOND BUDGET

THE Finance Minister, Mr. Ghulam Mohammad presented the second budget of Pakistan on February 28, 1949. The budget, as in the last year, included the Railway income and expenditure as follows:

| | (In Lakhs Rs.) | | |
|--|--------------------------|---------------------------|--------------------------|
| | Budget Estimates 1948-49 | Revised Estimates 1948-49 | Budget Estimates 1949-50 |
| GROSS REVENUE— | | | |
| Principal heads of Revenue | 41.10 | 47.00 | 55.43 |
| Railways and Posts and Telegraphs .. | 37.15 | 37.65 | 39.05 |
| Other heads | 11.48 | 10.99 | 13.71 |
| TOTAL | 89.73 | 95.64 | 1,08.19 |
| GROSS EXPENDITURE— | | | |
| Defence Services | 37.11 | 40.28 | 47.22 |
| Railways and Posts and Telegraphs .. | 37.15 | 36.89 | 37.90 |
| Other expenditure | 15.42 | 18.04 | 22.08 |
| TOTAL | 89.68 | 95.21 | 1,07.20 |
| SURPLUS | 5 | 43 | 99 |
| Extra expenditure due to IMPLEMENTATION | | | |
| PAY COMMISSION RECOMMENDATIONS .. | | | 7.76 |
| (Not included in Budget) | | | |
| DEBT C provision in budget for Railway cheap grain shops (being abolished) | | | 3.76 |
| NET EFFECT PAY COMMISSION RECOMMENDATIONS .. | | | 4.00 |
| DEFICIT | | | 3.01 |
| RELIEF to the poor by way of concessions .. | | | 2.2 |
| NET GAP TO BE MET | | | 5.21 |
| EFFECT OF TAXATION PROPOSALS | | | 5.27 |
| NET SURPLUS | | | 6 |

Instead of the estimated surplus of Rs. 5 Lakhs during the year 1948-49, the year is now expected to close with a net surplus of Rs. 43 Lakhs, as the actuals of Pakistan's revenues have proved to be better than was originally estimated. Certain developments in the political situation, the serious floods in Sind and the West Punjab, refugees from Kashmir, trade position, were some of the important points touched by the Finance Minister in his budget speech.

RAILWAY BUDGET

Regarding the Pakistan Railways, the Finance Minister said: "The Pakistan Railways registered a loss of Rs. 1.87 crores for the period 15th August 1947 to 31st March 1948 against the loss of Rs. 1.5 crores assumed in the estimates for that period. Conditions, however, soon began to improve in many directions and the total gross earnings for the current year are now placed at Rs. 33.38 crores against Rs. 32.59 crores originally estimated. With the working expenses at Rs. 32.58 crores we now expect that the anticipated nominal surplus of Rs. 3,000 will be converted into a surplus of Rs. 79.5 lakhs.

Gross earnings in 1949-50 are estimated at Rs. 34.5 crores whereas working expenses would be Rs. 33.5 crores. The year is thus expected to show a surplus of Rs. one crore which will be converted into a deficit of Rs. 82 lakhs on implementations of Pay Commission recommendations. The actual cost of the implementation of Pay Commission Recommendations, with the improvements made thereon by the Government, is expected to be Rs. 5.58 crores on the Railways in the year 1949-50. After deducting the provision of Rs. 3.76 crores for cheap grain shops which will be abolished, the extra cost

would be Rs. 1.82 crores. Taking into account the surplus of Rs. one crore, the net deficit would be Rs. 82 lakhs. The Finance Minister said that every effort would be made to meet this deficit by reduction in operational charges, by improving the collection of revenue and by other means.

The Works programme on the Pakistan Railways includes a provision of Rs. 50 lakhs for quarters for staff in Eastern Pakistan, where there is acute shortage of accommodation and the staff has been suffering considerable hardships since partition.

NEW LINES

The year 1948-49 saw an addition of three lines to the existing Railway system in Pakistan. The Sind section of the Jodhpur Railway has been taken over by the N. W. Railway, while the East Bengal Railway purchased the Khulna Bagerhat Light Railway and the Mymensingh-Bhairab Bazar Railway.

The survey of a suburban Railway for Karachi has been completed by the North Western Railway. On the Eastern Bengal Railway, surveys of Jessore-Darsana and Dacca-Aricha sections have been sanctioned. Preliminary arrangements for starting land acquisition and earth work on the Jessore-Kalighat section of the Jessore-Darsana project have been taken in hand. Doubling of the track in the Akhaura-Bhairab Bazar section is also progressing. The Saidpur workshop has been remodelled to meet the additional broad-gauge repair requirements, while the Bahawal workshop is being rehabilitated to carry out metre-gauge repairs displaced from Saidpur due to the increase in the load.

Regarding the working of the Pakistan Railways, the Finance Minister said the General position on the whole continued to be somewhat reassuring. "Working of the East Bengal Railway has been far from satisfactory. This Railway registered a loss of Rs. 1.45 crores in 1947-48 and is likely to show losses of Rs. 1.39 crores and Rs. 48.51 lakhs in the current and next financial years.

Due to shortage of coal, Pakistan has converted 20 per cent of her locomotives on the N. W. Railway into oil burning ones and experiments are being carried on with wood on the E. B. Railway so as to reduce the country's dependence on coal supplies from outside.

POSTS AND TELEGRAPHS

A loss of Rs. 4 lakhs during 1948-49 as against a loss of Rs. 20 lakhs was registered by the department during the seven and a half months of 1947-48. For the year 1949-50, receipts are expected to be Rs. 4.54 crores and expenditure at Rs. 4.40 crores resulting in a surplus of Rs. 14 lakhs. The implementation of the Pay Commission recommendations would convert this surplus into a deficit of Rs. 33 lakhs. The Finance Minister promised that the present drive to reduce expenditure would be intensified and an all-out effort would be made to improve efficiency and increase revenue.

The outlay on capital assets under this head includes an amount of Rs. 19 lakhs for construction of housing accommodation for the staff in Eastern Pakistan.

A Radio Telegraph link has recently been established between Eastern and Western Pakistan and the United Kingdom. It is hoped shortly to install new equipment for improving this service and for providing a radio-telephone link between Eastern and Western Pakistan and with London and through London with U.S.A. and other European countries. Plans are ready for an expansion during 1949-50 of the telephone systems in Karachi, Chittagong and Dacca. The expansion of the telephone exchanges at Lahore and Rawalpindi, already in hand, would be completed during the ensuing year. A repair shop for repairing telecommunication instruments is proposed to be started in the N.W. Railway workshops at Mughalpura. Provision has been made in the Budget for the establishment of a training centre for imparting technical training in telecommunication subjects which would help Pakistan in providing the requisite technical staff.

DEFENCE

Defence claimed a large percentage of the gross revenues as well as expenditure. The Finance Minister stated that Pakistan firmly believes in following a policy of international peace but in order that she may have peace she has to be fully prepared to meet any threat to her security. Government have therefore made adequate provisions for the Army, Air Force and Navy. Next year's budget includes a provision of Rs. 47.22 crores under Revenue and Rs. 27.13 crores under capital outlay as compared with the expenditure of Rs. 40.28 crores under Revenue and Rs. 23.11 crores under capital during 1948-49. The provision for the next year is about double the expenditure which was incurred by the whole of India before the Second World War.

PROVISION FOR INDUSTRY

A provision of Rs. 4 crores has been made on schemes of industrial development. This is in addition to a sum of Rs. 1.53 crores which will be paid by the Central Government to the Industrial Finance Corporation as part of its share capital. The Provincial Governments are also being helped by the Central Government to push on with their development schemes. In the current year (1948-49) loans to the extent of Rs. 12 crores were sanctioned in favour of provincial Governments for Productive Development Schemes. A provision of Rs. 10 crores has again been made in the next year's budget on this account.

Due to migration, the population of areas comprising Pakistan has increased appreciably and floods last year created a shortage of foodgrains which had to be met by imports from other countries in quite large quantities. A sum of Rs. one crore has been provided for grants for schemes of agricultural development. In addition schemes of agriculture and irrigation to the extent of Rs. 30 lakhs have been sanctioned for Baluchistan.

EDUCATION

Education has not been neglected in the budget. Though education like agriculture is a provincial responsibility, the Centre has provided Rs. 3 lakhs for the Miss Fatima Jinnah Medical College at Lahore; Rs. 5 lakhs for the advanced

training of women in nursing and social sciences and Rs. 7½ lakhs for scientific and industrial research including scholarships. A sum of Rs. 5 lakhs had been provided for the education of the scheduled castes in the budget for 1948-49. A similar amount has been set apart this year also for the same purpose.

TRIBAL AREAS

A sum of Rs. 10 lakhs has been set apart for improving the conditions of living in the Tribal areas. This is in addition to the annual subvention of Rs. one crore to the Frontier Province. An 'on account' payment of Rs. one crore will be made to Sind for the assets taken over by the Central Government in Karachi. The Sind Government will be compensated for the loss of revenue due to transfer of Karachi to the Centre, after the recommendations of the Assets and Liabilities Committee have been considered by the Government.

Government have also decided to embark upon a programme of reconstruction in Karachi which includes the construction of 3,000 quarters for staff, and 80 flats for officers in Karachi at a cost of Rs. 1.3 crores.

CONCESSIONS TO POOR

The following concessions to relieve the burden on the poor were given in the budget:—

(1) In view of the high cost of living, relief is being given in Sales Tax. Foodgrains, vegetables and milk, which constitute the primary necessities of life, will no longer be subject to Sales Tax. The relief afforded on this account is of the order of Rs. 14 crores per annum.

(2) Duty on kerosene oil will be reduced from 4 annas to 3 annas. This concession will cost the Government a sum of Rs. 15 lakhs.

(3) The minimum Income Tax limit will be raised from Rs. 2,500 to Rs. 3,000 per annum. This will cost about Rs. 20 lakhs.

(4) Import duty on machinery will be reduced from 10 per cent to 5 per cent.

(5) Export duty on sheep and goat skins will be reduced from 10 to 5 per cent. This will cost the Government about Rs. 10 lakhs.

NEW TAXES

Following new taxation measures were announced by the Finance Minister and later incorporated in the Finance Bill 1949:—

(1) Increased import duties on tobacco products and other luxury items; application of import duties to India. This will yield Rs. 2.5 crores.

(2) Export duties on cement, fish and lambos. These will produce Rs. 75 lakhs.

(3) Excise duty on Jute. This will affect India only. This will produce about Rs. 180 lakhs. Announcing this the Finance Minister said that if the government of India agreed to accord to Pakistan the same concession as they now gave to other countries, Pakistan would gladly continue to export jute to India free of excise duty.

(4) Some increases in Telegraph, Telephone and money order charges.

All these measures put together would produce Rs. 5.27 crores. Total revenue would thus amount to Rs. 111.26 crores against an expenditure of Rs. 111.20 crores, leaving a surplus of Rs. 6 lakhs.

ROAD TRANSPORT

THE road system of Pakistan is altogether inadequate considering the requirements of the country.

The national highways were subject to very heavy traffic on account of the movement of troops and supplies during the war. After partition, especially in Western Pakistan, these roads were subjected to further strain owing to the movements of millions of refugees. As a result of this, national highways in Pakistan have suffered greatly in respect of their surface conditions. The renewal of roads that have deteriorated in the past and further extension of the road system are urgently called for.

Unlike railways roads are a provincial subject under the present constitution. For the last 20 years, the undivided Government of India had been exercising some control in respect of roads through the agency of the Transport Advisory Council and the working of the Central Road Fund. But with effect from April 1947 the Government of India decided to accept financial responsibility for the construction and maintenance of national highways.

Twenty-two months after the establishment of Pakistan, a Transport Advisory Council was set up at the first Pakistan Road Transport Conference held in Karachi on May 26 and 27, 1949.

The Advisory Council consists of the representatives of the Central, Provincial and States Governments. Its functions are advisory—to make recommendations designed to evolve a policy for the development of a co-ordinated system of transport and suggest suitable measures to give effect to that policy. The special problem of East Bengal waterways also comes under the purview of the Advisory Council.

The Pakistan Road Transport Conference also decided to gradually nationalise the road transport system. Certain routes were nationalised with immediate effect while the remaining routes were to be nationalised gradually.

It was also decided that private bus-owners would be allowed to ply their buses on some specified routes. That competition with the railways should be avoided was also agreed upon by the representatives. They also agreed to give a share to the railways in schemes for operating nationalised transport on roads that run parallel to railways. It was also decided to set up a non-official organisation to be known as Pakistan Road Congress which would be composed of specialists and experts to advise the Provincial and Central Governments on technical matters.

Another question that the Road Transport Conference discussed related to control over distribution and prices of motor vehicles, batteries, tyres, tubes and spare parts. It was further decided that for the present there was no need to impose new controls or continue old ones except in some cases such as import of spare parts from hard currency areas. This decision, however, is subject to changes from time to time.

The Conference further recommended the establishment of a Road Fund for the utilisation

of the proceeds from the extra duty of 2½ annas per gallon on motor spirit. Yet another recommendation was the standardisation of the whole road transport system whether private or nationalised.

Finally the Central Government were asked to pass legislation to implement the recommendations of the Pakistan Road Transport Conference.

(For figures relating to mileage, etc. please see article on roads under India).

WATER TRANSPORT

PAKISTAN has an extensive overseas trade, as she is rich in valuable cash crops like jute and cotton, and has good exportable surplus of foodgrains, hides and skins, raw wool and tobacco. With the establishment of the new state, Karachi and Chittagong the two big ports have been declared ports of registry at which ships can be registered.

There are at present three Pakistan shipping companies, viz., Messrs. Muhammadi Steamship Company Limited, East and West Steamship Navigation Company Limited, and Karachi Steam Navigation Company Limited. These firms control shipping of 1,400,000 tons which consist of cargo vessels only. The starting of passenger service is under consideration.

Pakistan being a maritime country, there is a tremendous scope for the development of the shipping industry. Its nationals take readily

to the seaman's career. Before the partition about 150,000 seasoned seafarers used to be recruited annually from both East and West Pakistan.

There are two major ports—Karachi and Chittagong. Karachi which is both a "port of call" and a "port of registry" serves the entire need of the import and export trade, as well as the passenger traffic of Western Pakistan. It is well developed, and quite capable of handling the normal trade passing through it. There are at present 21 wharf berths and 18 sets of moorings, and the capacity of the port is 12,000 tons of cargo per day. Construction of a dry dock each for commercial and naval ships is also being proposed. The estimated cost of the dock vessels is about Rs. 1,02,00,000. It is also proposed to increase the existing transport facilities on the east and west wharves of the port. (See 'The Ports' below).

Chittagong which is situated at the mouth of the Karnatulli River in Eastern Pakistan, enjoys the reputation of being one of the best natural harbours of the world. It was, however, not fully developed by the Indian Government because of its vicinity to the port of Calcutta. With the advent of Pakistan, the port has assumed great importance and its developments is one of the main concerns of the Pakistan Government. The normal capacity of the port of Chittagong with the existing inadequate facilities and incomplete equipment is only 600,000 tons per annum. There are only four jetties with a total frontage of 2,235 feet. It is proposed to construct new jetties, extend the existing ones, procure modern equipment from abroad, erect additional storage accommodation and effect an all-round development of the port.

There is great scope for inland water transport which is extensively used in East Bengal.

THE PORTS

KARACHI

KARACHI, the premier port of Pakistan, is situated in the triangular bay of Karachi which is separated from the Arabian Sea by a low sandy reef stretching southwards from the mainland to the rocky headland of Manora. Of all ports in the sub-continent, Karachi is nearest to the south west Asia and to Europe.

Attempts have been made to trace the history of Karachi to a hoary past. Some writers have tried to identify the Bay of Karachi with Alexander's Haven and the present site of Karachi with Korokula of his days. Others suppose that the present site of Karachi is somewhere near, if not the same as, the ancient sea-port of Debal which existed in 700 A.D. when the Arabs invaded Sind.

It is, however, certain that early in the eighteenth century there was near the present site of Karachi a small fishing village with a larger pond or backwater close by, known as Karachi Kun, to which the sea had access over a submarine sand bar near the Pata Island within the present harbour.

In 1843 Sir Charles Napier, the conqueror of Sind became its first Governor. He was the first to realise the potentialities of Karachi as a harbour. He saw the necessity of improving Karachi and its harbour as the "Key to Sind and the Indus". He proposed to widen the entrance to the channel, to construct docks for sailing vessels, a timber-pile pier for country craft at Keamari and to connect the island of Keamari with the mainland by means of a causeway or mole.

In 1866, the Karachi Port Trust was constituted in the place of the Harbour Board which had been formed in 1880 to levy shipping dues. The Trust consisted of eight members

with the Collector of Karachi as ex-officio Chairman. The number of members rose to 15, representing Government, Municipality, North Western Railway, Labour and Commercial interests, with a whole-time Chairman appointed by Government. With the separation of Sind from the Bombay Presidency in 1936, the Port came under the direct control of the Government of India.

HARBOUR

LIGHTHOUSE on Manora Point is in Latitude 24° 47' 37" N, long. 66° 58' 36" E.

Accommodation.—Entrance channel High Water Spring Tides 38½ ft., at mean neaps 35 ft., 11 in. Vessels drawing 30 ft. can enter port during monsoon season; but Dy. Conservator may allow vessels of deeper draft to enter at discretion. During fair season vessels drawing 31 ft. to 32 ft. can enter or leave at 8 ft. tide.

Steamer wharves can accommodate three steamers of 375 ft., with 32 ft. dft., and one of 600 ft., with 34 ft. dft., nine steamers of 550 ft., two of 600 ft., one of 470 ft., three of 450 ft., one of 400 ft., and one of 430 ft., with 26 to 29 ft. of water alongside and one of 325 ft., with 18 ft. dft.

There are eleven electric cranes of 2 tons, five electric cranes of 3 tons, one steam Derrick Crane of 15 tons, eighty-nine hydraulic cranes of 35 cwt., four of 30 cwt., one of 30 tons on the wharves and one 30-ton Floating Crane self propelled.

Boat Basin, at the south end of the wharves, contains the Commissariat Wharf length of quayside, 150 ft.; depth at high water 17½ ft.; low water 8 ft.; One 30-cwt. hydraulic crane; the Passenger Landing Pier (length of quayside 450 ft.; depth at high water 16 ft., low water 16½ ft.).

The Railway Wharf—length of quayside, 800 ft.; depth at high water 19½ ft., low water 10 ft. Three 30-cwt. hydraulic cranes,

Bulk oil Pier lies south of the Boat Basin; length of the quayside 405 ft.; vessels 550 ft. can be berthed alongside; depth of low water 31 ft. Pipes are laid down from the pier to the oil installations, which are in the immediate neighbourhood. Liquid fuel pipes and connections are available from the Return Wharf and berths 1 to 11 of the Keamari wharves and are connected to the oil installations, permitting two ships to be bunkered with oil fuel simultaneously, or one ship being bunkered and one tanker discharging simultaneously, in addition to the service from the oil pier. A liquid fuel barge with a capacity of 450 tons is also available for bunkering and discharging ships at other berths and in the stream.

At the north-east end of the harbour are the Juna Bunder (length of quayside 1,235 ft.; depth at high water 17½ to 22½ ft.; low water 8 to 13 ft.), with five hydraulic cranes of 35 cwt.; one of 30 cwt.; one stationary hydraulic crane of 14 tons, and one fixed 14 ton hydraulic crane and the Napier Mole Boat Wharf (length of quayside, 1,824 ft.; depth at high water 21½ ft.; low water 12 ft.), with three hand cranes of 1-ton each. Five lightening piers and two lightening berths of 377 ft., and 519 ft. length and depth at low water of 6 to 10 ft. and at high water of 14½ and 18½ ft.; with one fixed 25-ton electric derrick crane at the shorter berth, for landing and shipping stores.

The Heavy Lift Pier north of ship wharves accommodation barges, d. at High Water 15 ft., at low water 5½ ft. One hydraulic crane of 14 tons. One ship repairing berth with a length of 300 ft. between dolphins and depth of 16 ft. and 25½ ft. at low water and high water respectively.

Seaplane port at the West Wharf Reclamation with a slipway for the flying boats in connection with the Empire airmail service and a jetty for the landing and shipping of mails, general

merchandise and passengers' luggage (not in use). Harbour moorings: five swinging moorings with a draft of 24 ft., and thirteen fixed moorings for vessels of 5 to 600 ft., of which two are with a draft of 17 to 23 ft., four of 32 ft., and seven of 27 to 28 ft.

Dry dock, length on blocks, 236½ ft.; breadth at entrance 50 ft.; depth on sill at High Water Ordinary Spring Tides 12½ ft. Coaling performed at the wharves and from lighters.

Cargoes are discharged into and loaded from railway wagons at the steamer wharves on the east side. On the west side cargo is loaded from and discharged into both railway wagons and transit sheds.

Charges.—Port dues on sea-going vessels on entering the port, 2 annas per net registered ton once in the same month (month reckoned from the first day (inclusive) of one month to the first (exclusive) of the next month, or from the second day (inclusive) of one month to the second day (exclusive) of the next, and so on. Moorings fixed or swinging 1½ p. per day, or part thereof, per 100 tons net registered or part thereof, with a minimum charge of (a) Rs. 40 for the period of stay of every vessel under 1,500 tons, (b) Rs. 20 per part of a day for every vessel of 1,500 tons and over, with maximum Rs. 40. Berthing fees Rs. 1-8-0 per day or part thereof, per 100 tons net registered or part thereof (1) with a minimum charge of Rs. 40 for the period of stay of every vessel under 1,500 tons, (2) maximum charge of Rs. 40 per day, or part of a day, for every vessel of 1,500 tons and over. Additional charges of Rs. 10 per hour or part of an hour, and Rs. 50 for every 24 hours, or part thereof for use of pipelines, are payable by vessels bunkering and discharging petroleum

respectively. Water supplied to vessels in the stream at Rs. 7-6-0 per 1,000 gallons, and to vessels at the wharves at Rs. 4-6-0 per 1,000 gallons.

Pilotage.—Charge on sea-going vessels of 200 tons net reg. and upwards. Fair season, 300 tons and under Rs. 35; monsoon season (15th May to 30th September), Rs. 52-8-0. For every additional 100 tons, or part thereof, Rs. 4. Pilots board incoming vessels day or night about 2 miles off breakwater. For services of a tug for assisting in berthing or unberthing, Rs. 75.

Towage.—In or out, 3 annas per net reg. ton. Sailing vessels when towed in or out are charged half pilotage. Vessels not under steam towed from one part of the port to another for use of one tug, Rs. 100, for every additional tug, Rs. 75. From 1st May to 30th September towage is compulsory for vessels leaving the wharves; charge Rs. 75. From 1st May to 30th September towage is N.C. in the case of vessels of 1,000 tons and under, and in case of vessels using the west wharf, but if a tug is used a charge of Rs. 50 is levied in the case of vessels of 1,000 tons and under; Rs. 75 for vessels over 1,000 tons.

The principal commodities imported and exported through the Port of Karachi are as under:—

Imports.—Coal, Iron & Steel, Kerosene oil, Liquid Fuel, Petrol, Sugar, Textiles, Machinery, Vehicles and Liquors.

Exports.—Bones, Cotton Raw, Flour, Grams, Hides & Skins, Oil Seeds, Wheat, Wool, Cement, Rice.

The income and expenditure for financial year ending 31st March 1947 was Rs. 1,11,85,176 and Rs. 1,27,56,982 respectively.

STATISTICS SHOWING THE GROWTH OF THE PORT FROM 1942-43 TO 1946-47

| Year | Imports | Exports | Total |
|---------|--------------|--------------|--------------|
| | Rs. | Rs. | Rs. |
| 1942-43 | 14,38,34,999 | 13,31,03,759 | 27,69,38,734 |
| 1943-44 | 9,65,20,982 | 18,60,91,566 | 28,26,15,548 |
| 1944-45 | 20,29,43,563 | 25,50,08,512 | 45,79,52,075 |
| 1945-46 | 22,28,33,635 | 33,69,41,613 | 55,97,75,248 |
| 1946-47 | 28,21,68,099 | 37,25,53,100 | 65,47,21,197 |

FUTURE

The total wharfage capacity of the Port is far in excess of its present requirements and does not call for its immediate or even early expansion. But the existing capacity will increase 50 per cent if the East Wharf is reconstructed and the Kramari Yard remodelled. The rebuilding of East Wharf, according to an improved layout, has become necessary because some of its constituent wharves are fifty years old and are maintained at excessive cost. The scheme is already under the active consideration of the Port Trust but its success will depend largely on the availability of more modern cranes and rolling-stock.

The partition of the sub-continent has created a need for the establishment of dry docks in Pakistan so that the Dominion may become independent in the matter of facilities for the repair of commercial and Government vessels. It is, therefore, proposed to construct two dry docks at Karachi, one for merchant shipping and the other for naval vessels at a cost of about Rs. one crore.

The Port has facilities for the building of small motor launches and other craft, but none for building large ships. This leeway is shortly to be made up. The Port Trust has leased out 250,000 square yards of land for 99 years to the Hyderabad Construction Company which proposes to build ocean going ships of ten to fifteen thousand tons displacement, or more, at a capital cost of five crores. The establishment of this industry will greatly add to the importance and revenue of the Port.

Nearly fifty years ago the Port Trust built for their regular employees 1,000 quarters at Keamari and 250 at Manora. In spite of efforts on the part of the Port Trust, housing accommodation is far short of the demand. Most of the existing quarters need reconstruction. The Port Trust has a housing programme costing over Rs. 42 lakhs but owing to unavailability of sufficient reinforcement steel the programme could not be fully carried out. However, with the small stocks in hand, the authorities have added 220 new quarters. The contemplated remodelling of the Keamari village has also to wait till the requisite building material becomes available.

The Sindh Government have sponsored a comprehensive scheme for developing the Fish Industry of Sindh on a modern, co-operative basis. A new channel is being formed to the west of West Wharf for this purpose. This channel will have a Fish Harbour, a wholesale Fish Market, boat-repair slipways, work shops and rail and road services. There will also be a Fish Curing Yard. In addition to trawlers used for inshore and off-shore fishing, power boats will be provided for deep sea fishing. This scheme will not only revolutionise the Fish Industry of Sindh but also augment the importance and income of the Port.

TRUSTEES

Chairman.—Amin-ud-din, I.C.S.

Vice-Chairman (Elected by the Board).—H. K. C. Hare (Ralli Brothers Ltd., elected by the Karachi Chamber of Commerce).

Appointed by Government.—Divisional Superintendent, N. W. Railway, Karachi; Principal Officer, Mercantile Marine Department, Karachi District; Commander, Karachi Sub-Area; Collector of Customs; Labour representative appointed by Government. —Kazi Mujtaba, M.A.

Elected by the Karachi Chamber of Commerce.—G. O. Pike, J.P. (Messrs. Burnah Shell Oil & Storage Distributing Co. of India Ltd.); B. R. Graham (Messrs. Anchor Line, Ltd.); G. D. Longhurst (Messrs. Mackinnon Mackenzie & Co.).

Elected by the Indian Merchants' Association.—Lala Jagannath Ralaram Tondon, B.Sc., J.P. (R. B. Ralaram Jagannath); Dwarakadas Tekchand, B.Sc., M.A. (Messrs. Menghraj Newandaram).

Elected by the Buyers and Shippers' Chamber.—Haridas Lalji, M.A.; Navinchandra T. Khandwalla (Bombay Steam Navigation Co., Ltd.).

Elected by the Municipal Corporation of Karachi.—Doongernall B. Pattnay J.P. (Messrs. Murlimal Santaram & Co.).

Principal Officers of The Port. Chief Engineer, E. L. Everatt, M.E., C.E., M.I. Mech. E.; Traffic Manager, M. A. Raymond, M.A. (Cantab.); Bar at Law; Chief Accountant, P. C. Jaikda, B. com. (Birm.), A.C.A.; Dy. Conservator, Capt. R. K. Caws (R.I.N.) (Retd.); Secretary, N. M. Dhalia, B.A., F.C.S. (London); Chief Storekeeper, C. J. T. Rozario; Labour Welfare Officer, Iqbal A. Qureshi, B.A.

CHITTAGONG

Chittagong is situated in the north-east corner of the Bay of Bengal, about 10 miles from the mouth of the Karnali river. Being almost a neglected port before the partition of the sub-continent it is now progressively assuming its importance as the major port of Eastern Pakistan.

Chittagong has a long history. Centuries ago, fleets from China used to call at Chittagong for trade purposes. Being on the Indo-Burma border, it has seen much warfare between the rulers of India and Arakan. Prior to its conquest by the Muslims in the fourteenth century, it changed hands several times. In the sixteenth century it came under the sway of the Portuguese and was known as the "Porto Grande". In the seventeenth century the British began to cast longing eyes on Chittagong. It became the scene of many British expeditions and was finally ceded to the East India Company in 1760. Until the end of the last century, the export trade of Chittagong consisted mainly of jute, rice and paddy, and imports included oil and salt.

In 1888 a Board of Port Commissioners was set up. The Board was entrusted with the task of procuring a sea-going tug and providing suitable moorings for ships. With the completion of the Assam and Bengal Railway in 1895, Chittagong became the natural outlet for the trade of Assam and East Bengal. In 1928, the port was officially recognised as a major port and its control was transferred from the Provincial Government to the Central Government.

The river improvement scheme was taken in hand in 1929, and by the end of 1941, three river bars were permanently improved by training walls, thus rendering dredging unnecessary. This improvement enabled Chittagong to cope with 1,250,000 tonnage per annum during the last world war.

In 1940, a sea-going tug Juddia was put into commission. It was fully equipped to deal with large ships and to do fire-fighting and salvage work. The Port Commission is now engaged in developing and reclaiming river-side lands for industrial purposes. This brings the total amount spent on the development of the port during the past 20 years to one crore of rupees, and the work is still proceeding.

CAPACITY, TONNAGE

Vessels of any size can proceed 9 miles up the Karnali to Chittagong at H.W. draught of 21 ft. to 26 ft. There are five berths for ocean-going

vessels at the East Bengal Railway Jetties, one for salt ships at the Salt Golao. Jetties are 2,295 ft. long, provided with hydraulic cranes 17 to lift 35 cwt., and 4 to lift 10 tons, ample shed accommodation, and jetties are in direct rail communication with the East Bengal and Assam Railway systems, cargo in bulk being dealt with direct into wagons. Depth at jetties are about 26 feet at L.W.S.T. Fresh provisions, good drinking water and coal are obtainable.

Conditions over the three river bars have been improved by river training works so that dredging has been practically eliminated.

The Port will have its berthage expanded during this year to accommodate five 500-foot ships at the jetty, it is learnt.

The number of berths will be increased to a total of twelve and four sets of fixed moorings provided thus giving the port an annual capacity of about three million tons.

Port dues 4 annas 6 pies per reg. ton, Harbour Master's fee Rs. 64, mooring and unmooring in fixed berths Rs. 64, swinging berths Rs. 32, berth alongside jetties Rs. 60 per day, night work and holidays extra.

Towage is done by Port Commissioners' Tug.

The Commissioners for the Port of Chittagong constitute the port authority.

Principal Officers.—*Deputy Conservator.*—Capt. J. T. Denley; *Port Engineer.*—F. J. Green, B.Sc., M.I.C.E. & C.; *Secretary and Chief Accountant.*—Ghulam Julani, B.A., G.D.A.

The principal articles of import are iron and steel, salt, sugar, coal, oil, paddy and rice, machinery, timber and cotton piecegoods. Exports include jute, tea, wax, raw cotton, tobacco and betelnuts.

East Bengal produces over 75 to 80 per cent of the jute grown in the world. This 'golden fibre' of East Bengal is in great demand in the markets of the world. Of late, ships loaded with bales of jutes have sailed for America, Australia, Italy, England, Canada and Argentina. Consignments to Australia and Canada were the first in the history of Chittagong.

Chittagong is excellently placed for schemes of further development, because its jetties can be extended both up and down stream in deep water. The programme extension has been divided into three phases.

The first phase, which is expected to be completed during the current year, aims at extending jetties, so as to accommodate a 500-foot ship. The second phase, scheduled for the next year, provides for an extra berth at the jetties. The third covers further expansion as the trade of the port requires, with a target of eleven berths for large vessels. These developments will enable the port to handle three million tons of cargo a year.

The Government also propose to appoint a firm of Consulting Engineers to advise on the development of Greater Chittagong and to set up a committee representing the Central and Provincial Governments and shipping interests to examine plans for Chittagong's development. The Railways are acquiring a marine flotilla for the movement of jute from internal riverine points in East Bengal to Chittagong. Also the Pakistan Navy will survey Haringhata, Fassar and Meghna Rivers in November 1948 to find an alternative port to Chittagong. The East Bengal Government is trying to acquire more dredgers for the maintenance of inland ports. A Statutory Inland Water-way Control Board and a Rail-River Transport Control Board representing the Central and East Bengal Governments, Railway, Steamer Companies and the Country Craft Organisation are in the process of formation to co-ordinate transport.

All these indications foreshadow a great future for Chittagong. There are already signs of marked prosperity. The population has increased considerably and is now in the neighbourhood of one hundred thousand.

KETI BANDAR, SHAH BANDAR AND SOKHI BANDAR

These are three minor ports in Sind. They are under the jurisdiction of the Collector of Customs, Karachi. None of them however is of sufficient importance to deserve detailed mention.

CHAMBERS OF COMMERCE

KARACHI Chamber of Commerce.—Wood St., Karachi. The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred by the Committee upon "any gentleman interested in the affairs and objects of the Chamber." All new Members joining the Chamber pay Rs. 750 entrance fee and the monthly subscription is Rs. 18. The subscription to the Chamber's periodical returns is at present fixed at Rs. 200 per annum per set for Members and Rs. 350 per annum per set for non-Members. The set comprises:—

(i) a Daily Trade Return containing lists of commodities entered in the Customs House for export, and imports cleared from Customs on each working day, shipping information and statistics of commodities entering Karachi by rail, and leaving by sea,

(ii) a Weekly Current and Market Report which besides giving quotations for commodities traded in the Karachi Markets, also contains statistics of exports and imports compiled from Ships' Manifests, and shipping movements,

(iii) Export Manifests of all Steamers leaving Karachi for Foreign Ports,

(iv) Monthly Import and Export statistics for the main commodities compiled from Ships' Manifests.

The affairs of the Chamber are managed by a Committee of eleven Members, consisting of a Chairman, Vice-Chairman and nine other Members, elected at the annual general meeting of the Chamber held early in each year. The Chamber elects a representative to the Sind Legislative Assembly, four representatives to the Karachi Port Trust, one to the Karachi Municipal Corporation and two to the North-Western Railway Advisory Committee, Karachi. There were 100 Members of the Chamber in

Feb. 1949. The following are the office-bearers for 1948-49:

COMMITTEE FOR 1948-49.

Chairman.—B. R. Graham.

Vice-Chairman.—A. C. Gledhill.

Members.—Amir-ud-Din; R. L. Coghlan; G. Gow; Lt.-Col. W. B. Hossack, M.L.A., J.P.; J. N. Kerr; N. MacLeod; R. E. Markley; Jos Rason; T. Waddell.

Honorary Members.—G. A. Browne (*Canadian Government Trade Commissioner*); W. Godfrey (*Senior U. K. Trade Commissioner*); F. M. Innes, C.A.E. (*Adviser in Pakistan to the Central British Committee*); A. MacFarquhar (*Commerce Secretary, Government of Pakistan*); James A. Ross (*Commercial Attache, United States Embassy*).

Representatives on the North Western Railway Local Advisory Committee.—J. N. Kerr; B. R. Graham.

Representatives on the Board of Trustees of the Port of Karachi.—B. R. Graham; T. Waddell; N. MacLeod, C.A.; A. C. Gledhill.

Representative on the Sind Legislative Assembly.—Lt.-Col. W. B. Hossack, M.L.A., J.P.

Secretary.—H. J. Martin.

Deputy Secretary.—J. S. Lobo.

Public Messenger.—J. Johnston.

The following are the principal ways in which the Chamber gives special assistance to Members:

The Committee take into consideration and give an opinion upon questions submitted to them regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate arbitrators and surveyors for the settlement of disputes. When two Members of the Chamber or when one Member and a party who is not a Member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber, under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are Members of the Chamber. A public measure is appointed under the authority of the Chamber

to measure merchandise arriving at or leaving the port.

The West Punjab & N.-W.F.P. Chamber of Commerce (Formerly the Northern India Chamber of Commerce) was founded in 1923, and has its headquarters at Lahore. The business of the Chamber is conducted by the Chairman, and a Committee consisting of a minimum of eight but not more than 11 elected members, and a maximum of 3 co-opted members, and ex-officio members.

The Chamber is represented on the Associated Chambers of Commerce of Pakistan; Government of Pakistan Food Standardization Committee; N.W.F. Local Advisory Committee; West Punjab Board of Industries; Communications Board, West Punjab; Board of Economic Enquiry, West Punjab; Hailey College of Commerce Managing Committee and Food and Civil Supplies Advisory Board, West Punjab.

The Chamber is affiliated with the Associated Chambers of Commerce of Pakistan and with the Federation of Chambers of Commerce of the British Empire, London.

A Tribunal of Arbitration has been set up under the Rules of which arbitrations relating to commercial disputes are carried out on behalf of members and non-members. Surveys of merchandise are also frequently held. Certificates of origin are issued for goods manufactured in West Pakistan.

The aim of the Chamber is to protect and further commercial, industrial and agricultural interests in West Punjab and N.-W.F. Province by every possible means, and it is the constant endeavour of the Chamber to achieve as much as possible for the good of the common interest of members—the business prosperity of West Punjab and N.-W.F. Province.

Chairman.—C. T. Mason.

Secretary.—G. J. Lumb.

Address.—Commerce House, 14, Lawrence Road, Lahore.

Telegraphic Address.—"Commerce."

Telephone No. 2237.

Note.—For "Pakistan Merchants' Association", see p. 516.

SURVEYS

SOME 6,000 square miles of original and revision survey was carried out by the Survey of Pakistan during the year ending August 14, 1949. The results are being incorporated in the maps for the publication of new and revised editions.

The Map Publication Office at Murree was fully engaged on the drawing and publication of maps of standard series. Approximately 400 different maps with a total of 5,000,000 copies were printed.

The preparation of a general map of Pakistan is in hand on a high priority as a result of a Cabinet decision.

Increasing demands for extra-departmental surveys have been received and the Department was engaged on Irrigation and Hydel Project surveys, such as the Lower Sind Barrage and Fuleli Canal surveys, for the Sind Government, the Haida River Basin, Karnaphuli Catchment Area and Subalong Dam Site surveys for East Bengal and the Warsaw Hydel survey for the North-West Frontier Province.

Planning surveys such as the Hyderabad and Sukkur Industrial Estate, the New Capital Site Reserved Area surveys and a survey for the Pakistan Employees House Building Society

were in hand or projected. Various miscellaneous surveys such as a Concession Demarcation for the Burma Oil Co., Mohenjo Daro survey for the Archaeological Department, Cemetery surveys for Graves Registration and Chittagong Town survey were also carried out.

The primary duty of the Survey of Pakistan is to keep topographical surveys and maps based on these up-to-date. Indeed accurate maps are a pre-requisite to the proper development of the resources of a country.

The survey and publication resources of the Department have been severely strained owing to lack of stores and equipment. Attempts are being made to surmount this difficulty so that the essential survey and the mapping work required for the development of Pakistan's resources in minerals, power, agriculture and industry and to meet the increased requirement of the army and aviation does not suffer.

WEIGHTS, MEASURES AND COINAGE

100,000 is one lakh (1,00,000).

10,00,000 is one crore (1,00,00,000).

COINAGE

3 pies make 1 piee
4 piee make 1 anna
16 annas make 1 rupee.

RUPEE, DOLLAR AND POUND

Re. 1 is approximately 1sh. 6d. or 2s. 8s. cents.

Rs. 100 are approximately £7-12-1 or \$29.85

Rs. 1,000 are approximately £76-3-0 or \$298.5

Rs. 1,00,000 (a lakh) are approximately £7,619-0-11 or \$29,850.

Rs. 1,00,00,000 (a crore) are approximately £761,904-15-2 or \$2,985,074.

MAUND, SEER AND TOLA

The principal units in all the scales of weight are the maund, seer and tola and the standard weights for each of these are 82.28 lbs., 2.057 lbs. and 180 grains troy respectively.

The tola has the same weight as the rupee, viz., 180 grains troy; the standard or the railway seer is equal to 2.057 lbs., while the standard or Railway maund of 40 seers is equivalent to 82 lbs.-4 oz.-9 drams.

FORESTS

THE total area under forests in Pakistan excluding States is estimated at 14,502 sq. miles, which is about 6.4 per cent of the total area of the country. This area is very small and is distributed unevenly. In Eastern Pakistan, the percentage of forests is 16.7, while in Western Pakistan it is only 3.3. The area under forests in West Punjab, whose population is about 20 million is extremely inadequate, being only 1,872 sq. miles. According to the accepted standard, it is necessary to have 25 per cent of a country's area under forests. Pakistan has thus a great deficiency to make up. Government is, however, fully alive to the great importance of forests in the economy of the country. Many development schemes are in hand in various Provinces and the extension of plantations is receiving attention.

Pakistan's requirements are timber for purposes of furniture, agricultural implements and minor rural needs, industries such as sport industry, packing cases, plywoods, tea chests, and building and heavy constructions including railway sleepers, firewood, and paper pulp, match wood and cellulose. In timber, the country is, or soon would be, more or less self-sufficient so far as furniture, agriculture and industries are concerned. For packing uses, enough material is available in Eastern Pakistan and self-sufficiency in this respect might be achieved in the near future when facilities for manufacture become available. For building and heavy constructions, Western Pakistan is definitely short, but Eastern Pakistan is self-sufficient. When underdeveloped areas in Eastern Pakistan are exploited, Western Pakistan's requirements of construction timber may be met to a large extent.

As regards firewood, the objective in Western Pakistan is to produce enough quantities at reasonable price. For this purpose extensive plantations of firewood species in the newly canal irrigated areas are being planned. In Eastern Pakistan firewood is plentiful and there is a surplus for export.

In paper pulp and cellulose, Pakistan is extremely deficient at present. There is practically no pulp, mechanical or chemical. Some good raw material such as Bhabar (Eliopsis is bipata) grass and firs in Western Pakistan

and Bamboos in Eastern Pakistan is available, but there are practically no manufacturing facilities.

There are a number of match factories, but at present all are suffering from short supplies of timber. Apart from a search for new suitable species for this purpose, attempts are being made to increase the production of species of known suitability such as Bombax malabaricum, Populus euphratica, etc.

Plans are under consideration for starting a Forest Research Institute which would carry on wood and fibre research. A rapid survey of the forest resources of the country has been made and it has been found that Eastern Pakistan has raw material sufficient to feed two big paper factories. Similar investigation is going on in Western Pakistan. Before partition, the match industry in Pakistan depended upon imported wood but a substitute has now been found in and. Plans have also been prepared to plant suitable species of wood for the match industry in irrigated plantations. Information about the economic forest products technically known as "minor forest products" available in Baluchistan has been collected, and schemes have also been prepared for the exploitation of forests in the Chittagong hill tracts.

In March 1949 the first Convocation of the Forest Colleges at Upper Topa took place when 12 officers and 26 Forest Rangers were awarded diplomas and certificates. A scheme for the reorganisation of the Forest Colleges is under consideration of the Government. An application was received for admission into the Rangers' College from a Muslim student of East Africa and it is hoped that these Forest Colleges will attract more and more students from the entire Muslim World. The Research Section has been strengthened by foreign trained scholars. The Institute renders all possible aid to users of forest products and gives practical advice to factory owners, industrialists and private individuals. Posts of Silviculturist and Forest Chemist have been sanctioned for research work.

A delegation was sent to the South-East Asia and Pacific Forest Conference held under the auspices of U.N.O. at Mysore. One delegate

from Eastern Pakistan and one delegate from Western Pakistan attended this Conference. The Delegate from Eastern Pakistan was selected as Senior Vice-Chairman of the Conference. A delegate was sent to World Forestry Conference held at Helsinki (Finland). In view of the growing importance of Soil Conservation work, one of the specialists who returned last year from U.S.A. was appointed as Instructor at the Forest College.

Arrangements were made for supplying sufficient timber to the match factories in the country. And with experiments new substitutes were found for the timber so far imported. The possibility of establishing a paper mill in Chittagong has been thoroughly investigated and the scheme is now in the final stages of the investigation.

PAKISTAN FORESTRY CONFERENCE

The Pakistan Forestry Conference, held on July 1 and 2, 1949, recommended that the forest research should be conducted by the Central Government, that the emoluments of technical subordinates in the Provincial Forest Departments be improved, that a Central Forest Library including photographs be set up and that forest surveys by air and land should be undertaken. The observance of two tree plantation days all over Pakistan, and the publication of official and semi-official journals were also recommended.

The Resolution embodying the forest policy said:—

"Whereas it is essential to reserve in perpetuity for the benefit of the present inhabitants and posterity, sufficient land, as well distributed as possible, either already under forests or capable of afforestation, so as to supply the rural and urban population with fuel, fodder and timber for domestic and agricultural requirements, to produce a sustained yield of timber and other forest produce and to maintain a regular flow in the rivers and mitigate the severity of floods, to sustain essential services and industrial development and to improve conditions for the preservation of wild life,

The Conference recommended that:—

- (1) a high priority be given to the claims of forestry and adequate facilities provided for large-scale afforestation and harvesting;
- (2) the practice of sound management in privately owned forest should be ensured by legislation or negotiation and by technical and, if necessary, financial assistance;
- (3) legislation be enacted appropriate to the needs of the country to provide powers to control utilisation of land and define the scope of work of forest services in a co-ordinated programme of soil conservation and land utilisation;
- (4) it is of paramount importance to associate public opinion in the execution of forest policy, through education, propaganda and demonstrations;

(5) forests be classified, on the basis of their utility and objects;

(6) the commercial aspect of forestry be generally subordinated to the over-riding necessity of integrating it into the general context of the economy of the country as far as possible;

(7) in view of acute deficiency of forest area in the country, a bold and well-planned action programme be undertaken for increasing forest area by:—

(a) reserving at least 10 per cent of canal irrigated land and 10 per cent water supply for raising irrigated plantations under new projects,

(b) growing trees on canal banks, road and rail road sides and arable waste-land, and

(c) farm forestry, preferably in compact plots of cropland, set apart on co-operative basis by village communities.

(8) existing forests be developed by encouraging the most economical utilisation of timber and other forest products;

(9) policy be executed by the agency of forest service consisting of only trained foresters;

(10) forest research, an important requisite for success of a dynamic science like forestry, be organised on suitable lines and be centralised in Pakistan Forest Institute, with ancillary field units in different problem areas of the country;

(11) more effective measures be taken for the preservation of the fauna of the country.

The Conference recommended the constitution of an All-Pakistan Forest Service, East Bengal dissenting.

AGRICULTURE

PAKISTAN is an agricultural country. Cultivation of land forms the main occupation of the people and 80 per cent of the population is directly or indirectly dependent on it. The total area sown in 1945-46 was nearly 45,000,000 acres of which 38,000,000 was under foodgrains. In 1944-45 Western Pakistan, excluding Baluchistan had 9.8 million acres under wheat, 2.3 million under rice, 2.5 million under millets, 1 million under maize and 5 million under barley. The acreage under cotton in the same year was nearly 3 million with an yield of about 1.2 million bales of 400 lbs. each.

Crops and agricultural methods differ from province to province according to soil and climate.

PUNJAB

In the Punjab with its sandy loam, a dry climate and an average annual rainfall of about 10 inches, a good irrigation system is vital. A network of canals, reputed to be among the best in the world, has made West Punjab the principal wheat-producing area in Pakistan. The most important of these canals are the Upper Jhelum Canal, the Lower Jhelum Canal, the Upper Chenab Canal, the Lower Chenab Canal and parts of the Upper Bari Doab Canal and the Lower Bari Doab Canal.

As a result of this network of irrigation many parts of the Punjab are "double cropped". Apart from wheat which is the main crop, millet, barley and maize are also cultivated. Oilseeds are grown mainly for export while the most important cash crop is cotton of the "American" or long staple variety.

Agricultural practices in the East are generally old-fashioned and Pakistan is no exception. Agricultural implements are generally made in the village blacksmiths and the village carpenter's shops. Drought power is supplied by bullocks; the crops are sown and harvested entirely by hand and the grain is thrashed by cattle. These practices are dictated by the economic limitations of the cultivator and the absence of large-scale industry in the country. Fruit cultivation in West Punjab has made rapid progress in recent years and large quantities of citrus fruits such as orange, lemon, sweet lime, and grapefruit are grown. Other fruits grown in the province are melons, mangoes, mulberries and dates.

Animal breeding is also an important occupation of the cultivator, and West Punjab is famous for some breeds of horses such as the Baluch and Dhani. The stock has been improved by the utilisation of Arab and English thoroughbred stallions. Sheep are reared for their wool in the south-west Punjab and the *Doerba*, or the fat-tailed sheep, is found in the

Salt Range. High yielding milch cattle—cows and buffaloes—are bred in large numbers.

SIND

Sind with its poor rainfall, the annual average being 11 inches only, is even more dependent on irrigation than the Punjab. Formerly irrigation was carried on by what are called "inundation canals" which carry water only when the river is in flood. But now a great dam has been built across the Indus at Sukkur and has helped bring nearly 6,000,000 acres under cultivation. The Sukkur, or the Lloyd Barrage as it is also known, is one of the largest works for irrigation ever attempted. This great water regulator consists of 66 spans, each sixty feet wide, the opening being regulated by steel gates each weighing fifty tons. The barrage is about a mile long—approximately five times the length of the London Bridge. The total length of channels and water courses connected with it is 36,000 miles.

The chief crops of Sind are wheat, rice, millets and long-staple cotton. Large quantities of fruit such as dates, figs and melons are also grown. The province rears some of the finest breeds of milch-cows. Among the other domestic animals are the one-humped camel, buffaloes and a hardy breed of ponies.

BALUCHISTAN

In Baluchistan the average annual rainfall is from 6 to 7 inches and there are no perennial rivers. The agriculturist is certain of his crops only where cultivation is carried on by the curious karez or underground water channels, by springs and small streams. Rice is grown on carefully terraced hillside fields while wheat and millets are sown on the plains.

Baluchistan is the fruit orchard of Pakistan. Melons, dates, several kinds of high quality grapes, apricots, almonds, apples, pomegranates, peaches, nectarines, quinces, plums and cherries are grown here in profusion. Large-scale mulberry cultivation has helped build up a small but growing sericulture industry. The province is famous for its horses. An exceptionally fine breed comes from Barkhan, the average specimens being about 15 hands in height, with small, delicately modelled heads, and long, slender arched necks.

N. W. F. P.

In the North-West Frontier Province, as in the rest of Western Pakistan, cultivation largely depends on irrigation. The Peshawar and Bannu valleys are irrigated by wells and are intensively cultivated. In the foot-hills water is obtained by the damming of streams. In the

riverain strip, wells and the flood water of the Indus and other hill torrents supply the required water. The valleys of Kohat are the most fertile because the soil is a good, clear loam, retentive of moisture and able to resist drought. The value of rotational crops is fully realised and crops such as wheat, cotton, tobacco or turmeric are followed by clover, maize and barley. The chief crops in order of importance are wheat, barley, gram, maize and millets. Cotton and oilseeds are also produced but the acreage under them is small.

The North-West Frontier Province also produces a large quantity of fruits, which find their way to the markets of India. The fruits grown are grapes of several varieties, Orbanas plums, quinces, pears, peaches, figs, pomegranates, melons, lemons, mulberries grow wild almost everywhere.

EAST BENGAL

Agriculture in East Bengal is very different. While the cultivator in Western Pakistan is almost always short of water and is dependent on irrigation for the watering of his crops, the cultivator in East Bengal has to wade waist-deep through water to transplant the young rice seedlings.

Here the great rivers are still building up their deltas and every year huge quantities of silt are brought down by the Ganges and the Brahmaputra. With an average rainfall of 60 inches in the year irrigation is unnecessary. On the contrary, due to the perennial overflow of rivers large areas of Eastern Pakistan are under water for at least six months in the year. The people build their cottages on high ground and move about by boat all the year round in some districts and for a part of the year in others. The surface is flat and much of it is covered with huge marshes where rice and jute grow in almost wild luxuriance. The total acreage under rice is about 15,000,000 and the entire produce is consumed. So fertile is the land that there are two major crops and a subsidiary crop in the year: the winter rice, which is the main crop, the early rice and the spring crop.

Winter rice is grown on low lands. A piece of high ground is usually selected for a seed nursery. In July or August the seedlings are transplanted to flooded fields which have been ploughed and reploughed till the whole surface is reduced to mud. Between November and January the crop is harvested. In the swamps, however, a variety of long-stemmed rice is sown broadcast after one or two ploughings.

The summer crop grows with the rains. By harvest time the fields are well under water but the ears maintain a fair margin as against the

water level. At times the reaping has to be done from boats. By the time the winter crop is reaped the fields are half dry.

The most important cash crop of East Bengal is jute of which it has an unquestioned monopoly, as it produces about 80 per cent of the world's supply. The total acreage under jute is nearly 2,000,000. Jute has been called the "brown paper" of world industry as it makes the best, the cheapest and the most durable packing material. Attempts have been made in different parts of the world to produce a synthetic substitute or, failing that, to grow it on a sufficiently large scale, but nowhere has the attempt succeeded. The average annual world consumption of this wonderful fibre runs into 10 million bales of 400 lbs. each, the principal markets being the U.S.A. and the U.K., but almost all countries require it in substantial quantities.

The seed is sown broadcast from February to May on finely prepared seedbeds. It is weeded and thinned at least twice and is cut after four or five months. The plants often grow to a height of 12 feet and are submerged under water for retting. In about ten to twenty days the retting is completed and the plants are removed. The fibre is then carefully separated from the stalk and after a process of cleaning and drying it is ready for its varied uses. The other crops are grain, oats, sugar-cane, chilies, turmeric, ginger, tea and tobacco. The last named is grown in very large quantities and is exported while nearly 4 million pounds of tea are produced annually by the Sylhet District alone.

Tropical and sub-tropical fruits such as mangoes, of which the Malda Variety is very well known, pine apples, custard apples, jack-fruit and bananas grow in abundance. Coconut and areca nut cover large parts of the countryside and impart a pleasing appearance to the landscape.

ORGANIZATIONS

The All-Pakistan Food and Agricultural Conference held at Lahore decided to set up a Council of Food and Agriculture. An organization for the study, research and active prevention of plant diseases and in particular locust pest was formed. Pakistan and its neighbouring countries, have large breeding areas of locust and the Locust Warning Organisation has, therefore, to keep a vigilant watch. During the year, gregarious breeding of locust which infiltrated into Baluchistan from the west took place only

once in an area of 8 square miles. The pairing was noticed at the end of April and the hoppers were found in May and were immediately controlled by baiting with poison and bran.

Arrangements for plant protection service have also been made. From April 15 to May 31, 1948, the produce of approximately 3,500 acres of wheat, 1,500 acres of oil seeds and 400 acres of jawar lying on the thrashing floors was completely saved from the ravages of the black-headed cricket. In Baluchistan, 61,345 trees were cleaned and 237,416 hibernating larvae of codling moth were removed. The infestation in the treated orchards was reduced from 50.90 per cent to 10.20 per cent. Similarly, hairy Caterpillars were dealt with and 13,257 trees were cleaned of the pest, thereby removing 274,565 colonies each having 117 larvae on an average.

The Plant Quarantine Organisation is intended to prevent exotic pests from entering into Pakistan. A Quarantine Station has been started in Chaman to prevent the introduction of Palearctic pests from Afghanistan.
